OFFICIAL

YEAR BOOK

OF THE

COMMONWEALTH OF AUSTRALIA

No. 38.—1951.

Prepared under Instructions from
The Right Honorable the Treasurer,

BY

ROLAND WILSON, C.B.E., B. Com., D. Phil., Ph. D.,
COMMONWEALTH STATISTICIAN.

By Authority :

L. F. JOHNSTON, COMMONWEALTH GOVERNMENT PRINTER, CANBERRA.

(Wholly set up and printed in Australia.)

28 Oct 69

PREFACE.

By the Constitution of the Commonwealth of Australia, the Parliament of the Commonwealth is empowered "to make laws for the peace, order, and good government of the Commonwealth, with respect to Census and Statistics." In the exercise of the power so conferred, a "Census and Statistics Act" was passed in 1905, and in the year following the "Commonwealth Bureau of Census and Statistics" was created. The first Official Year Book was published early in 1908. The publication here presented is the thirty-eighth Official Year Book issued under the authority of the Commonwealth Government.

The synopsis on pp. ix to xxvii immediately following shows the general arrangement of the work. The special index (following the usual general index) provided at the end of the volume, together with certain references given in the various Chapters, will assist in tracing in previous issues special articles and other more or less important miscellaneous matter which, owing to limitations of space, have been omitted or are not printed fully in the present volume.

Every endeavour has been made to meet the demand occasioned by the current economic and financial conditions for new information, or information expressed in new terms, concerning many branches of statistics, while a diary of the principal financial and economic events of the years 1946 to 1949 is inserted after the last chapter.

It is not proposed to refer here to the whole of the new matter or to the new treatment of existing matter incorporated in the present volume, but attention may be drawn to the following:—

Chapter II. Physiography.—Climate and Meteorology of Australia (pp. 30-70)

Chapter III. General Government.—Commonwealth Ministers of State, 1925 to 1949 (pp. 74-9); Conspectus of Parliamentary Superannuation Funds (pp. 91-9); Legislation during 1948 (pp. 104-7).

Chapter V. Transport and Communication.—World Shipping Tonnage (pp. 153-4); World Telephone Statistics (pp. 223-4).

Chapter VI. Education.—University Extension (pp. 247-8).

Chapter VII. Public Justice.—Powers of Magistrates (pp. 273-4); Habitual Offenders (pp. 282-3).

Chapter VIII. Public Health and Related Institutions.—This Chapter comprises the whole of the old chapter "Public Hygiene" together with matter relating mainly to hospitals from the old chapter "Public Benevolence, etc."

State Public Health Legislation and Administration (pp. 295-9).

Chapter IX. Welfare Services.—This chapter covers the balance of the matter previously appearing in old chapter "Public Benevolence, etc.", and relates to the Commonwealth Social Service Benefits and other welfare services. The explanatory matter respecting the various Commonwealth benefits has been rewritten.

Chapter XII. Trade.—Import values throughout this and other chapters changed to f.o.b. values in Australian currency.

Imperial Preference in the United Kingdom (pp. 471-3).

Chapter XIII. Population.—Final Results of 1947 Census of Population and Dwellings and Final Population Estimates for the Intercensal Period 1933-1947 (pp. 517 *et seq* and pp. 1303-4; Assisted Migration into Australia (pp. 576-9); Citizenship and Naturalization (p. 583).

Chapter XVI. Private Finance.—Classification of Advances of Commonwealth Bank and Nine Trading Banks (p. 720).

Chapter XVII. Public Finance.—Commonwealth Trust Funds—Receipts, Expenditure, Balances of more important individual Funds (p. 790); Commonwealth Expenditure on Capital Works and Services (p. 792); Commonwealth and State Public Debt—now a separate section (p. 816).

Chapter XIX. Pastoral Production.—Movement in Sheep Numbers (p. 910); Wool Classified according to Quality (p. 923).

32
3
APR 25 1952

- Chapter XX. Agricultural Production.—International Wheat Agreement (p. 944); Classification in Area Series of Rural Holdings (pp. 947, 1022).
 Chapter XXI. Farmyard, Dairy and Bee Products.—Classification according to size of Herd of Holdings carrying Dairy Cattle (p. 1028) and Holdings carrying Pigs (p. 1040).
 Chapter XXII. Forestry.—Forestry and Timber Bureau (p. 1062).
 Chapter XXIII. Fisheries.—Inquiries and Research (p. 1082).
 Chapter XXV. Water Conservation and Irrigation.—Dams and Reservoirs (p. 1149); Snowy Mountains Hydro-Electric Scheme (p. 1157).
 Appendix.—Australian Life Tables 1946-48 (p. 1305).

The material in the Year Book has been carefully checked throughout, but I shall be grateful to those who will be kind enough to point out defects or make suggestions.

Printing difficulties are still being experienced and have delayed the publication of this volume. Compared with the previous volume, however, the figures have been advanced by two years.

Later information which has been compiled since the various Chapters were sent to press has been incorporated in the Appendix (p. 1282). Opportunity has been taken therein to advance as far as possible, in summarized form, the more important statistics of the foregoing chapters. In some cases information has been extended to 1950.

Commencing with this issue a change in the title of the Year Book has been made, the year now shown being the year of issue.

My thanks are tendered to the State Statisticians, who have collected and compiled the data on which a great part of the information given in the Official Year Book is based. Thanks are also tendered to the responsible officers of the various Commonwealth and State Departments, and to others who have kindly, and often at considerable trouble, supplied information; special mention should be made of the services of the Chief Draftsman of the Property and Survey Branch, Department of the Interior, who was responsible for the drawing of the graphs throughout this volume.

An expression of keen appreciation is due in respect of the valuable work performed by Mr. S. H. Begley, Editor of Publications, Mr. J. M. Jones, B.A., Assistant Editor, and the other officers of the Publications Division, and of the services rendered by the officers in charge of the several branches of the Commonwealth Bureau of Census and Statistics, upon whom has devolved the duty of revising the Chapters relative to their respective branches.

ROLAND WILSON,
 Commonwealth Statistician.

(a) Owing to variation in classification, effective comparison is impossible. (b) Australian produce, except gold which includes re-exports. Australian currency values. (c) In terms of greasy. (d) Includes packets. (e) Figures for first three years are averages for the December quarter; the remainder for the June quarter. All cheque-paying banks prior to 1931-32, nine trading banks only thereafter. (f) Decrease due to prohibition of re-issue. (g) Includes Commonwealth Savings Bank deposits. (h) First three years at 31st December; remainder 30th June.

CHRONOLOGICAL TABLE.

CHRONOLOGICAL TABLE OF CHIEF EVENTS SINCE THE ESTABLISHMENT OF SETTLEMENT IN AUSTRALIA.

NOTE.—The Government was centralized in Sydney, New South Wales, up to 1825, when Tasmania (Van Diemen's Land) was made a separate colony. In the Table the names now borne by the States serve to indicate the localities.

Year.

- 1788 N.S.W.—Arrival of "First Fleet" at Botany Bay. Land in vicinity being found unsuitable for settlement, the expedition moved to Sydney Cove. Formal proclamation of colony on 7th February. Branch Settlement established at Norfolk Island. French navigator Lapérouse visited Botany Bay. First cultivation of wheat and barley. First grape vines planted.
- 1789 N.S.W.—First wheat harvest at Parramatta, near Sydney. Discovery of Hawkesbury River.
- 1790 N.S.W.—Scarcity of provisions. "Second Fleet" reached Port Jackson. Landing of the New South Wales Corps.
- 1791 N.S.W.—Arrival of "Third Fleet". Territorial seal brought by Governor King.
- 1792 N.S.W.—Visit of *Philadelphia*, first foreign trading vessel.
- 1793 N.S.W.—First free immigrants arrived in the *Bellona*. First Australian church opened at Sydney. Tas.—D'Entrecasteaux discovered the Derwent River.
- 1794 N.S.W.—Establishment of settlement at Hawkesbury River.
- 1795 N.S.W.—Erection of the first printing press at Sydney. Descendants of strayed cattle discovered at Cowpastures, Nepean River.
- 1796 N.S.W.—First Australian theatre opened at Sydney. Coal discovered by fishermen at Newcastle.
- 1797 N.S.W.—Introduction of merino sheep from Cape of Good Hope.
- 1798 Tas.—Insularity of Tasmania proved by voyage of Bass and Flinders.
- 1800 N.S.W.—Hunter River coal-mines worked. First Customs House in Australia established at Sydney. Flinders' charts published.
- 1801 N.S.W.—First colonial manufacture of blankets and linen.
- 1802 Vic.—Discovery of Port Phillip by Lieut. Murray. Q'land.—Discovery of Port Curtis and Port Bowen by Flinders. S.A.—Discovery of Spencer's and St. Vincent Gulfs by Flinders.
- 1803 N.S.W.—First Australian wool taken to England by Capt. Macarthur. Issue of "The Sydney Gazette", first Australian newspaper. Vic.—Attempted settlement at Port Phillip by Collins. Discovery of Yarra by Grimes. Tas.—First settlement formed at Risdon by Lieut. Bowen.
- 1804 Vic.—Abandonment of settlement at Port Phillip. Tas.—Foundation of settlement at Hobart by Collins.
- 1805 N.S.W.—First extensive sheep farm established at Camden by Capt. Macarthur.
- 1806 N.S.W.—"The great flood" on the Hawkesbury. Shortage of provisions. Tas.—Settlement at Launceston.
- 1807 N.S.W.—First shipment of merchantable wool (245 lb.) to England.
- 1808 N.S.W.—Deposition of Governor Bligh.
- 1809 N.S.W.—Free school established.
- 1810 N.S.W.—Post Office officially established at Sydney.
- 1813 N.S.W.—Passage across Blue Mountains discovered by Wentworth, Lawson and Blaxland. Macquarie River discovered by Evans.
- 1814 N.S.W.—Flinders suggested the name "Australia", instead of "New Holland". Creation of Civil Courts.
- 1815 N.S.W.—First steam engine in Australia erected at Sydney. Lachlan River discovered by Evans. Tas.—Arrival of first immigrant ship with free settlers. First export of wheat to Sydney.
- 1816 N.S.W.—Sydney Hospital opened.
- 1817 N.S.W.—Oxley's first exploration inland. Discovery of Lakes George and Bathurst and the Goulburn Plains by Meehan and Hume. First bank in Australia—Bank of New South Wales—opened at Sydney.

Year.

- 1818 N.S.W.—Liverpool Plains, and the Peel, Hastings and Manning Rivers discovered by Oxley, and Port Essington by Captain King.
- 1819 N.S.W.—First Savings Bank in Australia opened at Sydney.
- 1820 Tas.—First importation of pure merino sheep from Camden Park (N.S.W.) flocks.
- 1821 Tas.—Establishment of penal settlement at Macquarie Harbour.
- 1823 N.S.W.—New South Wales Judicature Act passed. Discovery of gold at Fish River by Assistant-Surveyor McBrien. Qld.—Brisbane River discovered by Oxley.
- 1824 N.S.W.—Constituted a Crown Colony. Executive Council formed. Establishment of Supreme Court at Sydney, and introduction of trial by jury. First Australian Enactment (Currency Bill) passed by the Legislative Council. Proclamation of freedom of the press. First manufacture of sugar. Vic.—Hume and Hovell, journeying overland from Sydney, arrived at Corio Bay. Qld.—Penal settlement founded at Moreton Bay (Brisbane). Fort Dundas Settlement formed at Melville Island, N. Terr.
- 1825 Tas.—Van Diemen's Land (Tasmania) proclaimed a separate colony. Qld.—Major Lockyer explored Brisbane River to its source and discovered coal.
- 1826 N.S.W.—Settlement in Illawarra District. Vic.—Settlement at Corinella, Western Port, formed by Captain Wright.
- 1827 Qld.—Darling Downs and the Condamine River discovered by Allan Cunningham. W.A.—Military settlement founded at King George's Sound by Major Lockyer. First official claim of British Sovereignty over all Australia.
- 1828 N.S.W.—Second constitution. First Census. Sturt's expedition down Darling River. Gas first used at Sydney. Richmond and Clarence Rivers discovered by Captain Rous. Vic.—Abandonment of settlement at Western Port. Qld.—Cunningham discovered a route from Brisbane to the Darling Downs, and explored Brisbane River.
- 1829 N.S.W.—Sturt's expedition down Murrumbidgee River. W.A.—Foundation of settlement at Swan River. Foundation of Perth.
- 1830 N.S.W.—Sturt, voyaging down Murrumbidgee and Murray Rivers, arrived at Lake Alexandrina. Tas.—Black line organized to force aborigines into Tasman's Peninsula, but failed. Small remnant subsequently (1830 to 1835) persuaded to settle on Flinders Island.
- 1831 N.S.W.—Crown lands first disposed of at auction. Mitchell's explorations north of Liverpool Plains. SS. *Surprise*, first steamship built in Australia, launched at Sydney. First coal shipped from Australian Agricultural Company's workings at Newcastle, N.S.W. First assisted immigration to N.S.W. S.A.—Wakefield's first colonization committee. W.A.—Appointment of Executive and Legislative Councils.
- 1832 N.S.W.—State Savings Bank established.
- 1833 N.S.W.—First School of Arts established at Sydney.
- 1834 N.S.W.—First settlement at Twofold Bay. Vic.—Settlement formed at Portland Bay by Henty Brothers. S.A.—Formation of the South Australian Association. W.A.—Severe reprisals against Murray River natives at Pinjarrah for continued attacks on settlers.
- 1835 Vic.—John Batman arrived at Port Phillip; foundation of Melbourne.
- 1836 N.S.W.—Mitchell's overland journey from Sydney to Cape Northumberland. Vic.—Proclamation of Port Phillip district as open for settlement. S.A.—Settlement founded at Adelaide under Governor Hindmarsh.
- 1837 N.S.W.—Appointment in London of Select Committee on Transportation. Vic.—First overlanders from Sydney arrived at Port Phillip.
- 1838 N.S.W.—Discontinuance of assignment of convicts. Qld.—Settlement of German missionaries at Brisbane—first free colonists. S.A.—“Overlanding” of cattle from Sydney to Adelaide along the Murray route by Hawden and Bonney. Settlement at Port Essington, Northern Territory, formed by Captain Bremer.
- 1839 N.S.W.—Gold found at Vale of Clwydd by Count Strzelecki. S.A.—Lake Torrens discovered by Eyre. Port Darwin discovered by Captain Stokes. W.A.—Murchison River discovered by Captain Grey.

- Year.
- 1840 N.S.W.—Abolition of transportation to New South Wales. Land regulations—proceeds of sales to be applied to payments for public works and expenditure on immigration. Vic.—Determination of northern boundary. Qld.—Penal settlement broken up and Moreton Bay district thrown open. S.A.—Eyre began his overland journey from Adelaide to King George's Sound.
- 1841 N.S.W.—Gold found near Hartley. W.A.—Completion of Eyre's overland journey from Adelaide to King George's Sound. Tas.—Renewal of transportation. New Zealand proclaimed a separate colony.
- 1842 N.S.W.—Incorporation of Sydney. Vic.—Incorporation of Melbourne. S.A.—Discovery of copper at Kapunda.
- 1843 N.S.W.—First Representative Constitution (under Act of 1842). Qld.—Moreton Bay granted legislative representation as a distinct electoral division.
- 1844 Qld.—Leichhardt's expedition to Port Essington. S.A.—Sturt's last expedition inland.
- 1845 N.S.W.—Mitchell's explorations on the Barcoo. Qld.—Explorations by Mitchell and Kennedy. S.A.—Discovery of the Burra copper deposits. Sturt discovered Cooper's Creek.
- 1846 N.S.W.—Initiation of meat-preserving. Qld.—Foundation of settlement at Port Curtis. S.A.—Proclamation of North Australia.
- 1847 N.S.W.—Iron-smelting commenced near Berrima. Overland mail established between Sydney and Adelaide. Qld.—Explorations by Leichhardt, Burnett and Kennedy.
- 1848 N.S.W.—National and Denominational School Boards established. Qld.—Leichhardt's last journey. Kennedy speared by the blacks at York Peninsula. Chinese brought in as shepherds.
- 1849 N.S.W.—Indignation of colonists at arrival of convict ship *Hashemy*. Exodus of population to gold-fields of California. Vic.—*Randolph* prevented from landing convicts. Qld.—Assignment of *Hushemy* convicts to squatters on Darling Downs. W.A.—Commencement of transportation to Western Australia.
- 1850 N.S.W.—Final abolition of transportation. First sod of first Australian railway turned at Sydney. Sydney University founded. Vic.—Gold discovered at Clunes. Representative government granted. S.A.—Representative government granted. W.A.—Pearl oysters found by Lieut. Helpman at Saturday Island Shoal. Tas.—Representative government granted.
- 1851 N.S.W.—Payable gold discovered by Hargraves at Lewis Ponds and Summerhill Creek. Vic.—Port Phillip created an independent colony under the name of Victoria. Discovery of gold in various localities. W.A.—Proclamation of Legislative Council Act.
- 1852 N.S.W.—Arrival of the *Chusan*, first P. and O. mail steamer from England. S.A.—First steamer ascended the Murray River to the junction with the Darling. Tas.—Meeting of first elective Council protested against transportation. Payable gold discovered at The Nook, near Fingal, and at Nine Mile Springs.
- 1853 Tas.—Abolition of transportation. Vic.—Melbourne University founded.
- 1854 Vic.—Opening of first Victorian railway—Flinders-street to Port Melbourne. Riots on Ballarat gold-fields. Storming of the Eureka Stockade, 3rd Dec. Telegraph first used.
- 1855 N.S.W.—Opening of railway—Sydney to Parramatta. Mint opened.
- 1856 N.S.W.—Pitcairn Islanders placed on Norfolk Island. W.A.—A. C. Gregory's expedition in search of Leichhardt.
Responsible Governments in N.S.W., Vic., S.A. and Tas. (Act of 1855).
- 1857 N.S.W.—Select Committee on Federation. Vic.—Manhood suffrage and vote by ballot. S.A.—Passage of Torrens' Real Property Act.
- 1858 N.S.W.—Establishment of manhood suffrage and vote by ballot. Telegraphic communication between Sydney, Melbourne and Adelaide. Qld.—Canoona gold rush.
Population of Australia reached 1,000,000.
- 1859 Qld.—Proclamation of Queensland as separate colony. Tas.—First submarine cable, via Circular Head and King Island to Cape Otway.

- Year.**
- 1860 Vic.—Burke and Wills left Melbourne and crossed to Gulf of Carpentaria. S.A.—Copper discoveries at Wallaroo and Moonta. McDouall Stuart reached centre of continent and named “Central Mount Stuart”.
- 1861 N.S.W.—Anti-Chinese riots at Lambing Flat and Burrangong gold-fields. Opening of first tramway in Sydney. Regulation of Chinese immigration. Vic.—Burke and Wills perished at Cooper's Creek, near Innamincka, S.A.
- 1862 N.S.W.—Abolition of State aid to religion. Real Property (Torrens) Act passed. S.A.—Stuart crossed the Continent from south to north. W.A.—First export of pearl-shell.
- 1863 Vic.—Intercolonial Conference at Melbourne. S.A.—Northern Territory taken over. W.A.—Initiation of settlement in the north-west district. Henry Maxwell Lefroy discovered and traversed area now comprised in the Coolgardie-Kalgoorlie gold-field.
- 1864 Qld.—First sugar made from Queensland cane.
- 1866 N.S.W.—Passage of Public Schools Act of (Sir) Henry Parkes. S.A.—Introduction of camels for exploration, etc.
- 1867 Vic.—Imposition of protective tariff. Qld.—Discovery of gold at Gympie.
- 1868 W.A.—Arrival of the *Hougomont*, last convict ship.
- 1869 Vic.—Record gold nugget “Welcome Stranger” 2,284 oz. found near Dunolly. W.A.—First telegraph line opened from Perth to Fremantle.
- 1870 N.S.W.—Intercolonial Exhibition opened at Sydney. Imperial troops withdrawn. Vic.—Intercolonial Congress at Melbourne. S.A.—Commencement of trans-continental telegraph.
- 1871 N.S.W.—Permanent military force raised. W.A.—Forrest's explorations. Tas.—Discovery of tin at Mount Bischoff.
- 1872 Vic.—Mint opened. S.A.—Cable from Java to Port Darwin. Completion of transcontinental telegraph line.
- 1873 N.S.W.—Intercolonial Conference at Sydney. First volunteer encampment. Inauguration of mail service with San Francisco.
- 1874 N.S.W.—Triennial Parliaments Act passed. Intercolonial Conference. W.A.—John and Alexander Forrest arrived at Overland Telegraph from Murchison. S.A.—University of Adelaide founded.
- 1876 N.S.W.—Completion of cable—Sydney to Wellington. W.A.—Giles crossed colony from east to west. Tas.—Death of Truganini, last representative of Tasmanian aborigines.
- 1877 W.A.—Opening of telegraphic communication with South Australia. Population of Australia reached 2,000,000.
- 1878 Qld.—Restriction of Chinese immigration. Introduction of telephone into Australia.
- 1879 N.S.W.—First artesian bore at Killara. First steam tramway. W.A.—A. Forrest's explorations in the Kimberley district, and discovery of the Fitzroy pastoral country.
- 1880 N.S.W.—Public Instruction Act passed. Vic.—First Australian Telephone Exchange opened in Melbourne. Federal Conference at Melbourne and Sydney.
- 1881 N.S.W.—Further restrictions on Chinese immigration. First Australia-wide censuses on same date taken.
- 1882 W.A.—Nugget of gold found between Roeboorne and Cossack.
- 1883 N.S.W.—Discovery of silver at Broken Hill. Completion of railway between New South Wales and Victoria. Qld.—Annexation of New Guinea—repudiated by Imperial authorities. Federal Conference held at Sydney. Federal Council created.
- 1884 Federation Bill passed in Victoria and rejected in New South Wales. British protectorate declared over New Guinea.
- 1885 N.S.W.—Military contingent sent to the Sudan. Opening of the Broken Hill Proprietary Silver Mines. W.A.—Gold found by prospectors on the Margaret and Ord Rivers in the Kimberley district. Tas.—Silver-lead discovered at Mount Zeehan.
- 1886 Tas.—Discovery of gold and copper at Mount Lyell. First session of Federal Council met at Hobart on 26th January.

- Year.
- 1887 W.A.—Gold discovered at Southern Cross.
First "Colonial" Conference in London. Australasian Naval Defence Force Act passed.
- 1888 N.S.W.—Restrictive legislation against Chinese, imposing poll-tax of £100.
Qld.—Railway communication opened between Sydney and Brisbane.
Conference of Australian Ministers at Sydney to consider question of Chinese immigration. First meeting of the Australasian Association for the Advancement of Science held in Sydney.
- 1889 Qld.—Railway communication established between Brisbane and Adelaide.
W.A.—Framing of new Constitution. Tas.—University of Tasmania founded.
Population of Australia reached 3,000,000.
- 1890 W.A.—Responsible Government granted.
Meeting at Melbourne of Australasian Federation Conference.
- 1891 N.S.W.—Arrival of Australian Auxiliary Squadron. Cessation of assisted immigration. W.A.—Discovery of gold on the Murchison.
First Federal Convention in Sydney, draft bill framed and adopted.
- 1892 W.A.—Discovery of gold at Coolgardie.
- 1893 Financial crisis, chiefly affecting the eastern States.
- 1895 N.S.W.—Free-trade tariff. Land and income taxes introduced.
Conference of Premiers on Federation at Hobart.
- 1896 N.S.W.—People's Federal Convention at Bathurst. Vic.—Wages Board system established by Act of Parliament.
- 1897-8 Sessions of Federal Convention at Adelaide, Sydney and Melbourne.
- 1898 Draft Federal Constitution Bill submitted to electors in Victoria, New South Wales, South Australia and Tasmania. Requisite statutory number of votes not obtained in New South Wales.
- 1899 First contingent of Australian troops sent to South Africa. Conference of Premiers in Melbourne to consider amendments to Federal Constitution Bill. Referendum—Bill accepted by New South Wales, Victoria, Queensland, South Australia and Tasmania. First Labour Government (Queensland).

Contingents of naval troops sent to China. Commonwealth Constitution Act received Royal Assent, 9th July. Proclamation of Commonwealth signed, 17th September. Mr. (afterwards Sir) Edmund Barton formed first Federal Ministry.
- 1901 Proclamation of the Commonwealth at Sydney. First Federal Parliament opened at Melbourne by the Duke of Cornwall and York. Interstate free-trade established.
- 1902 Completion of Pacific Cable (all-British). First Federal Tariff.
- 1903 Coolgardie and Kalgoorlie Water Supply Scheme completed. Inauguration of the Federal High Court.
- 1904 Commonwealth Conciliation and Arbitration Act.
- 1905 Population of Australia reached 4,000,000. Re-introduction of assisted immigration in New South Wales.
- 1906 Wireless telegraphy installed between Queenscliff, Vic., and Devonport, Tas. Papua taken over by Commonwealth. Excise Tariff Act imposed duties on agricultural machinery except when manufactured "under conditions as to the remuneration of labour which are declared to be fair and reasonable"
- 1907 First telephone trunk line service between Capital Cities, i.e., Sydney and Melbourne. Imperial Conference in London. Declaration of first basic wage in "Harvester Judgment".
- 1908 Canberra chosen as site of Australian Capital.
- 1909 Imperial Defence Conference in London. Visit of Lord Kitchener to report and advise on Australian military defence. Queensland University founded.
- 1910 Penny Postage. Arrival of Yarra and Parramatta, first vessels built for the Royal Australian Navy. Australian Notes Act passed and first Commonwealth notes issued. Admiral Sir R. Henderson visited Australia to advise on naval defence.

Year.

- 1911 First Federal Census. Transfer of Australian Capital Territory and Northern Territory to Commonwealth. Introduction of compulsory military training. University of Western Australia founded.
- 1912 Opening of Commonwealth Bank. First payments of Maternity Bonus. First sod turned at Port Augusta of Trans-Australian Railway.
- 1913 Australian Capital named Canberra and foundation stone laid. Appointment of Interstate Commission.
- 1914 Visit of General Sir Ian Hamilton to report on military defence scheme. Double dissolution of Federal Parliament. Transfer of Norfolk Island to Commonwealth.
- European War declared 4th August. Australian Navy transferred to British Navy. Australian offer to equip and furnish 20,000 troops accepted. German possessions in South-West Pacific seized by Australian Naval and Military Expeditionary Force. German cruiser *Emden* destroyed by H.M.A.S. *Sydney* at Cocos Islands, 9th November. First contingent landed in Egypt. Australian and New Zealand Army Corps (A.N.Z.A.C.) formed under Sir William Birdwood.
- 1915 Opening of Broken Hill Proprietary's Ironworks at Newcastle, N.S.W.
- Australian and New Zealand troops landed at Gallipoli, 25th April. Evacuation, 18th-20th December. Australian warships with Grand Fleet.
- 1916 Purchase of steamships by the Commonwealth.
- Australian and New Zealand mounted troops organized in mounted divisions and camel corps, operating thereafter in Egypt, Palestine and Syria. Other troops transferred to France. First proposal for compulsory military service defeated by referendum.
- 1917 National Ministry formed under Rt. Hon. W. M. Hughes. Transcontinental (Kalgoorlie-Port Augusta) Railway completed.
- Australian Flying Corps operating with R.F.C. in Palestine and France. Second proposal for compulsory military service defeated by referendum.
- 1918 Population of Australia reached 5,000,000. Australia House (Strand, London) opened by the King.
- Five Australian divisions in France formed into army corps, 1st January. Armistice with Germany, 11th November. Repatriation Commission created.
- 1919 Peace Conference. Return of Australian troops. Flight England to Australia by Capt. (Sir) Ross Smith and Lieut. (Sir) Keith Smith. Peace Treaty signed at Versailles, 28th June.
- 1921 Mandate given to Australia over Territory of New Guinea. First direct wireless press message, England to Australia.
- 1922 First lock on River Murray opened at Blanchetown, South Australia. Queensland Legislative Council abolished.
- 1923 First sod turned on the site of Federal Parliament House at Canberra.
- 1924 Directorate of Commonwealth Bank appointed. Australian Loan Council formed.
- 1925 Population of Australia reached 6,000,000. Solar Observatory established at Canberra.
- 1926 Council for Scientific and Industrial Research established. Imperial Conference. Dominion Status defined.
- 1927 Transfer of Seat of Commonwealth Government from Melbourne to Canberra. Beam wireless established.
- 1928 Financial agreement of Commonwealth and States: referendum carried.
- 1929 Commonwealth Bank empowered to mobilize gold reserve.
- 1930 Effects of world-wide severe economic depression felt throughout Australia.
- Wireless phone service with other countries inaugurated. Brisbane-Grafton (N.S.W.) railway, first step towards uniform gauge railway communication between capitals of mainland States, opened. First Australian—Right Hon. Sir Isaac Alfred Isaacs, G.C.M.G., Chief Justice of the High Court—appointed Governor-General of Australia. Telephone trunk line service established between Adelaide and Perth linking up the whole of the mainland States by telephone.

Year.

- 1931 Depression continues. Exchange rate at 130 in January. Initiation of Premiers' Conference plan to meet the financial situation. Commonwealth Bank Act amended to provide for temporary lower reserve against notes. England departed from gold standard. Commonwealth Bank assumed control of exchange rate and lowered it to 125.
- 1932 Sydney Harbour Bridge opened. Australian Broadcasting Commission established. Legislation passed enabling note reserve to be held in sterling securities. Imperial Economic Conference at Ottawa.
- 1933 World Economic Conference in London. Secession Referendum carried (Western Australia.) Antarctica and Ashmore and Cartier Islands taken over by the Commonwealth.
- 1934 Inauguration of England-Australia Air Mail Service.
- 1935 Empire Statistical Conference at Ottawa.
- 1936 Joint Commonwealth and State Marketing Schemes invalidated by decision of the Privy Council in the James case. Tasmania linked with mainland by submarine telephone cable.
- 1937 Imperial Conference in London. Report of the Royal Commission on Monetary and Banking Systems in Australia.
- 1938 New Defence Programme involving expenditure of £63,000,000 over three years. New Trade Treaty with Japan.
- 1939 Population of Australia reached 7,000,000. War declared on Germany, 3rd September.
- Royal Australian Navy placed at disposal of Great Britain. Advance party of Australians embarked for Middle East, 15th December.
- 1940 Exchange of Ministers between Australia and United States of America. Exchange of High Commissioners between Australia and Canada.
- First Australian convoy (6th Australian Division) sailed for Middle East. Cruiser *Sydney* crippled Italian cruiser *Bartolomeo Colleoni*.
- 1941 Establishment of Commonwealth Child Endowment Scheme. United States Congress passed Lend-Lease Bill. Japanese attack on Pearl Harbour. Australia declared war on Japan, 9th December.
- Australian destroyers in "Tobruk Ferry Run". *Sydney* lost after fight with *Steiermark*. R.A.A.F. in defence of Britain, in Middle East and at Singapore. Australian forces engaged in Middle East, Greece, Crete and Syria. Arrival of units of Eighth Australian Division in Malaya.
- 1942 Darwin bombed. United States armed forces land in Australia. General Douglas MacArthur Supreme Commander of Allied Forces in South-west Pacific. Federal uniform taxation adopted. Commonwealth widows' pensions introduced. Japanese submarines sunk in Sydney Harbour. Rationing of commodities. Exchange of Ministers between Netherlands, Union of Soviet Socialist Republics and Australia.
- Ninth Australian Division launched first attack in British thrust at El Alamein (North Africa). Fall of Singapore, 15th February. Japanese landed at Rabaul. Coral Sea Battle. Australians withdrew from Kokoda. Australian cruisers lead attack on Solomon Islands. Japanese forced to withdraw from Milne Bay. Australians recaptured Kokoda and Gorari, and captured Oivi, Wairopi and Gona.
- 1943 Price Stabilization Scheme. Mortgage Bank Department of Commonwealth Bank opened. National Works Council formed.
- Australian forces combined with American forces to recapture many places in New Guinea. Commencement of long series of amphibious operations in which R.A.N. ships took part. R.A.A.F. from 1943 till end of war operated on all fronts.
- 1944 Allied invasion of France by sea and air on 6th June. Pay-as-you-earn taxation operated from 1st July. Referendum on Constitution Amendment to give Commonwealth Government increased powers in post-war period defeated.
- Australians landed on New Britain; took over from Americans in Bougainville, Solomon Islands, and at Aitape, New Guinea.

Year.

- 1945 H.R.H. the Duke of Gloucester sworn in as Governor-General. Captain Cook Dock opened. Cessation of hostilities in Europe, 8th May. Delegates of 50 countries sign United Nations' Charter at San Francisco. Re-establishment and Employment Act. Cessation of hostilities against Japan, 15th August. Australian National Airlines Act. General demobilization of Armed Forces commenced.

At cessation of hostilities in Pacific, Australian forces were operating in New Guinea, Solomon Islands and Borneo.

- 1946 First meeting of General Assembly of United Nations in London. Arrangements between United Kingdom and Australia, New Zealand, India and South Africa to operate air trunk routes in various parts of world. An Australian observer sent to first meeting to establish International Monetary Fund and Bank. Government plans for increased immigration. Cessation of manpower controls. Arrival of British Rocket Research Mission in Australia. Mutual appointment of Ambassadors between Australia and United States of America. Prime Minister attended conference with United Kingdom and Dominion Prime Ministers in London. Commonwealth Government accepted responsibility for supply and maintenance of BCOF in Japan. Inauguration of Commonwealth Employment Service. Hearing of 40-hour week case commenced. Appointment of Commonwealth Insurance Commissioner. United Kingdom and Dominion Wool Disposals Ltd. (Joint Organization) commenced operations. Conference of Paris to consider draft treaties of peace with Italy, Rumania, Bulgaria, Hungary and Finland. Act to establish National University at Canberra. Coal Industry Act. Commonwealth and State agreement on housing programme to provide employment for 130,000 men over ten years. Commonwealth Trans-Australia Airlines began operations. Sydney-Vancouver fortnightly air service commenced. Constitution Alteration Referendum results granted powers in regard to social services to Commonwealth—powers for marketing and employment refused. Double taxation relief agreement between Australia and Britain signed. Basic wage enquiry, adjourned in 1940, re-opened. Reciprocal air transport agreement between Australia and United States of America signed. Interim basic wage rise. Defence (Transitional Provisions) Act. Expiry of National Security Act.

- 1947 Conference of Provisional International Civil Aviation Organization in Melbourne. Constitution of South Pacific Commission as permanent body. End of demobilization of Australian fighting forces. Industrial Arbitration (Forty Hours Week) Amendment Act (N.S.W.). International Monetary Agreement Act. Expenditure of £250,000,000 on defence in next five years approved. Talks in Canberra between Australian and United States Governments on Pacific strategy and future defence planning. Northern Territory Administration Act provided for establishment of a Legislative Council. Census of Australia—first since 1933. Arrival of Viscount Montgomery, Chief of Imperial General Staff, to discuss aspects of defence. War-time sugar rationing abolished. Australia to take displaced persons as migrants. Full High Court declared invalid Section 48 of Banking Act 1945. Resumption of private trading with Japan authorized. Empire conference on Japanese peace settlement at Canberra. Arbitration Court judgment reduced standard weekly hours of work from 44 to 40. Air Arm of R.A.N. to be established. Banking Act to nationalize trading banks. First party of Australian National Antarctic Research Expedition left for Heard Island to establish scientific research station. First "displaced persons" reached Australia. Act approving Australia becoming member of World Health Organization; also Defence (Transitional Provisions) Act.

- 1948 Forty-hour week effective throughout Australia. BCOF to be controlled and administered by Commonwealth Government. Tram and tramway bus strike in Melbourne—Victorian Essential Services Act. Status of Australian representatives in France, U.S.S.R. and China raised from Minister to

Year.

1948—
contd.

Ambassador. R.A.A.F. Reserve to be established. State of emergency declared in connexion with Queensland rail strike—Industrial Law Amendment Act (subsequently repealed.) Scheme for £8,000,000 housing project to meet industrial expansion in Wollongong-Port Kembla district. Representation Act increasing membership of Commonwealth Parliament. First meeting of South Pacific Commission. Proposal for Constitution Alteration (Rents and Prices) defeated at referendum. Australian Iron and Steel Ltd. ten-year plan for new tinplate mill and other extensions at Port Kembla. Cessation of war-time meat and clothes rationing. High Court declared invalid certain vital sections of Banking Act 1947. Professor Marcus L. Oliphant, F.R.S. accepted appointment as Director of Post-Graduate Research School of Physical Science at Australian National University. Essential Services Act proclaimed in Victoria. Tuberculosis Act assented to. Opening session of Economic Commission for Asia and Far East at Lapstone (N.S.W.). Wheat Industry Stabilization Act repealed 1946 Act. First display of new Australian-made car, the "Holden". Australian Capital Territory Representation Act. International Trade Organization Act (General Agreement on Tariffs and Trade and Havana Charter for International Trade Organization). Nationality and Citizenship Act. Defence (Transitional Provisions) Act. Parliamentary Retiring Allowances Act. National Health Service Act.

1949 Nationality and Citizenship Act operative. First Italian Minister to Australia arrived. Commonwealth to build hostels in Newcastle, Port Kembla, Adelaide and Melbourne to accommodate European migrants expected during next eighteen months. Appointment of Australia's first High Commissioner to Pakistan. Broadcasting Control Board to develop and co-ordinate national and commercial broadcasting services came into operation. Port Moresby decided on as administrative centre for Papua and New Guinea. Full High Court granted an injunction preventing deportation in O'Keefe case (subsequently Acts to provide for removal of certain persons who entered Australia during period of hostilities, and to amend Immigration Act, introduced and assented to). Act providing for placing of New Guinea under international trusteeship and for administrative union of Papua and New Guinea assented to. Certain Australian aborigines for first time granted franchise at Federal elections. Queensland State Parliament electorates increased from 62 to 75, and State divided into four zones. Agreement between Australia and New Zealand for full reciprocity in social service benefits. Prime Minister attended Dominion Prime Ministers' Conference, where India's continuing membership of British Commonwealth of Nations accepted and recognized. Agreement reached on arrangements for increasing meat exports from Australia to United Kingdom (legislation subsequently enacted to provide for assistance for improved roads and other facilities for movement of live-stock in Queensland and Western Australia). Provision in Tasmania for compulsory X-ray examination and treatment of all persons suffering from tuberculosis. Report of British experts on New South Wales transport recommended a transport commission, covering all transport including ferries and intra-state airways, to consider and recommend capital and other extraordinary expenditure and to co-ordinate budgets, and control wages and conditions in the departments covered—buses to replace trams in Newcastle and in Sydney. Invitation to four overseas Universities to establish observatories at Mount Stromlo, Australian Capital Territory. Ratification by Victoria of Murray River Agreement for enlarging of Hume Weir and installation of hydro-electric plant—all Governments concerned have ratified. Commencement of hearing of £10 per week basic wage claim—hearing of claim for interim basic wage increase of £2 per week refused. Appointment of first French Ambassador to Australia. Arrival of H.M.A.S. *Sydney*, Australia's first aircraft carrier. South Africa's first High Commissioner to Australia arrived. High Court declared invalid National Security (Liquid Fuel) Regulations, thus restoring free retailing of petrol. Victorian State and Municipal Authorities to spend

Year.

1949—
contd.

£46,000,000 in next eight years to expand electricity generation, making it less dependent on black coal. British export's report on Victorian transport system recommended changes in administration and finances of railways, metropolitan tramways and road transport, including the setting-up of a central controlling transport authority. Border River scheme commenced with work on Dumaresq River. Dispute over claims for 35-hour week, 30s. a week wage increase, and long-service leave rendered all Australian black coal mines idle from 27th June until 15th August—transport, power, lighting and gas supplies severely restricted in all States, and much unemployment caused, especially in New South Wales—National Emergency (Coal Strike) Bill enacted, making illegal any kind of payment in support of strike—troops used to extract coal from open-cut mines in New South Wales. Australia accepted agreement of wheat importing nations to purchase 450,000,000 bushels of wheat a year—Australia's share of exports to be 80,000,000 bushels a year. Assent to Act for construction and operation of works for generation of hydro-electric power in Snowy Mountains area for defence purposes and for consumption in Australian Capital Territory, and constituting Snowy Mountains Hydro-electric Authority; subsequently decided that final third of Snowy River waters be diverted to Murray; scheme commenced 17th October. Air transport agreement signed between Australia and India. Legislation passed in New South Wales to increase seats in Legislative Assembly from 90 to 94, to ban press and radio electoral comment for 70 hours preceding close of poll, and virtually to eliminate postal voting in present form. Commonwealth Conciliation and Arbitration Act amended to prevent irregularities in elections for offices in organizations registered under Act. Act providing for establishment of Australian Whaling Commission assented to. Liquid fuel importers required by law to hold stocks at specified places for defence needs. Privy Council dismissed Commonwealth Government's appeal against High Court's invalidation of Commonwealth's bank nationalization legislation. Following report on Finance Ministers Conference in London, Federal Cabinet sub-committee approved 25 per cent. reduction in Australia's imports from dollar areas. Coal Industry Tribunal granted long-service leave to miners throughout Australia—thirteen weeks' leave on full pay after minimum of ten years' service—not to be commenced before June, 1954. First Australian Minister to Italy appointed. Devaluation of sterling against American dollar, and commensurate devaluation of Australian pound to two dollars twenty-four cents. All-Australia Trade Union Congress decision to cancel affiliation with World Federation of Trade Unions. First party of European migrants under International Refugee Organization scheme released from two-year contracts 30th June. Prime Minister announced establishment of Immigration Planning Council to assist in assimilation of migrants into industry and the community. Arrival of first French Ambassador to Australia. Agreement on rail standardization, replacing original agreement of 1946, ratified by Commonwealth and South Australian Governments. Defence (Transitional Provisions) Act 1949 assented to. Dissolution of Eighteenth Australian Parliament. Australia's population reached 8,000,000. Re-introduction of petrol rationing in all States except Tasmania. Fulbright Agreement, providing for exchange of students between Australia and United States of America, signed, thereby liquidating balance of Australia's lend-lease debt to United States. Federal election resulted in defeat of Labour Government by Liberal-Country Parties' coalition.

OFFICIAL YEAR BOOK

OF THE

COMMONWEALTH OF AUSTRALIA,

CHAPTER I.

DISCOVERY, COLONIZATION AND FEDERATION OF AUSTRALIA.

§ 1. Early Knowledge and Discovery of Australia.

1. *Introduction.*—Only a brief summary of the more important facts relating to the early history of Australian discovery is given in this Chapter. A more complete account of this subject, together with bibliographical references thereto, may be found in Official Year Book No. 1 (pp. 45-51), although this account must be modified somewhat in view of later investigations.

2. *Early Tradition.*—It would appear that there was an early Chaldean tradition as to the existence of an Austral land to the south of India. Rumours to that effect in the course of time found their way to Europe, and were probably spread by travellers from Indian seas, more especially by the Greek soldiers who accompanied Alexander the Great (356-323 B.C.) to India. References to this *Terra Australis* are found in the works of Ælianus (A.D. 205-234), Manilius (probably a contemporary of Augustus or Tiberius Cæsar), and Ptolemy (A.D. 107-161). In some of the maps of the first period of the Middle Ages there is evidence which might warrant the supposition of the knowledge of the existence of a *Terra Australis*, while some idea of the Austral land appears in the maps and manuscripts of the fourteenth and fifteenth centuries. But much of the map-drawing in these early days was more or less fanciful, and there is no evidence definitely connecting this so-called *Terra Australis* with Australia.

3. *Discovery of Australia.*—(i) *General.* The Venetian traveller Marco Polo (1254-1324) refers to a land called *Locac*, which through a misunderstanding of his meaning was long thought to be Australia. But Marco Polo knew nothing of any land to the south of Java, and in any case the description given of the so-called *Locac* could not possibly be applied to Australia, as the writer speaks of elephants, etc. On a Mappamundi in the British Museum, of not later date than 1489, there is a coast-line which has been considered to represent the west coast of Australia. Investigation by Wood and others proves this claim to be merely fanciful. Martin Behaim's globe, the oldest known globe extant, constructed in 1492, also shows what purports to be a part of Australia's coast-line, and a globe discovered in Paris bears an inscription to the effect that the *Terra Australis* was discovered in 1499. These also have other countries located in impossible positions. The term *Terra Australis* was, however, also applied to the region now known as *Tierra del Fuego*, hence little weight can be attached to this reference.

In the Dauphin map (about 1530-1536) *Java la Grande* has been supposed by some to represent Australia, but an inspection of the unreal animals and other figures thereon lends no weight to the idea. As a matter of fact, much of this map drawing was simply an attempt to support the old notion that the land surface of the southern hemisphere must balance that of the northern.

(ii) *Arab Expeditions.* It has been stated that the Arabs had come to Australia long before the Portuguese, the Spaniards or the Dutch, but there is no evidence to support the statement.

(iii) *Spanish and Portuguese Expeditions.* The last decade of the fifteenth century and the commencement of the sixteenth saw numerous expeditions equipped in the ports of Spain and Portugal for the purpose of exploiting the new world. The Portuguese rounded the Cape of Good Hope in 1487 and eleven years later pushed eastward to India. The Spaniards, relying on the scientific conclusion that the world was spherical, attempted to get to the East by deliberately starting out west, Magalhaens by so doing reaching the Philippine Islands in 1521.

In 1606 Quiros, on reaching the island that has retained the name of Espiritu Santo (the largest island of the New Hebrides group), thought that he had discovered the great land of the south, and therefore named the group *La Australia del Espiritu Santo*. After leaving the New Hebrides, Quiros sailed eastward, but Torres, his second-in-command, took a westerly course and passed through the strait that now bears his name. In all probability he sighted the Australian Continent, but no mention is made of this fact in his records. This voyage marks the close of Spanish activity in the work of discovery in the South Seas.

(iv) *Discoveries by the Dutch.* With the decline of Portuguese and Spanish naval supremacy came the opportunity of the Dutch for discovery. Cornelius Wytfliet's map, of which there was an English edition, published in Louvain in 1597, indicates roughly the eastern and western coasts of Australia, as well as the Gulf of Carpentaria. The following oft-quoted passage occurs in Wytfliet's *Descriptionis Ptolemæicæ Augmentum*: "The *Australis Terra* is the most southern of all lands. It is separated from New Guinea by a narrow strait. Its shores are hitherto but little known, since after one voyage and another, that route has been deserted and seldom is the country visited, unless when sailors are driven there by storms. The *Australis Terra* begins at one or two degrees from the equator, and is maintained by some to be so great in extent that, if it were thoroughly explored, it would be regarded as a fifth part of the world." According to Wood this passage has its origin in the voyages through the Straits of Magellan and the discovery of Tierra del Fuego rather than that of Australia.

The Dutch discovered Australia when the Dutch East India Company sent the *Duyfken* from Bantam to explore the islands of New Guinea. During March, 1606 the *Duyfken* coasted along the southern shores of New Guinea, and followed the west coast of Cape York peninsula as far as Cape Keer-Weer ('Turn Again'). Dirk Hartogs (on the plate in the Amsterdam Museum recording his voyage the name is written Dirck Hatichs), in the *Eendracht* in 1616, sailed along a considerable part of the west coast of the continent. It may be mentioned that the route was not definitely selected, but that the navigator simply went farther east than the usual course from the Cape to Java.

In 1618 the *Zeeuwolf* found land in latitude $20^{\circ} 15'$ south, and in the following year Frederik Houtman discovered the reef of the west coast, now known as *Houtman's Abrolhos*.

In 1622 the Dutch vessel *Leeuwin* rounded the Cape, which now bears that name, at the south-west of the continent, and in 1623 the Dutch vessels *Pera* and *Arnhem* discovered Arnhem Land, the peninsula on the western side of the Gulf of Carpentaria, which was so named in compliment to Peter Carpentier, Governor of the Dutch East India Company.

In 1627 Francis Thysz, Commander of the *Gulde Zeepaerd*, with Pieter Nuyts of the Dutch Council of Seventeen on board, coasted along a portion of the shore of the Great Australian Bight. In 1628 De Witt, Commander of the *Vianen*, discovered land on the north-west, namely, in about latitude 21° S. The *Batavia*, commanded by Francis Pelsart, was wrecked on the western coast of Australia in 1629. Pelsart was the first to carry to Europe an authentic account of the west coast of Australia, which, however, he described in the most unfavourable terms. The yachts *Amsterdam* and *Wesel*, under Gerrit Pool, visited the Gulf of Carpentaria in 1636.

Abel Janszoon Tasman, in command of two vessels, the *Heemskerck* and *Zeehan*, set out from Batavia in 1642 to ascertain the extent of the great southern continent. He named Van Diemen's Land, imagining it to be part of Australia proper, and sailing north-easterly discovered New Zealand and returned to Batavia. In his second voyage in 1644 Tasman visited the northern coast of Australia, sailing round the Gulf of Carpentaria and along the north-west coast as far down as the tropic of Capricorn.

William de Vlamingh landed at the mouth of the Swan River at the end of 1696 and an exploring squadron under Martin Van Delft explored and named part of the north-west coast in 1705, but the period of Dutch discoveries may be said to have ended with Tasman's second voyage, and, with the decline of her maritime power, the Dutch interest in Australian discovery disappeared.

4. Discoveries by the English.—In the meantime the English had made their first appearance on the Australian coast in 1688, when the north-westerly shores were visited by William Dampier, as supercargo of the *Cygnet*, a trading vessel whose crew had turned buccaneers. In describing the country, Dampier stated that he was certain that it joined neither Asia, Africa nor America. In 1699 he again visited Australia, in command of H.M.S. *Roebuck*, and on his return to England published an account in which a description is given of trees, flowers, birds and reptiles observed, and of encounters with natives.

It was a question at the end of the seventeenth century whether Tasmania and New Zealand were parts of Australia, or whether they were separated from it, but themselves formed part of a great Antarctic Continent. Lieutenant James Cook's first voyage, though primarily undertaken for the purpose of observing the transit of Venus from Otaheite, had also for its objective to ascertain whether the unexplored part of the southern hemisphere was only an immense mass of water or contained another continent. In command of H.M.S. *Endeavour*, a barque of 370 tons burden, carrying about 85 persons, and accompanied by Sir Joseph Banks, Dr. Solander the naturalist, Green the astronomer, draughtsmen and servants, Cook, after observing the transit of Venus at Otaheite, turned towards New Zealand, sighting that land on 7th October, 1769 in the neighbourhood of Poverty Bay. Circumnavigating the North and South Islands, he proved that New Zealand was connected neither with the supposed Antarctic Continent nor with Australia, and took formal possession thereof in the name of the British Crown. On 20th April, 1770, at 6 a.m., Cook sighted the Australian mainland at a place he called Point Hicks, naming it after his first-lieutenant, who first saw it. Coasting northwards, Botany Bay was discovered on 29th April, 1770. The *Endeavour* dropped anchor and Cook landed on the same day. Cook sailed along the coast in a northerly direction for nearly 1,300 miles until 11th June, 1770, when the *Endeavour* was seriously damaged by striking a coral reef in the vicinity of Trinity Bay. Repairs occupied nearly two months, and the *Endeavour* then again set her course to the north, sailing through Torres Strait and anchoring in the Downs on 13th July, 1771. In 1772 Cook was put in command of the ships *Resolution* and *Adventure*, with a view to ascertaining whether a great southern continent existed. Having satisfied himself that, even if it did, it lay so far to the south as to be useless for trade and settlement, he returned to England in 1774. Cook's last voyage was undertaken in 1776, and he met his death on 14th February, 1779, by which date practically the whole coast of Australia had been explored. The only remaining discovery of importance was the existence of a channel between Tasmania and Australia. This was made by Flinders and Bass in 1798.

§ 2. The Annexation of Australia.

1. Annexation of Eastern Part of Australia, 1770.—Although representatives of the nations mentioned in the previous section landed or claimed to have landed on the shores of Australia on various occasions during the sixteenth and seventeenth centuries, it was not until 23rd August, 1770 that the history of Australia was brought into definite political connexion with Western civilization. It was on that date that Captain Cook took possession "of the whole eastern coast, from latitude 38° to this place, latitude 10½° S., in right of His Majesty King George the Third." Cook, however, proclaimed British sovereignty over only what are now the eastern parts of New South Wales and Queensland, and formal possession, on behalf of the British Crown, of the whole of the eastern part of the Australian continent and Tasmania was not taken until 26th January, 1788. It was on this last date that Captain Phillip's commission, first issued to him on 12th October, 1786, and amplified on 2nd April, 1787, was read to the people whom he had brought with him in the "First Fleet."

A full historical account of the period referred to may be found in the *Historical Records of New South Wales* Vol. I., parts 1 and 2.

2. **Original Extent of New South Wales.**—The commission appointed Phillip "Captain-General and Governor-in-Chief in and over our territory called New South Wales, extending from the Northern Cape or extremity of the coast called Cape York, in the latitude of ten degrees thirty-seven minutes south, to the southern extremity of the said territory of New South Wales or South Cape, in the latitude of forty-three degrees thirty-nine minutes south, and of all the country inland westward as far as the one hundred and thirty-fifth degree of east longitude reckoning from the meridian of Greenwich, including all the islands adjacent in the Pacific Ocean within the latitudes aforesaid of ten degrees thirty-seven minutes south and forty-three degrees thirty-nine minutes south."

Although in November, 1769 Captain Cook had taken possession of the North Island of New Zealand, and in January, 1770 also of the South Island, it is a matter of doubt whether, at the time when Captain Phillip's commission was drawn up, New Zealand was considered as one of the "islands adjacent in the Pacific Ocean." The facts that under the Supreme Court Act (Imperial) of 1823 British residents in New Zealand were brought under the jurisdiction of the Court at Sydney, while in 1839 there was a proposal on the part of the British Government to appoint a consul in New Zealand, would leave this an open question, as nothing more than extra-territorial jurisdiction may have been intended. Various hoistings of flags notwithstanding, New Zealand does not appear to have unequivocally become British territory until 1840. In that year, on 29th January, Captain Hobson arrived at the Bay of Islands. On the following day he read the commission, which extended the boundaries of the Colony of New South Wales so as to embrace and comprehend the islands of New Zealand. On 5th February the Treaty of Waitangi, made with the native chiefs, was signed. Finally, on 21st May, British sovereignty over the islands of New Zealand was explicitly proclaimed.

3. **Extension of New South Wales Westward, 1825.**—On 17th February, 1824 Earl Bathurst advised Sir Thomas Brisbane that he had recommended to His Majesty the dispatch of a ship of war to the north-west coast of New Holland for the purpose of taking possession of the coast between the western coast of Bathurst Island and the eastern side of Coburg Peninsula. Captain James J. Gordon Bremer of H.M.S. *Tamar*, who was selected for the purpose, took possession on 20th September, 1824 of the coast from the 135th to the 129th degree of east longitude. On 10th July, 1825 the whole territory between those boundaries was described in Darling's commission as being within the boundaries of New South Wales, thus increasing its area by 518,134 square miles, and making it, including New Zealand and excluding Tasmania, 2,076,308 square miles, or also excluding New Zealand, 1,972,446 square miles.

4. **Annexation of Western Australia, 1827.**—An expedition under Major Lockyer, sent by Lieutenant-General Sir Ralph Darling, then Governor of New South Wales, to found a settlement at King George III. Sound, sailed from Sydney on 6th November, 1826, landed at the Sound on 20th December following, and hoisted the British flag. Captain Stirling, in command of H.M.S. *Success*, arrived at Sydney a few weeks after the departure of the expedition to King George's Sound. He obtained the Governor's permission to visit Swan River with a view to seizing a position on the western coast and reporting upon its suitability as a place of settlement. Captain Stirling left Sydney on 17th January, 1827, and on his return in the following April submitted a glowing report on what he described as a "rich and romantic country," urging its occupation for the purpose of settlement. He left England in July, 1827, continuing his advocacy—withstanding much discouragement—with unabated enthusiasm. He was at last successful, the result being mainly due to the formation of an association of prospective settlers having capital at their disposal. He was appointed Lieutenant-Governor and with a party of settlers arrived at Garden Island, near the Swan River, in the ship *Parmelia* in June, 1829. On the 2nd of the preceding month Captain Fremantle, in command of H.M.S. *Challenge*, arrived and hoisted the British flag on the south head of Swan River,

again asserting possession of "all that part of New Holland, which is not included within the territory of New South Wales." Thus, before the middle of 1829, the whole territory now known as the Commonwealth of Australia had been constituted a dependency of the United Kingdom.

§ 3. The Creation of the Several Colonies.

1. **New South Wales.**—In Governor Phillip's commission of 1786 the mainland of Australia was divided by the 135th meridian of east longitude into two parts. The earliest colonists believed that the present State of Tasmania was actually joined to the mainland, and it was not till 1798 that the contrary was known. In that year, by sailing through Bass Strait, Flinders and Bass proved that it was an island. The territory of New South Wales, as originally constituted, and of New Zealand, which may be included although Cook's annexation was not properly given effect to until 1840, consisted of 1,584,389 square miles. A further area of 518,134 square miles was added in 1825, when the western boundary was extended to the 129th meridian. The territory was subsequently reduced by the separation of various areas to form the other colonies, and at the time of the establishment of the Commonwealth the area of New South Wales was 310,372 square miles.

2. **Tasmania.**—In 1825 Van Diemen's Land, as Tasmania was then called, was politically separated from New South Wales, being constituted a separate colony on 14th June of that year. The area of the colony was 26,215 square miles.

3. **Western Australia.**—The territory westward of the 129th meridian comprising 975,920 square miles was constituted a colony under the name of Western Australia in June, 1829. It was always distinct and independent of New South Wales, though until 1831 the settlement on King George's Sound remained under the latter jurisdiction.

4. **South Australia.**—On 15th August, 1834 the Act 4 and 5 William IV., cap. 95, was passed, creating South Australia a "province," and towards the end of the year 1836 settlement took place. The first Governor, Captain Hindmarsh, R.N., arrived at Holdfast Bay on 28th December, 1836, and on the same day the new colony was officially proclaimed. The new colony embraced 309,850 square miles of territory, lying south of the 26th parallel of south latitude, and between the 141st and 132nd meridians of east longitude. On 10th December, 1861, by the authority of the Imperial Act 24 and 25 Vic., cap. 44, the western boundary of South Australia was extended to coincide with the eastern boundary of Western Australia, namely, the 129th meridian. The area of the extension was approximately 70,220 square miles. Nearly two years later, on 6th July, 1863, the Northern Territory comprising 523,620 square miles was, by letters patent, brought under the jurisdiction of South Australia, which therefore controlled an area of 903,690 square miles.

5. **New Zealand.**—New Zealand, nominally annexed by Captain Cook and formally declared by proclamation in 1840 as a dependency of New South Wales, was, by letters patent of 16th November of that year, constituted a separate colony under the powers of the Act 3 and 4 Vic., cap. 62, of 7th August, 1840. Proclamation of the separation was made on 3rd May, 1841. The area of the colony was 103,862 square miles.

6. **Victoria.**—In 1851 what was known as the "Port Phillip District" of New South Wales was constituted the colony of Victoria, "bounded on the north and north-west by a straight line drawn from Cape Howe to the nearest source of the River Murray and thence by the course of that river to the eastern boundary of the colony of South Australia." The area of the new colony was 87,884 square miles, and its separate existence took effect from 1st July, 1851, upon the issuing of the writs for the first election of elective members of the Legislative Council.

7. **Queensland.**—The northern squatting districts of Moreton, Darling Downs, Burnett, Wide Bay, Maranoa, Leichhardt and Port Curtis, together with the reputed county of Stanley, were granted an independent administration and formed into a distinct colony under the name of Queensland by letters patent dated 6th June, 1859, although separation from New South Wales was not consummated until 10th

December of the same year, upon the assumption of office of the first Governor. The territory comprised in the new colony was so much of the colony of New South Wales as lies northwards of a line commencing on the sea-coast at Point Danger in latitude about $28^{\circ} 8'$ south, running westward along the Macpherson and Dividing Ranges and the Dumaresq River to the MacIntyre River, thence downward to the 29th parallel of south latitude, and following that parallel westerly to the 141st meridian of east longitude, which is the eastern boundary of South Australia, together with all the adjacent islands, their members, and appurtenances in the Pacific Ocean. The area of the colony thus constituted was 554,300 square miles. By letters patent dated 13th March, 1861, forwarded by the Colonial Secretary to the Governor of Queensland on 12th April, 1862, the area of Queensland was increased by the annexation of "so much of the colony of New South Wales as lies to the northward of the 26th parallel of south latitude, and between the 141st and 138th meridians of east longitude, together with all and every the adjacent islands, their members, and appurtenances, in the Gulf of Carpentaria." With this addition the area of Queensland became 670,500 square miles.

§ 4. Establishment of the Commonwealth of Australia.

1. **General.**—On 1st January, 1901 the colonies mentioned, with the exception of New Zealand, were federated under the name of the "Commonwealth of Australia," the designation of "Colonies"—except in the case of the Northern Territory, to which the designation "Territory" is applied—being at the same time changed into that of "States." The total area of the Commonwealth of Australia is 2,974,581 square miles. The dates of creation and the areas of its component parts, as determined on the final adjustment of their boundaries, are shown below :—

THE COMMONWEALTH OF AUSTRALIA : AREA, ETC., OF COMPONENT PARTS.

State.	Year of Formation into Separate Colony.	Present Area in Square Miles.	State.	Year of Formation into Separate Colony.	Present Area in Square Miles.
New South Wales(a)	1786	310,372	Tasmania ..	1825	26,215
Victoria ..	1851	87,884	Northern Territory	1863	523,620
Queensland ..	1859	670,500	Area of the Commonwealth	2,974,581
South Australia ..	1834	380,070			
Western Australia	1829	975,920			

(a) Including the Australian Capital Territory embracing an area of 911 square miles, and 28 square miles at Jervis Bay. See par. 3 below.

2. **Transfer of the Northern Territory to the Commonwealth.**—On 7th December, 1907 the Commonwealth and the State of South Australia entered into an agreement for the surrender to and acceptance by the Commonwealth of the Northern Territory, subject to approval by the Parliaments of the Commonwealth and the State. This approval was given by the South Australian Parliament under the Northern Territory Surrender Act 1907 (assented to on 14th May, 1908), and by the Commonwealth Parliament under the Northern Territory Acceptance Act 1910 (assented to on 16th November, 1910). The Territory was formally transferred to the Commonwealth on 1st January, 1911, and became the Northern Territory of Australia.

3. **Transfer of the Australian Capital Territory to the Commonwealth.**—On 18th October, 1909 the Commonwealth and the State of New South Wales entered into an agreement for the surrender to and acceptance by the Commonwealth of an area of 911 square miles as the seat of Government of the Commonwealth. In December, 1909 Acts were passed by the Commonwealth and New South Wales Parliaments approving the agreement, and on 5th December, 1910 a proclamation was issued vesting the Territory in the Commonwealth on and from 1st January, 1911. By the Jervis Bay

Territory Acceptance Act 1915, an area of 28 square miles at Jervis Bay, surrendered by New South Wales according to an agreement made in 1913, was accepted by the Commonwealth, and was transferred as from 4th September, 1915.

4. **Transfer of British New Guinea or Papua.**—Under the administration of the Commonwealth, but not included in it, is British New Guinea or Papua, finally annexed by the British Government in 1884. This Territory was for a number of years administered by the Queensland Government, but was transferred to the Commonwealth by proclamation on 1st September, 1906, under the authority of the Papua Act (Commonwealth) of 16th November, 1905. The area of Papua is about 90,540 square miles.

5. **Transfer of Norfolk Island.**—Although administered for many years by the Government of New South Wales, this Island was a separate Crown Colony until 1st July, 1914, when it was transferred to the Commonwealth under the authority of the Norfolk Island Act 1913. The Island is situated in latitude $29^{\circ} 3' 45''$ S. longitude $167^{\circ} 56' 29''$ E., and comprises an area of 8,528 acres.

6. **Territory of New Guinea.**—In 1919 it was agreed by the Principal Allied and Associated Powers that a mandate should be conferred on Australia for the government of the former German territories and islands situated in latitude between the Equator and 8° S., and in longitude between 141° E. and $159^{\circ} 25'$ E. The mandate was issued by the League of Nations on 17th December, 1920. The Governor-General of the Commonwealth was authorized to accept the mandate by the New Guinea Act 1920, which also declared the area to be a Territory under the authority of the Commonwealth by the name of the Territory of New Guinea. The Territory comprises about 93,000 square miles, and the administration under the mandate dated from 9th May, 1921. New Guinea is now administered under Trusteeship Agreement with the United Nations, approved 13th December, 1946. For further particulars see Chapter X.—The Territories of Australia.

7. **Nauru.**—In 1919 the Governments of the United Kingdom, Australia and New Zealand entered into an agreement to make provision for the exercise of the mandate conferred on the British Empire for the administration of the island of Nauru, and for the mining of the phosphate deposits thereon. The island is situated in longitude 166° E., 26 miles south of the Equator, and comprises about 5,263 acres. The agreement provided that the administration of the island should be vested in an administrator, the first appointment to be made by the Commonwealth Government, and thereafter in such manner as the three Governments decided. The agreement was approved by the Commonwealth Parliament in the Nauru Island Agreement Act 1919, and a supplementary agreement of 30th May, 1923, giving the Government immediately responsible for the administration greater powers of control over the Administrator, was approved in 1932. The administration under the mandate has operated from 17th December, 1920, and so far the administrators have been appointed by the Commonwealth Government. As with the Territory of New Guinea, Nauru is now administered under Trusteeship Agreement with the United Nations.

8. **Territory of Ashmore and Cartier Islands.**—By Imperial Order in Council, dated 23rd July, 1931, Ashmore Islands, known as Middle, East and West Islands, and Cartier Island, situated in the Indian Ocean off the North-west Coast of Australia, were placed under the authority of the Commonwealth. The Islands were accepted by the Commonwealth in the Ashmore and Cartier Islands Acceptance Act 1933 under the name of the Territory of Ashmore and Cartier Islands and were transferred on 10th May, 1934. The Act authorized the Governor of Western Australia to make ordinances having the force of law in and in relation to the Territory. An amendment to the 1933 Act, in July, 1938, annexed the Islands to the Northern Territory, whose laws, ordinances and regulations, wherever applicable, thereupon applied.

9. **Australian Antarctic Territory.**—An Imperial Order in Council, dated 7th February, 1933, placed under the authority of the Commonwealth the Antarctic Territories, comprising all the islands and territory, other than Adélie Land, situated south of 60° S. latitude, and lying between 160° E. longitude and 45° E. longitude. The Territory was

accepted by the Commonwealth under the name of the Australian Antarctic Territory in the Australian Antarctic Territory Acceptance Act 1933 which came into force on 24th August, 1936 by proclamation issued by the Governor-General.

§ 5. The Exploration of Australia.

A fairly complete, though brief, account of the exploration of Australia was given in Official Year Book No. 2 (pp. 20-39), and a summary of the more important facts relating to the subject was embodied in this Chapter in succeeding issues up to and including No. 22.

§ 6. The Constitutions of the States and of the Commonwealth.

1. **General.**—Information regarding the development of the Constitutions of the various Colonies (now States), together with a brief history of the Federal movement in Australia, was embodied in this Chapter in issues of the Official Year Book up to No. 22.

2. **Commonwealth Constitution Act.**—The Commonwealth of Australia Constitution Act, 63 and 64 Vict., Chapter 12, namely: "An Act to constitute the Commonwealth of Australia," as amended by the Constitution Alteration (Senate Elections) 1906, the Constitution Alteration (State Debts) 1909, the Constitution Alteration (State Debts) 1928, and the Constitution Alteration (Social Services) 1946, is given *in extenso* hereunder, and the text contains all the alterations of the Constitution which have been made up to and including 31st December, 1949.

THE COMMONWEALTH OF AUSTRALIA CONSTITUTION ACT, 63 & 64 VICT., CHAPTER 12.

An Act to constitute the Commonwealth of Australia. [9th July, 1900.]

WHEREAS the people of New South Wales, Victoria, South Australia, Queensland and Tasmania, humbly relying on the blessing of Almighty God, have agreed to unite in one indissoluble Federal Commonwealth under the Crown of the United Kingdom of Great Britain and Ireland, and under the Constitution hereby established:

And whereas it is expedient to provide for the admission into the Commonwealth of other Australasian Colonies and possessions of the Queen:

Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:—

1. This Act may be cited as the Commonwealth of Australia Constitution Act.
2. The provisions of this Act referring to the Queen shall extend to Her Majesty's heirs and successors in the sovereignty of the United Kingdom.
3. It shall be lawful for the Queen, with the advice of the Privy Council, to declare by proclamation that, on and after a day therein appointed, not being later than one year after the passing of this Act, the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, and also, if Her Majesty is satisfied that the people of Western Australia have agreed thereto, of Western Australia, shall be united in a Federal Commonwealth under the name of the Commonwealth of Australia. But the Queen may, at any time after the proclamation, appoint a Governor-General for the Commonwealth.
4. The Commonwealth shall be established, and the Constitution of the Commonwealth shall take effect, on and after the day so appointed. But the Parliaments of the several colonies may at any time after the passing of this Act make any such laws, to come into operation on the day so appointed, as they might have made if the Constitution had taken effect at the passing of this Act.
5. This Act, and all laws made by the Parliament of the Commonwealth under the Constitution, shall be binding on the courts, judges, and people of every State and of every part of the Commonwealth, notwithstanding anything in the laws of any State; and the laws of the Commonwealth shall be in force on all British ships, the Queen's ships of war excepted, whose first port of clearance and whose port of destination are in the Commonwealth.

6. "The Commonwealth" shall mean the Commonwealth of Australia as established under this Act.

"The States" shall mean such of the colonies of New South Wales, New Zealand, Queensland, Tasmania, Victoria, Western Australia, and South Australia, including the northern territory of South Australia, as for the time being are parts of the Commonwealth, and such colonies or territories as may be admitted into or established by the Commonwealth as States; and each of such parts of the Commonwealth shall be called "a State."

"Original States" shall mean such States as are parts of the Commonwealth at its establishment.

7. The Federal Council of Australasia Act, 1885, is hereby repealed, but so as not to affect any laws passed by the Federal Council of Australasia and in force at the establishment of the Commonwealth.

Any such law may be repealed as to any State by the Parliament of the Commonwealth, or as to any colony not being a State by the Parliament thereof.

8. After the passing of this Act the Colonial Boundaries Act, 1895, shall not apply to any colony which becomes a State of the Commonwealth; but the Commonwealth shall be taken to be a self-governing colony for the purposes of that Act.

9. The Constitution of the Commonwealth shall be as follows :—

THE CONSTITUTION.

This Constitution is divided as follows :—

- | | |
|---------|--|
| Chapter | I.—The Parliament : |
| | Part I.—General : |
| | Part II.—The Senate : |
| | Part III.—The House of Representatives : |
| | Part IV.—Both Houses of the Parliament : |
| | Part V.—Powers of the Parliament : |
| Chapter | II.—The Executive Government : |
| Chapter | III.—The Judicature : |
| Chapter | IV.—Finance and Trade : |
| Chapter | V.—The States : |
| Chapter | VI.—New States : |
| Chapter | VII.—Miscellaneous : |
| Chapter | VIII.—Alteration of the Constitution. |
| | The Schedule. |

CHAPTER I.—THE PARLIAMENT.

PART I.—GENERAL.

1. The legislative power of the Commonwealth shall be vested in a Federal Parliament, which shall consist of the Queen, a Senate, and a House of Representatives, and which is hereinafter called "The Parliament," or "The Parliament of the Commonwealth."

2. A Governor-General appointed by the Queen shall be Her Majesty's representative in the Commonwealth, and shall have and may exercise in the Commonwealth during the Queen's pleasure, but subject to this Constitution, such powers and functions of the Queen as Her Majesty may be pleased to assign to him.

3. There shall be payable to the Queen out of the Consolidated Revenue Fund of the Commonwealth, for the salary of the Governor-General, an annual sum which, until the Parliament otherwise provides, shall be ten thousand pounds.

The salary of a Governor-General shall not be altered during his continuance in office.

4. The provisions of this Constitution relating to the Governor-General extend and apply to the Governor-General for the time being, or such person as the Queen may appoint to administer the Government of the Commonwealth; but no such person shall be entitled to receive any salary from the Commonwealth in respect of any other office during his administration of the Government of the Commonwealth.

5. The Governor-General may appoint such times for holding the sessions of the Parliament as he thinks fit, and may also from time to time, by Proclamation or otherwise, prorogue the Parliament, and may in like manner dissolve the House of Representatives.

After any general election the Parliament shall be summoned to meet not later than thirty days after the day appointed for the return of the writs.

The Parliament shall be summoned to meet not later than six months after the establishment of the Commonwealth.

6. There shall be a session of the Parliament once at least in every year, so that twelve months shall not intervene between the last sitting of the Parliament in one session and its first sitting in the next session.

PART II.—THE SENATE.

7. The Senate shall be composed of senators for each State, directly chosen by the people of the State, voting, until the Parliament otherwise provides, as one electorate.

But until the Parliament of the Commonwealth otherwise provides, the Parliament of the State of Queensland, if that State be an Original State, may make laws dividing the State into divisions and determining the number of senators to be chosen for each division, and in the absence of such provision the State shall be one electorate.

Until the Parliament otherwise provides there shall be six senators for each Original State*. The Parliament may make laws increasing or diminishing the number of senators for each State, but so that equal representation of the several Original States shall be maintained and that no Original State shall have less than six senators.

The senators shall be chosen for a term of six years, and the names of the senators chosen for each State shall be certified by the Governor to the Governor-General.

8. The qualification of electors of senators shall be in each State that which is prescribed by this Constitution, or by the Parliament, as the qualification for electors of members of the House of Representatives; but in the choosing of senators each elector shall vote only once.

9. The Parliament of the Commonwealth may make laws prescribing the method of choosing senators, but so that the method shall be uniform for all the States. Subject to any such law, the Parliament of each State may make laws prescribing the method of choosing the senators for that State.

The Parliament of a State may make laws for determining the times and places of elections of senators for the State.

10. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State, for the time being, relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections of senators for the State.

11. The Senate may proceed to the despatch of business, notwithstanding the failure of any State to provide for its representation in the Senate.

12. The Governor of any State may cause writs to be issued for elections of senators for the State. In case of the dissolution of the Senate the writs shall be issued within ten days from the proclamation of such dissolution.

13. As soon as may be after the Senate first meets, and after each first meeting of the Senate following a dissolution thereof, the Senate shall divide the senators chosen for each State into two classes, as nearly equal in number as practicable: and the places of the senators of the first class shall become vacant at the expiration of [the third year] *three years*,† and the places of those of the second class at the expiration of [the sixth year] *six years*,† from the beginning of their term of service; and afterwards the places of senators shall become vacant at the expiration of six years from the beginning of their term of service.

The election to fill vacant places shall be made [in the year at the expiration of which] *within one year before*† the places are to become vacant.

* The Parliament has otherwise provided, by means of the Representation Act 1948, that the number of senators shall be ten for each State, from the first meeting of Parliament after the first dissolution of the House of Representatives occurring after the commencement of the Act (18th May, 1948).

† As amended by Section 2 of the Constitution Alteration (Senate Elections) 1906. The words in square brackets have been repealed; amendments are shown in italics.

For the purposes of this section the term of service of a senator shall be taken to begin on the first day of [January] *July** following the day of his election, except in the cases of the first election and of the election next after any dissolution of the Senate, when it shall be taken to begin on the first day of [January] *July** preceding the day of his election.

14. Whenever the number of senators for a State is increased or diminished, the Parliament of the Commonwealth may make such provision for the vacating of the places of senators for the State as it deems necessary to maintain regularity in the rotation.

15. If the place of a senator becomes vacant before the expiration of his term of service, the Houses of Parliament of the State for which he was chosen shall, sitting and voting together, choose a person to hold the place until the expiration of the term, or until the election of a successor as hereinafter provided, whichever first happens. But if the Houses of Parliament of the State are not in session at the time when the vacancy is notified, the Governor of the State, with the advice of the Executive Council thereof, may appoint a person to hold the place until the expiration of fourteen days after the beginning of the next session of the Parliament of the State, or until the election of a successor, whichever first happens.

At the next general election of members of the House of Representatives, or at the next election of senators for the State, whichever first happens, a successor shall, if the term has not then expired, be chosen to hold the place from the date of his election until the expiration of the term.

The name of any senator so chosen or appointed shall be certified by the Governor of the State to the Governor-General.

16. The qualifications of a senator shall be the same as those of a member of the House of Representatives.

17. The Senate shall, before proceeding to the despatch of any other business, choose a senator to be the President of the Senate; and as often as the office of President becomes vacant the Senate shall again choose a senator to be the President.

The President shall cease to hold his office if he ceases to be a senator. He may be removed from office by a vote of the Senate, or he may resign his office or his seat by writing addressed to the Governor-General.

18. Before or during any absence of the President, the Senate may choose a senator to perform his duties in his absence.

19. A senator may, by writing addressed to the President, or to the Governor-General if there is no President or if the President is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

20. The place of a senator shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the Senate, fails to attend the Senate.

21. Whenever a vacancy happens in the Senate, the President, or if there is no President or if the President is absent from the Commonwealth, the Governor-General, shall notify the same to the Governor of the State in the representation of which the vacancy has happened.

22. Until the Parliament otherwise provides, the presence of at least one-third of the whole number of the senators shall be necessary to constitute a meeting of the Senate for the exercise of its powers.

23. Questions arising in the Senate shall be determined by a majority of votes, and each senator shall have one vote. The President shall in all cases be entitled to a vote; and when the votes are equal the question shall pass in the negative.

PART III.—THE HOUSE OF REPRESENTATIVES.

24. The House of Representatives shall be composed of members directly chosen by the people of the Commonwealth, and the number of such members shall be, as nearly as practicable, twice the number of the senators.

* As amended by Section 2 of the Constitution Alteration (Senate Elections) 1906. The words in square brackets have been repealed; amendments are shown in italics.

The number of members chosen in the several States shall be in proportion to the respective numbers of their people, and shall, until the Parliament otherwise provides, be determined, whenever necessary, in the following manner :—

- (i) A quota shall be ascertained by dividing the number of the people of the Commonwealth, as shown by the latest statistics of the Commonwealth, by twice the number of the senators ;
- (ii) The number of members to be chosen in each State shall be determined by dividing the number of the people of the State, as shown by the latest statistics of the Commonwealth, by the quota ; and if on such division there is a remainder greater than one-half of the quota, one more member shall be chosen in the State.

But notwithstanding anything in this section five members at least shall be chosen in each Original State.

25. For the purposes of the last section, if by the law of any State all persons of any race are disqualified from voting at elections for the more numerous House of the Parliament of the State, then, in reckoning the number of the people of the State or of the Commonwealth, persons of that race resident in that State shall not be counted.

26. Notwithstanding anything in section twenty-four, the number of members to be chosen in each State at the first election shall be as follows :—

New South Wales ..	23		South Australia ..	6
Victoria ..	20		Tasmania ..	5
Queensland ..	8			

Provided that if Western Australia is an Original State, the numbers shall be as follows :—

New South Wales ..	26		South Australia ..	7
Victoria ..	23		Western Australia ..	5
Queensland ..	9		Tasmania ..	5

27. Subject to this Constitution, the Parliament may make laws for increasing or diminishing the number of the members of the House of Representatives.

28. Every House of Representatives shall continue for three years from the first meeting of the House, and no longer, but may be sooner dissolved by the Governor-General.

29. Until the Parliament of the Commonwealth otherwise provides, the Parliament of any State may make laws for determining the divisions in each State for which members of the House of Representatives may be chosen, and the number of members to be chosen for each division. A division shall not be formed out of parts of different States.

In the absence of other provision, each State shall be one electorate.

30. Until the Parliament otherwise provides, the qualification of electors of members of the House of Representatives shall be in each State that which is prescribed by the law of the State as the qualification of electors of the more numerous House of Parliament of the State ; but in the choosing of members each elector shall vote only once.*

31. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State for the time being relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections in the State of members of the House of Representatives.

32. The Governor-General in Council may cause writs to be issued for general elections of members of the House of Representatives.

After the first general election, the writs shall be issued within ten days from the expiry of a House of Representatives or from the proclamation of a dissolution thereof.

33. Whenever a vacancy happens in the House of Representatives, the Speaker shall issue his writ for the election of a new member, or if there is no Speaker or if he is absent from the Commonwealth the Governor-General in Council may issue the writ.

* The Parliament has otherwise provided, by means of the Commonwealth Electoral Act 1918-1934 Section 35 (repealing an earlier provision made by the Commonwealth Franchise Act 1902).

34. Until the Parliament otherwise provides, the qualifications of a member of the House of Representatives shall be as follows :—

- (i) He must be of the full age of twenty-one years, and must be an elector entitled to vote at the election of members of the House of Representatives, or a person qualified to become such elector, and must have been for three years at the least a resident within the limits of the Commonwealth as existing at the time when he is chosen :
- (ii) He must be a subject of the Queen, either natural-born or for at least five years naturalized under a law of the United Kingdom, or of a Colony which has become or becomes a State, or of the Commonwealth, or of a State.

35. The House of Representatives shall, before proceeding to the despatch of any other business, choose a member to be the Speaker of the House, and as often as the office of Speaker becomes vacant the House shall again choose a member to be the Speaker.

The Speaker shall cease to hold his office if he ceases to be a member. He may be removed from office by a vote of the House, or he may resign his office or his seat by writing addressed to the Governor-General.

36. Before or during any absence of the Speaker, the House of Representatives may choose a member to perform his duties in his absence.

37. A member may by writing addressed to the Speaker, or to the Governor-General if there is no Speaker or if the Speaker is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

38. The place of a member shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the House, fails to attend the House.

39. Until the Parliament otherwise provides, the presence of at least one-third of the whole number of the members of the House of Representatives shall be necessary to constitute a meeting of the House for the exercise of its powers.

40. Questions arising in the House of Representatives shall be determined by a majority of votes other than that of the Speaker. The Speaker shall not vote unless the numbers are equal, and then he shall have a casting vote.

PART IV.—BOTH HOUSES OF THE PARLIAMENT.

41. No adult person who has or acquires a right to vote at elections for the more numerous House of the Parliament of a State shall, while the right continues, be prevented by any law of the Commonwealth from voting at elections for either House of the Parliament of the Commonwealth.

42. Every senator and every member of the House of Representatives shall before taking his seat make and subscribe before the Governor-General, or some person authorized by him, an oath or affirmation of allegiance in the form set forth in the schedule to this Constitution.

43. A member of either House of the Parliament shall be incapable of being chosen or of sitting as a member of the other House.

44. Any person who—

- (i) Is under any acknowledgment of allegiance, obedience, or adherence to a foreign power, or is a subject or a citizen or entitled to the rights or privileges of a subject or a citizen of a foreign power : or
- (ii) Is attainted of treason, or has been convicted and is under sentence, or subject to be sentenced, for any offence punishable under the law of the Commonwealth or of a State by imprisonment for one year or longer : or
- (iii) Is an undischarged bankrupt or insolvent : or
- (iv) Holds any office of profit under the Crown, or any pension payable during the pleasure of the Crown out of any of the revenues of the Commonwealth : or

- (v) Has any direct or indirect pecuniary interest in any agreement with the Public Service of the Commonwealth otherwise than as a member and in common with the other members of an incorporated company consisting of more than twenty-five persons :

shall be incapable of being chosen or of sitting as a senator or a member of the House of Representatives.

But sub-section iv. does not apply to the office of any of the Queen's Ministers of State for the Commonwealth, or of any of the Queen's Ministers for a State, or to the receipt of pay, half-pay, or a pension by any person as an officer or member of the Queen's navy or army, or to the receipt of pay as an officer or member of the naval or military forces of the Commonwealth by any person whose services are not wholly employed by the Commonwealth.

45. If a senator or member of the House of Representatives—

- (i) Becomes subject to any of the disabilities mentioned in the last preceding section : or
- (ii) Takes the benefit, whether by assignment, composition, or otherwise, of any law relating to bankrupt or insolvent debtors : or
- (iii) Directly or indirectly takes or agrees to take any fee or honorarium for services rendered to the Commonwealth, or for services rendered in the Parliament to any person or State :

his place shall thereupon become vacant.

46. Until the Parliament otherwise provides, any person declared by this Constitution to be incapable of sitting as a senator or as a member of the House of Representatives shall, for every day on which he so sits, be liable to pay the sum of one hundred pounds to any person who sues for it in any court of competent jurisdiction.

47. Until the Parliament otherwise provides, any question respecting the qualification of a senator or of a member of the House of Representatives, or respecting a vacancy in either House of the Parliament, and any question of a disputed election to either House, shall be determined by the House in which the question arises.

48. Until the Parliament otherwise provides, each senator and each member of the House of Representatives shall receive an allowance of four hundred pounds a year, to be reckoned from the day on which he takes his seat.*

49. The powers, privileges, and immunities of the Senate and of the House of Representatives, and of the members and the committees of each House, shall be such as are declared by the Parliament, and until declared shall be those of the Commons House of Parliament of the United Kingdom, and of its members and committees, at the establishment of the Commonwealth.

50. Each House of the Parliament may make rules and orders with respect to—

- (i) The mode in which its powers, privileges, and immunities may be exercised and upheld :
- (ii) The order and conduct of its business and proceedings either separately or jointly with the other House.

* The Parliamentary allowance was raised to £600 per annum in 1907 and to £1,000 per annum in 1920, but in the case of Ministers, the Presiding Officers of the two Houses, and the Chairmen of Committees, the allowance, in addition to the emoluments of office, was fixed at £400 per annum in 1907 and at £800 per annum in 1920. Several reductions under financial emergency legislation reduced the Parliamentary allowance to £750 per annum in 1932, but it was gradually restored to £1,000, the last reduction being removed in May, 1938, when the proviso for the reduced allowance payable, in addition to the emoluments of office, to holders of Parliamentary Office was also omitted. In June, 1947, the Parliamentary allowance was increased to £1,500 per annum, and at the same time the additional allowance (1920) of £200 per annum to the Leader of the Opposition in the Senate and of £100 per annum to the Leader of the Opposition in the House of Representatives were increased to £300 and £200 per annum respectively. In December, 1947 the Parliamentary Allowances Act was amended to provide for an additional allowance of £400 per annum to the Leader in the House of Representatives, other than the Leader of the Opposition, of a recognized political party, of which not less than ten members are members of the House of Representatives, and of which no member is a Minister of State.

PART V.—POWERS OF THE PARLIAMENT.*

51. The Parliament shall, subject to this Constitution, have power to make laws for the peace, order, and good government of the Commonwealth with respect to—

- (i) Trade and commerce with other countries, and among the States :
- (ii) Taxation ; but so as not to discriminate between States or parts of States :
- (iii) Bounties on the production or export of goods, but so that such bounties shall be uniform throughout the Commonwealth :
- (iv) Borrowing money on the public credit of the Commonwealth :
- (v) Postal, telegraphic, telephonic, and other like services :
- (vi) The naval and military defence of the Commonwealth and of the several States, and the control of the forces to execute and maintain the laws of the Commonwealth :
- (vii) Lighthouses, lightships, beacons and buoys :
- (viii) Astronomical and meteorological observations :
- (ix) Quarantine :
- (x) Fisheries in Australian waters beyond territorial limits :
- (xi) Census and statistics :
- (xii) Currency, coinage, and legal tender :
- (xiii) Banking, other than State banking ; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money :
- (xiv) Insurance, other than State insurance ; also State insurance extending beyond the limits of the State concerned :
- (xv) Weights and measures :
- (xvi) Bills of exchange and promissory notes :
- (xvii) Bankruptcy and insolvency :
- (xviii) Copyrights, patents of inventions and designs, and trade marks :
- (xix) Naturalization and aliens :
- (xx) Foreign corporations, and trading or financial corporations formed within the limits of the Commonwealth :
- (xxi) Marriage :
- (xxii) Divorce and matrimonial causes ; and in relation thereto, parental rights, and the custody and guardianship of infants :
- (xxiii) Invalid and old-age pensions :
- (xxiiiA) †*The provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances :*
- (xxiv) The service and execution throughout the Commonwealth of the civil and criminal process and the judgments of the courts of the States :
- (xxv) The recognition throughout the Commonwealth of the laws, the public Acts and records, and the judicial proceedings of the States :
- (xxvi) The people of any race, other than the aboriginal race in any State, for whom it is deemed necessary to make special laws :
- (xxvii) Immigration and emigration :
- (xxviii) The influx of criminals :
- (xxix) External affairs :
- (xxx) The relations of the Commonwealth with the islands of the Pacific :
- (xxxi) The acquisition of property on just terms from any State or person for any purpose in respect of which the Parliament has power to make laws :
- (xxxii) The control of railways with respect to transport for the naval and military purposes of the Commonwealth :
- (xxxiii) The acquisition, with the consent of a State, of any railways of the State on terms arranged between the Commonwealth and the State :

* Particulars of proposed laws which were submitted to referenda are referred to in Chapter III., General Government.

† Under Section 2 of the Constitution Alteration (Social Services) 1946, the Constitution was amended by the insertion of this paragraph.

- (xxxiv) Railway construction and extension in any State with the consent of that State :
- (xxxv) Conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State :
- (xxxvi) Matters in respect of which this Constitution makes provision until the Parliament otherwise provides :
- (xxxvii) Matters referred to the Parliament of the Commonwealth by the Parliament or Parliaments of any State or States, but so that the law shall extend only to States by whose Parliaments the matter is referred, or which afterwards adopt the law :
- (xxxviii) The exercise within the Commonwealth, at the request or with the concurrence of the Parliaments of all the States directly concerned, of any power which can at the establishment of this Constitution be exercised only by the Parliament of the United Kingdom or by the Federal Council of Australasia :
- (xxxix) Matters incidental to the execution of any power vested by this Constitution in the Parliament or in either House thereof, or in the Government of the Commonwealth, or in the Federal Judicature, or in any department or officer of the Commonwealth.

52. The Parliament shall, subject to this Constitution, have exclusive power to make laws for the peace, order, and good government of the Commonwealth with respect to—

- (i) The seat of Government of the Commonwealth, and all places acquired by the Commonwealth for public purposes :
- (ii) Matters relating to any department of the public service the control of which is by this Constitution transferred to the Executive Government of the Commonwealth :
- (iii) Other matters declared by this Constitution to be within the exclusive power of the Parliament.

53. Proposed laws appropriating revenue or moneys, or imposing taxation, shall not originate in the Senate. But a proposed law shall not be taken to appropriate revenue or moneys, or to impose taxation, by reason only of its containing provisions for the imposition or appropriation of fines or other pecuniary penalties, or for the demand or payment or appropriation of fees for licences, or fees for services under the proposed law.

The Senate may not amend proposed laws imposing taxation, or proposed laws appropriating revenue or moneys for the ordinary annual services of the Government.

The Senate may not amend any proposed laws so as to increase any proposed charge or burden on the people.

The Senate may at any stage return to the House of Representatives any proposed law which the Senate may not amend, requesting, by message, the omission or amendment of any items or provisions therein. And the House of Representatives may, if it thinks fit, make any of such omissions or amendments, with or without modifications.

Except as provided in this section, the Senate shall have equal power with the House of Representatives in respect of all proposed laws.

54. The proposed law which appropriates revenue or moneys for the ordinary annual services of the Government shall deal only with such appropriation.

55. Laws imposing taxation shall deal only with the imposition of taxation, and any provision therein dealing with any other matter shall be of no effect.

Laws imposing taxation, except laws imposing duties of customs or of excise, shall deal with one subject of taxation only ; but laws imposing duties of customs shall deal with duties of customs only, and laws imposing duties of excise shall deal with duties of excise only.

56. A vote, resolution, or proposed law for the appropriation of revenue or moneys shall not be passed unless the purpose of the appropriation has in the same session been recommended by message of the Governor-General to the House in which the proposal originated.

57. If the House of Representatives passes any proposed law, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, and if after an interval of three months the House of Representatives, in the same or the next session, again passes the proposed law with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may dissolve the Senate and the House of Representatives simultaneously. But such dissolution shall not take place within six months before the date of the expiry of the House of Representatives by effluxion of time.

If after such dissolution the House of Representatives again passes the proposed law, with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may convene a joint sitting of the members of the Senate and of the House of Representatives.

The members present at the joint sitting may deliberate and shall vote together upon the proposed law as last proposed by the House of Representatives, and upon amendments, if any, which have been made therein by one House and not agreed to by the other, and any such amendments which are affirmed by an absolute majority of the total number of the members of the Senate and House of Representatives shall be taken to have been carried, and if the proposed law, with the amendments, if any, so carried is affirmed by an absolute majority of the total number of members of the Senate and House of Representatives, it shall be taken to have been duly passed by both Houses of the Parliament, and shall be presented to the Governor-General for the Queen's assent.

58. When a proposed law passed by both Houses of the Parliament is presented to the Governor-General for the Queen's assent, he shall declare, according to his discretion, but subject to this Constitution, that he assents in the Queen's name, or that he withholds assent, or that he reserves the law for the Queen's pleasure.

The Governor-General may return to the House in which it originated any proposed law so presented to him, and may transmit therewith any amendments which he may recommend, and the Houses may deal with the recommendation.

59. The Queen may disallow any law within one year from the Governor-General's assent, and such disallowance on being made known by the Governor-General by speech or message to each of the Houses of the Parliament, or by Proclamation, shall annul the law from the day when the disallowance is so made known.

60. A proposed law reserved for the Queen's pleasure shall not have any force unless and until within two years from the day on which it was presented to the Governor-General for the Queen's assent the Governor-General makes known, by speech or message to each of the Houses of the Parliament, or by Proclamation, that it has received the Queen's assent.

CHAPTER II.—THE EXECUTIVE GOVERNMENT.

61. The executive power of the Commonwealth is vested in the Queen and is exercisable by the Governor-General as the Queen's representative, and extends to the execution and maintenance of this Constitution, and of the laws of the Commonwealth.

62. There shall be a Federal Executive Council to advise the Governor-General in the government of the Commonwealth, and the members of the Council shall be chosen and summoned by the Governor-General and sworn as Executive Councillors, and shall hold office during his pleasure.

63. The provisions of this Constitution referring to the Governor-General in Council shall be construed as referring to the Governor-General acting with the advice of the Federal Executive Council.

64. The Governor-General may appoint officers to administer such departments of State of the Commonwealth as the Governor-General in Council may establish.

Such officers shall hold office during the pleasure of the Governor-General. They shall be members of the Federal Executive Council, and shall be the Queen's Ministers of State for the Commonwealth.

After the first general election no Minister of State shall hold office for a longer period than three months unless he is or becomes a senator or a member of the House of Representatives.

65. Until the Parliament otherwise provides, the Ministers of State shall not exceed seven in number, and shall hold such offices as the Parliament prescribes, or, in the absence of provision, as the Governor-General directs.*

66. There shall be payable to the Queen out of the Consolidated Revenue Fund of the Commonwealth, for the salaries of the Ministers of State, an annual sum which until the Parliament otherwise provides, shall not exceed twelve thousand pounds a year.*

67. Until the Parliament otherwise provides, the appointment and removal of all other officers of the Executive Government of the Commonwealth shall be vested in the Governor-General in Council, unless the appointment is delegated by the Governor-General in Council or by a law of the Commonwealth to some other authority.

68. The command in chief of the naval and military forces of the Commonwealth is vested in the Governor-General as the Queen's representative.

69. On a date or dates to be proclaimed by the Governor-General after the establishment of the Commonwealth the following departments of the public service in each State shall become transferred to the Commonwealth :—

Posts, telegraphs, and telephones :	Lighthouses, lightships, beacons, and buoys :
Naval and military defence :	Quarantine.

But the departments of customs and of excise in each State shall become transferred to the Commonwealth on its establishment.

70. In respect of matters which, under this Constitution, pass to the Executive Government of the Commonwealth, all powers and functions which at the establishment of the Commonwealth are vested in the Governor of a Colony, or in the Governor of a Colony with the advice of his Executive Council, or in any authority of a Colony, shall vest in the Governor-General, or in the Governor-General in Council, or in the authority exercising similar powers under the Commonwealth, as the case requires.

CHAPTER III.—THE JUDICATURE.

71. The judicial power of the Commonwealth shall be vested in a Federal Supreme Court, to be called the High Court of Australia, and in such other federal courts as the Parliament creates, and in such other courts as it invests with federal jurisdiction. The High Court shall consist of a Chief Justice, and so many other Justices, not less than two, as the Parliament prescribes.†

72. The Justices of the High Court and of the other Courts created by the Parliament—

(i) Shall be appointed by the Governor-General in Council :

(ii) Shall not be removed except by the Governor-General in Council, on an address from both Houses of the Parliament in the same session, praying for such removal on the ground of proved misbehaviour or incapacity :

(iii) Shall receive such remuneration as the Parliament may fix ; but the remuneration shall not be diminished during their continuance in office.‡

* The Ministers of State were increased in 1915 to eight, in 1917 to nine, in 1935 to ten, in 1938 to eleven, and in 1941, as a special provision during the war, to nineteen. A sum of £1,650 was added to the annual appropriation for Ministers' salaries for each additional Minister and £800 per annum was allowed each Minister by the Parliamentary Allowances Act 1920 (increased from £400 per annum in 1907). Reductions under financial emergency legislation reached their maximum in 1932, when Ministers' salaries were reduced by 30 per cent. and their allowances as members by 25 per cent.; the reductions were gradually removed, finally in May, 1938, by the Parliamentary Salaries Adjustment Act 1938. This Act also made provision for an additional allowance of £1,500 per annum to the Prime Minister, and omitted the proviso relating to the reduced Parliamentary allowance payable to Ministers. The Ministers of State Act 1941 made provision for the salaries of Ministers, the appropriation, excluding the Prime Minister's allowance, not to exceed £21,250. The Ministers of State Act 1935-1946 extended into peace-time the war-time special provision as to the number and salaries of Ministers and the Ministers of State Act 1947 increased the appropriation for Ministers' salaries to £27,650.

† The Judiciary Act 1903 provided for a Chief Justice and two other Justices. Subsequent amendments to the Act increased the number of other Justices to four and six, and then reduced it to five. The Judiciary Act 1946 again increased it to six. The Judiciary Act 1903 also provided for the payment of a salary of £3,500 per annum to the Chief Justice and of £3,000 per annum to each other Justice. The Salaries (Statutory Offices) Adjustment Act 1947 increased these salaries respectively to £4,500 and £4,000 per annum.

73. The High Court shall have jurisdiction, with such exceptions and subject to such regulations as the Parliament prescribes, to hear and determine appeals from all judgments, decrees, orders, and sentences—

- (i) Of any Justice or Justices exercising the original jurisdiction of the High Court :
- (ii) Of any other federal court, or court exercising federal jurisdiction ; or of the Supreme Court of any State, or of any other court of any State from which at the establishment of the Commonwealth an appeal lies to the Queen in Council :
- (iii) Of the Inter-State Commission, but as to questions of law only :

and the judgment of the High Court in all such cases shall be final and conclusive.

But no exception or regulation prescribed by the Parliament shall prevent the High Court from hearing and determining any appeal from the Supreme Court of a State in any matter in which at the establishment of the Commonwealth an appeal lies from such Supreme Court to the Queen in Council.

Until the Parliament otherwise provides, the conditions of and restrictions on appeals to the Queen in Council from the Supreme Courts of the several States shall be applicable to appeals from them to the High Court.

74. No appeal shall be permitted to the Queen in Council from a decision of the High Court upon any question, howsoever arising, as to the limits *inter se* of the Constitutional powers of the Commonwealth and those of any State or States, or as to the limits *inter se* of the Constitutional powers of any two or more States, unless the High Court shall certify that the question is one which ought to be determined by Her Majesty in Council.

The High Court may so certify if satisfied that for any special reason the certificate should be granted, and thereupon an appeal shall lie to Her Majesty in Council on the question without further leave.

Except as provided in this section, this Constitution shall not impair any right which the Queen may be pleased to exercise by virtue of Her Royal prerogative to grant special leave of appeal from the High Court to Her Majesty in Council. The Parliament may make laws limiting the matters in which such leave may be asked, but proposed laws containing any such limitation shall be reserved by the Governor-General for Her Majesty's pleasure.

75. In all matters—

- (i) Arising under any treaty :
- (ii) Affecting consuls or other representatives of other countries :
- (iii) In which the Commonwealth, or a person suing or being sued on behalf of the Commonwealth, is a party :
- (iv) Between States, or between residents of different States, or between a State and a resident of another State :
- (v) In which a writ of Mandamus or prohibition or an injunction is sought against an officer of the Commonwealth :

the High Court shall have original jurisdiction.

76. The Parliament may make laws conferring original jurisdiction on the High Court in any matter—

- (i) Arising under this Constitution, or involving its interpretation :
- (ii) Arising under any laws made by the Parliament :
- (iii) Of Admiralty and maritime jurisdiction :
- (iv) Relating to the same subject-matter claimed under the laws of different States.

77. With respect to any of the matters mentioned in the last two sections the Parliament may make laws—

- (i) Defining the jurisdiction of any federal court other than the High Court :
- (ii) Defining the extent to which the jurisdiction of any federal court shall be exclusive of that which belongs to or is invested in the courts of the States :
- (iii) Investing any court of a State with federal jurisdiction.

78. The Parliament may make laws conferring rights to proceed against the Commonwealth or a State in respect of matters within the limits of the judicial power.

79. The federal jurisdiction of any court may be exercised by such number of judges as the Parliament prescribes.

80. The trial on indictment of any offence against any law of the Commonwealth shall be by jury, and every such trial shall be held in the State where the offence was committed, and if the offence was not committed within any State the trial shall be held at such place or places as the Parliament prescribes.

CHAPTER IV.—FINANCE AND TRADE.

81. All revenues or moneys raised or received by the Executive Government of the Commonwealth shall form one Consolidated Revenue Fund, to be appropriated for the purposes of the Commonwealth in the manner and subject to the charges and liabilities imposed by this Constitution.

82. The costs, charges, and expenses incident to the collection, management, and receipt of the Consolidated Revenue Fund shall form the first charge thereon; and the revenue of the Commonwealth shall in the first instance be applied to the payment of the expenditure of the Commonwealth.

83. No money shall be drawn from the Treasury of the Commonwealth except under appropriation made by law.

But until the expiration of one month after the first meeting of the Parliament the Governor-General in Council may draw from the Treasury and expend such moneys as may be necessary for the maintenance of any department transferred to the Commonwealth and for the holding of the first elections for the Parliament.

84. When any department of the public service of a State becomes transferred to the Commonwealth, all officers of the department shall become subject to the control of the Executive Government of the Commonwealth.

Any such officer who is not retained in the service of the Commonwealth shall, unless he is appointed to some other office of equal emolument in the public service of the State, be entitled to receive from the State any pension, gratuity, or other compensation, payable under the law of the State on the abolition of his office.

Any such officer who is retained in the service of the Commonwealth shall preserve all his existing and accruing rights, and shall be entitled to retire from office at the time, and on the pension or retiring allowance, which would be permitted by the law of the State if his service with the Commonwealth were a continuation of his service with the State. Such pension or retiring allowance shall be paid to him by the Commonwealth; but the State shall pay to the Commonwealth a part thereof, to be calculated on the proportion which his term of service with the State bears to his whole term of service, and for the purpose of the calculation his salary shall be taken to be that paid to him by the State at the time of the transfer.

Any officer who is, at the establishment of the Commonwealth, in the public service of a State, and who is, by consent of the Governor of the State with the advice of the Executive Council thereof, transferred to the public service of the Commonwealth, shall have the same rights as if he had been an officer of a department transferred to the Commonwealth and were retained in the service of the Commonwealth.

85. When any department of the public service of a State is transferred to the Commonwealth—

- (i) All property of the State of any kind, used exclusively in connexion with the department, shall become vested in the Commonwealth; but, in the case of the departments controlling customs and excise and bounties, for such time only as the Governor-General in Council may declare to be necessary;
- (ii) The Commonwealth may acquire any property of the State, of any kind used, but not exclusively used in connexion with the department; the value thereof shall, if no agreement can be made, be ascertained in, as nearly as

may be, the manner in which the value of land, or of an interest in land, taken by the State for public purposes is ascertained under the law of the State in force at the establishment of the Commonwealth :

- (iii) The Commonwealth shall compensate the State for the value of any property passing to the Commonwealth under this section ; if no agreement can be made as to the mode of compensation, it shall be determined under laws to be made by the Parliament :
- (iv) The Commonwealth shall, at the date of the transfer, assume the current obligations of the State in respect of the department transferred.

86. On the establishment of the Commonwealth, the collection and control of duties of customs and of excise, and the control of the payment of bounties, shall pass to the Executive Government of the Commonwealth.

87. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, of the net revenue of the Commonwealth from duties of customs and of excise not more than one-fourth shall be applied annually by the Commonwealth towards its expenditure.

The balance shall, in accordance with this Constitution, be paid to the several States, or applied towards the payment of interest on debts of the several States taken over by the Commonwealth.

88. Uniform duties of customs shall be imposed within two years after the establishment of the Commonwealth.

89. Until the imposition of uniform duties of customs—

- (i) The Commonwealth shall credit to each State the revenues collected therein by the Commonwealth.
- (ii) The Commonwealth shall debit to each State—
 - (a) The expenditure therein of the Commonwealth incurred solely for the maintenance or continuance, as at the time of transfer, of any department transferred from the State to the Commonwealth ;
 - (b) The proportion of the State, according to the number of its people, in the other expenditure of the Commonwealth.
- (iii) The Commonwealth shall pay to each State month by month the balance (if any) in favour of the State.

90. On the imposition of uniform duties of customs the power of the Parliament to impose duties of customs and of excise, and to grant bounties on the production or export of goods, shall become exclusive.

On the imposition of uniform duties of customs all laws of the several States imposing duties of customs or of excise, or offering bounties on the production or export of goods, shall cease to have effect, but any grant of or agreement for any such bounty lawfully made by or under the authority of the Government of any State shall be taken to be good if made before the thirtieth day of June, one thousand eight hundred and ninety-eight, and not otherwise.

91. Nothing in this Constitution prohibits a State from granting any aid to or bounty on mining for gold, silver, or other metals, nor from granting, with the consent of both Houses of the Parliament of the Commonwealth expressed by resolution, any aid to or bounty on the production or export of goods.

92. On the imposition of uniform duties of customs, trade, commerce, and intercourse among the States, whether by means of internal carriage or ocean navigation, shall be absolutely free.

But notwithstanding anything in this Constitution, goods imported before the imposition of uniform duties of customs into any State, or into any Colony which, whilst the goods remain therein, becomes a State, shall, on thence passing into another State within two years after the imposition of such duties, be liable to any duty chargeable on the importation of such goods into the Commonwealth, less any duty paid in respect of the goods on their importation.

93. During the first five years after the imposition of uniform duties of customs, and thereafter until the Parliament otherwise provides—

- (i) The duties of customs chargeable on goods imported into a State and afterwards passing into another State for consumption, and the duties of excise paid on goods produced or manufactured in a State and afterwards passing into another State for consumption, shall be taken to have been collected not in the former but in the latter State :
- (ii) Subject to the last sub-section, the Commonwealth shall credit revenue, debit expenditure, and pay balances to the several States as prescribed for the period preceding the imposition of uniform duties of customs.

94. After five years from the imposition of uniform duties of customs, the Parliament may provide, on such basis as it deems fair, for the monthly payment to the several States of all surplus revenue of the Commonwealth.

95. Notwithstanding anything in this Constitution, the Parliament of the State of Western Australia, if that State be an Original State, may, during the first five years after the imposition of uniform duties of customs, impose duties of customs on goods passing into that State and not originally imported from beyond the limits of the Commonwealth : and such duties shall be collected by the Commonwealth.

But any duty so imposed on any goods shall not exceed during the first of such years the duty chargeable on the goods under the law of Western Australia in force at the imposition of uniform duties, and shall not exceed during the second, third, fourth, and fifth of such years respectively, four-fifths, three-fifths, two-fifths, and one-fifth of such latter duty, and all duties imposed under this section shall cease at the expiration of the fifth year after the imposition of uniform duties.

If at any time during the five years the duty on any goods under this section is higher than the duty imposed by the Commonwealth on the importation of the like goods, then such higher duty shall be collected on the goods when imported into Western Australia from beyond the limits of the Commonwealth.

96. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, the Parliament may grant financial assistance to any State on such terms and conditions as the Parliament thinks fit.

97. Until the Parliament otherwise provides, the laws in force in any Colony which has become or becomes a State with respect to the receipt of revenue and the expenditure of money on account of the Government of the Colony, and the review and audit of such receipt and expenditure, shall apply to the receipt of revenue and the expenditure of money on account of the Commonwealth in the State in the same manner as if the Commonwealth, or the Government or an officer of the Commonwealth, were mentioned whenever the Colony, or the Government or an officer of the Colony, is mentioned.

98. The power of the Parliament to make laws with respect to trade and commerce extends to navigation and shipping, and to railways the property of any State.

99. The Commonwealth shall not, by any law or regulation of trade, commerce, or revenue, give preference to one State or any part thereof over another State or any part thereof.

100. The Commonwealth shall not, by any law or regulation of trade or commerce, abridge the right of a State or of the residents therein to the reasonable use of the waters of rivers for conservation or irrigation.

101. There shall be an Inter-State Commission, with such powers of adjudication and administration as the Parliament deems necessary for the execution and maintenance, within the Commonwealth, of the provisions of this Constitution relating to trade and commerce, and of all laws made thereunder.

102. The Parliament may by any law with respect to trade or commerce forbid, as to railways, any preference or discrimination by any State, or by any authority constituted under a State, if such preference or discrimination is undue and unreasonable, or unjust to any State ; due regard being had to the financial responsibilities incurred by any State in connexion with the construction and maintenance of its railways. But

no preference or discrimination shall, within the meaning of this section, be taken to be undue and unreasonable, or unjust to any State, unless so adjudged by the Inter-State Commission.

103. The members of the Inter-State Commission—

(i) Shall be appointed by the Governor-General in Council :

(ii) Shall hold office for seven years, but may be removed within that time by the Governor-General in Council, on an address from both Houses of the Parliament in the same session praying for such removal on the ground of proved misbehaviour or incapacity :

(iii) Shall receive such remuneration as the Parliament may fix ; but such remuneration shall not be diminished during their continuance in office.

104. Nothing in this Constitution shall render unlawful any rate for the carriage of goods upon a railway, the property of a State, if the rate is deemed by the Inter-State Commission to be necessary for the development of the territory of the State, and if the rate applies equally to goods within the State and to goods passing into the State from other States.

105. The Parliament may take over from the States their public debts [as existing at the establishment of the Commonwealth],* or a proportion thereof according to the respective numbers of their people as shown by the latest statistics of the Commonwealth, and may convert, renew, or consolidate such debts, or any part thereof ; and the State shall indemnify the Commonwealth in respect of the debts taken over, and thereafter the interest payable in respect of the debts shall be deducted and retained from the portions of the surplus revenue of the Commonwealth payable to the several States, or if such surplus is insufficient, or if there is no surplus, then the deficiency or the whole amount shall be paid by the several States.

105A.† (i) *The Commonwealth may make agreements with the States with respect to the public debts of the States, including—*

(a) *the taking over of such debts by the Commonwealth ;*

(b) *the management of such debts ;*

(c) *the payment of interest and the provision and management of sinking funds in respect of such debts ;*

(d) *the consolidation, renewal, conversion, and redemption of such debts ;*

(e) *the indemnification of the Commonwealth by the States in respect of debts taken over by the Commonwealth ; and*

(f) *the borrowing of money by the States or by the Commonwealth, or by the Commonwealth for the States.*

(ii) *The Parliament may make laws for validating any such agreement made before the commencement of this section.*

(iii) *The Parliament may make laws for the carrying out by the parties thereto of any such agreement.*

(iv) *Any such agreement may be varied or rescinded by the parties thereto.*

(v) *Every such agreement and any such variation thereof shall be binding upon the Commonwealth and the States parties thereto notwithstanding anything contained in this Constitution or the Constitution of the several States or in any law of the Parliament of the Commonwealth or of any State.*

(vi) *The powers conferred by this section shall not be construed as being limited in any way by the provisions of section one hundred and five of this Constitution.*

CHAPTER V.—THE STATES.

106. The Constitution of each State of the Commonwealth shall, subject to this Constitution, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be, until altered in accordance with the Constitution of the State.

* Under Section 2 of the Constitution Alteration (State Debts) 1909, the words in square brackets are omitted.

† Under Section 2 of the Constitution Alteration (State Debts) 1928, the Constitution was amended by the insertion of this section.

107. Every power of the Parliament of a Colony which has become or becomes a State, shall, unless it is by this Constitution exclusively vested in the Parliament of the Commonwealth or withdrawn from the Parliament of the State, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be.

108. Every law in force in a Colony which has become or becomes a State, and relating to any matter within the powers of the Parliament of the Commonwealth, shall, subject to this Constitution, continue in force in the State; and, until provision is made in that behalf by the Parliament of the Commonwealth, the Parliament of the State shall have such powers of alteration and of repeal in respect of any such law as the Parliament of the Colony had until the Colony became a State.

109. When a law of a State is inconsistent with a law of the Commonwealth, the latter shall prevail, and the former shall, to the extent of the inconsistency, be invalid.

110. The provisions of this Constitution relating to the Governor of a State extend and apply to the Governor for the time being of the State, or other chief executive officer or administrator of the government of the State.

111. The Parliament of a State may surrender any part of the State to the Commonwealth; and upon such surrender, and the acceptance thereof by the Commonwealth, such part of the State shall become subject to the exclusive jurisdiction of the Commonwealth.

112. After uniform duties of customs have been imposed, a State may levy on imports or exports, or on goods passing into or out of the State, such charges as may be necessary for executing the inspection laws of the State; but the net produce of all charges so levied shall be for the use of the Commonwealth; and any such inspection laws may be annulled by the Parliament of the Commonwealth.

113. All fermented, distilled, or other intoxicating liquids passing into any State or remaining therein for use, consumption, sale, or storage, shall be subject to the laws of the State as if such liquids had been produced in the State.

114. A State shall not, without the consent of the Parliament of the Commonwealth, raise or maintain any naval or military force, or impose any tax on property of any kind belonging to the Commonwealth, nor shall the Commonwealth impose any tax on property of any kind belonging to a State.

115. A State shall not coin money, nor make anything but gold and silver coin a legal tender in payment of debts.

116. The Commonwealth shall not make any law for establishing any religion, or for imposing any religious observance, or for prohibiting the free exercise of any religion, and no religious test shall be required as a qualification for any office or public trust under the Commonwealth.

117. A subject of the Queen, resident in any State, shall not be subject in any other State to any disability or discrimination which would not be equally applicable to him if he were a subject of the Queen resident in such other State.

118. Full faith and credit shall be given, throughout the Commonwealth, to the laws, the public Acts and records, and the judicial proceedings of every State.

119. The Commonwealth shall protect every State against invasion and, on the application of the Executive Government of the State, against domestic violence.

120. Every State shall make provision for the detention in its prisons of persons accused or convicted of offences against the laws of the Commonwealth, and for the punishment of persons convicted of such offences, and the Parliament of the Commonwealth may make laws to give effect to this provision.

CHAPTER VI.—NEW STATES.

121. The Parliament may admit to the Commonwealth or establish new States, and may upon such admission or establishment make or impose such terms and conditions, including the extent of representation in either House of the Parliament, as it thinks fit.

122. The Parliament may make laws for the government of any territory surrendered by any State to and accepted by the Commonwealth, or of any territory placed by the Queen under the authority of and accepted by the Commonwealth, or otherwise acquired by the Commonwealth, and may allow the representation of such territory in either House of the Parliament to the extent and on the terms which it thinks fit.

123. The Parliament of the Commonwealth may, with the consent of the Parliament of a State, and the approval of the majority of the electors of the State voting upon the question, increase, diminish, or otherwise alter the limits of the State, upon such terms and conditions as may be agreed on, and may, with the like consent, make provision respecting the effect and operation of any increase or diminution or alteration of territory in relation to any State affected.

124. A new State may be formed by separation of territory from a State, but only with the consent of the Parliament thereof, and a new State may be formed by the union of two or more States or parts of States, but only with the consent of the Parliaments of the States affected.

CHAPTER VII.—MISCELLANEOUS.

125. The seat of Government of the Commonwealth shall be determined by the Parliament, and shall be within territory which shall have been granted to or acquired by the Commonwealth, and shall be vested in and belong to the Commonwealth, and shall be in the State of New South Wales, and be distant not less than one hundred miles from Sydney.

Such territory shall contain an area of not less than one hundred square miles, and such portion thereof as shall consist of Crown lands shall be granted to the Commonwealth without any payment therefor.

The Parliament shall sit at Melbourne until it meet at the seat of Government.

126. The Queen may authorize the Governor-General to appoint any person, or any persons jointly or severally, to be his deputy or deputies within any part of the Commonwealth, and in that capacity to exercise during the pleasure of the Governor-General such powers and functions of the Governor-General as he thinks fit to assign to such deputy or deputies, subject to any limitations expressed or directions given by the Queen; but the appointment of such deputy or deputies shall not affect the exercise by the Governor-General himself of any power or function.

127. In reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted.

CHAPTER VIII.—ALTERATION OF THE CONSTITUTION.

128. This Constitution shall not be altered except in the following manner :—

The proposed law for the alteration thereof must be passed by an absolute majority of each House of the Parliament, and not less than two nor more than six months after its passage through both Houses the proposed law shall be submitted in each State to the electors qualified to vote for the election of members of the House of Representatives.

But if either House passes any such proposed law by an absolute majority, and the other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, and if after an interval of three months the first-mentioned House in the same or the next session again passes the proposed law by an absolute majority with or without any amendment which has been made or agreed to by the other House, and such other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, the Governor-General may submit the proposed law as last proposed by the first-mentioned House, and either with or without any amendments subsequently agreed to by both Houses, to the electors in each State qualified to vote for the election of the House of Representatives.

When a proposed law is submitted to the electors the vote shall be taken in such manner as the Parliament prescribes. But until the qualification of electors of members of the House of Representatives becomes uniform throughout the Commonwealth, only one-half the electors voting for and against the proposed law shall be counted in any State in which adult suffrage prevails.

And if in a majority of the States a majority of the electors voting approve the proposed law, and if a majority of all the electors voting also approve the proposed law, it shall be presented to the Governor-General for the Queen's assent.

No alteration diminishing the proportionate representation of any State in either House of the Parliament, or the minimum number of representatives of a State in the House of Representatives, or increasing, diminishing, or otherwise altering the limits of the State, or in any manner affecting the provisions of the Constitution in relation thereto, shall become law unless the majority of the electors voting in that State approve the proposed law.

SCHEDULE.

OATH.

I, A.B., do swear that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law. So HELP ME GOD !

AFFIRMATION.

I, A.B., do solemnly and sincerely affirm and declare that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law.

(NOTE.—*The name of the King or Queen of the United Kingdom of Great Britain and Ireland for the time being is to be substituted from time to time.*)

3. **The Royal Proclamation.**—The preceding Act received the Royal assent on the 9th July, 1900. This made it lawful to declare that the people of Australia should be united in a Federal Commonwealth. This proclamation, made on the 17th September, 1900, constituted the Commonwealth as from the 1st January, 1901 ; it reads as follows :—

BY THE QUEEN.

A PROCLAMATION.

(Signed) VICTORIA R.

WHEREAS by an Act of Parliament passed in the Sixty-third and Sixty-fourth Years of Our Reign, intituled "An Act to constitute the Commonwealth of *Australia*," it is enacted that it shall be lawful for the Queen, with the advice of the Privy Council, to declare by Proclamation, that, on and after a day therein appointed, not being later than One year after the passing of this Act, the people of *New South Wales, Victoria, South Australia, Queensland, and Tasmania*, and also, if Her Majesty is satisfied that the people of *Western Australia* have agreed thereto, of *Western Australia*, shall be united in a Federal Commonwealth under the name of the Commonwealth of Australia.

And whereas We are satisfied that the people of *Western Australia* have agreed thereto accordingly.

We therefore, by and with the advice of Our Privy Council, have thought fit to issue this Our Royal Proclamation, and We do hereby declare that on and after the First day of *January* One thousand nine hundred and one, the people of *New South Wales, Victoria, South Australia, Queensland, Tasmania, and Western Australia* shall be united in a Federal Commonwealth under the name of the Commonwealth of *Australia*.

Given at Our Court at *Balmoral* this Seventeenth day of *September*, in the Year of Our Lord One thousand nine hundred, and in the Sixty-fourth Year of Our Reign.

GOD SAVE THE QUEEN.

CHAPTER II.

PHYSIOGRAPHY.

§ 1. General Description of Australia.

1. *Geographical Position.*—(i) *General.* The Australian Commonwealth, which includes the island continent of Australia proper and the island of Tasmania, is situated in the Southern Hemisphere, and comprises in all an area of about 2,974,581 square miles, the mainland alone containing about 2,948,366 square miles. Bounded on the west and east by the Indian and Pacific Oceans respectively, it lies between longitudes $113^{\circ} 9' \text{ E.}$ and $153^{\circ} 39' \text{ E.}$, while its northern and southern limits are the parallels of latitude $10^{\circ} 41' \text{ S.}$ and $39^{\circ} 8' \text{ S.}$, or, including Tasmania, $43^{\circ} 39' \text{ S.}$ On its north are the Timor and Arafura Seas and Torres Strait—on its south the Southern Ocean and Bass Strait. The extreme points are “Steep Point” on the west, “Cape Byron” on the east, “Cape York” on the north, “Wilson’s Promontory” on the south, or, if Tasmania be included, “South-East Cape.”

(ii) *Tropical and Temperate Regions.* Of the total area of Australia nearly 40 per cent. lies within the tropics. Assuming, as is usual, that the latitude of the Tropic of Capricorn is $23^{\circ} 30' \text{ S.}$ (its mean value for 1949 was $23^{\circ} 26' 45.30''$), the areas within the tropical and temperate zones are approximately as follows:—

AUSTRALIA : AREAS OF TROPICAL AND TEMPERATE REGIONS.

Area.	N.S.W. (a)	Vic.	Qld.	S. Aust.	W. Aust.	Tas.	N. Terr.	Total.
Within Tropical Zone sq. miles	359,000	..	364,000	..	426,320	1,149,320
Within Temperate Zone sq. miles	310,372	87,884	311,500	380,070	611,920	26,215	97,300	1,825,261
Total Area sq. miles	310,372	87,884	670,500	380,070	975,920	26,215	523,620	2,974,581
Ratio of Tropical part to whole State	0.535	..	0.373	..	0.814	0.386
Ratio of Temperate part to whole State	I	I	0.465	I	0.627	I	0.186	0.614

(a) Includes Australian Capital Territory.

Thus the tropical part is roughly about five-thirteenths of the whole of Australia (0.386) or, of the three territories with areas within the tropical zone, about one-half (0.530).

2. *Area of Australia compared with Areas of other Countries.*—The area of Australia is almost as great as that of the United States of America, four-fifths of that of Canada, more than one-fifth of the area of the British Commonwealth, nearly three-fourths of the whole area of Europe, and about 25 times as large as Great Britain and

Ireland. This great area, coupled with a limited population, renders the solution of the problem of Australian development a particularly difficult one. The areas of Australia and of certain other countries are shown in the following table :—

AREA OF AUSTRALIA AND OF OTHER COUNTRIES, *Circa 1947.*

Country.	Area.	Country.	Area.
Continental Divisions—	Sq. miles.	Africa—continued.	sq. miles.
Europe (a)	1,913,000	Angola	481,000
Asia (a)	10,349,000	Union of South Africa ..	472,000
U.S.S.R. (Europe and Asia)	8,599,000	Egypt	386,000
Africa	11,620,000	Nigeria and Protectorate ..	373,000
North and Central America		Tanganyika Territory ..	363,000
and West Indies ..	8,666,000	Ethiopia	350,000
South America	6,927,000	South-West Africa ..	318,000
Oceania, etc.	3,305,000	Mozambique	298,000
Total, excluding Arctic		Northern Rhodesia ..	290,000
and Antarctic Conts.	51,379,000	Bechuanaland Protectorate	275,000
		Madagascar	229,000
Europe(a)—		Kenya Colony and Protec-	
France	213,000	torate	225,000
Spain (incl. possessions) ..	195,000	Other	1,384,000
Sweden	173,000	Total	11,620,000
Germany	138,000		
Finland	130,000	North and Central America—	
Norway	125,000	Canada	3,690,000
Poland	120,000	United States of America ..	3,022,000
Italy	116,000	Mexico	760,000
Yugoslavia	99,000	Alaska	586,000
United Kingdom	94,000	Newfoundland and Labra-	
Rumania	92,000	dor	153,000
Other	418,000	Nicaragua	59,000
Total	1,913,000	Honduras	57,000
		Other	339,000
Asia(a)—		Total	8,666,000
China and Dependencies ..	3,750,000		
India	1,220,000	South America—	
Indonesia(b)	735,000	Brazil	3,288,000
Iran	628,000	Argentine Republic ..	1,079,000
Mongolian Peoples' Republic	626,000	Peru	482,000
Saudi Arabia	597,000	Colombia (excl. of Panama)	449,000
Pakistan	361,000	Bolivia	415,000
Turkey	287,000	Venezuela	352,000
French Indo-China ..	272,000	Chile	286,000
Burma	262,000	Ecuador	176,000
Afghanistan	251,000	Paraguay	157,000
Siam	198,000	Other	262,000
Other	1,153,000	Total	6,927,000
Total	10,349,000		
U.S.S.R.	8,599,000	Oceania, etc.—	
		Commonwealth of Australia	2,975,000
Africa—		New Zealand and Depen-	
French West Africa ..	1,805,000	dencies	104,000
French Equatorial Africa ..	969,000	New Guinea	93,000
Anglo-Egyptian Sudan ..	967,000	Papua	91,000
Belgian Congo	905,000	Other	42,000
Algeria	851,000	Total	3,305,000
Libya	679,000	British Commonwealth	13,258,000

(a) Excludes U.S.S.R., shown below.

(b) Includes Dutch New Guinea.

The countries and areas shown in the table are obtained from the *Demographic Yearbook*, 1948, published by the United Nations.

3. Areas of Political Subdivisions.—As already stated, Australia consists of six States and the Northern and Australian Capital Territories. The areas of these, and their proportions of the total of Australia, are shown in the following table:—

AUSTRALIA : AREA OF STATES AND TERRITORIES.

State or Territory.			Area.	Percentage on Total.
			Sq. miles.	%
New South Wales	309,433	10.40
Victoria	87,884	2.96
Queensland	670,500	22.54
South Australia	380,070	12.78
Western Australia	975,920	32.81
Tasmania	26,215	0.88
Northern Territory	523,620	17.60
Australian Capital Territory	939	0.03
Total	2,974,581	100.00

4. Coastal Configuration—(i) *General*. There are no striking features in the configuration of the coast; the most remarkable indentations are the Gulf of Carpentaria on the north and the Great Australian Bight on the south. The Cape York Peninsula on the extreme north is the only other remarkable feature in the outline. In Official Year Book No. 1 an enumeration is given of the features of the coast-line of Australia (see pp. 60–68).

(ii) *Coast-line*. The lengths of coast-line, excluding minor indentations, of each State and of the whole continent, and the area per mile of coast-line, are shown in the following table:—

AUSTRALIA : COAST-LINE AND AREA PER MILE THEREOF.

State.	Coast-line.	Area per Mile of Coast-line.	State.	Coast-line.	Area per Mile of Coast-line.
	Miles.	Sq. miles.		Miles.	Sq. miles.
New South Wales(a)	700	443	Western Australia	4,350	224
Victoria..	680	129	Northern Territory	1,040	503
Queensland	3,000	223	Continent (b)	11,310	261
South Australia	1,540	247	Tasmania	900	29

(a) Includes Australian Capital Territory.

(b) Area 2,948,366 square miles.

For the entire Commonwealth of Australia this gives a coast-line of 12,210 miles and an average of 244 square miles for one mile of coast-line. According to Strelbitski, Europe has only 75 square miles of area to each mile of coast-line, and, according to more recent figures, England and Wales have only one-third of this, 25 square miles.

(iii) *Historical Significance of Coastal Names*. It is interesting to trace the voyages of some of the early navigators by the names bestowed by them on various coastal features—thus Dutch names are found on various points of the Western Australian coast, in Nuyts' Archipelago, in the Northern Territory, and in the Gulf of Carpentaria; Captain Cook can be followed along the coasts of New South Wales and Queensland; Flinders' track is easily recognized from Sydney southwards, as far as Cape Catastrophe, by the numerous Lincolnshire names bestowed by him; and the French navigators of the end of the eighteenth and the beginning of the nineteenth century have left their names all along the Western Australian, South Australian and Tasmanian coasts.

5. *Geographical Features of Australia*.—In separate issues of earlier Official Year Books fairly complete information has been given concerning some special geographical element. The nature of this information and its position in the various issues can be readily ascertained on reference to the special index following the index to maps and graphs at the end of this issue.

6. **Fauna, Flora, Geology and Seismology of Australia.**—Special articles dealing with these features have appeared in previous issues of the Official Year Book, but limits of space naturally preclude their repetition in each volume. As pointed out in par. 5, however, the nature and position of these articles can be readily ascertained from the special index.

§ 2. Climate and Meteorology of Australia.*

1. **Introductory.**—In Official Year Book No. 3, pp. 79 and 80, some account is given of the history of Australian meteorology, including a reference to the development of magnetic observations. In Official Year Book No. 4, pp. 84 and 87, will be found a short sketch of the creation and organization of the Commonwealth Bureau of Meteorology, and a résumé of the subjects dealt with at the Meteorological Conference in 1907.

2. **Organization of the Meteorological Service.**—The Meteorological Branch is organized with a head-quarters' staff at the Central Meteorological Bureau, Melbourne, and Divisional Meteorological Bureaux at Adelaide, Brisbane, Hobart, Sydney, and Perth. Aviation services are provided by Forecasting and Observer Stations at the main terminals and at staging stations along the national air routes. At international airports, forecasting stations, working to agreed procedures, maintain integrated services with the staging stations in adjoining territories.

The Central Meteorological Bureau is organized in specializing sections, which include :—

- (i) *Aviation and Transport Section.*—For the administration and supervision of Aviation Meteorological Offices at Royal Australian Air Force and civil aerodromes.
- (ii) *Climatological and Statistical Section.*—For the organization of the climatological network of the Commonwealth, and the receipt and compilation of climatological statistics for a wide variety of purposes. These are applied to departmental, public, economic, and scientific purposes by the climatologists of the Section in the form of publications and special papers issued from time to time.
- (iii) *Central Analysis and Weather Development Section.*—For the preparation of analyses and advisory statements (distributed daily amongst all meteorological offices in the Commonwealth, and transmitted overseas for the benefit of International Meteorological Services), and the development of practising procedures for the application of new meteorological theories and techniques as they arise.
- (iv) *Training and Publications Section.*—For the organization and supervision of all training activities throughout the Meteorological Service, and the editing, collation and publication of Meteorological manuals, pamphlets, and papers. In addition, this Section attends to the meteorological training of Civil Aviation pilots, and to the associated examinations for promotion within the Australian Aviation Services.
- (v) *Special Investigations Section.*—For investigation of problems referred by departmental and public interests, and for the preparation of reports on special aspects in applied meteorology.
- (vi) *Seasonal Forecasting Research Section.*—For investigation of methods and techniques for extended range forecasting.
- (vii) *Works and Laboratory.*—For the design, specification, maintenance and repair of meteorological equipment and supplies.
- (viii) *Administrative Section.*—For the general administration of the Departmental Services.

Divisional Bureaux in the capital cities of the various States are responsible for the administration of Meteorological and Climatological Services within the region of the State, and provide all necessary forecasting and advisory services for the public and other interests and attend to climatological problems in respect of the region which they control.

The Aviation Service, co-ordinated by the Aviation Section at Central Office, is responsible for all meteorological services required for aviation over the routes and route sections of the regions in which they are located.

* Prepared from data supplied by the Director, Commonwealth Meteorological Bureau.

3. **Meteorological Publications.**—Reference to publications issued by the Central Meteorological Bureau appears in Official Year Book No. 22, pp. 40 and 41, and No. 34, p. 11. The following publications have since been issued:—Bulletin No. 28, "Duststorms in Australia"; Bulletin No. 29, "Report on the Divergence Theory of the Formation of Cyclones"; Bulletin No. 30, "Synoptic Analysis over South-West Pacific Area"; Bulletin No. 31, "Coastal Fogs in Australia"; Bulletin No. 32, "Frost in the Australian Region"; Bulletin No. 33, "Discussion of Seven Years of Aerological Observations by Aeroplane at Sydney"; Bulletin No. 34, "Bradfield Scheme for Watering the Inland"; Bulletin No. 35, "A Study of Average Hourly Values of Temperature, Relative Humidity and Saturation Deficit in the Australian Region from Records of Capital City Bureaux"; Bulletin No. 36, "Weather Conditions Affecting Aviation over the Tasman Sea"—Part IV., "Flying Conditions over the Tasman Sea" (1940-44); Bulletin No. 37, "Discussion of Four Years of Aerological Observations obtained by means of Aeroplanes near Perth"; Studies in Applied Climatology, Western Australia—Pamphlet No. 1, "Climate of the West Australian Wheat Belt with Special Reference to Rainfall over Marginal Areas"; Pamphlet No. 2, "Climate of the South-West Wheat Belt of New South Wales"; Bulletin No. 40, "Meteorology of the Indian Ocean Area between Australia and India"; "Analysis and Forecasting in the South-West Pacific Area"; and "Set of Typical Summer and Winter Weather Charts (for use in Schools)".

4. **Equipment.**—The determination of the climatological data has been made by records of the following instruments:—

- (i) *Rainfall.* Rainfall has been measured by a cylindrical gauge generally 8 inches in diameter.
- (ii) *Temperature.* Extreme daily temperatures have been recorded by means of self-registering maximum and minimum thermometers which are read and set daily.
- (iii) *Humidity.* Humidities have been determined by the aid of tables from readings of dry and wet bulb thermometers.
- (iv) *Atmospheric Pressure.* Pressures have been measured by mercurial barometers of the Kew (or Fortin) pattern.
- (v) *Evaporation.* The standard evaporimeter in use consists of a cylindrical galvanized iron tank 3 feet in diameter and 3 feet deep, with a water jacket. Concrete tanks of similar form and dimensions are also used.
- (vi) *Wind.* Data concerning wind have been obtained either by "Robinson" cup anemometer, "Dines" pressure tube anemometer or by "Machin" cup anemometer.

5. **General Description of Australia.**—A considerable portion (0.530) of three divisions of Australia is north of the tropic of Capricorn—that is to say, within Queensland, Western Australia and the Northern Territory, no less than 1,149,320 square miles belong to the tropical zone and 1,020,720 to the temperate zone. The whole area of Australia within the temperate zone, however, is 1,825,261 square miles; thus the tropical part is about 0.386, or about five-thirteenths of the whole, or the "temperate" region is half as large again as the "tropical" (more accurately 1.588). By reason of its insular geographical position and the absence of striking physical features whether in marine gulfs or in important mountains, Australia is, on the whole, less subject to extremes of weather than are regions of similar area in other parts of the globe, and latitude for latitude Australia is, on the whole, more temperate.

The average elevation of the surface of the land is low, probably close to 900 feet above the sea. The altitudes range up to a little over 7,300 feet, hence its climate embraces a great many features, from the characteristically tropical to what is essentially alpine, a fact indicated in some measure by the name Australian Alps given to the southern portion of the Great Dividing Range.

On the coast, the rainfall is often abundant and the atmosphere moist, but in some portions of the interior is very limited, and the atmosphere dry. The distribution of forest, therefore, with its climatic influence, is very uneven. In the interior, in places, there are fine belts of trees, but there are large areas also which are treeless, and here the air is hot and parching in summer. Again, on the coast, even so far south as latitude 35°, the vegetation is tropical in its luxuriance, and to some extent also in character. Climatologically, therefore, Australia may be said to present a great variety of features.

6. **Meteorological Divisions.**—Reference to the divisions adopted by the Commonwealth Meteorologist will be found in Official Year Book No. 22, p. 41.

7. **Temperature.**—(i) *Effective Temperature.* When a meteorologist speaks of temperature he means the temperature of the air indicated by a thermometer sheltered from precipitation, from direct rays of the sun and from radiation of heat from the ground and neighbouring objects, yet freely exposed to the circulation of the air. In other words, he means temperature measured under conditions standardized as near as possible in a Stevenson Screen, which is the standard housing for meteorological thermometers.

This shade temperature as measured by a "dry bulb" thermometer shows only the actual temperature experienced by dry inorganic substances, not the *sensible* temperatures felt by organic bodies. In the case of human beings, sensible temperature is affected by the rate of conduction of heat to or from the body by moving air and also by the rate of cooling due to evaporation from the skin and respiratory passages. The wind and humidity therefore determine the sensible temperature.

The humidity (relative humidity) is determined from the readings of the dry and wet bulb thermometers. Of late years, however, with increasing interest in human comfort in tropical climates, another term, *effective* temperature, has come into use. It may be defined as "the temperature of a still, saturated atmosphere which would on the average produce the same feeling of warmth or cold as the atmosphere in question".*

Later investigations have established "comfort zones"† bounded by limits of effective temperature within which people will feel comfortable. American research workers have determined the following figures :—‡

COMFORT ZONES : EFFECTIVE TEMPERATURES.

Season.				No subjects feel comfortable below—	Fifty per cent. of subjects feel comfortable between—	No subjects feel comfortable above—
Winter	60° F.	63° and 71° F.	74° F.
Summer	64° F.	66° and 75° F.	79° F.

Isotherms of effective temperature (not corrected for altitude) have been determined for Australia.§ A map showing effective temperature for Australia for January (9 a.m.) will be found on page 33.

It will be seen that the 80° F. isotherm is confined to a very narrow tract of country on the north-west coast of Western Australia. The 75° F. isotherm extends broadly from Onslow on the north-west coast of Western Australia to Daly Waters to Camooweal to Moreton in Cape York Peninsula following in a general way the coastline of Northern Australia but from 100 to 300 miles inland.

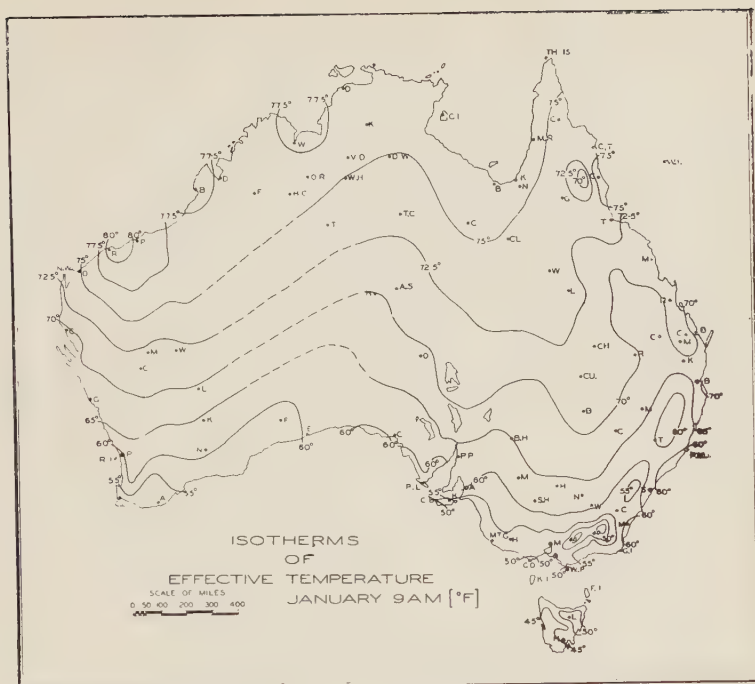

Queensland investigators¶ in recent years have divided some towns of Queensland into three classes on the basis of deviation from comfort :—

Class 1 (Sub-tropics).—Quite suitable for Caucasian habitation—Rockhampton, Bundaberg, Brisbane, Longreach, Charleville.

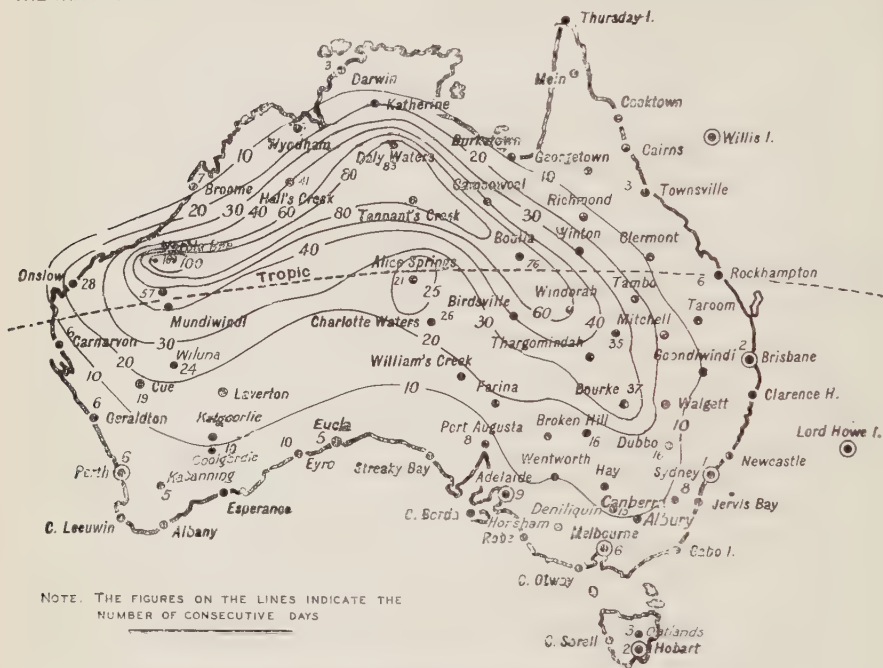

Class 2 (Marginal tropics).—Suitable for Caucasian habitation, but requires adaptation in summer—Mackay, Townsville.

Class 3 (Tropics).—(a) Permissible for Caucasian habitation but requires selection and marked adaptation—Cardwell, Cairns, Cloncurry. (b) Not suitable for continuous Caucasian habitation—Cape York, Burketown.

BUREAU OF METEOROLOGY MELBOURNE.
MONTHLY DISTRIBUTION OF RAINFALL
OVER AUSTRALIA.

REVISED TO END OF 1939.

BY THE MINISTER OF STATE FOR THE AIR BY

H. N. WARREN
DIRECTOR

SCALE OF MILES
0 50 100 200

EXPLANATION. THE GRAPHS SHOW THE AVERAGE RAINFALL IN EACH MONTH OF THE YEAR IN THE VARIOUS RAINFALL DISTRICTS, THE BOUNDARIES OF WHICH ARE SHOWN BY THE BROKEN LINES ON THE MAP. THE NUMBERS ON THE MAP REFER TO THE DISTRICTS. THE CORRESPONDING DISTRICT NAMES ARE GIVEN IN THE INSERT ON PAGE 37.

THE COLUMNS FOR THE SUCCESSIVE MONTHS, JANUARY TO DECEMBER, RUN FROM LEFT TO RIGHT.

THE LENGTH OF A VERTICAL COLUMN REPRESENTS THE AVERAGE MONTHLY RAINFALL ACCORDING TO THE SCALE GIVEN BELOW.

LOCAL MEAN TIME

WIND ROSES

SHOWING MONTHLY FREQUENCY
DISTRIBUTION OF WIND DIRECTIONS
TO EIGHT POINTS OF THE COMPASS

3 P.M.

LOCAL MEAN TIME

WIND ROSES

SHOWING MONTHLY FREQUENCY
DISTRIBUTION OF WIND DIRECTIONS
TO EIGHT POINTS OF THE COMPASS

EXPLANATION.

The sides of the octagons face towards the cardinal and semi-cardinal points. Projecting from each side are twelve columns representing the twelve months of the year, and the lengths of the columns are proportional to the percentage frequencies of the winds from the given direction in the successive months, working round clockwise from January to December. The scale is shown above, and the outer octagons have been drawn, separated from the inner octagons by a distance representing 12%. The tops of the columns would all be on these outer octagons if winds from the eight directions were equally frequent and there were no calms. The percentage frequency of calms in the 12 months is shown by figures within the octagons. Small dashes within the inner octagons indicate months when the percentage of winds from that direction is practically zero.

EXPLANATION.

The sides of the octagons face towards the cardinal and semi-cardinal points. Projecting from each side are twelve columns representing the twelve months of the year, and the lengths of the columns are proportional to the percentage frequencies of the winds from the given direction in the successive months, working round clockwise from January to December. The scale is shown above, and the outer octagons have been drawn, separated from the inner octagons by a distance representing 12%. The tops of the columns would all be on these outer octagons if winds from the eight directions were equally frequent and there were no calms. The percentage frequency of calms in the 12 months is shown by figures within the octagons. Small dashes within the inner octagons indicate months when the percentage of winds from that direction is practically zero.

These results of recent years bear out investigations made previously in Australia* in which the atmospheric vapour pressure was used as a measure of comfort, its value for this purpose being that it has equal effect in both indoor and outdoor climates. The limits of comfort range from .2 to .5 inch of vapour pressure. After drawing isopleths for effective temperature (not corrected for altitude), mean vapour pressure reduced to a logarithmic scale, and mean wet bulb, it is found that there is close agreement in defining zones of relative discomfort.

(ii) *Seasons.* The Australian seasons are:—Summer, December to February; autumn, March to May; winter, June to August; spring, September to November. In most parts of Australia, January is the hottest month, but in Tasmania and southern Victoria, February is the hottest; in the tropical north, probably because the cooling "monsoon" rains occur in late summer, December is the hottest month, and at Darwin, November.

On a rainfall basis, in the tropical north the year is divisible into "wet" and "dry" seasons, but on the basis of temperature and physical comfort the "dry" season can be further sub-divided into two parts—"cool dry" and "warm dusty". †

(a) "*Cool dry*" Season. From May to August. The average maximum temperature ranges from 80° to 85° F., the relative humidity is low and in inland areas cold nights are experienced when the temperature drops to 40° F. The skies generally are cloudless, but in about one year in three during June or July one to two inches of rain fall.

(b) "*Warm dusty*" Season. From the end of August temperatures rise and reach a maximum in October or the beginning of November. Temperatures of over 120° F. have been recorded.

(c) "*Wet*" Season. After the first of the heavy storms, the maximum temperatures fall but still remain high with high relative humidity. At Wyndham during January, 1944 the minimum temperature did not drop below 75° F. for fourteen consecutive days. A maximum of over 100° F. was recorded on each rainless day.

In Central as in Northern Australia during the hottest months, the average temperatures range from 80° to 85° F., whereas in Southern Australia they vary from 65° to 70°.

Throughout Australia the coldest month is July, when only a very narrow strip of the northern sea-board has an average temperature as high as 75°. Over the southern half of the continent, July temperatures range from 55° to 45° at elevations below 1,500 feet and fall as low as 35° on the Australian Alps. Here the temperature seldom, if ever, reaches 100° even in the hottest of seasons. Hotham Heights (6,100 feet above Mean Sea Level) recorded the highest maximum of 94.0° on 18th December, 1934. In winter, readings slightly below zero are occasionally recorded on the extreme heights.

Tasmania as a whole enjoys a moderate and equable range of temperature throughout the year, although occasionally hot winds may cause the temperature to rise to 100° in the eastern part of the State.

(iii) *Comparisons with other Countries.* In respect of Australian temperatures generally, it may be pointed out that the mean annual isotherm for 70° F. extends in South America and South Africa as far south as latitude 33°, while in Australia it reaches only as far south as latitude 30°, thus showing that, on the whole, Australia has, latitude for latitude, a more temperate climate than other places in the Southern Hemisphere.

The comparison is even more favourable when the Northern Hemisphere is included, for in the United States of America the 70° isotherm extends in several of the western States as far north as latitude 41°. In Europe, the same isotherm reaches almost to the southern shores of Spain, passing afterwards, however, along the northern shores of Africa till it reaches the Red Sea, when it bends northward along the eastern shore of the Mediterranean till it reaches Syria. In Asia, nearly the whole of the land area south of latitude 40° N. has a higher temperature than 70°.

* Barkley, H. Zones of Relative Physical Comfort in Australia. Met. Bull. 20, 1934.
† Maze, W. H. Austr. Geog. June, 1945. Settlement in E. Kimberleys.

The extreme range of temperature is less than 100° over practically the whole of Australia, that figure being only slightly exceeded at a very few places; it is mostly 70° to 90° over inland areas, and somewhat less on the coast. In parts of Asia and North America, the extreme range exceeds 130° and 150° in some localities.

Along the northern shores of Australia the temperatures are very equable. At Darwin, for example, the difference in the means for the hottest and coldest month is only 8.4° , and the extreme readings for the year, or the highest maximum on record and the lowest minimum, show a difference of under 50° .

The highest temperature recorded in Australia was 127.5° F. at Cloncurry on 16th January, 1889. The world's highest (136° F.) was recorded at Azizia (Tripoli) on 13th August, 1922. The lowest temperature ever recorded in Australia was -8° F. at Charlotte Pass on 14th June, 1945, and again on 22nd July, 1947, as contrasted with the world's lowest recorded temperature of -90° F. at Verkhoyansk (Siberia) on 5th and 7th February, 1892.

A comparison of the mean temperatures and the range from the extreme maximum to the extreme minimum temperatures (in whole degrees) of the capital cities of Australia with those of the main cities of some other countries is shown in the following table :—

TEMPERATURE OF AUSTRALIAN CAPITAL CITIES COMPARED WITH THAT OF THE MAIN CITIES OF OTHER COUNTRIES.

(iv) *Hottest and Coldest Parts.* A comparison of the temperatures recorded at coast and inland stations shows that, in Australia, as in other continents, the range increases, within certain limits, with increasing distance from the coast. This is clearly illustrated by the map of extreme temperature range (page 33.)

In the interior of Australia, and during exceptionally dry summers, the temperature occasionally reaches or exceeds 120° in the shade. The hottest area of the continent is situated in the northern part of Western Australia about the Marble Bar and Nullagine gold-fields, where the maximum shade temperature during the summer sometimes exceeds 100° continuously for days and weeks. The longest recorded period was 160 days from 31st October, 1923 to 7th April, 1924.

The area affected and the period of duration of the longest heat waves in Australia are shown in the map and diagram on page 34.

(v) *Tabulated Data for Selected Climatological Stations in Australia.* The following tables show normal mean temperature, extreme temperature and normal rainfall for each month for selected climatological stations in each State :—

(vi) *Frosts.** The Observer's Handbook of the Meteorological Office, London, gives the following definition:—"Injury to the tissues of growing plants is not caused until the temperature has fallen considerably below the freezing point of water (32° F.) and a 'ground frost' is regarded as having occurred when the thermometer on the grass has fallen to 30.4° F. or below".

In Australia this definition is adopted for stations equipped with terrestrial minimum thermometers. However, these are few in number, so although many rainfall observers record "hoar frost" when seen, for statistical purposes a screen temperature of 36° F. is taken as indicating light frosts at ground level. For heavy frosts a screen temperature of 32° F. is taken.

In America a "killing" frost is defined as a frost "that is generally destructive of vegetation". A "black frost" is the phenomenon arising out of a combination of low temperature and low humidity causing rupturing of plant cells by expansion, when freezing takes place, of the water which they contain, though frost crystals are not formed on the ground.

The parts of Australia most subject to low temperature are the eastern highlands from about Omeo in Victoria northward to Cambooya and Bybera in Queensland. Most stations in this region experience more than ten nights per month with readings of 32° F. or under for three to five months of the year. In Tasmania, districts on the Central Plateau are subject to such conditions for three to six months of the year. Minimum temperatures of 32° F. are comparatively infrequent in Western Australia except in parts of the south and south-west. In South Australia the Yongala district is much more subject to such temperatures than other parts of the State. Much of the south-east of Queensland has a higher frequency of such readings than South Australia. Generally speaking, the frequency is controlled mainly by altitude, latitude and, to a lesser degree, by proximity to the sea.

Frosts may occur within a few miles of the coastline over the whole continent, except in the Northern Territory and a considerable area of Northern Queensland. Regions subject to frost in all months of the year comprise portions of the tablelands of New South Wales, the Eastern Highlands and parts of the Central Divide and Western district in Victoria, practically the whole of Tasmania and a small area in the south-west of Western Australia.

* Foley, J. C. Frost in the Australian Region (Bull. 32, 1945).

A map showing the average annual number of frost-free days (i.e. days on which the temperature does not fall below 36° F.) appears on page 35.

Over most of the interior of the continent and on the Highlands in Queensland as far north as the Atherton Plateau frosts appear in April and end in September, but they are infrequent in these months. Minimum temperatures of 32° F. are experienced in most of the sub-tropical interior in June and July.

8. Humidity.—After temperature, humidity is the most important element of climate, particularly as regards its effects on human comfort, rainfall supply, and conservation and related problems.

In this publication the humidity of the air has been expressed by the relative humidity, which is the quotient of the vapour pressure divided by the saturation vapour pressure and multiplied by one hundred. The mean 9 a.m. relative humidity, as well as its highest and lowest recorded mean values at 9 a.m., are shown in the tables of climatological data for the capital cities (par. 19). The mean monthly vapour pressure has also been added to these tables.

The annual curve of vapour pressure derived from the normal monthly values for this element is comparable with the maximum and minimum temperature curves, but the relative humidities consisting as they do of the extremes for each month do not show the normal annual fluctuation which would be approximately midway between the extremes.

The order of stations in descending values of 9 a.m. vapour pressure is Darwin, Brisbane, Sydney, Perth, Melbourne, Adelaide, Canberra, Hobart and Alice Springs, while the relative humidity diminishes in the order, Sydney, Canberra, Melbourne, Darwin, Hobart, Brisbane, Perth, Adelaide and Alice Springs.

Further reference to humidity will be found in the section on effective temperature (page 32).

9. Evaporation.—(i) *General.* The rate and quantity of evaporation in any territory is influenced by the prevailing temperature, and by atmospheric humidity, pressure and wind movement. In Australia the question is, perhaps, of more than ordinary importance, since in its drier regions water has often to be conserved in "tanks" and dams. The magnitude of the economic loss by evaporation will be appreciated from the map reproduced herein (see page 36) which shows that the yearly amount varies from about 20 inches over Western Tasmania to more than 100 inches over the central and north-western parts of Australia. Over an area of 70 per cent. of the continent, comprising most inland districts and extending to the coast in the North-West and Eucla divisions of Western Australia, during no month of the year does the rainfall exceed the evaporation. The central and north-western portions of the continent, comprising 46 per cent. of the total land mass, experience evaporation more than twice as great as their rainfall; it is noteworthy that the vegetation over most of this region is characterised by acacia, semi-desert, shrub steppe and porcupine grass. Since the loss by evaporation depends largely on the exposed area, tanks and dams so designed that the surface shall be a minimum are advantageous. Further, the more they are protected from the direct rays of the sun and from winds by means of suitable tree planting, the less will be the loss by evaporation. These matters are naturally of more than ordinary concern in the drier districts of Australia.

(ii) *Comments on Map of Average Annual Evaporation.* The map of average annual evaporation in Australia (see page 36) has been compiled on the basis of records obtained from a number of evaporimeters supplemented by estimates derived from records of saturation deficit by applying the Waite Institute factor of 263.* Some modification of the latter values was found to be necessary in comparison with recordings of evaporimeters.

The standard evaporation tank used in Australia is cylindrical in form and is 36 inches in diameter and 36 inches deep. It is surrounded by a 6-inch water jacket and the whole is sunk into the ground so that the water surface is approximately at ground level.

* Prescott, J. A. "Atmospheric Saturation Deficit in Australia" (Trans. Royal Society, S.A. Vol. IV., 1931).

Saturation deficit is obtained from readings of dry and wet bulb thermometers exposed in a standard Stevenson thermometer shelter. Saturation deficit is the difference between the vapour pressure indicated by the dry and wet bulb readings, and the saturation vapour pressure corresponding to the dry bulb temperature.

The Waite formula, $e = 263 \text{ s.d.}$, is not an exact relationship, but it takes account of one of the major factors in evaporation, i.e., the difference between saturation vapour pressures at the mean dew point and at the mean air temperature. Errors in the formula are found to be fairly consistent in considerable areas of Australia and corrections have been applied accordingly. No evaporation records are available north of latitude 20° , and corrections have been extrapolated for these areas. The evaporation stations on which estimates for the tropics have been based are Alice Springs (N.T.) and Winton (Q'land), and to a lesser degree Blackall (Q'land) and Marble Bar (W.A.).

The map thus presents an estimate of evaporation for which allowance should be made for a certain margin of error (perhaps 10 per cent. or so) on the conservative side. In the absence of definite information, such a map should serve a useful purpose as a basis for many climatic studies.

For graphs and tables of mean monthly evaporation and rainfall at certain selected stations see Official Year Book No. 37, pp. 34-35.

10. Rainfall.—(i) *General*. The rainfall of any region is determined mainly by the direction and route of the prevailing winds, by the varying temperatures of the earth's surface over which they blow, and by its physiographical features.

Australia lies within the zones of the south-east trades and "prevailing" westerly winds. The southern limit of the south-east trade strikes the eastern shores at about 30° south latitude, and, with very few exceptions, the heaviest rains of the Australian continent are precipitated along the Pacific slopes to the north of that latitude, the varying quantities being more or less regulated by the differences in elevation of the shores and of the chain of mountains from the New South Wales northern border to Thursday Island, upon which the rain-laden winds blow. The converse effect is exemplified on the north-west coast of Western Australia, where the prevailing winds, blowing from the interior of the continent instead of from the ocean, result in the lightest coastal rain in Australia.

The westerly winds, which skirt the southern shores, are responsible for the reliable, generally light to moderate rains enjoyed by the south-western portion of Western Australia, the agricultural areas of South Australia, a great part of Victoria, and the whole of Tasmania.

(ii) *Distribution of Rainfall*. The average annual rainfall map of Australia (page 37) shows that the heaviest yearly falls occur on the north coast of Queensland (up to more than 160 inches) and in Western Australia (up to 140 inches), while from 50 to over 60 inches are received on parts of the eastern seaboard from Jervis Bay (New South Wales) to the northern part of Cape York Peninsula, also around Darwin (Northern Territory), on the West Kimberley coast, near Cape Leeuwin (Western Australia), about the Australian Alps in eastern Victoria and New South Wales, and on the north-eastern highlands in Tasmania. A great part of the interior of the continent, stretching from the far west of New South Wales and the south-west of Queensland to the vicinity of Shark Bay in Western Australia, has a very low average rainfall of less than 10 inches a year. Between these two regions of heavy and very low rainfall are the extensive areas which experience useful to good rains, and in the southern and eastern parts of which are found the best country and most of the population and primary production.

(iii) *Factors Determining Occurrence, Intensity and Seasonal Distribution of Rainfall*. Reference has already been made to the frequent rains occurring in the north-eastern coastal districts of Queensland with the prevailing south-east trade winds and to similar rains in the west of Tasmania with the prevailing westerly winds. Other rains in Australia are associated mainly with tropical and southern depressions.

The former chiefly affect the northern, eastern, and to some extent the central parts of the continent and operate in an irregular manner during the warmer half of the year, but principally from December to March. They vary considerably in activity and scope from year to year, occasionally developing into severe storms off the east and north-west

coasts. Tropical rainstorms sometimes cover an extensive area, half of the continent on occasions receiving moderate to very heavy falls during a period of a few days. Rain is also experienced, with some regularity, with thunderstorms in tropical areas, especially near the coast. All these tropical rains, however, favour mostly the northern and eastern parts of the area referred to; the other parts further inland receive lighter, less frequent and less reliable rainfall. With the exception of districts near the east coast, where some rain falls in all seasons, the tropical parts of the continent receive useful rains only on rare occasions from May to September.

The southern depressions are most active in the winter—June to August—and early spring months. The rains associated with them are fairly reliable and frequent over Southern Australia and Tasmania, and provide during that period the principal factor in the successful growing of wheat. These depressions also operate with varying activity during the remainder of the year, but the accompanying rains are usually lighter. The southern rains favour chiefly the south-west of Western Australia, the agricultural districts of South Australia, Victoria, Tasmania, and the southern parts of New South Wales. They sometimes extend into the drier regions of the interior, but only infrequently and irregularly.

The map showing mean monthly distribution of rainfall over Australia (page 38) gives in graphic form information on the amount and occurrence of rain.

(iv) *Wettest and Driest Regions.* The wettest known part of Australia is on the north-east coast of Queensland, between Port Douglas and Cardwell, where Deeral on the north coast-line has an average annual rainfall of 174.00 inches and Tully on the Tully River 175.32 inches. In addition, three stations situated on, or adjacent to, the Johnstone and Russel Rivers have an average annual rainfall of between 144 and 169 inches. The maximum and minimum annual amounts there are:—Deeral, 287.18 in 1945 and 99.60 inches in 1947, or a range of 187.58 inches; Tully, 234.37 in 1936 and 104.98 inches in 1943, or a range of 129.39 inches; Goondi, 241.53 in 1894 and 67.88 inches in 1915, or a range of 173.65 inches; Innisfail, 211.24 in 1894 and 69.87 inches in 1902, or a range of 141.37 inches; Harvey Creek, 254.77 in 1921 and 80.47 inches in 1902, or a range of 174.30 inches.

On four occasions more than 200 inches have been recorded at Goondi, the last of these being in 1910, when 204.52 inches were registered. The records at this station cover a period of 62 years.

In twenty-two years of record Tully has exceeded 200 inches on eight occasions, whilst in a record of 28 complete years Harvey Creek has four times exceeded this figure.

In Tasmania the wettest part is in the West Coast region, the average annual rainfall at Lake Margaret being 146.29 inches, with a maximum of 175.12 inches in 1924.

The driest known part of the continent is in an area of approximately 180,000 square miles surrounding Lake Eyre in South Australia, where the annual average is between 4 and 6 inches and where the fall rarely exceeds 10 inches for 12 months.

Records of stations have at times been interrupted, but of the 23 stations in this region which have an annual average of less than 5 inches, six have complete records extending from 30 to 55 years. Of these Mulka has the lowest average of 3.94 inches (30 years), followed by Troudaninna with an average of 4.15 inches in 42 years. Troudaninna in the period 1893 to 1936 had only one year in which the total exceeded 9 inches (11.07 inches in 1894). There have been protracted periods when the average has even been less than 3 inches. From 1895 to 1903 Troudaninna received the following annual totals:—2.78, 0.99, 5.71, 3.04, 3.18, 2.83, 1.80, 1.11, 4.87, an average of 2.91 inches. From 1918 to 1929 the average was only 2.65 inches, and in this period from December, 1924 to November, 1929 the average was only 1.70 inches.

Mulka since 1918 has only once exceeded 10 inches for the annual total (11.72 inches in 1920), and in 30 years on 15 occasions the annual total has been less than 3 inches. In one particular period from October, 1926 to September, 1930, the average was only 1.26 inches (505 points in 48 months). However, at Kanowana, an even lower four year average of 1.12 inches was recorded between 1896 and 1899 with yearly totals of 43, 225, 87 and 94 points. An even smaller total than 43 points was recorded at Mungeranie in 1889 when only 39 points was recorded on 5 days.

The average number of rain days per month in this region is only 1-2 and the annual number ranges between 10 and 20. Oodnadatta (standard 30 years' average rainfall equal to 4.44 inches) has an average of 20 days of rain per year while Cordillo Downs in the extreme north-east corner of the State of South Australia receives 5.16 inches on 12 days per year, averaging about one day of rain each month in the thirty years' period 1911-1940.

No part of the earth, so far as is known, is absolutely rainless, and although at Arica, in northern Chile, the rainfall over a period of 15 years was nil, a further two years in which there were three measurable showers made the "average" for 17 years 0.02 inches.

(v) *Quantities and Distribution of Rainfall.* The general distribution is best seen from the rainfall map (page 37) which shows the areas subject to average annual rainfalls lying between certain limits. The proportions of the total area of each State and of Australia as a whole enjoying varying quantities of rainfall determined from the latest available information are shown in the following table:—

AVERAGE ANNUAL RAINFALL DISTRIBUTION.
(Per Cent.)

Average Annual Rainfall.	N.S.W. (a)	Victoria.	Queens- land.	South Australia	Western Australia.	Tas- mania. (b)	Northern Territory	Total.

(a) Includes Australian Capital Territory.
available.

(b) Over an area of 2,777 square miles no records are

Referring first to the capital cities, the records of which are given in the next table, it will be seen that Sydney, with an average rainfall of 46.21 inches, occupies the chief place: Brisbane, Perth, Melbourne, Hobart, Canberra and Adelaide follow in that order, Adelaide with 21.10 inches being the driest. The extreme range from the wettest to the driest year is greatest at Brisbane (72.09 inches) and least at Adelaide (19.46 inches).

In order to show how the rainfall is distributed throughout the year in various parts of the continent, average figures for the various climatological districts have been selected. (See map on p. 38). The figures for Northern Rivers (District 14), show that nearly the whole of the rainfall occurs there in the summer months, while little or none falls in the middle of the year. The figures for the Central Coast, south-west of Western Australia (District 9), are the reverse, for while the summer months are dry, the winter months are very wet. In the districts containing Melbourne and Hobart the rain is fairly well distributed throughout the twelve months, with a maximum in October for both districts. In Queensland, the heaviest rains fall in the summer months, but good averages are also maintained during the other seasons in eastern parts.

On the coast of New South Wales, the first half of the year is the wettest, with heaviest falls in the autumn; the averages during the last six months are fair, and moderately uniform. Generally it may be said that approximately one-third of the area of the continent, principally in the eastern and northern parts, enjoys an annual average rainfall of from 20 to 50 inches or more, the remaining two-thirds averaging from 5 to 20 inches.

(vi) *Tables of Rainfall.* The table of rainfall for a fairly long period of years for each of the various Australian capitals affords information as to the variability of the fall in successive years, and the list of the more remarkable falls furnishes information as to what may be expected on particular occasions.

12. **Snowfall.**—Light snow has been known to fall occasionally as far north as latitude 31° S., and from the western to the eastern shores of the continent. During exceptional seasons, it has fallen simultaneously over two-thirds of New South Wales, and has extended at times along the whole of the Great Dividing Range, from its southern extremity in Victoria as far north as Toowoomba in Queensland. During the winter, for several months, snow covers the ground to a great extent on the Australian Alps, where also the temperature falls below zero Fahrenheit during the night. In the ravines around Mt. Kosciuszko and similar localities the snow never entirely disappears after a severe winter.

13. **Hail.**—Hail falls most frequently along the southern shores of the continent in the winter, and over eastern Australia during the summer months. The size of the hailstones generally increases with distance from the coast. A summer rarely passes without some station experiencing a fall of stones exceeding in size an ordinary hen-egg, and many riddled sheets of light-gauge galvanized iron bear evidence of the weight and penetrating power of the stones.

The hailstones occur most frequently when the barometric readings indicate a flat and unstable condition of pressure. Tornadoes or tornadic tendencies are almost invariably accompanied by hail, and on the east coast the clouds from which the stones fall are frequently of a remarkable sepia-coloured tint.

14. **Barometric Pressures.**—The mean annual barometric pressure (corrected to sea level and standard gravity) in Australia varies from 29.80 inches on the north coast to 29.92 inches over the central and 30.03 inches in the southern parts of the continent. In January, the mean pressure ranges from 29.70 inches in the northern and central areas to 29.95 inches in the southern. The July mean pressure ranges from 29.90 inches at Darwin to 30.12 inches at Alice Springs. Barometer readings corrected to mean sea level and standard gravity have, under anticyclonic conditions, ranged as high as 30.935 inches (at Hobart on 13th July, 1846) and have fallen as low as 27.55 inches. This lowest record was registered at Mackay during a tropical hurricane on 21st January, 1918. An almost equally abnormal reading of 27.88 inches was recorded at Innisfail during a similar storm on 10th March, 1918. For graphs of Mean Barometric Pressure at Capital Cities see Official Year Book No. 37, p. 35.

15. **Wind.**—(i) *Trade Winds.* The two distinctive wind currents in Australia are, as previously stated, the south-east trade and the “prevailing” westerly winds. As the belt of the earth's atmosphere in which they blow apparently follows the sun's ecliptic path north and south of the equator, so the area of the continent affected by these winds varies at different seasons of the year. During the summer months the anticyclonic belt travels in high latitudes, thereby bringing the south-east trade winds as far south as 30° south latitude. The “prevailing” westerly winds retreat a considerable distance to the south of Australia, and are less in evidence in the hot months. When the sun passes to the north of the equator, the south-east trade winds follow it, and only operate to the north of the tropics for the greater part of the winter. The westerly winds come into lower latitudes during the same period of the year. They sweep across the southern areas of the continent from Cape Leeuwin to Cape Howe, and during some seasons are remarkably persistent and strong, and occasionally penetrate to almost tropical latitudes.

(ii) *North-west Monsoon.* As the belt of south-east trade winds retreats southward during the summer, it is replaced in the north and north-west of Australia first by a sequence of light variable winds and then by the north-west monsoon. In Australia, the north-west monsoon has not the persistence nor regularity of the Indian south-west

monsoon but is sufficiently characteristic for the summer in the north of Australia to be called the "North-west Season". In central and eastern Queensland, the north-west monsoon in the summer has comparatively little effect and the trade winds, albeit weakened, are still dominant winds. With the migration of the sun northward in the autumn, the north-west monsoon is itself replaced first by light variable winds and then by the trade winds.

(iii) *Land and Sea Breezes.* The prevailing winds next in order of importance are the land and sea breezes. On the east coast the sea breezes which come in from the north-east, when in full force, frequently reach the velocity of a gale during the afternoon in the summer months, the maximum hourly velocity, ordinarily attained about 3 p.m., not infrequently attaining a rate of 35 to 40 miles per hour. It was formerly thought that this wind did not ordinarily penetrate more than 9 or 12 miles inland. It is now known that coastal air penetrates upwards of 60 miles or more, as in the case of the "sea breeze" which reaches Canberra late on a summer afternoon. Whether this represents a true sea breeze or the movement of a "coastal front" (which is said to penetrate as much as 200 miles inland by late at night) is an open question.

The land breezes on the east coast blow out from a westerly direction during the night.

On the western shores of the continent the directions are reversed. The sea breezes come in from the south-west, and the land breezes blow out from the north-east.

(iv) *Inland Winds.* Inland, the direction of the prevailing winds is largely regulated by the seasonal changes of pressure, so disposed as to cause the winds to radiate spirally outward from the centre of the continent during the winter months, and to circulate spirally from the seaboard to the centre of Australia during the summer months.

(v) *Prevailing Direction at the Capital Cities.* In Canberra at 9 a.m. the air is usually calm, particularly during the winter months, but such winds as do occur are predominantly north-westerly, though a proportion of south-easterly winds occur during the autumn. At 3 p.m. the predominant wind is north-westerly.

In Perth at 9 a.m. east to south-east winds prevail from September to March, while from April to August north-north-east to east winds predominate. At 3 p.m. the prevailing wind is south-south-west from October to May inclusive and westerly at other times.

In Adelaide at 9 a.m. the predominant wind is north-easterly from April to August but during the rest of the year no particular direction is outstanding. At 3 p.m. the predominant wind is south-westerly for all months except May, June and July. Throughout the year winds with an easterly component are rare in the afternoon.

In Brisbane at 9 a.m. the most frequent winds during the colder two-thirds of the year come from the south or south-west, while in the warmer months south to south-east winds are more usual. At 3 p.m. winds with an easterly component predominate, especially north-easterlies during the warmer half of the year.

In Sydney at 9 a.m. by far the most prevailing wind is a westerly, particularly during the colder two-thirds of the year. At 3 p.m., during the warmer two-thirds of the year, winds with an easterly component are most frequent with a smaller proportion of southerlies and westerlies during the winter months.

In Melbourne at 9 a.m. northerlies are the most frequent winds during the period February to October with a moderate proportion of westerlies in the spring. During the summer months, winds with a southerly component are in evidence to a slightly greater degree than any others. At 3 p.m. southerly winds prevail during the warmer two-thirds of the year with the frequency of northerlies increasing during the colder months.

In Hobart at 9 a.m. the most favoured directions are from the north-west and north with a good proportion of south-easterlies showing up at 3 p.m. during the warmer months.

(vi) *Maximum Wind Gusts.* The records of maximum wind gusts have mostly been obtained with the Dines type of anemometer with the head exposed some 30 or 40 feet above the ground. The data are set out in the tables which follow for stations arranged in the following three groups:—

- (a) *Stations North of Brisbane (Tropical).* Cairns, Townsville, Rockhampton, Willis Island, Darwin, Groote Eylandt, Karumba, Onslow and Cloncurry.
 (b) *Capital Cities.* Brisbane, Sydney, Melbourne, Hobart, Adelaide and Perth.
 (c) *Other Stations south of Brisbane (located at Aerodromes).* Archerfield, Lord Howe Island, Richmond, Rathmines, Mascot, Wagga, Canberra, Essendon, Laverton, Western Junction, Oodnadatta, Ceduna, Parafield, Guildford and Kalgoorlie.

PERCENTAGE FREQUENCY OF MAXIMUM GUSTS.
(Per Cent.)

Station Group.	Wind Speed Range (miles per hour).

Other Stations South of Brisbane	3	7	13	21	21	16	9	5	2	3	..

PERCENTAGE FREQUENCY OF DIRECTIONS OF THE HIGHEST GUSTS RECORDED THROUGHOUT THE YEAR.
(Per Cent.)

Station Group.	Direction of Maximum Yearly Gusts.							
	South-West.	South.	South-East.	East.	North-East.	North.	North-West.	West.
Stations North of Brisbane ..	13	11	31	22	4	2	13	4
Capital Cities ..	18	8	6	4	27	37
Other Stations South of Brisbane ..	17	9	2	2	..	19	31	20

HIGHEST MAXIMUM GUST REGISTERED IN EACH CALENDAR MONTH IN EACH REGION.
(Miles per hour.)

Station Group.	Jan.	Feb.	Mar.	Apr.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.
Stations North of Brisbane ..	100	69	100	60	46	43	43	52	52	80	61	78
Capital Cities ..	72	67	68	81	73	80	78	87	84	95	79	79
Other Stations South of Brisbane ..	91	87	91	82	79	71	76	80	90	80	74	89

From the foregoing tables it is seen that, for Capital Cities (Group 2), maxima of 60 to 75 miles per hour are frequent, with rare higher extremes of possibly up to 95 m.p.h. The most frequent directions of maximum gusts are from the west or north-west with a moderate percentage from the south-west.

At aerodrome stations south from Brisbane (Group 3), the most frequent maxima are from 55 to 75 m.p.h., with rare occurrences up to 95 m.p.h. Here the most frequent directions are from the north-west with moderate percentages of west, north and south-west.

The frequency distribution of maximum yearly gusts at tropical stations (Group 1) is quite different from those further south. Generally, maxima of 45 to 55 m.p.h. predominate, with a generally lower frequency of the higher gusts than in the other regions. However, in cyclones, gusts of 98 and 100 m.p.h. have been recorded, prior, in some cases, to the anemometer mast being blown away. The most frequent directions of the maximum gusts in the group are from the south-east and east.

Maximum yearly "gusts" may arise out of a high general wind, tornado or cyclone or be associated with squalls with the passage of a cold front or thunderstorm.

16. *Meteorology of Australia.*—(i) *General.* Meteorology, as the science of weather, attempts to apply physical principles to an explanation and interpretation of the variations in weather phenomena. The condition and behaviour of the air at a given time and place constitute weather. (Climate is the long-term weather experience of any locality.)

In Australia, certain selected stations, at three hourly intervals, measure or observe :—(a) The temperature of the air ; (b) pressure ; (c) the speed and direction of air movement ; (d) moisture content ; and (e) the state of the sky and the occurrence, present and past, of precipitation. These conditions are summarized by analysis as follows :—

(a) *Identification of Air Masses.* An air mass is a widespread body of air which is approximately homogeneous in its horizontal extent, having fairly definite characteristic properties in regard to temperature, humidity, etc., which determine its type.

In the Australian region, the air masses are frequently ill-defined, but as well as the two broad classifications of cold and warm air masses the following primary types may be distinguished :—Equatorial, Tropical, Southern-Maritime, Indian, Pacific and Continental. These are obviously so called because of their sources of origin. In addition, there are sub-types which are modifications of the foregoing.

(b) *Demarcation of Air Mass Boundaries.* These are generally exhibited as "fronts" which are zones of rapid change of the air mass properties both at the earth surface and in the upper levels.

There are two main classes of fronts, viz. :—*Cold Fronts*, when a cold air mass is displacing and under-running a warmer one, and *Warm Fronts* when warm air is displacing, and at higher levels moving over, a cold air mass. An "occlusion" occurs when the warm air is lifted bodily and only cold air is found at the surface. Well defined, distinct warm fronts are infrequently found over Australia, being more characteristic of higher latitudes.

(c) *Pressure Isolines.* These are drawn joining places of equal pressure, resulting in the familiar pattern of isobars delineating anticyclones ("highs") and cyclones ("lows") as seen on the Weather Map appearing in the daily press.

(ii) *The Daily Press Weather Map.* (a) *Pressure Gradient.* The distance between the isobars indicates the "pressure gradient". The gradient is steeper when the isobars are closer together and flatter where the isobars are further apart.

There is a definite relation between the winds and isobars. The winds blow almost parallel to and slightly across the isobars from high to low pressure and clockwise around a "low" and anti-clockwise around a "high" (in the Southern Hemisphere), i.e. "In the Southern Hemisphere an observer standing with his back to the wind will have the lower pressure to his right". The angle at which the wind arrows cross the isobars is very variable. Over the land it averages about 30° , over the sea about 10° .

The winds are strongest where the pressure gradient is steepest or where the isobars are crowded together. In other words, the speed of the wind is proportional to the pressure gradient. The "gradient wind" speed estimated from the closeness of the isobars is found at a height of from 2,000 to 3,000 feet above the surface, and the following table shows the speed for straight isobars of intervals equal to two millibars (one millibar = 0.029 inches of mercury or 1,000 millibars = 29.53 inches).

WIND SPEED IN RELATION TO DISTANCE BETWEEN ISOBARS.

Distance between Isobars representing a pressure difference of 2 millibars.	Wind Speed (miles per hour).	
	Latitude 25° .	Latitude 35° .
Miles—		
180	20	15
110	34	25
75	50	37
55	70	55

If the curvature of the isobars is appreciable, the winds will be underestimated around "highs" and overestimated around "lows".

(b) *Isobaric Forms. Cyclones and Storms.* The "elements" in Australia are ordinarily peaceful, and while destructive cyclones have visited various parts, more especially coastal areas, such visitations are rare, and may be properly described as erratic.

During the winter months, the southern shores of the continent are subject to deep depressions of the southern low-pressure belt. They are felt most severely over the south-western parts of Western Australia, to the south-east of South Australia, in Bass Strait, including the coast-line of Victoria, and on the west coast of Tasmania. Apparently the more violent wind pressures from these disturbances are experienced in their northern half, or in that part of them which has a north-westerly to a south-westerly circulation.

The north-east coast of Queensland is occasionally visited by hurricanes from the north-east tropics. During the first four months of the year, these hurricanes appear to have their origin in the neighbourhood of the South Pacific Islands, their path being a parabolic curve first to the south-west and finally towards the south-east.

Very severe cyclones, locally known as "willy willies," are peculiar to the north-west coast of Western Australia from the months of November to April, inclusive. They usually originate over the ocean to the north or north-west of Australia, and travel in a south-westerly direction with continually increasing force, displaying their greatest energy near Cossack and Onslow, between latitudes 20° and 22° South. The winds in these storms, like those from the north-east tropics, are very violent and destructive. The greatest velocities are usually to be found in the south-eastern quadrant of the cyclones, with north-east to east winds. After leaving the north-west coast, these storms either travel southwards, following the coast-line, or cross the continent to the Great Australian Bight. When they take the latter course, their track is marked by torrential rains, as much as 29.41 inches, for example, being recorded in 24 hours at Whim Creek from one such occurrence. Falls of 10 inches and over have frequently been recorded in the northern interior of Western Australia from similar storms.

Some further notes on severe cyclones and on "southerly bursters", a characteristic feature of the eastern part of Australia, appear in previous issues of the Official Year Book (see No. 6, pp. 84-86), and a special article dealing with "Australian Hurricanes and Related Storms" appears in Official Year Book No. 16, pp. 80-84.

Depressions vary considerably in their isobaric forms, intensity and other characteristics. Some bring rain in variable quantities, some heat and others mainly wind. A common type in southern Australia is the "a" shaped trough with an abrupt "backing" of the wind or "line squall" as it passes. The cold front is most frequently found through the centre of the "trough" because it is along this line, and extending into the upper levels of the atmosphere that the demarcation of different air masses is so well defined. The best rains occur in inland Australia when extensive masses of warm moist tropical air move into the interior and are forced to rise by convergence of flow or by impact with a cold air stream.

The speed of low pressure systems is very variable, but in general in southern latitudes, the movement is of the order of 500 to 700 miles per day.

Anticyclones. The anticyclone or "high" is usually distinguished by a series of closed isobars of roughly circular or oval form enclosing the region of highest pressure. They usually cover much larger areas than depressions and in a well-defined "high" the winds blow spirally outward with subsidence or sinking of stable air near the centre, where the winds are generally light and variable. Anticyclonic weather is usually regarded as quiet and settled, but actually considerable variations occur according to the activity of neighbouring "lows" and pressure gradients.

The most frequent interval between the passage of successive centres is five days. The general direction of movement is from west to east, but the speed is much slower than that of depressions, averaging in Australian regions about 400 miles per day, but occasionally accelerating, or, on the other hand, exhibiting an apparent retrograde movement.

In winter, the usual path is across the centre of the continent; in summer, south of the southern coastline.

When the upper air temperatures in an anticyclone are low, that is, when the "high" is of little vertical depth, it usually travels more rapidly than one which is of greater depth and warm in its upper layers. A "wedge" or "tongue" of high pressure is an extension of an anticyclone between two "lows" and thus the opposite of the trough.

Waves of Low Pressure (or series of depressions). This type is frequently experienced in southern Australia in winter and spring. The passage of the waves from the west is accompanied by a "backing" of the wind from about north-west to south-west and "veering" to north-west again as the wave of low pressure passes. Each wind shift may be marked by rain squalls, the effect of which is intensified on the windward slopes of coastal hills.

(c) *Rain Areas.* These are depicted on the press chart by hatched areas and a continuous check on these rain areas from day to day will do much to explain the characteristics of the various wind-streams and cold and warm front precipitation.

Fundamentally, rain is produced by the uplift, and so cooling and condensation, of a moist air mass, by either one or all of the following ways:—(i) *Convection.* Uplift by heating from below. (ii) *Orographic.* Forced uplift due to elevated land barriers. (iii) *Convergence.*—The net result when more air flows into an area than flows out. The excess air will rise and flow outward aloft. There are two main causes—surface friction, which causes a flow of air at the surface from high to low pressure, and convergence in a region of falling pressure owing to a lack of perfect balance between wind and pressure gradients. (iv) *Frontal Rain.* One air mass may be forced to rise over another (warm air over cool air—warm frontal), or one air mass may be lifted by another (cold air lifting up warm air—cold frontal). The warm front is characterized by continuous precipitation (drizzle), the cold front by showery conditions and sometimes thunderstorms.

Two other important methods of condensation are:—(i) *Contact or Conduction Cooling.* Warm air flowing over a cold surface may cause fog or drizzle, occurring mainly on coastal lands in winter and adjacent sea areas in summer. (ii) *Radiation Cooling.* Under anticyclonic conditions this process of cooling may result in radiation fog.

17. *Influences affecting Australian Climate.*—(i) *General.* Australian history does not cover a sufficient period, nor is the country sufficiently occupied, to ascertain whether or not the advance of settlement has materially affected the climate as a whole. Local changes have, however, taken place, a fact which suggests that settlement and the treatment of the land have a distinct effect on local conditions. For example, low-lying lands on the north coast of New South Wales, which originally were seldom subject to frosts, have, with the denudation of the surrounding hills from forests, experienced annual visitations, the probable explanation being that through the absence of trees the cold air of the highlands now flows unchecked and untempered down the sides of the hills to the valleys and lower lands.

(ii) *Influence of Forest on Climate.* As already indicated, forests doubtless exercise a great influence on local climate, and hence, to the extent that forestal undertakings will allow, the weather can be controlled by human agency. The direct action of forests is an equalizing one; thus, especially in equatorial regions, and during the warmest portion of the year, they considerably reduce the mean temperature of the air. They also reduce the diurnal extremes of shade temperatures by altering the extent of radiating surface by evaporation, and by checking the movement of air, and while decreasing evaporation from the ground, they increase the relative humidity. Vegetation greatly diminishes the rate of flow-off of rain and the washing away of surface soil, and when a region is protected by trees, a steadier water supply is ensured, and the rainfall is better conserved. In regions of snowfall, the supply of water to rivers is similarly regulated, and without this and the sheltering influence of ravines and "gullies," watercourses supplied mainly by melting snow would be subject to alternative periods of flooding and dryness. This is borne out in the case of the inland rivers, the River Murray, for example, which has never been known to become dry, deriving its steadiness of flow mainly through the causes indicated.

(iii) *Direct Influence of Forests on Rainfall.* Whether forests have a direct influence on rainfall is a debatable question, some authorities alleging that precipitation is undoubtedly induced by forests, while others take the opposite view.

Sufficient evidence exists, however, to prove that, even if the rainfall has not increased, the beneficial climatic effect of forest lands more than warrants their protection and extension. Rapid rate of evaporation, induced by both hot and cold winds, injures crops and makes life uncomfortable on the plains, and, while it may be doubted that the forest aids in increasing precipitation, it must be admitted that it does check winds and the rapid evaporation due to them. Trees as wind-breaks have been successfully planted in central parts of the United States of America, and there is no reason why similar experiments should not be successful in many parts of the treeless interior of Australia. The belts should be planted at right angles to the direction of the prevailing parching winds, and if not more than half a mile apart will afford shelter to the enclosed areas.

18. *Rainfall and Temperatures, Various Cities.*—The Official Year Book No. 34, p. 28, shows rainfall and temperature for various important cities throughout the world, and for the Australian capitals.

19. *Climatological Tables.*—The averages and extremes for a number of climatological elements, which have been determined from long series of observations at the Australian capitals up to and including the year 1948, are given on pp. 64–70.

NOTE.—The following points apply throughout:—

- (i) Where records are available, mean or average values have been calculated on a standard period of 30 years from 1911 to 1940.
- (ii) Extreme values have been extracted from all available years of actual record, but the number of years quoted does not include intervening periods when observations were temporarily discontinued.

§ 3. Standard Times in Australia.

Prior to 1895 the official time adopted in the several colonies was for most purposes the mean solar time of the capital city of each.

In November, 1892, an intercolonial conference of surveyors was held in Melbourne to consider, among other things, the advantages of introducing the system of standard time. In this system it was proposed to make the initial meridian that of Greenwich and to change local standard time by whole hours according to the longitude east or west of that of Greenwich. Thus for every difference of 15° in longitude a change of one hour would be required. The minutes and seconds would then be identical everywhere.

To give effect to this proposal it was suggested that Australia should be divided into three zones, the standard times for which should be respectively the mean solar times of the meridians of 120° , 135° and 150° E. longitude, thus giving standard times 8, 9 and 10 hours respectively ahead of Greenwich time. It was proposed that the 120° zone should comprise Western Australia, that the 135° zone should comprise South Australia and the Northern Territory, and that the 150° zone should comprise Queensland, New South Wales, Victoria and Tasmania.

The matter was also considered by several intercolonial postal conferences, and eventually in 1894 and 1895 legislation was enacted by each of the colonies in accord with the recommendations of the Surveyors' Conference of 1892.

In 1898 the South Australian legislature amended its earlier provision, and adopted the mean solar time of the meridian $142^{\circ} 30'$ E. longitude as the standard time for that colony, thus reducing the difference between the standard time of Adelaide and that of the capitals of the eastern colonies from an hour to half-an-hour. Particulars concerning these enactments are as follows :—

STANDARD TIMES IN AUSTRALIA.

State.		Date when Act came into Operation.	Meridian Selected.	Time Ahead of Greenwich.
				Hours.
New South Wales	..	1st February, 1895	150° E.	10
Victoria	..	1st February, 1895	150° E.	10
Queensland	..	1st January, 1895	150° E.	10
South Australia	..	1st February, 1895	135° E.	9
South Australia	..	1st May, 1899	$142^{\circ} 30'$ E.	$9\frac{1}{2}$
Western Australia	..	1st December, 1895	120° E.	8
Tasmania	..	1st September, 1895	150° E.	10

The standard time in the Australian Capital Territory is the same as in New South Wales, and in the Northern Territory the same as in South Australia.

Consequent upon the opening of the Trans-Australian Railway an arrangement was made by which the change of time between South Australia and Western Australia (namely, $1\frac{1}{2}$ hours) is divided into two changes of 45 minutes each. Going east from Kalgoorlie the first change is made at Rawlinna, 235.18 miles out, where the time is put forward by 45 minutes. The second change of the same amount is made at Tarcoola, 794.05 miles out. Thenceforward South Australian standard time is kept. The Commonwealth Observatory at Mount Stromlo, Canberra, and the State Observatories at Sydney, Adelaide, and Perth derive time by astronomical observations.

Time signals are originated by these Observatories and by the Postmaster-General's Research Laboratory, Melbourne. The latter participates with the Commonwealth Observatory in the Commonwealth Time Service.

CHAPTER III.

GENERAL GOVERNMENT.

§ 1. Scheme of Parliamentary Government.

1. *General*.—A brief account of the general legislative powers of the Commonwealth and States is given in preceding issues of the Official Year Book (*see* No. 13, pp. 927-951, and No. 22, p. 64).

2. *Powers and Functions of the Governor-General and of the State Governors*.—A detailed statement of the powers and functions of the Governor-General and of the State Governors appears in preceding issues of the Official Year Book (*see* No. 18, pp. 78-80).

3. *Governor-General and State Governors*.—The present Governor-General of the Commonwealth of Australia is His Excellency the Right Honorable William John McKell, who assumed office on 11th March, 1947, in succession to His Royal Highness the Duke of Gloucester.

The following is a list of the Governors of the various States of Australia in office in June, 1949 :—

New South Wales ..	Lieutenant-General JOHN NORTHCOTT, C.B., M.V.O.
Victoria	Major-General SIR WINSTON JOSEPH DUGAN, G.C.M.G., C.B., D.S.O.
Queensland ..	Lieutenant-General SIR JOHN DUDLEY LAVARACK, K.B.E., C.B., C.M.G., D.S.O.
South Australia ..	Lieutenant-General SIR CHARLES WILLOUGHBY MOKE NORRIE, K.C.M.G., C.B., D.S.O., M.C.
Western Australia ..	The Hon. SIR JAMES MITCHELL, G.C.M.G.
Tasmania ..	Admiral SIR HUGH BINNEY, K.C.B., D.S.O.

On 30th April, 1949 it was announced that General Sir Reginald Alexander Dallas Brooks, K.C.B., C.M.G., D.S.O., was appointed successor to Major-General Sir Winston Dugan, Governor of Victoria, whose term of office (extended) ended on 30th June, 1949.

4. *The Cabinet and Executive Government*.—(i) *General*. Both in the Commonwealth and in the States, executive government is based on the system which was evolved in Britain in the 18th century, and which is generally known as "Cabinet" or "responsible" government. Its essence is that the head of the State (His Majesty the King, and his representative, the Governor-General or Governor) should perform Governmental acts on the advice of his Ministers; that he should choose his principal

Ministers of State from members of Parliament belonging to the party, or coalition of parties, commanding a majority in the popular House; that the Ministry so chosen should be collectively responsible to that House for the government of the country; and that the Ministry should resign if it ceases to command a majority there.

The Cabinet system operates by means, chiefly, of constitutional conventions, customs or understandings, and of institutions that do not form part of the legal structure of the government at all. The constitutions of the Commonwealth and the States make fuller legal provision for the Cabinet system than the British Constitution does—for example, by requiring that Ministers shall be, or within a prescribed period become, members of the Legislature. In general, however, the legal structure of the executive government remains the same as it was before the establishment of the Cabinet system.

Formally, the executive power is vested in the Commonwealth in the Governor-General, and in the States in the Governor. In each case he is advised by an Executive Council, which, however, meets only for certain formal purposes, as explained below. The whole policy of a Ministry is, in practice, determined by the Ministers of State, meeting, without the Governor-General or Governor, under the chairmanship of the Prime Minister or Premier. This group of Ministers is known as the Cabinet.

(ii) *The Cabinet.* This body does not form part of the legal mechanism of government. Its meetings are private and deliberative. The actual Ministers of the day are alone present, no records of the meetings are made public, and the decisions taken have, in themselves, no legal effect. In Australia, all Ministers are members of the Cabinet. As Ministers are the leaders of the party or parties commanding a majority in the popular House, the Cabinet substantially controls, in ordinary circumstances, not only the general legislative programme of Parliament, but the whole course of Parliamentary proceedings. In effect, though not in form, the Cabinet, by reason of the fact that all Ministers are members of the Executive Council, is also the dominant element in the executive government of the country. Even in summoning, proroguing or dissolving Parliament, the Governor-General or Governor is usually guided by the advice tendered him by the Cabinet, through the Prime Minister or Premier, though legally the discretion is vested in the Governor-General or Governor himself.

(iii) *The Executive Council.* This body is presided over by the Governor-General or Governor the members thereof holding office during his pleasure. All Ministers of State are *ex officio* members of the Executive Council. In the Commonwealth, and also in the States of Victoria and Tasmania, Ministers remain members of the Executive Council on leaving office, but are not summoned to attend its meetings; for it is an essential feature of the Cabinet system that attendance should be limited to the Ministers of the day. The meetings of the Executive Council are formal and official in character, and a record of proceedings is kept by the Secretary or Clerk. At Executive Council meetings, the decisions of the Cabinet are (where necessary) given legal form; appointments made; resignations accepted; proclamations issued, and regulations and the like approved.

(iv) *The Appointment of Ministers.* Legally, Ministers hold office during the pleasure of the Governor-General or Governor. In practice, however, the discretion of the King's representative in the choice of Ministers is limited by the conventions on which the Cabinet system rests. Australian practice follows, broadly, that of the United Kingdom. When a Ministry resigns, the Crown's custom is to send for the leader of the party which commands, or is likely to be able to command, a majority in the popular House, and to commission him, as Prime Minister or Premier, to "form a Ministry"—that is, to nominate other persons to be appointed as Ministers of State and to serve as his colleagues in the Cabinet.

The customary procedure in connexion with the resignation or acceptance of office by a Ministry is described fully in previous issues of the Official Year Book (*see* No. 6, p. 942). It may be added, however, that subsequent legislation has, in most of the States, obviated the necessity of responsible Ministers vacating their seats in Parliament on appointment to office.

(v) *Ministers in Upper and Lower Houses.* The following table shows the number of Ministers with seats in the Upper or Lower Houses of each Parliament in June, 1949 :—

AUSTRALIAN PARLIAMENTS : MINISTERS IN UPPER OR LOWER HOUSES, JUNE, 1949.

Ministers with Seats in—	C'wealth. (a)	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Total.
The Upper House ..	5	2	4	(b)	2	2	..	15
The Lower House ..	14	13	8	11	4	8	9	67
Total ..	19	15	12	11	6	10	9	82

(a) For particulars of Government in office following results of 1949 elections see § 4.2 (c) following.
(b) Abolished in 1922.

(vi) *Ministers of State.* (a) *Commonwealth.* A statement showing the names of Ministers of State who have held office from the inauguration of the Commonwealth Government to 1925 will be found in Official Year Book No. 18, pp. 82 and 83. The names of the present Ministers will be found on pages 101 and 102. The names of those who have held office from 1st April, 1925 to 31st December, 1949 are shown in the following table.

	17.10.33	12.10.34

- (a) Afterwards the Hon. Sir C. W. C. Marr, K.C.V.O., D.S.O., M.C., V.D. (b) Senator.
 (c) Afterwards Viscount Bruce of Melbourne; Minister without portfolio, London, from 26th September, 1932. (d) Acting-Treasurer from 3rd November, 1939. (e) Afterwards the Rt. Hon. A. W. Fadden. (f) Afterwards the Rt. Hon. F. M. Forde. (g) Afterwards the Rt. Hon. J. A. Beasley.
 (h) Afterwards the Rt. Hon. E. J. Holloway. (i) Afterwards the Hon. Sir Walter Massey-Greene, K.C.M.G. (j) Afterwards the Rt. Hon. R. G. Casey, C.H., D.S.O., M.C.

(b) *State Ministries.* A list of the members of the Ministry in each State in June, 1949, will be found on pages 102-104.

5. *Number and Salary of Members of the Legislatures.*—The following table shows the number and annual salary of members in each of the legislative chambers in June, 1949:—

MEMBERS OF COMMONWEALTH AND STATE PARLIAMENTS, AND ANNUAL SALARIES, JUNE, 1949.

Members in—	C'wealth.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Total.
NUMBER OF MEMBERS.								
Upper House ..	(a)36	60	34	(b)	20	30	19	199
Lower House ..	(a)75	(c)90	65	(d)62	39	50	30	411
Total ..	(a)111	150	99	62	59	80	49	610

- (a) The Representation Act 1948 provided for the increase in numbers of the Senate to 60 and of the House of Representatives to 121 (excluding 2 members for the Territories) to take effect after the 1949 general elections. (b) Abolished in 1922. (c) The Parliamentary Electorates and Elections (Amendment) Act 1949 provided for an increase in the number of members and electorates to 94. (d) The Electoral Districts Act of 1949 provided for an increase in the number of members and electorates to 75, to apply from beginning of Thirty-second Parliament (in ordinary course of events to be elected in 1950).

MEMBERS OF COMMONWEALTH AND STATE PARLIAMENTS, AND ANNUAL SALARIES, JUNE, 1949—*continued*.

Members in—	C'wealth.	N.S.W.	Vic.	Q'land.	S. Aust.	W.Aust.	Tasmania.	Total.
ANNUAL SALARY. (£.)								
Upper House ..	(e) 1,500	(f) 300	(g) 750	(b)	(h) 900— 975	(i) 960	(j) 800— 1,050	
Lower House ..	(e) 1,500	(k) 1,375	(g) 1,050	(l) 1,050	(h) 900— 975	(i) 960	(j) 850— 1,050	

(b) Abolished in 1922. (e) Increased from £1,000 as from July, 1947. (f) As from September, 1948. (g) Increased from £350 and £650 respectively as from July, 1948. Plus £100 for urban and country electorates (i.e., excluding Metropolitan Electoral Districts). (h) According to distance of electorate from Adelaide. Increased from £600 as from September, 1948. (i) Increased as from October, 1947 from £600 plus basic wage adjustment. Plus £50 where electorate is more than 50 miles from Perth. (j) According to area of electorate and distance from the Capital. Increased from £370-£500 and £400-£500 respectively as from August, 1948. (k) Increased from £875 as from July, 1947. (l) Increased from £850 as from July, 1948.

The use of the expressions "Upper House" and "Lower House" in the statement above, though not justified constitutionally, is convenient, inasmuch as the legislative chambers are known by different names in the Commonwealth and in some of the States.

6. **Enactments of the Parliament.**—In the Commonwealth all laws are enacted in the name of the Sovereign, the Senate, and the House of Representatives. The subjects with respect to which the Commonwealth Parliament is empowered to make laws are enumerated in the Constitution. In the States laws are enacted in the name of the Sovereign by and with the consent of the Legislative Council (except in Queensland) and Legislative Assembly or House of Assembly. The Governor-General or the State Governor acts as Viceroy as regards giving the Royal Assent to or vetoing Bills passed by the Legislatures, or reserving them for the special consideration of the Sovereign. In the States the Councils and Assemblies are empowered generally, subject to the Commonwealth Constitution, to make laws in and for their respective States, in all cases whatsoever. Subject to certain limitations, they may alter, repeal, or vary their Constitutions. Where a law of a State is inconsistent with a law of the Commonwealth the latter prevails, and the former is, to the extent of the inconsistency, invalid.

§ 2. Parliaments and Elections.

1. **Qualifications for Membership and for Franchise.**—The conspectus in § 4 of "General Government" in Official Year Book No. 13 contains particulars, as in 1920, relating to the legislative chambers in the Commonwealth and State Parliaments, and shows concisely the qualifications necessary for membership and for the franchise in each House. (These were, in the main, applicable in 1946, but it must be remembered that Queensland abolished the Upper House in 1922, and that since 1934 the New South Wales Legislative Council has consisted of 60 members elected as required for a twelve-year term by the members of the two Houses.) It has further to be remembered that in 1925 the Commonwealth Parliament passed an Act removing the disqualification on racial grounds from (a) natives of British India and (b) persons who have become naturalized, while in 1949 the Parliament agreed to an Act which in effect removes the disqualification from aboriginal natives of Australia—entirely, in the States of New South Wales, Victoria, South Australia and Tasmania and in the Australian Capital Territory, and to a modified extent in Queensland, Western Australia and the Northern Territory. Disqualification of persons otherwise eligible, either as members or voters, is generally on the usual grounds of being of unsound mind or attainted of treason, being

convicted of certain offences, and, as regards membership, on the grounds of holding a place of profit under the Crown, being pecuniarily interested in a Government contract except as a member of an incorporated company of more than 25 persons, or being an undischarged bankrupt.

2. **The Commonwealth Government.**—From the establishment of the Commonwealth until 1949 the Senate had consisted of 36 members, six being returned by each of the original federating States. The Constitution empowers Parliament to increase or decrease the size of the Parliament and, as the population of the Commonwealth has more than doubled since its inception, the Parliament enacted legislation in 1948 enlarging both Houses of Parliament and providing a representation ratio nearer to the proportion which existed at Federation. Thus the Representation Act 1948 provides that there shall be ten Senators from each State instead of six, increasing the total to 60 Senators. To effect this transition in the Senate, seven Senators were elected from each State at the elections of 1949, four of whom taking office immediately the Senate sat after the election, the remaining three commencing their term on the usual date—1st July, 1950. Two of the seven Senators elected will retire in 1953. Members of this Chamber are normally elected for the term of six years, but half the members retire at the end of every third year, although they are eligible for re-election. Accordingly, at each subsequent election of Senators, five Senators will normally be elected in each State, making 30 to be elected at each periodical election.

In accordance with the Constitution, the total number of members of the House of Representatives must be as nearly as practicable double that of the Senate. Correspondingly, in terms of the Constitution and the Representation Act 1905-38, from the date of the 1949 elections the number of members in the House of Representatives was increased from 74 to 121 (excluding the members for the internal Territories). As the States are represented in the House of Representatives on a population basis, the numbers were increased as follows:—New South Wales—from 28 to 47; Victoria—20 to 33; Queensland—10 to 18; South Australia—6 to 10; Western Australia—5 to 8; Tasmania—5, no increase; total—74 to 121. The increase in the number of members of Parliament necessitated a redistribution of seats and a redetermination of electoral boundaries. This was carried out by the Distribution Commissioners in each State, taking into account community or diversity of interest, means of communication, physical features, existing boundaries of divisions and sub-divisions, and State electoral boundaries.

Since the general elections of 1922 the Northern Territory has been represented by one member in the House of Representatives. The Australian Capital Territory Representation Act 1948 gave similar representation to the Australian Capital Territory as from the elections of 1949. The members for the Territories may join in the debates but are not entitled to vote, except on a motion for the disallowance of any ordinance of the Territory or on any amendment to such motion.

The Constitution provides for a minimum of five members for each original State. Members of the House of Representatives are elected for the duration of the Parliament, which is limited to three years. In elections for Senators, the whole State constitutes the electorate. For the purposes of elections for the House of Representatives, the State is divided into single electorates corresponding in number with the number of members to which the State is entitled. Further information regarding the Senate and the House of Representatives is given in earlier issues of the Official Year Book.

3. **Commonwealth Elections.**—There have been eighteen complete Parliaments since the inauguration of Federation. The fifth Parliament, which was opened on 9th July, 1913, was dissolved on 30th July, 1914 in somewhat unusual circumstances, when, for the first time in the history of the Commonwealth, a deadlock occurred between the Senate and the House of Representatives in the second session of the fifth Parliament, and, in accordance with Section 57 of the Constitution which provides for such an eventuality, both Houses were dissolved by the Governor-General. Until 1927 the Parliament met at Melbourne; it now meets at Canberra, the first meeting at Parliament House, Canberra, being opened by H.M. the King, then Duke of York, on 9th May,

1927. The first session of the eighteenth Parliament opened on 6th November, 1946, and the Parliament was dissolved on 31st October, 1949. The first session of the nineteenth Parliament opened on 22nd February, 1950. Particulars of Commonwealth elections from 1931 to 1946 are shown in the following table, while details of the 1949 elections, by States, appear in the Appendix to this issue :—

28.9.1946	2,314,193	2,425,660	4,739,853	2,199,860	2,254,081	4,453,941	95.06	92.93	93.97

(a) Includes members of Forces not enrolled.
with those for Senate.

(b) All electorates contested, hence numbers identical

The percentage of electors who exercised the franchise at each election rose from 53.04 for the Senate and 55.69 for the House of Representatives in 1901 to 77.69 and 78.30 respectively in 1917. The next election in 1919 showed a considerable falling off, and in 1922 the decrease was still more marked, the respective percentages for that year being 57.95 and 59.36, or very little more than those for 1901. Compulsory voting was introduced prior to the election in 1925, and an exceedingly heavy vote (over 91 per cent) was cast in that year. This high percentage has been exceeded appreciably at subsequent elections, increasing in 1943 to 96.3 per cent for both Houses. In the 1946 election it dropped to 94.0 per cent.

Members of both Houses of Parliament are elected by universal adult suffrage. The system of voting for the House of Representatives is preferential, and for the Senate, since the passing of the Commonwealth Electoral Act 1948, that of proportional representation (*see par. 4 below*). Previously it also had been preferential.

For the first time two women were elected to the Commonwealth Parliament in 1943, one to the Senate and the other to the House of Representatives.

4. **Proportional Representation in Senate Elections.**—The Commonwealth Electoral Act 1948, introduced with the Representation Act 1948 to enlarge the Commonwealth Parliament (*see above*), changed the system of scrutiny and counting of votes in Senate elections from preferential to that of proportional representation. The system of recording votes (*i.e.*, by placing numbers in the squares opposite the names of candidates in order of voters' preferences) is unchanged, however.

Summarized, the new procedure is as follows. The total number of first preference votes for all candidates is divided by one more than the number of candidates to be elected, and the resulting quotient, plus one, is taken as the quota necessary for each candidate to obtain in order to become elected. When the number of first preference votes received by an elected candidate is greater than the quota, and there are still vacancies to be filled, his votes in excess of the quota (surplus votes) are transferred in the following manner to the continuing candidates in proportion to the voters' preferences.

The number of the elected candidate's surplus votes is divided by the number of his first preference votes, the resulting fraction representing the transfer value of his surplus votes. The totals of the elected candidate's ballot papers, after the latter have been arranged in parcels according to the next available preference for continuing candidates, are multiplied by the transfer value. This determines the number of the elected candidate's votes to be transferred to each continuing candidate, the method being to transfer, after random selection, the appropriate number of ballot papers which bear the next available preference for that candidate.

After the surplus votes of all candidates elected on the count of first preferences have been so transferred, any continuing candidate who has received a number of votes equal to or greater than the quota is elected.

This procedure of the transfer of surplus votes of elected candidates is continued, while there are vacancies to be filled, until the stage is reached where no continuing candidate has received the quota of votes. Then the candidate with the lowest votes is excluded, and the whole of his ballot papers are transferred to the continuing candidates according to preferences. Any continuing candidate thereby obtaining the quota is elected, and if there are still vacancies his surplus votes are transferred.

The process of exclusion and transfer of ballot-papers is repeated until remaining vacancies are filled by candidates obtaining the quota, or, in respect of the last vacancy, by obtaining a majority of votes, even if this is less than the quota.

When transferring the surplus votes of elected candidates other than those elected on the count of first preference votes, only those ballot papers which have been transferred to the elected candidates at the last preceding count are considered. Similarly, in the transfer of surplus votes of a candidate elected during the exclusion procedure, only the ballot papers transferred from the candidate last excluded are taken into account.

The exclusion of the candidate with the lowest votes and the distribution of his ballot papers operate also immediately after the count of first preference votes, where no candidate has obtained the quota.

The amending act also provides for the filling of a long casual vacancy by the continuing candidate who, next after the periodical vacancies have been filled as above, first receives a number of votes equal to or greater than the quota.

5. Commonwealth Referenda.—(i) *General.* According to Section 128 of the Constitution, any proposed law for the alteration of the Constitution must, in addition to being passed by an absolute majority of each House of Parliament, be submitted to a referendum of the electors in each State, and must further be approved by a majority of the States and of the electors who voted, before it can be presented for Royal Assent. So far 23 proposals have been submitted to referenda and the consent of the electors has been received in four cases only, the first in relation to the election of Senators in 1906, the second and third in respect of State Debts—one in 1910 and the other in 1928—and the fourth in respect of Social Services in 1946. Details of the various referenda and the voting thereon were given in previous issues of the Official Year Book (*see* No. 18, p. 87, No. 31, p. 67, No. 35, p. 60, No. 36, p. 61, and No. 37, pp. 64–5).

(ii) *Post-war Reconstruction and Democratic Rights Referendum, 1944.* Particulars of events leading up to, and of, the referendum on the transfer of powers from the States to the Commonwealth in August, 1944 will be found in Official Year Book No. 37 and earlier issues.

(iii) *Social Services, Organized Marketing of Primary Products and Industrial Employment Referendum, 1946.* A referendum held on 28th September, 1946, to decide whether the Commonwealth should be empowered to legislate for the provision of certain social services, the organized marketing of primary products, and with respect to terms and conditions of employment in industry, resulted in approval being granted by the electors for the first proposal only. Consequent on obtaining this approval, the Constitution Alteration (Social Services) Act 1946 was assented to on 19th December,

1946. Section 51 (Powers of the Parliament) of the Constitution is thereby altered by the insertion, after paragraph (xxiii) invalid and old-age pensions, of the following paragraph :—

“(xxiiiia) The provision of maternity allowances, widows’ pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances.”

For a summary of the events leading up to the referendum, and for details of the voting at the referendum, see Official Year Book No. 37, pp. 64-5.

(iv) *Constitution Alteration (Rents and Prices) Referendum, 1948.* On 29th May, 1948 a referendum was taken to decide whether power should be granted to the Commonwealth Government to control rents and prices (including charges). The results showed a majority in each State against the proposal. Particulars were as follows :—

CONSTITUTION ALTERATION (RENTS AND PRICES) REFERENDUM, 29th MAY, 1948.

State.	Yes.	No.	Informal.	Total.
New South Wales	723,183	1,012,639	26,269	1,762,091
Victoria	559,361	693,937	16,739	1,270,037
Queensland	187,955	422,236	7,487	617,678
South Australia	167,171	229,438	6,169	402,778
Western Australia	105,605	168,088	4,589	278,282
Tasmania	50,437	91,845	2,853	145,135
Total	1,793,712	2,618,183	64,106	4,476,001
Percentage (a)	40.66	59.34

(a) Excludes informal votes.

6. *Broadcast of Parliamentary Proceedings.*—The proceedings of both Houses of the Commonwealth Parliament are regularly broadcast at certain specified times by the national broadcasting system. For some particulars of the origin of this practice see Official Year Book No. 37, p. 65.

7. *Parliamentary Retiring Allowances Act 1948.*—For particulars see § 3 dealing with Parliamentary Superannuation Funds, pp. 91-99.

8. *The Parliament of New South Wales.*—(i) *Constitution.* The Parliament of New South Wales consists of two Chambers, the Legislative Assembly and the Legislative Council. The Assembly consists of 90 members, elected in single-seat electoral districts, who hold their seats during the existence of the Parliament to which they are elected. The duration of Parliament is limited to three years. Until 1934 the Council was a nominee Chamber, consisting of a variable number of members appointed for life without remuneration, but as from 23rd April, 1934 it was reconstituted and became a House of 60 members to serve without remuneration for a term of twelve years, with one-quarter of the members retiring every third year. As from 1st September, 1948, however, members of the Council have been paid an allowance of £300 per annum. The electorate comprises members of both Chambers, who vote as a single electoral body at simultaneous sittings of both Chambers. At the first elections in 1933, four

groups of fifteen members were elected to serve respectively twelve years, nine years, six years, and three years. Any person resident for at least three years in Australia and entitled to vote at the election of members of the Legislative Assembly is eligible for election as a member of the Council, if nominated by two electors, an elector being a member of either of the two Houses for the time being.

Legislation assented to in July, 1949 provides for an increase in the number of members and electorates to 94. Other amendments include the restriction of postal voting and prohibition on the use of electoral propaganda for the two days preceding polling day, and on polling day itself.

(ii) *Particulars of Elections.* Since the introduction of responsible government in New South Wales there have been 34 complete Parliaments, the first of which opened on 22nd May, 1856, and was dissolved on 19th December, 1857, while the thirty-fourth was dissolved on 29th March, 1947. The thirty-fifth Parliament opened on 28th May, 1947. The elections of 1920, 1922 and 1925 were contested on the principle of proportional representation, but a reversion to the system of single seats and preferential voting was made at the later appeals to the people. Particulars of voting at elections from 1932 to 1947 are given below :—

NEW SOUTH WALES LEGISLATIVE ASSEMBLY ELECTIONS.

Year.	Electors Enrolled—Whole State.			Contested Electorates.					
				Electors who Voted.			Percentage of Electors who Voted.		
	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.
1932	739,009	725,999	1,465,008	690,094	676,993	1,367,087	96.42	96.37	96.39
1935	769,220	759,493	1,528,713	654,383	640,369	1,294,752	96.09	95.60	95.85
1938	803,517	804,316	1,607,833	608,727	606,767	1,215,494	96.15	95.41	95.78
1941	834,752	850,029	1,684,781	698,100	727,652	1,425,752	90.99	94.03	92.52
1944 ^a	833,300	899,406	1,732,706	610,904	699,368	1,310,272	81.62	92.85	87.47
1947	903,138	949,649	1,852,787	794,908	826,622	1,621,530	95.40	93.68	94.51

(a) Service and "Section" votes omitted in percentage calculations.

The principle of one elector one vote was adopted in 1894, and that of compulsory enrolment in 1921. Compulsory voting was introduced at the 1930 election and the percentage of electors who voted in contested electorates rose from 82.54 in 1927 to over 96 in 1932, but declined to 87.47 in 1944.

The franchise was extended to women (Women's Franchise Act) in 1902, and was exercised by them for the first time in 1904.

(iii) *Legislative Assembly Members Pensions Act 1946.* For particulars see § 3 dealing with Parliamentary Superannuation Funds, pp. 91-99.

9. *The Parliament of Victoria.*—(i) *Constitution.* Both of the Victorian legislative Chambers are elective bodies, but there is a considerable difference in the number of members of each House, as well as in the qualifications necessary for members and electors. The number of members in the Upper House is 34, and in the Lower House, 65. In the Legislative Council the tenure of the seat is for six years,

but one member for each of the seventeen provinces retires every third year. Members of the Legislative Assembly are elected for the duration of Parliament, which is limited to three years.

(ii) *Particulars of Elections.* Since the introduction of responsible government in Victoria there have been 36 complete Parliaments, the first of which opened on 21st November, 1856, and closed on 9th August, 1859, while the thirty-sixth was dissolved on 9th October, 1947. The thirty-seventh Parliament was opened on 2nd December, 1947. Particulars of voting at elections during the years 1931 to 1947 are shown in the following table:—

VICTORIAN ELECTIONS.
LEGISLATIVE COUNCIL.

Year.	Contested Electorates.				
	Electors Enrolled—Whole State.		Electors Enrolled.	Electors who Voted.	Percentage of Electors who Voted.
1931	470,349	239,975	93,244	38.86	
1934	469,395	160,980	47,375	29.43	
1937	447,694	265,194	208,925	78.78	
1940	471,843	235,784	178,666	75.78	
1943	465,637	117,584	83,568	71.07	
1946	517,719	393,907	291,295	73.95	

LEGISLATIVE ASSEMBLY.

Year.	Electors Enrolled—Whole State.			Contested Electorates.					
				Electors who Voted.			Percentage of Electors who Voted.		
	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.

1943	596,595	665,035	1,261,630	392,160	491,519	883,679	81.87	91.57	87.00
1945	594,761	682,188	1,276,949	408,671	487,800	896,561	85.75	89.93	87.98
1947	645,342	700,188	1,345,530	585,026	621,789	1,206,815	94.44	92.52	93.44

Single voting is observed in elections held for either House, plurality of voting having been abolished for the Legislative Assembly in 1899 and for the Legislative Council in 1937; for the latter House, however, it is still possible for an elector to be enrolled for more than one province, and such elector may select the province for which he desires to record his vote. A preferential system of voting (*see* Official Year Book No. 6, p. 1182) was adopted for the first time in Victoria at the election held in November, 1911. Compulsory voting was first observed at the 1927 elections for the Legislative Assembly, and at the 1937 elections for the Legislative Council. The franchise was extended to women by the Adult Suffrage Act 1908, while voting at elections was made compulsory for the Legislative Assembly in 1926 and for the Legislative Council in 1935.

(iii) *Parliamentary Contributory Retirement Fund Act 1946-1948.* For particulars *see* § 3 dealing with Parliamentary Superannuation Funds, pp. 91-99.

10. **The Parliament of Queensland.**—(i) *Constitution.* As stated previously, the Legislative Council in Queensland was abolished in 1922, the date of Royal Assent to the Act being 23rd March, 1922. The Legislative Assembly is composed of 62 members, and the State is divided into that number of electoral districts. The Electoral Districts Act of 1931, assented to on 1st October, 1931, provided that from and after the end of the twenty-fifth Parliament (dissolved on 19th April, 1932) the number of members and electoral districts should be reduced from 72 to 62.

Under the Electoral Districts Act of 1949 the number of members and the number of electorates were increased from 62 to 75, the increase to become effective from the beginning of the thirty-second Parliament, which in the ordinary course of events will be elected in 1950. The Act divided the State into four zones, as follows:—Zone 1, the "Metropolitan Zone", divided into 24 electoral districts returning 24 members; Zone 2, the "South-Eastern Zone", 28 districts and members; Zone 3, the "Northern Zone," thirteen districts and members; Zone 4, the "Western Zone", ten districts and members. A commission of three appointed by the Governor-in-Council will completely distribute the prescribed zones into the number of electoral districts. District quotas will be obtained by dividing the total number of electors living in a zone and enrolled on 31st December, 1948 by the number of electoral districts prescribed for that zone. In distributing the zones the Commissioners must consider community or diversity of interest, means of communication, physical features, boundaries of Petty Sessions Districts and of areas of Local Authorities. The Act empowers the Governor-in-Council to appoint three electoral commissioners to carry out any redistribution made necessary by future changes in the number of electors.

(ii) *Particulars of Elections.* Since the establishment of responsible government in Queensland there have been 30 complete Parliaments, the last of which was dissolved on 21st March, 1947. Opinions differ regarding the opening date of the first Queensland Parliament. According to the Votes and Proceedings of the Legislative Assembly the House met for the first time on 22nd May, 1860, when the members were sworn and the Speaker elected. The Governor, however, was unable to be present on that date, but he duly attended on 29th May, 1860, and delivered the Opening Address.

At the elections held in May, 1915, the principle of compulsory voting was introduced for the first time in Australia. Of the number of electors enrolled at the 1944 elections, 87.55 per cent. went to the polls. Statistics regarding elections during the years 1932 to 1947 are shown below:—

QUEENSLAND LEGISLATIVE ASSEMBLY ELECTIONS.

Contested Electorates.

Year.	Electors Enrolled—Whole State.			Electors who Voted.			Percentage of Electors who Voted.		
	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.
1932	274,986	250,958	525,944	236,266	220,628	456,894	92.59	93.14	92.86
1935	303,018	272,270	575,288	245,331	225,427	470,758	92.55	92.89	92.71

1947a	357,083	340,322	697,405	324,869	308,040	632,909	90.98	90.51	90.75

(a) All electorates contested.

The election of 1907 was the first State election in Queensland at which women voted, the right being conferred under the Elections Acts Amendment Act 1905. In 1942 the system of preferential voting was abolished and that of election of the candidate obtaining the highest number of votes in the electorate now operates.

(iii) *Parliamentary Contributory Superannuation Fund Act 1948.* For particulars see § 3 dealing with Parliamentary Superannuation Funds, pp. 91-99.

II. The Parliament of South Australia.—(i) *Constitution.* In this State there is a Legislative Council composed of twenty members and a House of Assembly with 30 members, both Chambers being elective. For the Legislative Council the State is divided into five districts each returning four members two of whom retire alternately. Thirty-nine districts return one member each to the House of Assembly; prior to 1938 there were 46 members representing nineteen districts.

(ii) *Particulars of Elections.* Since the inauguration of responsible government in South Australia there have been 31 complete Parliaments, the first of which was opened on 22nd April, 1857. The thirty-first Parliament was opened on 20th July, 1944, and was dissolved on 28th February, 1947. The thirty-second Parliament was opened on 26th June, 1947. The duration of the twenty-eighth Parliament was extended from three to five years by the provisions of the Constitution (Quinquennial Parliament) Act 1933, but this Act was repealed by the Constitution Act Amendment Act (No. 2) 1939, and the three-year term was reverted to. Particulars of voting at the last six elections are shown below :—

South Australia was the first of the States to grant women's suffrage (under the Constitution Amendment Act 1894), the franchise being exercised by women for the first time at the Legislative Assembly election on 25th April, 1896. Compulsory voting for the House of Assembly, provided for by the Electoral Act Amendment Act 1942, was first observed at the 1944 election. A system of preferential voting is in operation.

(iii) *Parliamentary Superannuation Act 1948.* For particulars see § 3 dealing with Parliamentary Superannuation Funds, pp. 91-99.

12. The Parliament of Western Australia.—(i) *Constitution.* In this State both Chambers are elective. For the Legislative Council there are 30 members, each of the ten provinces returning three members, one of whom retires biennially. At each biennial election the member elected holds office for a term of six years, and automatically retires at the end of that period. The Legislative Assembly is composed of 50 members, one member being returned by each electoral district. Members of the Legislative Assembly are elected for three years.

(ii) *Particulars of Elections.* Since the establishment of responsible government in Western Australia there have been eighteen complete Parliaments, the first of which was opened on 30th December, 1890. The eighteenth Parliament was opened on 27th July, 1944, and expired on 31st January, 1947. The preferential system of voting in use in Western Australia is described in Official Year Book No. 6, p. 1184. Elections for membership of both Houses, which were due to be held early in 1942, were postponed by the Legislative Council Postponement of Elections Act 1942 and the Legislative Assembly Duration and General Elections Postponement Act 1941. Particulars of voting at the last six elections for each Chamber are shown in the table following:—

WESTERN AUSTRALIAN ELECTIONS.

Year.	Electors Enrolled—Whole State.			Contested Electorates.					
				Electors who Voted.			Percentage of Electors who Voted.		
	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.

(a) Includes 18,478 members of Forces not enrolled.

(b) Includes 567 members of Forces not enrolled.

Women's suffrage was granted by the Electoral Act of 1899. The first woman member to be elected to an Australian Parliament was returned at the 1921 election in this State. Voting for the Legislative Assembly was made compulsory in December, 1936, the first elections for which the provision was in force being those held on 18th March, 1939, when the percentage of electors who voted in contested electorates rose from 70.13 to 90.01. The high percentage of 90.60 in 1933 was due to the fact that the Secession Referendum, at which voting was compulsory, was taken on the Legislative Assembly election day (for particulars of the referendum *see* Official Year Book No. 26, p. 70, and later issues).

(iii) *Parliamentary Superannuation Act 1948.* For particulars *see* § 3 dealing with Parliamentary Superannuation Funds, pp. 91-99.

13. **The Parliament of Tasmania.**—(i) *Constitution.* In Tasmania there are two legislative Chambers—the Legislative Council and the House of Assembly, both bodies being elective. In accordance with the Constitution Act 1946, the Council now consists of nineteen members, elected for six years and returned from nineteen divisions. Three members retire annually (except in the 1953 elections and in each sixth successive year thereafter, when four retire) and the Council cannot be dissolved as a whole. Prior to the 1946 Act there were eighteen members elected from fifteen divisions, of which Hobart returned three members and Launceston two. There are five House of Assembly divisions, corresponding to the Commonwealth electoral divisions, each returning six members elected under a system of proportional representation which first came into force at the 1909 elections (*see* Official Year Book No. 6, p. 1185). The life of the Assembly was extended from three to five years by the Constitution Act 1936.

(ii) *Particulars of Elections.* The first Tasmanian Parliament opened on 2nd December, 1856, and closed on 8th May, 1861. There have been 27 complete Parliaments since the inauguration of responsible government. Particulars of the voting at the last six elections for the House of Assembly are shown hereunder :—

The present members of the Legislative Council have been elected at various dates and the following particulars relate to the contested elections in three divisions in 1947 and 1948 respectively :—Number of electors on the roll, 12,545 and 21,762 ; number of votes recorded, 10,102 and 17,800 ; percentage of enrolled electors who voted, 80.53 and 81.79.

The suffrage was granted to women under the Constitution Amendment Act 1903 and compulsory voting came into force on the passing of the Electoral Act in 1928. The system of voting is proportional representation by single transferable vote.

§ 3. Conspectus of Superannuation Funds of the Parliaments of the Commonwealth and of the Australian States as at 30th June, 1949.

The following pages contain a summary of the main features of the Parliamentary Superannuation Funds established by the Parliament of the Commonwealth of Australia and the Parliament of each of the States of New South Wales, Victoria, Queensland, South Australia and Western Australia as at 30th June, 1949. No such fund operates in respect of the Tasmanian Parliament. In Western Australia a system previously existed which provided for the payment of a lump sum on loss of membership, but the authorizing Act (Members of Parliament Fund Act 1941-1944) was repealed on the commencement of the new Act. The amounts at credit of the former fund were transferred to the new fund, and the period during which deductions were made under the repealed Act is taken into account when determining a member's period of contributions under the new Act.

In addition to the main features of the funds summarized hereafter, there are a number of matters for which the several authorizing Acts prescribed fairly uniform treatment, and which, in order to obviate extending the table unduly, may here be dealt with briefly.

Application of Benefits. Benefits apply only to persons who are Members of Parliament at the commencement of the Act, or become members thereafter.

Service. Periods during which a member or former member was entitled to Parliamentary allowance; etc.; includes broken periods and service before and after commencement of Act.

Resignation before, or retirement on, expiration of term of service as a member. In such cases, in order to be eligible for a pension, etc. (in the Commonwealth scheme to avoid classification under "voluntary" retirement), a former member must produce adequate and satisfactory reasons for his failure to continue as a member. Such reasons include ill health, defeat at an ensuing election or by-election, failure to secure the support of the recognized political party of which he is a member, etc.

Suspension or reduction of pension on again becoming a Member of Parliament, or on holding office of profit, etc., under Crown. Provision exists generally for the suspension or reduction of benefit received during period of remuneration from new office (the Victorian scheme provides for disqualification for life on acceptance of office of profit, etc., under Crown).

Repayment of refund of contributions. On re-election to his former Parliament a member who has received a refund of contributions must repay it within a prescribed time in order to have the service covered by the contributions once again credited to him.

Assignment of pensions. Pensions are absolutely inalienable.

CONSPECTUS OF SUPERANNUATION FUNDS OF THE PARLIAMENTS OF THE

Particulars.	Commonwealth.	New South Wales.
(I) <i>Authorizing Act—</i> (a) Title	Parliamentary Retiring Allowances Act 1948	Legislative Assembly Members Pensions Act 1946

To widower, where marriage had taken place prior to loss of membership or, if no surviving widow or widower, then to a dependent child or children under the age of 16 years, being the issue of such a marriage—Pension at the rate appropriate to the entitlements as above

§ 4. Administration and Legislation.

1. **The Commonwealth Parliaments.**—The first Parliament of the Commonwealth was convened by proclamation dated 29th April, 1901, by his Excellency the late Marquis of Linlithgow, then Earl of Hopetoun, Governor-General. It was opened on 9th May, 1901, by H.R.H. the Duke of Cornwall and York, who had been sent to Australia for that purpose by His Majesty the King. The Rt. Hon. Sir Edmund Barton, G.C.M.G., K.C., was Prime Minister.

The following table shows the number and duration of Parliaments since Federation :—

COMMONWEALTH PARLIAMENTS.

Number of Parliament.	Date of Opening.	Date of Dissolution.
First	9th May, 1901	23rd November, 1903
Second	2nd March, 1904	5th November, 1906
Third	20th February, 1907	19th February, 1910
Fourth	1st July, 1910	23rd April, 1913
Fifth	9th July, 1913	30th July, 1914(a)
Sixth	8th October, 1914	26th March, 1917
Seventh	14th June, 1917	3rd November, 1919
Eighth	26th February, 1920	6th November, 1922
Ninth	28th February, 1923	3rd October, 1925
Tenth	13th January, 1926	9th October, 1928
Eleventh	9th February, 1929	16th September, 1929
Twelfth	20th November, 1929	27th November, 1931
Thirteenth	17th February, 1932	7th August, 1934
Fourteenth	23rd October, 1934	21st September, 1937
Fifteenth	30th November, 1937	27th August, 1940
Sixteenth	20th November, 1940	7th July, 1943
Seventeenth	23rd September, 1943	16th August, 1946
Eighteenth	6th November, 1946	31st October, 1949
Nineteenth	22nd February, 1950

(a) On this occasion, the Governor-General, acting on the advice of the Ministry, and under Section 57 of the Constitution, granted a dissolution of both the Senate and the House of Representatives, this being the only occasion on which a dissolution of both Houses has occurred.

2. **Governors-General and Commonwealth Ministries.**—The following statements show the names of the several Governors-General and the Ministries which have directed the administration of the affairs of the Commonwealth since its inception :—

(a) GOVERNORS-GENERAL.

Rt. Hon. EARL OF HOPETOUN (afterwards MARQUIS OF LINLITHGOW), K.T., G.C.M.G., G.C.V.O. From 1st January, 1901 to 9th January, 1903.

4. *The Course of Legislation.*—The actual legislation by the Commonwealth Parliament up to the end of 1948 is indicated in alphabetical order in Vol. XLVI. "The Acts of the Parliament of the Commonwealth of Australia passed during the year 1948, in the First Session of the Eighteenth Parliament of the Commonwealth and portion of the Second Session of the Eighteenth Parliament of the Commonwealth, with Tables, Appendix and Index." A "Chronological Table of Acts passed from 1901 to 1948, showing how they are affected by subsequent legislation or lapse of time" is also given, and, further, "A Table of Commonwealth Legislation passed from 1901 to 1948 in relation to the several provisions of the Constitution", is furnished. Reference should be made to these for complete information. In issues of the Official Year Book prior to No. 23, an analytic table was included showing the nature of Commonwealth legislation in force at the end of the latest year available. A classification of legislation, according to its relation to the several provisions of the Constitution, up to the end of the year 1928 will be found in No. 22, pp. 76-84.

5. *Legislation during 1948.*—The following paragraphs present a summary of some of the more important legislative enactments (excluding ordinary appropriation and loan acts) of the Commonwealth and State Parliaments during the year 1948.

Commonwealth.—Australian Broadcasting. An amending Act constituting the Australian Broadcasting Control Board and altering the method of financing the Australian Broadcasting Commission.

Australian Capital Territory Representation. Provides for the representation of the Australian Capital Territory in the Parliament of the Commonwealth.

Commonwealth Electoral. Amends the law with regard to scrutiny of votes in Senate elections.

International Trade Organization. Approves acceptance by Australia of the General Agreement on Tariffs and Trade and the Havana Charter for an International Trade Organization.

International Wheat Agreement. Approves acceptance by Australia of the International Wheat Agreement.

Nationality and Citizenship. Amends the law with regard to British nationality and provides for Australian citizenship.

Representation. An amending Act increasing the number of Senators and members of the House of Representatives.

River Murray Waters. Ratifies and approves an agreement for the further variation of the Agreement between the Commonwealth and the States of New South Wales, Victoria and South Australia, providing for the increase of storage in the Hume Dam and for the increase of the capacity of the inlet works of Lake Victoria, for the creation of a reserve of water, and for protection of the catchment areas from erosion.

Tuberculosis. Provides for medical services and financial assistance by the Commonwealth in treatment and control of tuberculosis.

Weights and Measures (National Standards). Provides for the prescription of Commonwealth legal units of measurement, to be the sole legal units of measurement.

Wheat Industry Stabilization. Repeals the Wheat Industry Stabilization Act 1946 and portions of the Wheat Industry Stabilization Act (No. 2) 1946; provides for the acquisition and marketing of wheat for a period of five years.

New South Wales.—Constitution Amendment (Legislative Council Members' Allowances). Provides for payment of an allowance of £300 per annum to members of the Legislative Council.

Fauna Protection. Repeals Birds and Animals Protection Act and provides for preservation and protection of fauna.

Industrial Arbitration. An amending Act providing for appointment of special commissioners, increasing the powers of conciliation commissioners and enabling the Industrial Commission to divide and sit as two full benches.

Landlord and Tenant. Repeals the Fair Rents Act 1939, provides for control of rents of certain premises, and for recovery of possession of certain premises; relates to matters previously dealt with under Commonwealth regulations.

Land Sales Control. Makes provision for regulating and controlling prices payable in respect of certain transactions in land; relates to matters previously dealt with under Commonwealth regulations.

Local Government (Areas). Repeals the Sydney Corporation Act; unites the City of Sydney and certain areas, constituting the united area as a city; unites certain other areas or areas and parts of areas, constituting them as municipalities; and reconstitutes the Sydney County Council.

Prices Regulation. Provides for the regulation of prices and rates for certain goods and services; relates to matters previously dealt with under Commonwealth regulations.

Racing. An amending Act providing for betting at night trotting meetings, for the constitution of a Greyhound Racing Control Board, and for matters connected with the control of racing.

Rivers and Foreshores Improvement. Provides for constitution of a Rivers and Foreshores Improvement Board, and for works to improve rivers and foreshores and to prevent erosion of land by tidal and non-tidal waters.

State Coal Mines. An amending Act providing for reconstitution of the State Coal Mines Control Board as the State Mines Control Authority with increased powers, and for appointment of a Director of State Coal Mines, and requiring State authorities to use coal from State mines.

Stock (Artificial Insemination). Provides for the control and regulation of the artificial insemination of stock.

Wheat Industry Stabilization. Complementary to Commonwealth Act of same title.

Victoria.—Cancer Institute. Establishes a Cancer Institute for research into, and treatment of, cancer and allied conditions.

Essential Services. Protects the community against the interruption or dislocation of essential services.

Hospitals and Charities. Establishes a Hospitals and Charities Commission and amends and consolidates the law relating to hospitals and charities.

Landlord and Tenant. Amending Acts, relating to the control of rents of premises and the recovery of possession of premises; relates to matters previously dealt with under Commonwealth regulations.

Parliamentary Salaries and Allowances. An amending Act increasing Parliamentary salaries and allowances.

Prices Regulation. Relates to the regulation and removal of control of prices and rates for certain goods and services and of certain transactions in land; refers to matters previously dealt with under Commonwealth regulations.

Railways Standardization Agreement. Authorizes and ratifies the execution by or on behalf of the State of Victoria of an agreement between the Commonwealth and the State of New South Wales, Victoria and South Australia in relation to the standardization of certain railways.

State Electricity Commission. An amending Act extending the borrowing powers of the State Electricity Commission of Victoria to finance its projects at Morwell and Kiewa.

Statute Law Revision Committee. Amends the Constitution Act to provide for the constitution of a Joint Statute Law Revision Committee of the Legislative Council and the Legislative Assembly.

Wheat Industry Stabilization. Complementary to Commonwealth Act of same title.

Queensland.—Coal Industry (Control). An Act to provide means for securing and maintaining adequate supplies of coal throughout Queensland and for export, and for providing for the regulation and improvement of the coal industry in Queensland; constitutes the Queensland Coal Board.

Constitution Acts Amendment. Provides for increases in salaries for Members of Parliament, Ministers, etc., and for an increase of one in Cabinet numbers.

Criminal Law. Amends the criminal code, providing for stricter control of reckless or dangerous driving.

Diseases in Stock. Amends the Stock Acts, providing for the tuberculosis testing of all dairying herds.

Industrial Law. An amending Act to make further provision for upholding the industrial law, prohibiting the counselling, etc. towards industrial offence. (Repealed by a subsequent Act.)

Land. Amends Land Acts to give power to limit perpetual lease allotments purchasable by one buyer, and to control overstocking; includes reclamation as improvement.

Landlord and Tenant. Acts relate to the determination of fair rents of dwelling-houses and recovery of possession of premises; Fair Rents Acts are repealed; refer to matters previously dealt with under Commonwealth Regulations.

Profiteering Prevention. Relates to the regulation of prices and rates of certain goods and services and of the sales of certain lands; consolidates and amends the law relating to the prevention of profiteering; refers to matters previously dealt with under Commonwealth regulations.

Queensland.—British Food Production. Provides for the development and extension of primary industries by establishing the Queensland—British Food Corporation.

State Electricity Commission. An amending Act reconstituting the corporation of the State Electricity Commission under a single Commissioner.

Suppression of Gambling. Amends the Acts to legalize the broadcasting of barrier positions and jockeys.

Wheat Industry Stabilisation. Complementary to Commonwealth Act of same title.

South Australia.—Coal. Extends the operation of the Coal Act 1947, enabling the Government to control the distribution and use of coal and the consumption of gas and electricity, until the end of 1950.

Landlord and Tenant (Control of Rents). An amending Act extending rent control to premises other than dwelling-houses, and relating to the recovery of possession of premises; refers to matters previously dealt with under Commonwealth regulations.

Land Settlement. An amending Act, empowering the Minister of Lands to acquire, either compulsorily or by purchase, any land in the Western Division of the South-East of the State for the purpose of draining, and allotment in blocks.

Mental Institute Benefits. Empowers the Minister of Health to enter into an agreement with the Commonwealth extending the Hospital Benefits Scheme to mental hospitals.

Payment to Members of Parliament. Repeals Payments to Members of Parliament Acts 1936 and 1944, and increases payments to Members of Parliament.

Potato Marketing. Establishes a South Australian Potato Board and confers on it power to control the marketing of potatoes, but not to acquire and market them.

Prices. Provides for the control of prices and land sales; relates to matters previously dealt with under Commonwealth regulations.

River Murray Waters. Complementary to Commonwealth Act of same title.

South Eastern Drainage. An amending Act empowering the South Australian Drainage Board to construct drains and drainage works in the Western Division of the South East of the State.

Wheat Industry Stabilization. Complementary to Commonwealth Act of same title.

Western Australia.—*Increase of Rent (War Restrictions).* Amends and continues the operation of the 1939-1947 Act; relates to the recovery of possession of premises; refers to matters previously dealt with under Commonwealth regulations.

Industrial Arbitration. An amending Act permitting the appointment of a Conciliation Commissioner to assist the President and to be chairman of any industrial board constituted under the Act.

Land Sales Control. Provides for regulating and controlling prices payable in respect of certain transactions in land; relates to matters previously dealt with under Commonwealth regulations.

Matrimonial Causes and Personal Status Code. Amends and codifies the law relating to divorce, separation, nullity of marriage, custody of children and maintenance.

Mining. An amending Act providing for safe working of coal-mines and empowering enforcement of modern mining methods.

Prices Control. Provides for the control of prices and rates of certain goods and services; relates to matters previously dealt with under Commonwealth regulations.

Western Australian Marine. Consolidates a number of Acts and brings the marine laws of Western Australia into line with those of other States and the Commonwealth.

Wheat Industry Stabilisation. Complementary to Commonwealth Act of same title.

Workers' Compensation. An amending Act providing that all compensation matters be subject to control by a board; liberalizes benefits payable.

Tasmania.—*Adult Education.* Provides for the creation of an Adult Education Board to plan and supervise the development of adult education in the State.

Apple and Pear Marketing. Provides for the marketing of apples and pears during the year 1949; sets out functions of the Australian Apple and Pear Marketing Board and the State Committee.

Fruit Board. An amending Act providing that every fruit-grower must insure the fruit grown by him against loss or damage by hail.

Landlord and Tenant (Temporary Provisions). Provides for the continuation for a further period of the provisions of certain Commonwealth regulations relating to landlord and tenant.

Land Sales Control. Provides for the regulation and control of the prices payable in respect of certain transactions in land; relates to matters previously dealt with under Commonwealth regulations.

Parliamentary Salaries and Allowances. An amending Act authorizing increases in the rates of Parliamentary salaries and allowances.

Prices. Provides for the regulation and control of prices for certain goods and services; relates to matters previously dealt with under Commonwealth regulations.

§ 5. Commonwealth Government Departments.

Official Year Book No. 37 contains, on pp. 76-86, a list of the Commonwealth Government Departments as at 31st March, 1947, showing details of the matters dealt with by each Department, and the Acts administered by the Minister of each Department.

It is proposed to re-publish this information at intervals only, whenever changes in Departments and their functions make it desirable. Issue No. 12 (pp. 924-5) was the last prior to No. 37 to contain such detailed information, and included, in addition, similar particulars for the State Governments.

§ 6. Cost of Parliamentary Government.

The following statement shows the cost of parliamentary government in the Commonwealth and in each State, as well as the cost per head of population, for the year ended 30th June, 1948. In order to avoid incorrect conclusions as to the cost of the Governor-General's or Governor's establishment, it may be pointed out that a very large part of the expenditure (with the exception of the item "Governor's salary") under the head of Governor-General or Governor represents official services entirely outside the Governor's personal interest, and carried out at the request of the Government.

COST OF PARLIAMENTARY GOVERNMENT, 1947-48.

(£.)

Particulars.	C'wlth.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	Total.

§ 8. Diplomatic and other Representatives Overseas and in Australia.

Australia has diplomatic and other representatives in the United Kingdom, Canada, New Zealand, Union of South Africa, Eire, India, Pakistan, Ceylon, Malaya, Egypt, the United States of America, Brazil, China, France, the Netherlands, the Union of Soviet Socialist Republics and other countries, in all more than twenty. In addition, there are the Australian delegates to the United Nations at New York and Australian representatives in Germany and Japan.

Countries represented in Australia by diplomatic and other representatives include the following :—The United Kingdom, Canada, New Zealand, Union of South Africa, Eire, India, Pakistan, Malta, the United States of America, Brazil, China, Denmark, France, the Netherlands, Norway, Sweden and the Union of Soviet Socialist Republics. Including those with consular representatives, who number about 160, there are about fifty countries represented.

For particulars of the various diplomatic and other representatives overseas and in Australia see Chapter XXVIII.—Miscellaneous. Full details of British and foreign representation in Australia—diplomatic and consular—may be obtained from a publication issued by the Department of External Affairs, Canberra, entitled “Diplomatic and Consular List, including British Commonwealth Representatives and Trade Commissioners in Australia.”

CHAPTER IV.

LAND TENURE AND SETTLEMENT.

§ 1. Introduction.

1. **General.**—A comprehensive description of the land tenure systems of the several States is given in Official Year Book No. 4 (pp. 235-333), while later alterations are referred to in subsequent issues. In this chapter a summary is given of the principal features of existing land legislation. In previous issues an account is given of the various tenures under which Crown lands may be taken up. (*See* Official Year Book No. 22, pp. 133-195; also par. 2 hereunder for a conspectus of legislation at present in force). Special sections are devoted to closer settlement, the settlement of returned service personnel on the land and advances to settlers. Particulars as to the areas of land alienated in each State and similar matter are also included.

2. **State Land Legislation.**—The legislation in force relating to Crown Lands, Closer Settlement, Settlement of Returned Service Personnel and other matters dealt with in this chapter is summarized in the following conspectus :—

STATE LAND LEGISLATION.

New South Wales.	Victoria.	Queensland.
CROWN LANDS ACTS.		
Crown Lands Act 1913-1948: Western Lands Act 1901-1945: Prickly Pear Act 1924-1948.	Land Acts 1928-1941: Land (Crown Leases Adjustment) Act 1936: Land (Residence Area) Act 1935: Land Act 1941: Land Settlement (Ac- quisition) Act 1943: Agri- cultural College Act 1944.	Land Acts 1910-1948: Rabbit Acts 1913-1943: Upper Burnett and Callide Land Settlement Acts 1923-1932: Prickly Pear Land Acts 1923- 1941: Sugar Workers' Sele- ctions Acts 1923-1936: Stock Routes Improvement and Animal and Vegetable Pests Destruction Acts 1936-1938: Stock Routes and Rural Lands Protection Acts 1944-1948.

CLOSER SETTLEMENT ACTS.

Closer Settlement Act 1904-1948.	Closer Settlement Act 1938. Closer Settlement (Disposal of Land) Act 1948.	Closer Settlement Acts 1906- 1941.
----------------------------------	--	---------------------------------------

RESUMPTION ACTS (ALIENATED LAND).

		Public Works Land Resumption Acts 1906-1940: War Service Land Settlement Acquisition Acts 1945-1948.
--	--	---

MINING ACTS.

Mining Act 1906-1946: Mining Leases (Validation) Act 1946.	Mines Acts 1928-1942: Mines (Petroleum) Acts 1935-1943: Mines (Minerals) Act 1944.	Mining Acts 1898-1948: Mining for Coal and Mineral Oil Acts 1912-1941: Petroleum Acts 1923-1939: Miners' Home- stead Leases Acts 1913-1947: Coal Mining Acts 1925-1948: Mining on Private Land Acts 1909-1929, as amended by the Mining Acts Amendment Act 1930.
---	--	---

STATE LAND LEGISLATION—*continued.*

New South Wales.

Victoria.

Queensland.

RETURNED SERVICE PERSONNEL SETTLEMENT ACTS.

Returned Soldiers' Settlement Act 1916-1945: War Service Land Settlement Act 1941-1948.

Soldier Settlement Act 1945.

Discharged Soldiers' Settlement Acts 1917-1945: War Service Land Settlement Agreement Act 1945: War Service Land Settlement Acquisition Acts 1945-1948: War Service Land Settlement Acts 1946-1948: War Service (Sugar Industry) Land Settlement Act 1946.

ADVANCES TO SETTLERS ACTS.

Government Savings Bank Act 1906-1947: Returned Soldiers' Settlement Act 1916-1945: Rural Bank Agency Act 1934: Farmers' Relief Act 1932-1947: Rural Reconstruction Act 1939-1940.

State Savings Bank Acts 1915-1922: Primary Products Advances Acts 1919-1922: Fruit and Vegetable Act 1928: Farmers Advances Acts and Drought Relief Act 1940: Farm Water Supplies Advances Act 1944: Farmers Advances Act 1944: Drought Relief Acts 1944-1947.

State Advances Acts 1916-1934: Co-ordination of Rural Advances and Agricultural Bank Acts 1938-1947: Farmers' Assistance (Debts Adjustment) Acts 1935-1945: Financial Arrangements and Development Aid Acts 1942-1947: Marsupial Proof Fencing Acts 1898-1944: Wire and Wire-netting Advances Acts 1927-1944: Wire and Wire-netting Advances Acts 1933-1944: Discharged Soldiers' Settlement Acts 1917-1945: Re-establishment and Employment Act 1945: War Service Land Settlement Acts 1946-1948.

South Australia.

Western Australia.

Tasmania.

CROWN LANDS ACTS.

Crown Lands Act 1929-1944: Pastoral Act 1936-1944: Marginal Lands Act 1940: Crown Lands Development Act 1943.

Land Act 1933-1948.

Crown Lands Act 1935.

CLOSER SETTLEMENT ACTS.

Crown Lands Act 1929-1944: Land Settlement Act 1944.

Closer Settlement Act 1927.

Closer Settlement Act 1929-1945, incorporating Commonwealth and State War Service Land Settlement Agreement Act 1945-1948.

MINING ACTS.

Mining Act 1930-1946: Mines and Works Inspection Act 1920-1935: Mining (Petroleum) Act 1940: Broken Hill Proprietary Company's Indenture Act 1937: Leigh Creek Coal Act 1942.

Mining Act 1904-1937: Sluicing and Dredging for Gold Act 1899: Petroleum Act 1936-1940: Mines Regulation Act 1906: Mining Development Act 1902-1924: Inspection of Machinery Act 1921: Gold Buyers Act 1921: Coal Mines Regulation Act 1902-1926: Miners' Phthisis Act 1922: Mine Workers Relief Act 1932: Mining Tenements (War-time) Exemptions Act 1942.

Mining Act 1929: Aid to Mining Act 1927: Mines and Works Regulation Act 1915.

STATE LAND LEGISLATION—*continued.*

South Australia.	Western Australia.	Tasmania.
RETURNED SERVICE PERSONNEL SETTLEMENT ACTS.		
Discharged Soldiers' Settlement Act 1934-1940: War Service Land Settlement Agreement Act 1945.	Discharged Soldiers' Settlement Act 1918: War Service Land Settlement Agreement Act 1945: War Service Land Settlement Agreement (Land Application) Act 1945.	Closer Settlement Act 1929-1945, incorporating Commonwealth and State War Service Land Settlement Agreement Act 1945-1948.
AGRICULTURAL GRADUATES SETTLEMENT ACTS.		
Agricultural Graduates Act 1922-1938: Eyre Peninsula Land Purchase Act 1946.		
ADVANCES TO SETTLERS ACTS.		
Irrigation Act 1930-1945: Discharged Soldiers' Settlement Act 1934-1940: State Bank Act 1925-1941: Advances to Settlers Act 1930-1944: Agricultural Graduates Act 1922-1938: Loans for Fencing and Water Piping Act 1938-1940: Vermin Act 1931-1945.	Rural and Industries Bank Act 1944: Rural Relief Fund Act 1935.	State Advances Act 1935: Closer Settlement Act 1929-1939: Unemployed (Assistance to Primary Producers) Relief Act 1930-1934: Farmers' Debt Adjustment Act 1936.

3. **Northern Territory Land Legislation.**—In the Northern Territory of Australia the legislation relating to Crown lands is embodied in the Crown Lands Ordinance 1931-1948, the Darwin Town Area Leases Ordinance 1947 and the Darwin Short Term Leases Ordinance 1946; that relating to mining in the Mining Ordinance 1939-1947, the Mining (Royalty Suspension) Ordinance 1943, the Gold Dredging Act 1899 of South Australia, the Mineral Oil and Coal Ordinance 1922-1923, the Mining Development Ordinance 1939-1940, and the Mines Regulation Ordinance 1939; and that relating to advances to settlers in the Encouragement of Primary Production Ordinance 1931-1938.

4. **Australian Capital Territory Land Legislation.**—In the Australian Capital Territory the Ordinances relating to Crown lands are the Leases Ordinance 1918-1937, the City Area Leases Ordinance 1936-1947, the Church Lands Leases Ordinance 1924-1932, and the Leases (Special Purposes) Ordinance 1925-1943.

5. **Administration and Classification of Crown Lands.**—In each of the States there is a Lands Department under the direction of a Minister who is charged generally with the administration of the Acts relating to the alienation, occupation and management of Crown lands. The administrative functions of most of the Lands Departments are to some extent decentralized by the division of the States into what are usually termed Land Districts, in each of which there is a Lands Office, which deals with applications for selections and other matters generally appertaining to the administration of the Acts within the particular district. In some of the States there is a local Land Board or a Commissioner for each district or group of districts. In the Northern Territory the Administrator, under the control of the Minister for the Interior, is charged with the general administration of the Lands Ordinance and of Crown lands in the Northern Territory. In the Australian Capital Territory the administration of the Leases Ordinances is in the hands of the Department of the Interior.

Crown lands are generally classified according to their situation, the suitability of the soil for particular purposes, and the prevailing climatic and other conditions. The modes of tenure under the Acts, therefore, as well as the amount of purchase-money or rent, and the conditions as to improvements and residence, vary considerably. The administration of special Acts relating to Crown lands is in some cases in the hands of a Board under the general supervision of the Minister.

In each of the States there is also a Mines Department which is empowered under the several Acts relating to mining to grant leases and licences of Crown lands for mining and allied purposes. In the Northern Territory there are several ordinances relative to mining.

6. **Classification of Tenures.**—The tabular statement which follows shows the several tenures under which Crown lands may be acquired or occupied in each State. In the Northern Territory, leases (except pastoral and “miscellaneous”) are granted in perpetuity, pastoral and “miscellaneous” leases being restricted to periods of not more than 42 and 21 years respectively. The Lands Ordinance provides also for the grant in fee simple of town lands, agricultural lands, garden lands and tropical lands, and for the issue of grazing, occupation and “miscellaneous” licences. The mining leases and holdings are, generally speaking, similar to those of the States. In the Australian Capital Territory leases only are issued.

§ 2. Free Grants and Reservations.

1. *New South Wales*.—(i) *Free Grants*. Crown lands may, by notification in the *Gazette*, be dedicated for public purposes and be granted therefor in fee simple. Such lands may be placed under the care and management of trustees, not less than three in number, appointed by the Minister.

(ii) *Reservations*. Temporary reservations of Crown lands from sale or lease may be made by the Minister.

(iii) *Areas Granted and Reserved*. During 1946-47 and 1947-48 1,631 and 1,572 acres respectively were permanently reserved or dedicated for miscellaneous parks and

recreation reserves and for other public purposes, the number of separate localities or areas being 115 and 82 respectively. The areas reserved at 30th June, 1947 and 1948 were as follows :—

AREAS TEMPORARILY AND PERMANENTLY RESERVED : NEW SOUTH WALES.

(Acres.)

At 30th June—	Travelling Stock.	Pending Classification and Survey.	Forest Reserves.	Water and Camping Reserves.	Mining Reserves.	Recreation and Parks.	Other Reserves.	Total Area Reserved. (a)
1947 ..	5,330,327	4,055,348	2,083,032	836,743	1,217,525	419,633	4,079,554	18,022,162
1948 ..	5,327,695	4,155,138	2,083,095	833,309	1,215,757	420,665	3,986,921	18,022,580

(a) Includes areas occupied under annual, special, scrub or forestry leases, or under occupation licences or permissive occupancy, included under the appropriate leasehold tenures in following sections.

2. **Victoria.**—(i) *Free Grants.* The Governor may grant, convey or otherwise dispose of Crown lands for public purposes.

(ii) *Reservations.* The Governor may temporarily or permanently reserve from sale, lease or licence any Crown lands required for public purposes.

(iii) *Areas Granted and Reserved.* During 1947 and 1948 73 and 3 acres respectively were granted without purchase. The areas both temporarily and permanently reserved at the end of 1947 and 1948 were as follows :—

AREAS TEMPORARILY AND PERMANENTLY RESERVED : VICTORIA.

(Acres.)

At 31st December—	Roads.	Water Reserves.	Agricultural Colleges, etc.	Forest and Timber Reserves.		Reserves in the Mallee.	Other Reserves.	Total Area Reserved.
				Under Forests Acts. (a)	Under Land Acts.			
1947 ..	1,794,218	315,919	8,434	4,939,494	161,943	410,000	549,384	8,179,392
1948 ..	1,794,218	315,309	8,434	4,939,494	161,941	410,000	549,392	8,178,788

(a) Timber Reserves, included in figures, amounted to 879,394 acres in each year.

(iv) *Revoking of Agricultural Reservations.* Under the Agricultural Colleges Act 1944, the lands on which the agricultural colleges and experimental farms at Longerenong (2,386 acres) and Dookie (6,048 acres) are established, are permanently reserved as sites for the purposes of State Agricultural Colleges, and the remainder of the lands previously reserved has become unalienated for treatment as such under the Land Acts. See also § 5, para. 3 following.

3. **Queensland.**—(i) *Free Grants.* The Governor may grant in trust any Crown land which is or may be required for public purposes. Under the Irrigation Act, land to be used for the purpose of any undertaking under that Act may be vested in fee simple in the Irrigation Commission.

(ii) *Reservations.* The Governor may reserve from sale or lease, either temporarily or permanently, any Crown land which is or may be required for public purposes. Reserved lands may be placed under the control of trustees who are empowered to lease them for not more than 21 years with the approval of the Minister.

Under the State Forests and National Parks Acts, the Governor may permanently reserve any Crown lands and declare them to be a State Forest or a National Park.

(iii) *Areas Granted and Reserved.* During 1947 and 1948 respectively the areas granted in fee simple without payment were nil, the area set apart as reserves 785,244 and 717,310 acres, and reserves cancelled 245,993 and 243,487 acres. The areas reserved, including roads, at the end of 1947 and 1948 were as follows :—

AREAS RESERVED : QUEENSLAND.

(Acres.)

		Timber Reserves.	State Forests and National Parks.	Aboriginal Reserves.	Streets, Surveyed Roads and Stock Routes.	General.	Total Area Reserved.
At 31st December—							
1947..	..	3,123,065	4,300,462	6,471,986	3,454,000	5,658,358	23,016,871
1948..	..	3,116,020	4,751,152	6,517,749	3,479,754	5,651,773	23,516,448

4. *South Australia.*—(i) *Free Grants.* The Governor may dedicate Crown lands for any public purpose and grant the fee simple of such lands, with the exception of foreshores and land for quays, wharves or landing-places, which are inalienable in fee-simple from the Crown.

(ii) *Reservations.* The Governor may reserve Crown lands for the use and benefit of aborigines, military defence, forest reserves, railway stations, park lands or any other purpose that he may think fit.

(iii) *Areas Granted and Reserved.* During 1946-47 and 1947-48 respectively, free grants were issued for areas of 67 and 96 acres, and reserves comprising 6,768 and 9,473 acres were proclaimed. At 30th June, 1947 and 1948, the total area of surveyed roads, railways and other reserves was 20,263,100 and 20,272,573 acres respectively, including at each date 16,726,400 acres in the north-west of the State set apart as an aboriginal reserve in 1921, and 595,200 acres at Ooldea, adjoining the transcontinental railway, reserved for a similar purpose in 1940.

5. *Western Australia.*—(i) *Free Grants.* The Governor may dispose of, in such manner as for the public interest may seem best, any lands vested in the Crown for public purposes, and may grant the fee simple of any reserve to secure the use thereof for the purpose for which such reserve was made.

(ii) *Reservations.* The Governor may reserve any lands vested in the Crown for public purposes. Areas not immediately required may be leased by the Governor for periods up to 10 years. Reserves may be placed under the control of a local authority or trustees, with power to lease them for a period not exceeding 21 years, or may be leased for 99 years. Temporary reserves may also be proclaimed.

(iii) *Areas Granted or Reserved.* During the years ended 30th June, 1947 and 1948, approximately 673,105 and 78,975 acres respectively were reserved for various purposes. At 30th June, 1948 (figures at 30th June, 1947, in parentheses), the total area reserved was 50,409,691 (50,328,930) acres, comprising State forests, 3,399,799 (3,398,013) acres, timber reserves 1,789,133 (1,789,133) acres, and other reserves 45,220,759 (45,141,784) acres.

6. *Tasmania.*—(i) *Free Grants.* No mention is made in the Crown Lands Act respecting free grants of land, and it is expressly stated that no lands may be disposed of as sites for religious purposes except by way of sale under the Act. Under the Returned Soldiers' Settlement Act 1916, returned soldiers who applied prior to 31st March, 1922 were eligible to receive free grants of Crown land not exceeding £100 each in value, but these grants were conditional on the land being adequately improved.

(ii) *Reservations.* The Governor in Council may except from sale or lease, and reserve to His Majesty any Crown land for public purposes, and vest for such term as he thinks fit any land so reserved in any person or corporate body. Any breach or non-fulfilment of the conditions upon which such land is reserved renders it liable to forfeiture. A school allotment, not exceeding 5 acres in area, may also be reserved.

(iii) *Areas Granted or Reserved.* The total area reserved at the end of 1947 and 1948 was 2,937,684 and 3,967,808 acres respectively, excluding 22,319 and 21,724 acres respectively of land occupied by Commonwealth and State Departments.

7. *Northern Territory.*—(i) *Reservations.* The Governor-General may resume for public purposes any Crown lands not subject to any right of, or contract for, purchase, and may reserve, for the purpose for which they are resumed, the whole or any portion of the lands so resumed.

(ii) *Areas Reserved.* The total area of reserves at 30th June, 1947 and 1948 respectively was 69,334 and 71,018 square miles, comprising aboriginal native, 68,103 and 69,015 square miles; and other reserves, 1,231 and 2,003 square miles.

8. *Summary.*—The following table shows the total areas reserved in each State, and the grand totals, for the years 1944 to 1948:—

AREAS RESERVED.

('000 Acres.)

Year.	N.S.W. (a)	Victoria. (b)	Q'land. (b)	S. Aust. (a)	W. Aust. (a)	Tasmania. (b)	Nor. Terr. (a)	Total.
1944 ..	18,319	8,216	21,720	20,222	49,596	2,828	44,324	165,225
1945 ..	17,747	8,137	22,143	20,240	49,628	2,885	44,324	165,104
1946 ..	17,872	8,171	22,460	20,256	54,816	2,889	44,374	170,838
1947 ..	18,022	8,179	23,017	20,203	50,329	2,938	44,374	167,122
1948 ..	18,023	8,179	23,516	20,273	50,410	3,969	45,452	169,822

(a) At 30th June.

(b) At 31st December.

§ 3. Unconditional Purchases of Freehold.

1. *New South Wales.*—(i) *Auction Purchases.* Crown lands, not exceeding in the aggregate 200,000 acres in any one year, may be sold by public auction in areas not exceeding half-an-acre for town lands, 20 acres for suburban lands, and 640 acres for country lands, at the minimum upset price of £8, £2 10s., and 15s. per acre respectively. At least 10 per cent. of the purchase-money must be paid at the time of sale, and the balance within three months, or the Minister may allow the payment of such balance to be deferred for a period not exceeding ten years, 4 per cent. interest being charged. Town blocks in irrigation areas may also be sold by auction.

(ii) *After-Auction Purchases.* In certain cases, land offered at auction and not sold may be purchased at the upset price. A deposit in accordance with the terms and conditions under which the land was previously offered must be lodged, and, if the application be approved by the Minister, the balance of purchase money is payable as required by the specified terms and conditions.

(iii) *Special Purchases.* Under certain circumstances, land may be sold in fee simple, the purchaser paying the cost of survey and of reports thereon, in addition to the purchase-money. The minimum upset price per acre is the same as in the case of land sold by auction. Areas not exceeding 5 acres in extent may be sold to recognized religious bodies and public authorities at prices determined by the local land board.

(iv) *Improvement Purchases.* The owner of improvements in land, in authorized occupation by residence under any Mining or Western Lands Act of land within a gold-field or mineral field, may purchase such land without competition at a price determined by the local Land Board, but at not less than £8 per acre for town lands or £2 10s. per acre for other lands. The area must not exceed $\frac{1}{4}$ acre within a town or village, or 2 acres elsewhere, and no person may purchase more than one such area within 3 miles of a similar prior purchase by him.

(v) *Areas Sold.* During the year ended 30th June, 1948 (figures for year ended 30th June, 1947 in parentheses) the total area sold was 361 (469) acres, of which 3 (5) acres were sold by auction and 48 (98) acres as after-auction purchases, while 22 (13) acres were sold as improvement purchases and 137 (316) acres as special purchases. The amount realized for the sale of the whole area was £23,220 (£24,415).

2. *Victoria.*—(i) *General.* Lands, not exceeding 100,000 acres in any one year, specially classed for sale by auction, may be sold by auction in fee simple at an upset price not less than £1 per acre. The purchaser must pay the survey fee at the time of the sale, together with a deposit of 12½ per cent. of the whole price; the residue is payable in equal half-yearly instalments with interest. Any unsold land in a city, town or borough, areas specially classed for sale, isolated pieces of land not exceeding 150 acres in area, and sites for churches or charitable purposes, if not more than 3 acres in extent, may be sold by auction on the same terms. Swamp or reclaimed lands may also be sold by auction, subject to the condition that the owner keeps open all drains, etc., thereon.

(ii) *Areas sold at Auction and by Special Sales.* During 1947 and 1948 totals of 1,248 and 1,480 acres respectively were disposed of under this tenure. 1,016 and 1,000 acres being country lands and 232 and 414 acres town and suburban lands.

3. *Queensland.*—(i) *General.* From 1917 to 1929 the law precluded land being made available for any class of selection which gave the selector the right to acquire the freehold title. Amending legislation giving power to make land available under freehold tenures was passed in 1929 but this provision was repealed by the Act of 1932.

(ii) *Areas Sold, etc.* During 1947 unconditional selections made freehold totalled 125 acres. In 1948 no unconditional selections were made freehold.

4. *South Australia.*—(i) *Sales by Auction.* The following lands may be sold by auction for cash :—(a) special blocks; (b) Crown lands which have been offered for lease and not taken up within two years; (c) town lands; and (d) suburban lands which the Governor excepts from the operations of the Land Board. A purchaser must pay 20 per cent. of the purchase money in cash, and the balance within one month or within such extended time as the Commissioner of Crown Lands may allow. Town lands may be sold subject to the condition that they cannot be transferred or mortgaged within six years without the consent of the Commissioner. If the Commissioner of Crown Lands so determines, town lands may also be offered at auction on terms that the buyer may at his option purchase the lands for cash or on agreement for sale and purchase.

(ii) *Areas Sold, etc.* During the years ended 30th June, 1947 and 1948 the area of town lands and special blocks sold by auction was 59 and 25 acres respectively. In addition, 82,259 and 134,360 acres respectively were sold at fixed prices, and the purchases of 41,265 and 73,105 acres respectively on credit were completed, making a total of 123,583 and 207,490 acres respectively.

5. *Western Australia.*—(i) *Sales by Auction.* Town, suburban and village lands must be sold by auction after being surveyed into lots and notified in the *Gazette*. Ten per cent. of the purchase-money must be paid in cash together with the value of any improvements, and the balance in four equal quarterly instalments. Suburban land must be fenced within two years, and no Crown grant may be issued until the land is fenced.

(ii) *Areas Sold.* During the years ended 30th June, 1947 and 1948 the area of town and suburban allotments sold by auction was 864 and 766 acres in 413 and 363 allotments respectively.

6. *Tasmania.*—(i) *Sales by Auction.* Town lands may be sold by auction for cash or on credit. No town land, the price of which is less than £15, may be sold on credit.

(ii) *After-auction Sales.* Town lands, not within 5 miles of any city, which, after having been offered at auction, have not been sold, may be sold at the upset prices by private contract.

(iii) *Sales of Land in Mining Towns.* Any person being the holder of a residence licence or business licence who shall be in lawful occupation of any residence area or business area, and who shall be the owner of buildings and permanent improvements upon such land of a value equal to or greater than the upset price of such area, shall be entitled to purchase such area at the upset price at any time prior to the day on which such area is to be offered for sale as advertised. The upset price for such area shall not be less than £10, excluding the value of improvements, cost of survey, and of grant deed. The area which may be so purchased may, with the consent of the Commissioner, exceed one-quarter of an acre, but shall not in any case exceed one-half of an acre.

§ 4. Conditional Purchases of Freehold.

1. **General.**—The various methods of obtaining Crown lands by conditional purchase in the several States are given in some detail in preceding issues of the Official Year Book (see No. 22, pp. 141-9).

2. **New South Wales.**—At 30th June, 1947 and 1948 the total number of incomplete conditional purchases in existence was 40,552 and 39,784 respectively, covering an area of 13,218,370 and 12,964,458 acres respectively. The following table gives particulars of conditional purchases, including non-residential conditional purchases and special area conditional purchases, for the years ended 30th June, 1947 and 1948, together with the total area for which deeds have been issued :—

CONDITIONAL PURCHASES : NEW SOUTH WALES.

Year ended 30th June—	Applications Received.(a)	Applications Confirmed.(a)		Areas for which Deeds have been Issued.	
	Number.	Number.	Area.	During the Year.	To end of Year.
			Acres.	Acres.	Acres.
1947	42	15	732	209,650	31,896,353
1948	21	16	2,409	334,796	32,231,148

(a) Excludes conversions from other tenures—1946-47, 639 comprising 150,541 acres; 1947-48, 622 comprising 105,768 acres.

3. **Victoria.**—Excluding selections in the Mallee country, the total area purchased conditionally in 1947 and 1948 was 4,071 and 8,690 acres respectively, all with residence. The number of selectors was 30 and 53 respectively. There were no selections in the Mallee in 1947 and 1948.

In addition, the final payments were made during 1947 and 1948 on conditional purchases comprising 38 and 111 acres of Mallee lands.

4. **Queensland.**—The following selections were made freehold during 1947 and 1948 :—Agricultural farms 158,667 and 65,611 acres; agricultural homesteads 166 and 211 acres; prickly pear selections 63,315 and 121,740 acres; and prickly pear development selections 12,402 and 6,289 acres.

5. **South Australia.**—The land allotted under agreements to purchase during 1947-48 (figures for 1940-47 in parentheses) was 2,654 (13,598) acres, comprising Eyre's Peninsula railway lands 232 (1,039) acres, closer settlement lands 67 (2,309) acres, soldiers' acquired lands 1,589 (78) acres, surplus lands 717 (2,610) acres, and other Crown lands 49 (7,562) acres.

6. **Western Australia.**—During the year ended 30th June, 1948 (figures for the year ended 30th June, 1947 in parentheses) the number of holdings conditionally alienated was 607 (570), the total area involved being 698,079 (556,784) acres, comprising conditional purchases by deferred payments with residence of 692,414 (550,502) acres and free homestead farms 5,665 (6,282) acres. Under the heading "deferred payments with residence" are included conditional purchases of grazing lands.

In addition, Crown grants were issued during 1947-48 (1946-47 in parentheses) for the following selections, the prescribed conditions having been complied with :—Free homestead farms 22,952 (20,319) acres and conditional purchases 204,959 (175,108) acres.

7. **Tasmania.**—During 1947-48 (figures for 1946-47 in parentheses) conditional purchases of 37,340 (26,459) acres were completed. The total area sold conditionally was 2,304 (1,316) acres, comprising selections for purchase 2,099 (1,055) acres, and town and suburban allotments 205 (261) acres. The numbers of applications received and confirmed were 41 (19) and 183 (140) respectively.

§ 5. Leases and Licences under Land Acts.

1. **General.**—Information regarding the methods of obtaining leases and licences of Crown lands in the several States and Territories is given in preceding issues of the Official Year Book (see No. 22, pp. 149-63).

2. New South Wales.—On 30th June, 1948 the area of leases and licences under the control of the Department of Lands, the Water Conservation and Irrigation Commission, and the Western Lands Commission, comprised 112,943,345 acres of Crown lands, compared with 111,864,500 acres at the close of the previous year. Of the total area at 30th June, 1948, 77,316,391 acres were held under the Western Lands Acts, and of the remainder, 24,729,687 acres were held under perpetual lease and 10,897,2q7 acres under other forms of lease, licence and permissive occupancy.

The following table shows the areas held under various descriptions of leases and licences at the end of 1946-47 and 1947-48 :—

AREAS OCCUPIED UNDER LEASE OR LICENCE AT 30th JUNE : NEW SOUTH WALES.(a)
(Acres.)

Particulars.	1947.	1948.
<i>Areas taken up under Crown Lands or Closer Settlement Acts.</i>		
Occupation licences—ordinary	523,353	512,065
preferential	231,228	233,728
Conditional leases	11,812,721	11,733,894
Conditional purchase leases	161,572	157,644
Settlement leases	2,772,362	2,770,819
Improvement leases	32,479	57,141
Annual leases	510,976	467,335
Scrub leases	41,210	51,716
Snow leases	692,675	672,671
Special leases	942,035	936,003
Inferior lands leases	15,460	25,513
Residential leases (on gold and mineral fields)	5,372	5,398
Church and school lands	9	8
Permissive occupancies (ordinary)	2,016,765	2,103,596
(Closer Settlement Acts)	47,256	45,574
Prickly pear leases	158,062	148,068
Crown leases	7,329,046	7,285,895
Homestead farms	4,719,314	4,782,046
Homestead selections and grants	1,669,107	1,667,470
Closer settlement leases (Closer Settlement Acts)	129,562	502,657
Settlement purchase leases (Closer Settlement Acts)	862,343	958,960
Suburban holdings	53,697	53,615
Week-end leases	171	172
Group purchase leases (Closer Settlement Acts)	188,547	206,714
Leases of town lands	67	66
Returned soldiers' special holdings	13,705	13,695
Irrigation areas	231,627	234,521
<i>Leases, Licences and Permissive Occupancies under Western Lands Act.</i>		
Conditional leases	93,823	93,823
Perpetual leases	52,474,589	54,232,448
Other long-term leases	17,380,895	17,040,382
Permissive occupancies	5,459,641	5,600,861
Occupation licences—ordinary	164,025	163,420
preferential	1,130,806	185,427
Total	111,864,500	112,943,345

(a) Excludes mining leases and permits; forest leases and occupation permits; and leases outside irrigation areas, controlled by the Water Conservation and Irrigation Commission—34,616 acres in 1947 and 42,502 acres in 1948.

3. **Victoria.**—The area of Crown lands occupied under leases and licences in each of the years 1947 and 1948 is shown in the following table :—

AREAS OCCUPIED UNDER LEASE OR LICENCE : VICTORIA.
(Acres.)

Particulars.	1947.	1948.
Grazing licences—Other than Mallee	5,533,484	5,703,371
Mallee lands	2,972,274	3,145,878
Auriferous lands (licences)	16,334	16,004
Perpetual leases—Other than Mallee	16,550	16,550
Mallee lands	66,244	63,263
Swamp lands (leases)	4,020	4,020
Agricultural college lands (a)	66,974	48,005
 Total	 8,675,880	 8,997,091

(a) Transferred under Agricultural Colleges Act 1944 to control of Department of Lands and Survey.
See also § 2, para. 2 (iv) *ante*.

4. **Queensland.**—The total area occupied under lease or licence, excluding mining leases, at the end of 1947 and 1948 was as follows :—

AREAS OCCUPIED UNDER LEASE OR LICENCE AT 31st DECEMBER :
QUEENSLAND.
(Acres.)

Particulars.	1947.	1948.
Pastoral leases	243,185,020	243,521,780
Occupation licences	17,498,880	17,001,160
Grazing selections and settlement farm leases ..	83,613,898	84,255,577
Special purpose leases—Crown land	491,427	501,816
Reserves	652,071	853,180
Perpetual lease selections and perpetual lease prickly pear selections	6,392,727	6,434,883
Auction perpetual leases, etc.	30,476	30,582
Forest grazing leases (of reserves)	2,103,800	1,919,200
 Total	 353,968,299	 354,518,178

During 1947 and 1948 the areas taken up were 3,287,329 acres and 7,219,488 acres respectively. The latter area includes 1,904,014 acres of grazing selections which comprised land surrendered and re-opened in connexion with relief to South-Western grazing selectors. Pastoral leases amounted to 1,928,660 acres during 1947 and to 3,100,640 acres during 1948.

5. **South Australia.**—The total area including repurchased lands held under lease or licence, except mining lease and licence, at 30th June, 1947 and 1948, was respectively 135,771,083 acres and 136,809,071 acres, of which pastoral leases, 114,137,403 acres in

1947 and 115,295,542 acres in 1948, constituted the major proportion. The total area leased during 1946-47 was 803,353 acres, and during 1947-48 450,299 acres, pastoral, grazing and cultivation leases constituting 598,315 acres and 292,858 acres thereof.

6. **Western Australia.**—At 30th June, 1947 the total area held under lease or licence issued by the Lands Department amounted to 210,678,819 acres, of which 208,185,283 acres were under pastoral lease. Corresponding figures for 1948 were 214,570,348 acres and 211,877,572 acres. During 1946-47 the total area of leases issued was 5,116,885 acres (pastoral, 4,948,603 acres). Leases issued in 1947-48 totalled 5,217,746 acres (pastoral, 4,913,978 acres).

7. **Tasmania.**—Crown lands leased at 31st December, 1947 for other than mining purposes amounted to 2,715,612 acres, of which 2,062,933 acres were leased for pastoral purposes. At 31st December, 1948 corresponding figures were 2,684,579 acres and 2,026,455 acres. The area of land leased for pastoral purposes during 1946-47 was 67,812 acres and for 1947-48, 104,841 acres.

8. **Northern Territory.**—At 30th June, 1947 the total area held under lease, licence and permit was 154,201,390 acres, of which pastoral leases accounted for 104,497,920 acres and grazing licences 49,703,470 acres. At 30th June, 1948 the total area under lease, etc., was 157,595,520 acres, and pastoral leases and grazing licences, 115,144,320 acres and 40,231,338 acres respectively. Total annual rentals for all leases were £38,496 and £35,929 in 1946-47 and 1947-48 respectively.

9. **Australian Capital Territory.**—The number of leases granted under the City Area Leases Ordinance 1931-1947 to 30th June, 1947 and 1948 (excluding leases surrendered and determined) was 738 and 791 respectively, representing a capital value of £276,767 and £295,072. There were 68 new leases granted during 1946-47 and 80 during 1947-48. The total area held under grazing, etc., lease and licence (including Jervis Bay area) amounted to 304,298 acres in 1947 and 305,094 acres in 1948.

Fourteen leases have been granted under the Church Lands and Special Purposes Ordinances for church and scholastic purposes. In addition, a lease in perpetuity has been granted under the Church of England Land Ordinance 1926 for church purposes.

10. **Summary.**—The following table shows particulars of the land held in each State under lease or licence for purposes other than mining and forestry, the total leased or licensed land in the Territories, and the grand totals, for the years 1944 to 1948:—

AREAS OCCUPIED UNDER LEASE OR LICENCE OTHER THAN MINING AND FORESTRY.

('000 Acres.)

Year.	N.S.W. (a)	Victoria. (b)	Q'land. (b)	S. Aust. (a)	W. Aust. (a)	Tas. (b)	N.T. (a) (c)	A.C.T. (b) (c) (d)	Total.
1944	111,099	9,463	350,313	132,928	209,916	2,800	156,913	329	973,761
1945	112,225	8,691	354,689	133,401	209,574	2,771	163,497	329	985,177
1946	112,545	10,124	354,325	134,234	209,104	2,741	159,205	329	982,607

1948	112,943	8,997	354,518	136,809	214,570	2,685	157,596	305	988,423

(a) At 30th June.

(b) At 31st December.

(c) Leases and licences for all purposes

(d) Includes Jervis Bay area.

§ 6. Leases and Licences under Mining Acts.

1. **General.**—Information regarding the various forms of leases and licences under Mining Acts in the several States and the Northern Territory is given in preceding issues of the Official Year Book (*see* No. 22, pp. 170-7).

2. **New South Wales.**—The following table gives particulars of operations on Crown lands for the years 1946-47 and 1947-48:—

AREAS TAKEN UP UNDER MINING ACTS: NEW SOUTH WALES.

(Acres.)

Particulars.	1946-47.		1947-48.	
	Areas Taken up during Year.	Total Areas Occupied at End of Year.	Areas Taken up during Year.	Total Areas Occupied at End of Year.
Gold-mining	951	6,287	1,411	5,425
Mining for other minerals ..	14,811	195,287	22,046	193,888
Authorities to prospect ..	5,148,218	32,493	743,354	1,127,441
Other purposes	427	7,280	830	7,248
Total	5,164,407	241,257	767,641	1,334,002

3. **Victoria.**—The following table gives particulars of the number of leases and licences granted during 1947 and 1948, and the area under occupation for mining purposes at the end of each year:—

AREAS TAKEN UP UNDER MINING ACTS: VICTORIA.

Particulars.	1947.		1948.	
	Leases and Licences Granted.	Total Areas Occupied at End of Year.	Leases and Licences Granted.	Total Areas Occupied at End of Year.
	No.	Acres.	No.	Acres.
Gold-mining leases	75	23,697	41	21,082
Petroleum prospecting licences ..	1	523,446	8	948,665
Coal leases	61	{ (a) 12,995 3,514 }	66	{ (a) 16,023 3,871 }
Other leases and licences ..				
Total	137	563,652	115	989,641

(a) Includes State Coal Mine area 7,575 acres and State Electricity Commission area 2,800 acres.

The area covered by licences, etc., issued in 1947 was 17,278 acres, and in 1948 596,903 acres. The rent, fees, etc., were £7,297 and £8,044 in 1947 and 1948 respectively.

4. **Queensland.**—During 1947 and 1948 the number of miners' rights issued was 3,202 and 2,965 respectively, and of business licences 3 and 2. The following table gives particulars of the areas of lands taken up under lease or licence and the total areas occupied for 1947 and 1948. In addition, an area estimated at 25,000 acres was held under miners' rights and dredging claims.

AREAS TAKEN UP UNDER MINING ACTS : QUEENSLAND.

(Acres.)

Particulars.	1947.		1948.	
	Areas Taken up during Year.	Total Areas Occupied at End of Year.	Areas Taken up during Year.	Total Areas Occupied at End of Year.
Gold-mining	947	3,301	434	3,365
Mining for other minerals	2,659	27,782	7,005	32,287
Miners' homestead leases	6,964	420,926	1,010	421,027
Petroleum-prospecting permits	127,680	536,180	..	482,740
Coal prospecting areas	2,698	3,509	5,550	5,550
Total	140,948	991,698	13,999	944,969

The area of land held under lease only at 31st December, 1947 and 1948 was 452,009 and 456,679 acres respectively.

5. South Australia.—The following table gives particulars of operations for 1946-47 and 1947-48 :—

AREAS TAKEN UP UNDER MINING ACTS : SOUTH AUSTRALIA.

(Acres.)

Particulars.	1946-47.		1947-48.	
	Areas Taken up during Year.	Total Areas Occupied at End of Year.	Areas Taken up during Year.	Total Areas Occupied at End of Year.
Gold-mining leases	309	691	286	963
Mineral and miscellaneous leases	1,318	70,058	1,603	70,046
Claims	4,539	15,018	3,986	11,830
Occupation licences	2	31	2	32
Oil licences	31,360,000	35,936,000	32,000	35,968,000
Special mining leases	50,880	26,880	..	26,880
Search licences	640	640
Total	31,417,688	36,049,318	37,877	36,077,751

6. Western Australia.—The following table gives particulars of operations for 1947 and 1948. The figures exclude holdings under miners' rights and mineral oil licences. Of the areas shown as taken up in 1948 (1947 in parentheses), the area under lease was 4,110 (4,076) acres for gold-mining, 705 (2,150) for mining for other minerals, 768 (94) for miners' homesteads, and 128 (21) for miscellaneous—a total of 5,711 (6,341) acres. The balance was taken up under licences.

AREAS TAKEN UP UNDER MINING ACTS : WESTERN AUSTRALIA.

(Acres.)

Particulars.	1947.		1948.	
	Areas Taken up during Year.	Total Areas Occupied at End of Year.	Areas Taken up during Year.	Total Areas Occupied at End of Year.

Total	2,742	25,700	941	22,681

8. Northern Territory.—At 30th June, 1948 the number and acreage of holdings under mining lease and tenement were as follows :—

MINING LEASES AND TENEMENTS : NORTHERN TERRITORY, 30th JUNE, 1948.

Particulars.	No.	Acres.
Gold-mining leases	276	4,701
Mineral leases	198	4,898
Mineral reward leases	2	120
Tin dredging claims	1	300
Mineral prospecting areas	36	644
Gold prospecting areas	20	312
Business and residence areas	197	54
Miscellaneous	66	334
Total	790	11,363

At 30th June, 1947 leases and mining tenements in force numbered 787, with an aggregate area of 11,725 acres.

9. **Summary.**—The following table shows the areas taken up, or for which leases and licences for mining purposes were issued during the year, and the total areas occupied, for the years 1944 to 1948 :—

AREAS TAKEN UP UNDER MINING ACTS.

(Acres.)

Year.	N.S.W. (a)	Victoria.	Q'land. (b)	S. Aust. (a) (b)	W. Aust. (c)	Tasmania. (b)	Total. (d)

TOTAL AREAS OCCUPIED AT END OF YEAR.

(a) Year ended 30th June. (b) Excludes lands held under miners' rights only. (c) Excludes holdings under miners' rights and mineral oil licences. (d) Excludes Northern Territory. (e) Not available.

§ 7. Closer Settlement.

1. **General.**—Particulars regarding the methods of acquisition and disposal of land for closer settlement in the several States are given in preceding issues of the Official Year Book (*see* No. 22, pp. 163-9).

2. **New South Wales.**—Since the inception of closer settlement in 1905 to 30th June, 1948, 1,983 estates totalling 5,150,517 acres have been purchased by the Crown at a cost of £20,146,135 for purposes of closer settlement of civilians and returned service personnel. The total areas set apart, and the values thereof, to 30th June, 1947 and 1948, are shown below :—

CLOSER SETTLEMENT AREAS (a) : NEW SOUTH WALES.

Areas (Acres).			Values (£).			
To 30th June—	Acquired Lands.	Adjoining Crown Lands.	Total.	Cost of Acquired Lands.	Value of Adjoining Crown Lands.	Total.
1947.. ..	4,593,083	209,661	4,802,744	17,098,094	370,874	17,468,968
1948.. ..	5,150,517	213,355	5,363,872	20,146,135	385,284	20,531,419

(a) Includes 70 long-term leases resumed for closer settlement, but excludes areas acquired for village sites, 3,665 acres.

The following table gives particulars regarding the disposal of the farms by closer settlement purchase and closer settlement lease at 30th June, 1947 and 1948 :—

CLOSER SETTLEMENT ALLOTMENTS : NEW SOUTH WALES.

At 30th June—	Farms Allotted to Date.			Total Amount received in respect of Closer Settlement Farms.
	Number.	Area.	Capital Value.	
		Acres.	£	£
1947	9,448	4,593,083	17,098,094	16,393,118
1948	9,943	5,150,517	20,146,135	17,131,820

3. **Victoria.**—The Closer Settlement Commission was abolished as from 31st December, 1938, and land settlement was placed under the control of the Department of Lands and Survey. On 31st March, 1939 all Closer Settlement and Discharged Soldiers' accounts were amalgamated, the settlers' accounts adjusted and the new debt made payable over an extended period. As separate details are not available now, the following statement shows the operations under the provisions of the Closer Settlement Acts to 30th June, 1938 :—

CLOSER SETTLEMENT : VICTORIA.

(INCLUDING IRRIGATED AREAS.)

To 30th June—	How Made Available for Settlement.										Area Available for Settlement at 30th June.
	Total Area Acquired.	Total Cost of Purchases. (a)	Farm Allotments.	Workmen's Homes Allotments.	Agricultural Labourers' Allotments.	Town Allotments. (b)	Roads and Reserves.	Number of Farms, etc.	Total Receipts (Land and Advances).	Repayments of Principal (Land and Advances).	
	Acres.	£	Acres.	Acres.	Acres.	Acres.	Acres.	No.	£	£	Acres.
1938	1,402,568	10,244,023	1,162,676	790	3,484	86,599	14,775	8,722	14,297,492	4,779,268	1,006

(a) Includes value of Crown Lands taken over. Conditional Purchase Lease.

(b) Includes all land sold other than under

In the foregoing table the area and cost of land acquired for closer settlement purposes include, in addition to 133,128 acres purchased for £1,246,722 and transferred subsequently to discharged soldiers, a total area of 512,757 acres costing £4,125,822 which was purchased originally for the settlement of discharged soldiers.

4. **Queensland.**—Separate records relating to the closer settlement of re-purchased land are no longer kept by the Land Administration Board, and the operations under this heading are now included with "Leases and Licences under Land Acts." The total area acquired to 31st December, 1934 was 970,778 acres, costing £2,292,881. At the same date the area allotted amounted to 915,690 acres distributed over 3,048 selections consisting of 2,155 agricultural farms, 257 unconditional selections, 544 perpetual lease selections, 9 prickly pear selections, 6 perpetual lease prickly pear selections and 77 settlement farm leases. An area of 13,038 acres was sold by auction.

5. **South Australia.**—The following table shows the area of land acquired for the purposes of closer settlement, and the manner in which it had been dealt with to 30th June, 1947 and 1948 :—

CLOSER SETTLEMENT : SOUTH AUSTRALIA.

(Acres.)

To 30th June—	Area of Lands Re- purchased (excluding land afterwards set apart for other purposes).	Agree- ments with Covenants to Purchase.	Total Area Leased as Homestead Blocks.		Perpetual Leases.	Mis- cellaneous Leases.	Sold.	Remainder Un- occupied (including roads and land in course of allotment).
			Right of Purchase.	Perpetual Lease.				
1947 ..	839,461	342,012	..	1,353	125,528	20,881	337,019	12,668
1948 ..	840,918	321,059	..	1,293	124,068	14,845	390,861	18,102

The total area re-purchased at 30th June, 1948 was 922,568 acres at a cost of £2,835,437. Included in these figures are 51,872 acres purchased for £185,285 and afterwards set apart for returned service personnel, 3,214 acres reserved for forest and waterworks purposes, the purchase-money being £16,185, and also 26,563 acres of swamp and other lands which were purchased for £111,580 in connexion with reclamation of swamp-lands on the River Murray. Of the total area, 826,793 acres in 1947 and 822,726 in 1948 have been allotted to 2,809 and 2,818 persons respectively, the average area to each being 294 and 292 acres.

6. **Western Australia.**—The total area acquired for closer settlement up to 30th June, 1948 was 1,654,117 acres, costing £2,882,626. Of this area, 20,972 acres have been set aside for roads, reserves, etc., leaving a balance of 1,633,145 acres available for selection. Particulars of operations under the Act for the year ended 30th June, 1948 (figures for year ended 30th June, 1947 in parentheses) are as follows :—Area selected during the year 75,171 (3,738) acres; number of farms, etc., allotted to date 1,768 (1,700); total area occupied to date 867,235 (792,064) acres; balance available for selection 765,910 (451,526) acres; and total revenue £1,284,726 (£1,228,736).

7. **Tasmania.**—Up to 30th June, 1948, 37 areas had been opened up for closer settlement, the total purchase-money paid by the Government being £369,578 and the total area acquired amounting to 104,193 acres, including 12,053 acres of Crown lands. The number of farms occupied at 30th June, 1947 and 1948 was 185 and 182 respectively.

8. **Summary.**—Because of the amalgamation, in some States, of closer settlement records with those of other bodies it is not possible to obtain up-to-date figures of the total area in Australia acquired and set aside for closer settlement purposes, and of the cost thereof. The following figures are aggregations of the State totals as at the latest dates available, and should be regarded as approximations intended only to give some idea of the extent of the scheme :—Area acquired and set aside, 10,400,000 acres; cost thereof, £38,750,000.

§ 8. Settlement of Returned Soldiers and Sailors : 1914-18 War.

1. **General.**—Information regarding the methods adopted in each State following the commencement of the 1914-18 War for providing land for the settlement of returned soldiers and sailors, together with the conditions under which such land could be acquired

is given in earlier issues of the Official Year Book (*see* No. 13, pp. 1016-23, and No. 18, pp. 187-9). Later modifications were made with a view to simplifying procedure and liberalizing the conditions under which holdings may be acquired.

Particulars respecting the position of soldier settlement in each State at the latest available date are given in the following paragraphs.

2. **New South Wales.**—At 30th June, 1948 (figures at 30th June, 1947 in parentheses) the area set apart for soldiers of the 1914-18 War was 5,379,279 (5,379,279) acres, of which 1,710,272 (1,710,272) acres comprised acquired land purchased at a cost of £8,113,956 (£8,113,956). The number of settlers to whom farms, etc., had been allotted up to 30th June, 1948 was 9,882 (9,846). Five thousand, four hundred and sixty-eight (5,414) soldiers have either transferred or abandoned their farms, leaving 4,414 (4,432) in occupation of 5,648,358 (6,336,216) acres, consisting of 4,461,366 (5,023,689) acres of Crown lands, including 2,147,250 (2,716,300) acres in the Western Division taken up under the Western Lands Act, 2,241,583 (2,242,834) acres miscellaneous holdings, and 72,533 (64,555) acres within Irrigation Areas. The area of acquired lands still occupied is 1,186,992 (1,201,952) acres. These totals exclude 703 (703) discharged soldiers who purchased privately-owned land with their own capital and were granted advances for the purchase of stock and plant or for effecting improvements.

3. **Victoria.**—At 30th June, 1938 the area acquired or set apart for soldier settlement in respect of the 1914-18 War was 2,482,286 acres consisting of 1,763,241 acres of private land purchased at a cost of £13,361,266, 133,128 acres costing £1,246,722 taken over from Closer Settlement, and 585,917 acres of Crown lands valued at £447,622. Subsequently 512,757 acres valued at £4,125,822 were transferred to Closer Settlement. Up to 30th June, 1938 the number of settlers to whom farms, etc., had been allotted was 12,126, and the number of farms, etc., allotted was 9,784 (including 955 farms originally purchased for closer settlement purposes) containing 2,365,518 acres. In addition, 802 share farmers and holders of leasing agreements and private land had received assistance. The number of farms, etc., occupied at 30th June, 1938 was 8,426 (including 1,001 originally purchased for closer settlement) containing 1,734,379 acres. Later particulars cannot be given, as separate details are not available.

4. **Queensland.**—At 30th June, 1929 the area acquired or set apart for soldier settlement (1914-18 War) was 577,633 acres, of which 41,101 acres comprised private land, purchased at a cost of £270,480. The number of farms occupied was 1,148, containing 440,992 acres. Some of these selections were acquired under the ordinary provisions of the Land Act, and do not include areas specially set apart for soldiers.

As special records are not now kept respecting the areas held by discharged soldier settlers later information cannot be given.

5. **South Australia.**—At 30th June, 1947 and 1948 the area of land acquired or set apart for soldier settlement (1914-18 War) was 1,336,612 acres, of which 1,202,653 acres comprised private land purchased at a cost of £3,863,572. These figures exclude mortgages discharged, £194,770 on 360,403 acres representing 300 farms, etc., and 314 settlers. The number of soldiers to whom assistance had been granted under the Discharged Soldiers' Settlement Acts up to 30th June, 1948 was 4,165, and the area of farms, etc. (including mortgages discharged) on which assistance had been granted was 2,746,744 acres. At 30th June, 1948 (1947) farms, etc., occupied numbered 1,283 (1,357) containing 826,379 (898,371) acres.

6. **Western Australia.**—At 30th June, 1947 the area of private land acquired for soldier settlement (1914-18 War) was 345,110 acres purchased at a cost of £605,076. To that date, assistance had been given to 5,213 returned soldiers, and the number of farms, etc., occupied was 1,145. No further land has been purchased for returned soldiers of the 1914-18 War.

Owing to the amalgamation of records in the Rural and Industries Bank, information regarding assistance to returned soldiers is no longer available, but at 30th June, 1944 the area of land acquired or set apart for soldier settlement was 14,287,643 acres.

7. *Tasmania*.—At 30th June, 1948 (figures at 30th June, 1947 in parentheses) the area acquired or set apart for soldier settlement (1914–18 War) was 364,200 (364,200) acres, of which 277,348 (276,844) acres comprised private land purchased at a cost of £2,100,040 (£2,093,189). Up to 30th June, 1948 (figures to 30th June, 1947 in parentheses) the number of settlers to whom farms, etc., had been allotted was 2,380 (2,380) and the number of farms, etc., allotted was 2,204 (2,204) containing 343,557 (343,557) acres. The number of farms, etc., occupied at 30th June, 1948 was 795 containing 137,111 acres compared with 917 containing 166,768 acres at 30th June, 1947.

8. *Summary*.—As with closer settlement, it is not possible to give up-to-date figures of soldier settlement (1914–18 War) for Australia as a whole. The following figures are aggregations of State totals as at the latest dates available:—Total areas acquired and set aside, 24,400,000 acres, including 5,300,000 acres of private land acquired at a cost of £28,300,000.

9. *Losses on Soldier Settlements*.—(i) *General*. At the Premiers' Conference in Melbourne in 1917, it was agreed that the States should undertake the work of settling on the land returned soldiers and munition and war workers, and that the Commonwealth should raise the necessary loans for the States for this purpose.

The original arrangement provided that the Commonwealth should take the responsibility of finding up to £500 per settler as working capital for improvements, implements, seed, etc., an amount which was subsequently increased to £625, together with £375 per settler for resumptions and works incidental to land settlement approved by the Commonwealth. Loans were to be advanced to the settlers by the States at reasonable rates of interest not exceeding $3\frac{1}{2}$ per cent. in the first year, increasing by $\frac{1}{2}$ per cent. each subsequent year to the full rate of interest at which the money had been raised, plus working expenses, the difference between these rates and the cost of the money to the Government to be borne equally by the Commonwealth Government and the State Government. This provision respecting interest loss was not ultimately carried out as passed, the Commonwealth Government assuming responsibility for more than one-half of the interest loss, namely, a rebate of interest equal to $2\frac{1}{2}$ per cent. per annum during a period of five years from the date of payment to the State of each instalment of loan money.

(ii) *Report by Mr. Justice Pike*. In addition to this expected loss of interest, other losses occurred in connexion with soldier settlement, and in 1927 Mr. Justice Pike, of the Land Valuation Court of New South Wales, was commissioned to report, not only on the losses, but on the principles on which financial responsibility should be divided. His report in 1929, to which reference should be made for fuller information, found that in all the negotiations concerning soldier settlement on the land the States insisted on undivided control, and that financial responsibility went along with control except so far as the Commonwealth definitely promised to give assistance. The undertaking of the Commonwealth to share equally with the States the cost of lower interest rates to soldier settlers was made the basis of a practical compromise, and the report recommended that the total loss should be shared equally between the two parties.

The gross losses were assessed at £23,525,522 distributed amongst the States as follows:—New South Wales, £7,003,950; Victoria, £7,721,891; Queensland, £1,853,315; South Australia, £3,565,829; Western Australia, £2,059,368; and Tasmania, £1,321,169. Other concessions granted by the Commonwealth Government increased its proportion of these gross losses (£11,762,760) to £12,333,000.

The total amount advanced by the Commonwealth to the States was £35,000,000. For further information on this subject see Official Year Book No. 28, pp. 131–2, and earlier issues.

§ 9. Settlement of Returned Service Personnel : 1939-45 War.

1. War Service Land Settlement Scheme.—(i) *General.* Information regarding the method of operation and the administration of the War Service Land Settlement Scheme (the agreement between the Commonwealth and States for the settlement of returned soldier personnel on the land) will be found in preceding issues of the Official Year Book (*see* No. 37, pp. 113-117).

While the scheme is concentrated mainly on the expansion of the wool, fat lamb, wheat, dairying, citrus and dried fruit industries throughout Australia, other important industries have not been overlooked. The Commonwealth Government, under this scheme, is giving practical assistance and encouragement to the establishment of tobacco growing, particularly in the States of Queensland and Western Australia.

Before ex-servicemen are allotted tobacco farms, a course of training extending over a period of twelve months is provided under the Commonwealth Rural Training Scheme. This course, carried out mainly in the field, starts from the raising of seedlings and finishes with the grading of the crop. Tobacco-growing projects in Queensland and Western Australia which have been approved to date will, it is anticipated, result in an annual yield of nearly 1,000,000 lb. of tobacco leaf.

The sugar industry is now also included under the scheme, the Central Sugar Cane Prices Board having granted an assignment of land in Queensland for the growing of sugar-cane by ex-servicemen.

(ii) *Summary of Operations to 31st December, 1948.* Up to 31st December, 1948 the States had submitted to the Commonwealth settlement proposals involving 8,313,511 acres, and of that total 6,588,038 acres had been approved as suitable for soldier settlement.

The tables hereunder show the position up to 31st December, 1948.

(a) Excludes portion of one property.

The area approved in New South Wales as suitable for settlement to 31st December, 1948 was 4,385,596 acres. Plans had been approved for the subdivision of 199 properties into 1,241 holdings. In addition, approval had been given to include 144 single farm properties, making a total of 1,385 holdings, with an area of 3,898,639 acres. The number of holdings allotted to settlers was 901, involving 3,337,825 acres. In Victoria the area approved for soldier settlement to 31st December, 1948 was 548,044 acres. By the subdivision of 75 properties and the inclusion of 10 single farm holdings, a total of 981 holdings with an area of 387,614 acres had been provided. In Queensland 191,773 acres had been provided for soldier settlement to 31st December, 1948. This included 20,323 acres approved for sugar production and 17,375 acres to be used in the establishment of tobacco farms. Sixteen single farm holdings and the subdivision of 52 properties into 214 holdings provided 230 holdings with an area of 137,200 acres. The area submitted for soldier settlement by South Australia was 454,530 acres and 362,719 acres had been approved by the Commonwealth. To 31st December, 1948 an area of 119,371 acres had been subdivided into 301 holdings, and 99 holdings, with an area of 19,444 acres, had been allotted to settlers. Of the total holdings provided, 104 were in the Loxton, Chaffey and Loveday Irrigation areas. Western Australia had submitted 504 proposals for soldier settlement involving 1,361,437 acres, and 942,847 acres had been approved. To 31st December, 1948 there had been 460,682 acres subdivided into 223 holdings and 205 existing single farms with a total area of 314,118 acres had been approved as suitable. There had been 208 holdings with an area of 348,587 acres allotted to ex-soldier applicants. The production of tobacco leaf in Western Australia is to be expanded under the War Service Land Settlement Scheme. There had

SETTLEMENT OF RETURNED SERVICE PERSONNEL: 1939-45 WAR. 135

been 157,059 acres approved for soldier settlement in Tasmania and on King and Flinders Islands. Considerable developmental work is in progress and to 31st December, 1948 83 holdings, comprising 69,378 acres, had been provided. Fourteen of the holdings provided will be subject to an irrigation scheme on the Lawrenny Estate. Settlers will be engaged chiefly in dairying and sheep breeding for wool and fat lambs.

(iii) *Expenditure.* The following table shows a dissection of the Commonwealth expenditure on War Service Land Settlement to 31st December, 1948 :—

WAR SERVICE LAND SETTLEMENT (1939-45 WAR): EXPENDITURE TO 31st DECEMBER, 1948.

(£.)

Advances to States.	N.S.W.	Vic.	Qld.	S. Aust.	W. Aust.	Tas.	Total.
For acquisition of land	1,132,655	2,121,117	351,750	3,605,522

2. *Loans and Allowances (Agricultural Occupations) Scheme.*—Full details of the measures taken to provide for the re-establishment of ex-servicemen in rural occupations are contained in Official Year Book No. 37, pp. 117-8.

Ex-servicemen are taking advantage of this means of re-establishing themselves and to the 31st December, 1948 the number of loan applications approved by State authorities for the Commonwealth was 10,988 for an amount of £7,890,164. The amount actually advanced to applicants to 31st December, 1948 was £5,819,953. The following table shows particulars for each State to 31st December, 1948 :—

LOANS (AGRICULTURAL OCCUPATIONS): SUMMARY TO 31st DECEMBER, 1948.

§ 10. Advances to Settlers.

1. General.—A detailed statement regarding the terms and conditions governing advances to settlers in the several States and the Northern Territory appears in preceding issues of the Official Year Book (*see* No. 22, pp. 179-186).

In this section are summarized the loans and advances made by the various Government lending agencies in the States, including the transactions in lands acquired under closer and soldier settlement schemes. The balances owing on former Crown lands sold on the conditional purchase, etc., system, however, are not included.

The amounts outstanding do not represent the actual differences between the total advances and settlers' repayments, for considerable remissions of indebtedness have been made in all States as a result of reappraisements of land values and the writing down of debts.

2. New South Wales.—The following table gives particulars respecting advances, etc., under State Authorities to 30th June, 1948 :—

ADVANCES TO SETTLERS : NEW SOUTH WALES.

(a) Excludes £10,988 forfeited properties. (b) Excludes £200,593 advances capitalized, £70,114 advances written off to bad debts, and £40,789 written off to revaluation. (c) Not regarded as outstanding advances by the Department. (d) Number of leaseholders, including those to whom advances have been made.

8. **Northern Territory.**—During the financial year 1947-48 three advances totalling £146 were made. The total amount advanced to 30th June, 1948 was approximately £25,695. At 30th June, 1948 the balance outstanding from 13 settlers, including interest, was £1,362.

9. **Summary of Advances.**—The following table gives a summary for each State and the Northern Territory to the 30th June, 1948. The particulars so far as they are available represent the total sums advanced to settlers, including amounts spent by the various Governments in the purchase and improvement of estates disposed of by closer and soldier land settlement, while the amounts outstanding reveal the present indebtedness of settlers to the Governments, including arrears of principal and interest but excluding amounts written off debts and adjustments for land revaluations.

§ 11. Alienation and Occupation of Crown Lands.

1. **General.**—The figures given in the previous parts of this chapter show separately the areas alienated, in process of alienation, or occupied under various tenures. The following tables set out in summarized form the position in regard to the tenure of land in each State, in the Northern Territory, and in the Australian Capital Territory during the latest year for which information is available—1948 in all cases. Particulars for each

year from 1937 to 1947 appear in *Production Bulletin* No. 42, Part II., page 7. The area unoccupied includes roads, permanent reserves, forests, etc. In some cases, lands which are permanently reserved from alienation are occupied under leases and licences, and have been included therein. Lands occupied under leases or licences for pastoral purposes are frequently held on short tenures only, and could thus be made available for settlement practically whenever required.

2. **New South Wales.**—The total area of New South Wales is 198,037,120 acres, of which 25.7 per cent. had been alienated at 30th June, 1948, 7.7 per cent. was in process of alienation, 58.2 per cent. was held under leases and licences and the remaining 8.4 per cent. was unoccupied or held by the Crown.

The following table gives particulars as at 30th June, 1948:—

**ALIENATION AND OCCUPATION OF CROWN LANDS: NEW SOUTH WALES,
30th JUNE, 1948.**

(Acres.)

Particulars.	Area.	Particulars.	Area.
1. Alienated.		3. Held under Leases and Licences.

(a) Includes reservations for roads and various other public purposes, 3,967,808 acres; lands occupied by Commonwealth or State Departments, 21,724 acres; and land acquired for soldier and closer settlement but not leased, 145,543 acres.

8. *Northern Territory*.—The area of the Northern Territory is 335,116,800 acres, of which, at 30th June, 1948, only 0.1 per cent. was alienated; 47.1 per cent. was held under leases and licences; 13.5 per cent. was reserved for aboriginal, defence and public requirements; and the remaining 39.3 per cent. was unoccupied and unreserved.

The following shows the mode of occupancy of areas at 30th June, 1948 :—

**ALIENATION AND OCCUPATION OF CROWN LANDS : NORTHERN TERRITORY
30th JUNE, 1948.**

(Acres.)

Particulars.	Area.
1. <i>Alienated</i>	455,321
2. <i>Leased</i> —	
Pastoral leases	115,144,320
Other leases, licences and mission stations ..	42,451,200
Total	157,595,520
3. <i>Reserved</i> —	
Aboriginal, defence and public requirements ..	45,451,833
4. <i>Unoccupied and Unreserved</i>	131,614,126
5. <i>Total Area</i>	335,116,800

9. *Australian Capital Territory*.—Alienated land of the Territory (excluding the Jervis Bay area) at the end of 1948 comprised 10.9 per cent. of the total area, land in process of alienation 7.0 per cent. land held under lease and licence 50.2 per cent. land otherwise occupied, including city tenures 5.3 per cent. and unoccupied 26.6 per cent.

The following table gives particulars of land areas in the Australian Capital Territory (excluding the Jervis Bay area) at the end of 1948 :—

ALIENATION AND OCCUPATION OF CROWN LANDS : AUSTRALIAN CAPITAL TERRITORY (a), 31st DECEMBER, 1948.
(Acres.)

Particulars.	Area.
1. <i>Alienated</i>	63,635
2. <i>In Process of Alienation</i>	41,056
3. <i>Leased, etc.</i> —	
Grazing, agriculture, etc., leases	290,581
Grazing licences	2,725
Total	293,306
4. <i>Otherwise Occupied (b)</i>	30,870
5. <i>Unoccupied</i>	153,933
6. <i>Total Area (a)</i>	582,800

(a) Excludes the Jervis Bay area of 18,000 acres—11,788 acres leased and 6,212 acres otherwise occupied—making a grand total of 600,800 acres. (b) Includes city area tenures.

10. **Summary.**—The following table gives a summary for each State and Territory of the alienation and occupation of Crown lands for 1947 and 1948 :—

ALIENATION AND OCCUPATION OF CROWN LANDS : AUSTRALIA.

(b) At 31st December.

11. **Diagram showing Condition of Public Estate.**—The following diagram shows the condition of the public estate during the year 1948. The square itself represents the total area of Australia, while the relative areas of individual States are shown by the vertical rectangles. The areas alienated from the State; those in process of alienation under various systems of deferred payments; and the areas held under leases or licences are indicated by the differently-shaded areas as described in the reference given below the diagram, and the areas unoccupied are left unshaded.

TENURE OF LAND.

CHAPTER V.

TRANSPORT AND COMMUNICATION.

A. SHIPPING.

§ 1. System of Record.

In the system of recording statistics of oversea shipping, Australia is considered as a unit, and, therefore, only one entry and one clearance is counted for each voyage, without regard to the number of States visited (*see also* Section 5 following, paragraph 1.)

On the arrival at, or departure from, a port in Australia, whether from or for an oversea country or from another port in Australia, the master or agent must "enter" the vessel with the Customs authorities at the port, and supply certain prescribed information in regard to the ship, passengers and cargo. At the end of each month the information so obtained is forwarded to this Bureau. This arrangement has been in operation since 1st July, 1924.

The net tonnage is the gross tonnage less certain deductions on account of crew spaces, engine room, water ballast and other spaces not used for passengers or cargo. The unit of measurement is a ton of 100 cubic feet.

From 1st July, 1914 the Trade and Shipping of Australia have been recorded for the fiscal years ending 30th June.

Commencing with 1935-36 particulars of sailing vessels with auxiliary engines, previously included in the columns headed "Steam", have been included in those headed "Sailing", this classification being considered more correct as the main method of propulsion of these vessels is sail.

The outbreak of war with Japan in December, 1941 resulted in Australia becoming the land base of operations in the South-West Pacific Area. The outcome of this action was the transport by sea to Australia of large numbers of Allied troops with huge quantities of arms and equipment, munitions and stores, which resulted in a substantial increase in the volume of shipping in ports throughout Australia. Particulars regarding these vessels have been excluded from the following tables of "oversea" and "interstate" shipping movement except in Section 3, paragraph 1. The published tables, therefore (except Section 3, paragraph 1), relate primarily to vessels engaged in normal trade (i.e., carrying part or full cargo for civil purposes), and are strictly comparable with pre-war figures.

The total volume of all shipping including vessels carrying troops and war supplies which entered the principal ports of Australia during the years 1938-39 and 1944-45 to 1947-48 is shown in Section 3, paragraph 1. These particulars were compiled from information supplied by the State authorities controlling ports and harbours and include all vessels entering ports with the exception of warships. The year 1938-39 has been inserted for comparative purposes.

As a result of enemy activity the Customs Officers were withdrawn from the ports of Thursday Island (Queensland), Broome (Western Australia) and Darwin (Northern Territory) during February, March and April, 1942, respectively, and the ports closed as Customs Stations. Consequently, no particulars are available of shipping movements at these ports between the dates named and June, 1945, as they were still under the control of the defence authorities. Shipping in these ports during this period was predominantly military and naval in character. The port of Darwin (Northern Territory) was reopened as a Customs Station in July, 1945, Broome in December, 1945, and Thursday Island in August, 1946.

§ 2. Oversea Shipping.

1. Total Movement.—The following table shows the number and net tonnage of oversea steam and motor vessels and sailing vessels which entered Australian ports during the years 1938-39 to 1947-48 :—

OVERSEA SHIPPING : VESSELS ENTERED, AUSTRALIA.

Year.	Steam and Motor.		Sailing.		Total.	
	Vessels.	Net Tons ('000).	Vessels.	Net Tons ('000).	Vessels.	Net Tons ('000).
1938-39	1,725	6,684	151	27	1,876	6,711
1939-40	1,573	6,459	101	7	1,674	6,466
1940-41	1,260	5,372	56	7	1,316	5,379
1941-42	1,248	5,166	28	8	1,276	5,174
1942-43	943	3,820	13	4	956	3,824
1943-44	1,085	4,482	9	2	1,094	4,484
1944-45	1,051	4,480	8	4	1,059	4,484
1945-46	1,140	5,260	6	3	1,146	5,263
1946-47	1,187	5,183	15	3	1,202	5,186
1947-48	1,448	6,075	22	8	1,470	6,083

The average tonnage per vessel entered has risen from 3,577 tons per vessel in 1938-39 to 4,137 tons in 1947-48.

Particulars regarding the total oversea movement of shipping for each year from 1822 to 1920-21 will be found in Official Year Book No. 15, p. 507, for each year from 1921-22 to 1930-31 in Official Year Book No. 25, p. 189, and for each of the years 1931-32 to 1937-38 in Official Year Book No. 34, p. 81.

2. Total Oversea Shipping, States.—The following table shows the numbers and net tonnages of vessels which entered and cleared the various States direct from and to oversea countries during the years 1946-47 and 1947-48 :—

SHIPPING ENTERED FROM AND CLEARED TO OVERSEA COUNTRIES DIRECT, 1946-47 AND 1947-48.

State or Territory.	1946-47.				1947-48.			
	Entered.		Cleared.		Entered.		Cleared.	
	Vessels.	Net Tonnage ('000).	Vessels.	Net Tonnage ('000).	Vessels.	Net Tonnage ('000).	Vessels.	Net Tonnage ('000).
New South Wales	427	1,753	460	1,844	454	1,699	433	1,596
Victoria	196	895	183	824	238	1,060	223	984
Queensland	164	635	232	669	198	658	250	695
South Australia ..	116	490	92	391	138	590	119	512
Western Australia	279	1,337	299	1,405	398	1,906	433	1,995
Tasmania	14	62	16	73	30	143	9	40
Northern Territory	6	14	5	14	14	27	12	23
Total	1,202	5,186	1,287	5,220	1,470	6,083	1,479	5,845

3. Shipping Communication with various Countries.—Records of the number and tonnage of vessels arriving from and departing to particular countries, as they are invariably made, may be misleading for the reason that the tonnage of a vessel can be recorded against one country on'y, notwithstanding that the same vessel on the same

voyage may carry cargo or passengers to or from Australia from or to several countries. For instance, a mail steamer on a voyage from the United Kingdom to Australia, through the Suez Canal, may call at Marseilles, Genoa, Port Said, Aden and Colombo, yet can be credited only to the United Kingdom, the country where the voyage commenced, to the exclusion of all of the others from the records. Also a number of vessels touch at New Zealand ports on their voyages to and from the United States of America and Canada, but their tonnages are not included in the records of Australian shipping trade with New Zealand. Similarly, the record of shipping engaged in trade between Australia and the United Kingdom via South African ports does not show tonnage to and from South Africa, the whole of it being included in the figures for United Kingdom. In view of this defect, statistics relating to the direction of the shipping to and from Australia are restricted to the following tables in which countries situated on the main trade routes are grouped together. This grouping into larger geographical divisions to some extent avoids the limitations referred to, except, as already pointed out, in the case of Africa and New Zealand.

DIRECTION OF OVERSEA SHIPPING : AUSTRALIA.

		6,835	5,203	4,649	5,430	5,220	5,845

4. Nationality of Oversea Shipping.—Due to war conditions, shipping of British nationality progressively declined during the years 1939-40 to 1943-44 to 43.40 per cent. compared with 72.82 per cent. in 1938-39. On the other hand, shipping of United States of America nationality visiting Australia during the same period advanced to

33.07 per cent. in 1943-44 compared with 2.61 per cent. in 1938-39. During the years 1944-45 to 1946-47 the shipping of British nationality progressively increased to 76.22 per cent. in 1946-47 but declined slightly to 72.79 per cent. in 1947-48; the tonnage of vessels of United States of America nationality declined during this period from 33.07 per cent. in 1943-44 to 9.40 per cent. in 1947-48.

Particulars of the nationality of oversea shipping for the five years ended 30th June, 1948, compared with the year 1938-39, are given in the following table:—

OVERSEA SHIPPING : NATIONALITY OF VESSELS ENTERED, AUSTRALIA.

Nationality.	Net Tonnage ('000).

The Australian tonnage which entered Australia from overseas during the year 1947-48 represented 1.41 per cent. of the total tonnage entered and was confined mainly to the New Zealand and Pacific Island trade.

§ 3. Shipping at Principal Ports.

1. Total Shipping, Australia.—The following table shows the total volume of shipping—oversea, interstate and coastwise—which entered the principal ports of Australia during the years 1944-45 to 1947-48 compared with 1938-39, irrespective of whether these vessels were transporting civilian goods or troops and war equipment. Warships are excluded from the table.

§ 4. Vessels Built and Registered.

1. Vessels Built.—The following table shows the number and tonnage of vessels built in Australia during each of the calendar years 1938 and 1944 to 1948, so far as such information can be ascertained from the Shipping Registers of the various States. The Merchant Shipping Act, under which vessels are registered in Australia, does not, however, make it compulsory to register vessels under 15 tons burden if engaged in river or coastal trade. Larger vessels are also exempt from registration if not engaged in trade. Yachts and small trading vessels may be, and frequently are, registered at the request of the owners

(a) Includes Great Lakes shipping.
1,000 gross tons and upwards.

(b) Vessels 100 gross tons and upwards.

(c) Tankers

The foregoing figures have been compiled from *Lloyds' Register of Shipping* for 1949.

§ 5. Interstate Shipping.

1. **System of Record.**—*Interstate Shipping* comprises two elements: (a) Vessels engaged solely in interstate trade: and (b) Vessels trading between Australia and oversea countries and in the course of their voyage proceeding from one State to another. (It should be mentioned that these vessels, except under special circumstances, do not now engage in interstate carrying.) No complexity enters into the record of those in category (a), but with regard to the method of recording the movements of the oversea vessels (b) some explanation is necessary. Each State desires that its shipping statistics (which are prepared in this Bureau) should show in full its shipping communication with oversea countries, but at the same time it is necessary to avoid any duplication in the statistics for Australia as a whole. In order to meet these dual requirements, a vessel arriving in any State from an oversea country—say United Kingdom—*via* another State, is recorded in the second State as from United Kingdom *via* States, thus distinguishing the movement from a *direct* oversea entry. Continuing the voyage, the vessel is again recorded for the statistics of the third State as from United Kingdom *via* other States. On an inward voyage the *clearance* from the first State to the second State is a *clearance* interstate, and is included with interstate tonnage in conformity with the pre-federation practice of the States, and to preserve the continuity of State statistics. Thus, movements of ships which are, from the standpoint of Australia as a whole, purely coastal movement, must for the individual States be recorded as “Oversea *via* other States” or “Interstate” according to the direction of the movement. The significance of the record of these movements will be more clearly seen from the following tabular presentation of the inward and outward voyages to and from Australia of a mail steamer which, it is presumed, reaches Fremantle (Western Australia) and then proceeds to the terminal port of the voyage—Sydney (New South Wales)—*via* South Australia and Victoria. From the terminal port the vessel will commence the outward voyage, and retrace its inward track.

ITINERARY OF AN OVERSEA VESSEL ON AUSTRALIAN COAST.

Particulars.	Recorded as—	
	For the State and for Australia.	For the States.
Inward Voyage—		
Enters Fremantle from United Kingdom	Oversea direct	Interstate direct
Clears Fremantle for Adelaide
Enters Adelaide from United Kingdom
<i>via</i> Fremantle	Oversea <i>via</i> States
Clears Adelaide for Melbourne	Interstate direct
Enters Melbourne from United Kingdom
<i>via</i> Adelaide	Oversea <i>via</i> States
Clears Melbourne for Sydney	Interstate direct
Enters Sydney from United Kingdom
<i>via</i> Melbourne	Oversea <i>via</i> States
Outward Voyage—		
Clears Sydney for United Kingdom <i>via</i>		
Melbourne	Oversea <i>via</i> States
Enters Melbourne from Sydney	Interstate direct
Clears Melbourne for United Kingdom <i>via</i>		
Adelaide	Oversea <i>via</i> States
Enters Adelaide from Melbourne	Interstate direct
Clears Adelaide for United Kingdom <i>via</i>		
Fremantle	Oversea <i>via</i> States
Enters Fremantle from Adelaide	Interstate direct
Clears Fremantle for United Kingdom ..	Oversea direct

From the method outlined above, the requirements for Australia and for the individual States are ascertained as follows. (a) The aggregate of all ships recorded for each State as “Oversea *direct*” gives the oversea shipping for Australia as a whole;

(b) the aggregate for all ships recorded in any State as "Oversea direct" plus those recorded as "Oversea via States" gives the total *oversea shipping* for that State; and (c) the aggregate for all ships recorded as "Oversea via States" may also be used, together with those recorded as "Interstate direct," to furnish figures showing the total interstate *movement* of shipping.

It should be remembered, however, that all overseas vessels do not follow the same itinerary as the vessel in the table above.

2. *Interstate Movement.*—(i) *Interstate direct.* The following table shows the number and tonnage of vessels recorded as having entered each State from any other State (including *oversea* vessels on interstate direct voyages) during each of the years 1943-44 to 1947-48 compared with the year 1938-39. The shipping of the Murray River, between the States of New South Wales, Victoria and South Australia, is excluded :—

INTERSTATE SHIPPING : NUMBER AND TONNAGE OF VESSELS ENTERED.

State or Territory.	1938-39.	1943-44.	1944-45.	1945-46.	1946-47.	1947-48.
NUMBER.						
New South Wales	2,183	1,282	1,209	1,112	1,136	1,133
Victoria	2,243	1,210	1,143	1,104	1,209	1,224
Queensland	639	389	410	303	340	306
South Australia	1,036	562	573	482	647	678
Western Australia	382	209	192	221	256	326
Tasmania	1,301	773	739	695	706	717
Northern Territory	39	(a)	(a)	6	14	16
Total	7,823	4,425	4,266	3,923	4,308	4,400

NET TONNAGE ('000).

New South Wales	6,205	2,535	2,391	2,439	3,041	2,977
Victoria	4,751	1,741	1,798	1,815	2,568	2,690
Queensland	1,730	621	763	587	728	587
South Australia	3,322	1,414	1,471	1,247	1,871	1,963
Western Australia	2,019	745	684	1,045	1,165	1,395
Tasmania	1,770	604	635	674	739	772
Northern Territory	103	(a)	(a)	20	28	25
Total	19,900	7,660	7,742	7,827	10,140	10,409

(a) Port of Darwin closed.

From 1938-39 the total net tonnage declined steadily each year until 1942-43, when it represented only 38 per cent. of the total for the pre-war year. It remained practically unchanged during the next three years, but increased by over 29 per cent. in 1946-47. There was little change in 1947-48, the tonnage for that year being about 52 per cent. of the 1938-39 total.

(ii) *Oversea via States.* To ascertain the aggregate movement of shipping between the States, including the total interstate movements of overseas vessels, the figures in the

following table which show the number and tonnage of vessels entered from or cleared for oversea countries via other Australian States, must be added to those in the preceding table :—

SHIPPING ENTERED AND CLEARED FROM AND TO OVERSEA COUNTRIES VIA OTHER AUSTRALIAN STATES.

Oversea vessels moving interstate are with few exceptions not engaged in the active interstate trade of Australia, but are merely proceeding to the several States in continuation of their oversea voyages.

(iii) *Total, Australia.* The appended table shows the total interstate movement of shipping, including oversea vessels travelling oversea via States and interstate direct, for each of the years 1938-39 and 1943-44 to 1947-48:—

TOTAL INTERSTATE MOVEMENT OF SHIPPING : AUSTRALIA.

§ 6. Tonnage of Cargo.

1. *Oversea and Interstate Cargo.*—(i) *Australia.* The table hereunder shows the aggregate tonnage of oversea cargo discharged and shipped and the tonnage of interstate cargo shipped in all ports for the years 1943-44 to 1947-48 compared with the year 1938-39. Cargo which was stated in cubic feet has been converted to tons measurement on the basis of 40 cubic feet to the ton.

CARGO MOVEMENT : AUSTRALIA.

(b) Includes Netherlands East Indies.

Owing to war conditions the percentage of cargo carried in British vessels decreased from 72.43 in 1938-39 to 41.37 in 1943-44, but increased to 77.51 per cent. in 1946-47, although declining to 73.30 per cent. in 1947-48. On the other hand, the percentage of cargo carried on foreign vessels increased from 27.57 in 1938-39 to 58.63 in 1943-44, but decreased to 22.49 in 1946-47, rising again to 26.70 in 1947-48.

§ 7. Control of Shipping.

1. **War-time Control.**—An account of the action taken by the Commonwealth Government to control and regulate shipping throughout Australian waters during the 1939-45 War is given in Official Year Book No. 36, pp. 121-130.

2. **Post-war Control and Developments.**—On 1st January, 1946 the Shipping Co-ordination Regulations were substantially amended to provide for a consolidation, within an Australian Shipping Board, of the war-time shipping authorities, notably the Shipping Control Board, Commonwealth Government Ships Chartering Committee, Central Cargo Control Committee and the Salvage Board. In consequence, a contraction of war emergency shipping administration was effected, with a tapering off of war-time powers and controls being achieved.

The Allied Consultative Shipping Council, the British-American-Australian Shipping sub-committee, and the Port Equipment and Development Committee lapsed towards the end of 1945. The Allied Materials Handling Standing Committee continued, however, developing into the Commonwealth Handling Equipment Pool.

As the immediate post-war years were marked by a continued shortage of coastal shipping, it was necessary not only to continue requisitioning of merchant shipping up to the 18th August, 1947, but to supplement Australian coastal shipping with as many as 26 overseas chartered vessels obtained through the British Ministry of Transport. During these two post-war years, however, the majority of vessels operating under Defence Services Control were returned after refitting for commercial employment, and on 18th August, 1947 all requisitioned vessels, with a few exceptions, had been returned to shipowners.

After the return of requisitioned vessels to private shipowners, the Australian Shipping Board continued to operate Commonwealth-owned shipping, also overseas vessels chartered by the Commonwealth. At 31st May, 1949 the Australian Shipping Board controlled the operation of 38 vessels totalling 169,158 gross tons of which twelve vessels totalling 78,293 gross tons represented chartered shipping. The 90,865 gross tons of Government-owned ships included 13 "A" class vessels of an average of 5,200 gross tons, 8 "D" class vessels of an average of 2,300 gross tons, 3 "E" class vessels of an average of 550 gross tons including *Edenhope* commissioned in May, 1949, also two other vessels—*Nyora* of 1,200 gross tons (formerly the German reparations vessel *Adrian*) and *Corrimal*.

In March, 1949 Federal legislation was enacted providing for the establishment of a Commonwealth Shipping Line which will be managed and operated by a reconstituted Australian Shipping Board of five members. This legislation is designed not only to set up a Commonwealth Shipping Line, but to maintain and develop the Australian merchant fleet and to foster the development of Australia's shipbuilding industry. The defence aspects of an adequate mercantile marine and an efficient shipbuilding industry were prominent factors influencing the introduction of the legislation.

Under the Shipping Act 1949 the Minister for Shipping and Fuel has power to grant licences for the construction of ships for the Commonwealth and has authority to arrange the sale of vessels to private companies at a discount. In addition to licences to build vessels, the Act provides that vessels may not trade on the Australian coast except under licence which, subject to exception in special cases, will be issued only to vessels constructed in Australia and under 24 years of age.

In March, 1947 legislation established a permanent Stevedoring Industry Commission to continue in peace-time the functions performed during the war by the Commission established under National Security legislation. In June, 1949 legislation was enacted to abolish the Stevedoring Industry Commission on which employers and employees were represented, and established in its place a Stevedoring Industry Board of three members which is to attend to administrative matters formerly under the control of the Commission, such as the operation of labour bureaux at ports, payment of attendance money and provision of amenities, etc.

The industrial functions which previously came within the province of the Commission will be dealt with in the future by a single Judge of the Commonwealth Court of Conciliation and Arbitration.

The Maritime Industry Commission established during the war years under National Security legislation continues to function and consideration is being given to its establishment on a permanent basis.

In the international sphere, ratification is being awaited from 21 shipowning nations of a Convention establishing an Inter-Governmental Maritime Consultative Organization within the framework of United Nations. The major objectives of this Organization are to provide machinery for co-operation among Governments with shipping engaged in international trade, and to encourage the removal of discriminatory action and unnecessary restrictions by Governments affecting such shipping.

This Organization is designed to replace the United Maritime Consultative Council which was established on a tentative basis after the expiry of the war-time United Maritime Authority and Combined Adjustment Board.

§ 8. Miscellaneous.

1. **Lighthouses.**—A list of the principal lighthouses on the coast of Australia, giving details of the location, number, colour, character, period, candle-power and visibility of each light so far as particulars were available was published in *Transport and Communication Bulletin* No. 14.

2. **Distances by Sea.**—The distances by sea between the ports of the capital cities of Australia and the most important ports in other countries which trade with Australia are shown in *Transport and Communication Bulletin* No. 39.

3. **Shipping Freight Rates.**—The *Quarterly Summary of Australian Statistics* shows a list of the ruling freight rates for general merchandise in respect of both overseas and interstate shipments. At 30th September, 1949 the rate for general merchandise from Australia to United Kingdom and Continent was 123s. od. per ton weight or measurement, while the rates for wheat (bagged) and wool (greasy) were respectively 70s. per ton weight and 2.238d. less 7 per cent. per lb. These rates, which are expressed in sterling, are subject to an adjustment of 25½ per cent. when freight is prepaid in Australia.

4. **Depth of Water at Main Ports.**—A table, compiled from information supplied by the Director of Navigation, showing the depth of water available and tides at principal ports of Australia at 1st January, 1949, is included in *Transport and Communication Bulletin* No. 39.

5. **Shipping Casualties.**—Courts of Marine Inquiry are constituted by a Magistrate assisted by skilled assessors, and, when necessary, are held at the principal port in each State and at Launceston (Tasmania). Such courts have power to deal with the certificates of officers who are found at fault. Particulars of shipping casualties reported on or near the coast during the years 1944 to 1948 are shown in the table below. This information also was furnished by the Director of Navigation :—

TOTAL SHIPPING CASUALTIES AND LOSSES : AUSTRALIA.

Year ended 31st December—	Total Losses of Vessels.			Total Casualties to Vessels.		
	Number.	Net Tonnage (‘000).	Lives Lost.	Number.	Net Tonnage (‘000).	Lives Lost.

1945	2	4	4	179	432	4
1946	173	395	..
1947	2	(a)	..	151	442	10
1948	1	(a)	..	206	652	..

(a) Less than 500 net tons.

6. **Commonwealth Navigation and Shipping Legislation.**—An account in some detail of the Commonwealth navigation and shipping legislation is contained in *Official Year Book* No. 17 (pp. 1053–5).

Under the provisions of the Navigation Act the coasting trade of Australia in passengers and cargo is reserved by Section 288 to ships licensed to engage in that trade. Licences are granted to ships complying with Australian conditions respecting wages, manning, crew accommodation, and so on, stipulations which have confined the trade to Australian-owned vessels.

Provision was made in the Act for permits to be granted to unlicensed British ships to carry cargo and passengers on the coast when it was shown that the licensed service was inadequate. The permit system, however, was not entirely satisfactory and in 1926 the Act was amended to allow the Governor-General, by notice in the *Gazette*, to permit unlicensed British ships of a specified size and speed to engage in the passenger trade between particular ports. Such a permit, however, could only be granted when it was shown that the tourist traffic was being injured or retarded. By a further amendment

in 1935, this concession was revised to permit unlicensed British ships of not less than 10,000 tons and a sea speed of not less than 14 knots to carry passengers between any two ports in Australia not connected by rail. In every case the voyage must be made in one ship without break of journey, transshipment, or second call at any intermediate port. On arriving at the port of destination the passenger may be taken on to the next port of call of the ship, which may be his first port of embarkation, or a further port not connected by rail.

In the Navigation Act of 1935, also, the provision for the carriage of wireless equipment was extended to all ships engaged in interstate trade. A similar provision for intra-state vessels has been made by some of the States.

The Navigation (Maritime Conventions) Act of 1934 was an amendment of the Navigation Act to enable the Commonwealth to give effect to the provisions of a number of maritime conferences of recent years, of which the most important were those dealing with the safety of life at sea and load lines.

The war-time and post-war control of shipping is referred to in § 7 *ante*.

7. **Ports and Harbours.**—A report in two volumes on "Transport in Australia," with special reference to Ports and Harbours facilities, was submitted to the Commonwealth Government by Sir George Buchanan, and published as two Parliamentary Papers (No. 86 printed 14th March, 1927, and No. 108 printed 9th May, 1927).

B. RAILWAYS.

§ 1. General.

1. **Introduction.**—The policy of Government ownership and control of railways has been adopted in each State and at 30th June, 1948 only 648 route-miles of the 27,771 open for general traffic in Australia were privately owned, while 24,922 route-miles and 2,201 route-miles were owned by the State Governments and the Commonwealth respectively. In the following tables details of the four lines owned by the Commonwealth are grouped and shown with the totals for the various State-owned systems. Separate particulars for each Commonwealth line are shown in *Transport and Communication Bulletin* No. 39, issued by this Bureau, and also in *Official Year Book* No. 31, p. 125, et seq.

2. **Railway Communication in Australia.**—An account of the progress of railway construction in Australia since the opening of the first line in 1854 will be found in *Official Year Book* No. 6, p. 681. Further information regarding railway communication in Australia is given in *Official Year Book* No. 22, pp. 259–61.

3. **Standardization of Railway Gauges.**—A summary of the report and recommendations relating to the standardization of Australia's railway gauges on the basis of a 4 ft. 8½ in. gauge, made at the request of the Commonwealth Government by Sir Harold Clapp, Director-General of Land Transport, Commonwealth Department of Transport, is contained in *Official Year Book* No. 37, together with an outline of the agreement between the Commonwealth Government and the States of New South Wales, Victoria and South Australia regarding the standardization of railway gauges in their respective States (Chapter V.—Transport and Communication, pp. 146–9). The agreement was ratified by the Governments of the Commonwealth, of Victoria and of South Australia, but not by the New South Wales Government. After some time had elapsed and New South Wales had failed to ratify the agreement, the Commonwealth Government decided to enter into a separate agreement with South Australia, and the necessary legislation has been enacted by each Government concerned. Action has also been taken to invite the Victorian Government to discuss the subject of a separate agreement. The Commonwealth–South Australia Agreement provides for the same standardization

work to be carried out in South Australia as would have been carried out had New South Wales ratified the original Commonwealth—Three States Agreement, and that over a period of years the Commonwealth should contribute 70 per cent. and South Australia be responsible for the remaining 30 per cent. of the estimated cost of £24,000,000.

4. Government Railways. Lines under Construction and Lines Authorized, 1947-48.—

(i) *Lines under Construction.* In spite of the great extensions of State railways since 1875 and also the construction of various railways by the Commonwealth Government, there are still, in some States, immense areas of country which are as yet practically undeveloped, and in which little in the nature of permanent settlement has been accomplished. The general policy of the States was to extend the existing lines inland in the form of light railways as settlement increased, and while it is true that lines which were not likely to be commercially successful in the immediate future have been constructed from time to time for the purpose of encouraging settlement, the general principle that the railways should be self-supporting was kept in view.

(a) *New South Wales.* Construction work proceeded during 1947-48 on the Sandy Hollow to Maryvale line (approximately 147 miles) and on the connecting link between St. James and Wynyard stations of the underground railway of Sydney. In connexion with the eastern, southern and south-eastern suburban electric railways, detailed surveys and preliminary plans were undertaken during the year for locations of tracks; also general arrangements for various stations together with boring operations to ascertain the class of strata that would be encountered in the underground work. The duplication of track on the main Southern line between Cootamundra and Junee made substantial progress and work was vigorously prosecuted in the stages on the comprehensive long-range scheme for the provision of additional track accommodation on the main Western line between Lidcombe and Penrith. The proposed new railway line (Inverell to Iluka, 152 miles) involving considerable exploratory surveys, and plans and sections of the first 30 miles were compiled during the year.

(b) *Other.* At 30th June, 1948 no construction work on new lines was in progress in Victoria, Queensland, South Australia, Western Australia, Tasmania, nor for the Commonwealth Government.

(ii) *Lines Authorized for Construction.* In the States of New South Wales, Victoria, Queensland, South Australia and Western Australia at the 30th June, 1948 there were certain lines authorized for construction but not commenced. These lines were authorized many years ago, some as early as 1910 and none later than 1933. Particulars may be found in Official Year Book No. 36, p. 133. There have been no later authorizations.

5. *Grafton-South Brisbane (Uniform Gauge) Line.*—The 4 ft. 8½ in. gauge line from Grafton (New South Wales) to Brisbane (Queensland) which was opened for traffic on 27th September, 1930, was constructed under agreement between the Commonwealth and the States of New South Wales and Queensland to overcome the break of gauge between Sydney and Brisbane; and was the first step towards uniform gauge railway communication between the capitals of the mainland States. To 30th June, 1948 the capital cost of construction and equipment was £4,362,500. The working of the line is the responsibility of the New South Wales and Queensland Railway Commissioners, and figures relating to its operations, etc., are incorporated as far as possible with those for New South Wales and Queensland in the tables which follow. Further particulars of the construction of the line will be found in Official Year Book, No. 31, p. 122, and later issues.

6. *Mileage Open for Traffic, all Lines.*—(i) *General.* Almost all the railways open for general traffic in Australia are owned and controlled by the State or Commonwealth Governments. Private lines have been laid down for the purpose of opening up forest lands, mining districts or sugar areas. These lines are not generally used for the conveyance of passengers or the public conveyance of goods, and it should be understood that the private lines included in the tables below form only a small part of all private railways in Australia.

The following table shows the route-mileage of Commonwealth, State and private lines open for general traffic in each State at different periods since the inauguration of railways in Australia in 1854 up to the year 1947-48 :—

GOVERNMENT AND PRIVATE RAILWAYS : MILEAGE OPEN.

8. Classification of Lines according to Gauge, 1947-48.—The next table shows a classification according to gauge of the route-mileage open of (a) Commonwealth railways, according to the State or Territory in which situated; (b) State railways; and (c) Private railways open to the public for general traffic. Particulars of Government railways are up to 30th June, 1948, and of private railways open for general traffic to 31st December, 1947, as nearly as possible.

(a) Incomplete. Full particulars not available for all items.

(b) Excludes construction staff.

(c) Employees at 31st December, 1948.

Details shown above relating to capital cost do not include particulars of amounts totalling about £61.5 million written off during the period 1st July, 1927 to 1st July, 1937. If these are taken into account, the cost per mile for State Railways is increased to £15,554 and for all railways to £14,813.

§ 2. Government Railways.

1. Cost of Construction and Equipment.—The following table shows particulars of the mileage open and the capital cost of Government railways in Australia. The cost shown for Australia (£344,630,000) does not represent the total expenditure on construction and equipment, as legislation was introduced in Victoria, Queensland, South Australia and Tasmania, for the purpose of reducing the capital indebtedness of the railways. Figures relating to capital cost do not include charges for works in the course of construction, surveys, and discounts and flotation charges on loans allocated to the railways.

GOVERNMENT RAILWAYS: MILEAGE AND COST TO 30th JUNE, 1948.

System.	Mileage Open.		Total Cost of Construction and Equipment.	Average Cost per Route-Mile Open.	Cost per Head of Population.	Route-Mileage per 1,000 of Population.
	Route.	Track.				
	Miles.	Miles.	£'000.	£	£	Miles.
New South Wales	6,128	8,384	165,839	27,063	54.15	2.00

(a) See following paragraph.
Line, £2,446,972.

(b) Includes Commonwealth proportion Grafton-South Brisbane

The reductions made in the capital indebtedness referred to above were:—Victoria, £25,684,423; Queensland, £28,000,000; South Australia, £3,088,986; and Tasmania, £4,738,000. After adding these figures to the capital costs of the respective States and

RAILWAY SYSTEMS - AUSTRALIA 1947.

Showing existing lines, & new lines, & conversions recommended in Proposals A, B & C of the Clapp Report, 1945, & those authorized in the Railway Standardization Act, 1946 in respect of the Commonwealth, New South Wales, Victoria & South Australia.
(See letterpress)

FINANCIAL POSITION OF THE GOVERNMENT RAILWAYS OF AUSTRALIA, 1870 TO 1948.

EXPLANATION.—The base of each square represents throughout ten years. The significance of the vertical height of each square varies according to the nature of the several curves.

In the curves for (i) gross revenue ; (ii) working expenses ; and (iii) net revenue, the vertical side of each square represents £10,000,000. The mileage open is shown by a broken line, the vertical side of each square representing 5,000 miles.

MOTOR VEHICLE REGISTRATION—AUSTRALIA, 1920 TO 1948.

(See pages 192-4.)

EXPLANATION.—This is a ratio graph, the vertical scale being logarithmic, and the curves rise and fall according to the rate of increase or decrease. Actual numbers are indicated by the scale at the side of the graph.

The graphs show for all motor vehicles other than motor cycles the registrations in force at 30th June each year and the number of new registrations during the year.

adjusting the route-mileage for New South Wales and Queensland to exclude portions of the Grafton-South Brisbane Line, the cost per route-mile open in each State and for the Commonwealth railways is as follows:—New South Wales, £27,063; Victoria, £16,956; Queensland, £10,708; South Australia, £13,572; Western Australia, £6,324; Tasmania, £12,490; Commonwealth, £8,404; and for all Government railways in Australia, £14,974. The lowest average cost is in Western Australia, and the highest is in New South Wales. Very few engineering difficulties were encountered in Western Australia, and the fact that contractors were permitted to carry traffic during the term of their contract considerably reduced expenditure.

Adjusted figures for the cost per head of population for each State and for Australia are as follows:—New South Wales, £54.15; Victoria, £38.04; Queensland, £61.38; South Australia, £51.90; Western Australia, £52.64; Tasmania, £27.88; all Government railways in Australia, £52.10.

2. **Expenditure on Construction and Equipment from Revenue and from Loans.**—The following table shows particulars of the expenditure on construction and equipment from revenue and from loans:—

**GOVERNMENT RAILWAYS: CAPITAL EXPENDITURE FROM REVENUE
AND FROM LOANS.**
(£'000.)

System.	Expenditure from Revenue to 30th June, 1948.	Net Loan Expenditure.			
		1938-39.	1946-47.	1947-48.	Total to 30th June, 1948.
New South Wales ..	640	2,002	3,103	5,543	170,649
Victoria ..	(a) 6,561	(b) 354	(b) 434	(b) 479	(b) 81,116
Queensland	490	401	706	68,642
South Australia	261	558	510	38,954
Western Australia ..	632	(c) 195	264	284	26,415
Tasmania	35	198	307	(d) 8,513
Commonwealth ..	3,642	..	Cr., 2	Cr. 5	11,317
Australia ..	11,475	3,337	4,956	7,824	(e) 408,051

(a) From proceeds of sale of State lands, Consolidated Revenue Fund, National Recovery Loan, etc.
(b) Gross loan expenditure. (c) Includes expenditure on railways provided in Unemployment Relief work programmes. (d) Includes losses funded. (e) Includes £2,444,681 Commonwealth loan expenditure on Grafton-South Brisbane Line.

3. **Gross Revenue.**—(i) *General.* The total revenue from all sources, the revenue per average mile worked and the revenue per train-mile run during the years 1943-44 to 1947-48 in comparison with 1938-39 were as follows:—

GOVERNMENT RAILWAYS: GROSS REVENUE.

Year.	N.S.W.(a)	Vic.(b)	Q'land.	S. Aust.	W. Aust.	Tas.	C'wealth.	Australia.
TOTAL GROSS REVENUE. (£'000.)								
1938-39 ..	19,940	9,284	7,798	3,119	3,599	487	547	44,780
1943-44 ..	35,301	15,882	16,430	5,979	4,387	871	3,459	82,309
1944-45 ..	32,377	15,259	13,809	5,460	4,276	900	2,424	74,505
1945-46 ..	32,113	14,675	11,917	4,871	4,107	928	1,565	70,176

(ii) *Coaching, Goods and Miscellaneous Receipts.* (a) *Totals.* The gross revenue is composed of (a) receipts from coaching traffic, including the carriage of mails, horses, parcels, etc., by passenger trains; (b) receipts from the carriage of goods and live stock; and (c) rents and miscellaneous items. The following table shows the gross revenue for 1938-39 and 1943-44 to 1947-48 classified according to the three chief sources of receipts. The total of the three items specified has already been given in the preceding paragraph.

GOVERNMENT RAILWAYS: COACHING, GOODS AND MISCELLANEOUS

Australia ..	36.15	52.53	11.32	33.79	56.58	9.63

4. *Working Expenses.*—(i) *General.* In order to make an adequate comparison of the working expenses, allowance should be made for the variation of gauges and of physical and traffic conditions, not only on the different systems of the State and Commonwealth railways, but also on different portions of the same systems. When traffic is light, the percentage of working expenses is naturally greater than when traffic is heavy ; and this is especially true in Australia, where ton-mile rates are in many cases based on a tapering principle—i.e., a lower rate per ton-mile is charged upon merchandise from remote interior districts—and where on many of the lines there is but little back loading.

During the war years large amounts were set aside by the Railways as reserves, mainly to provide for depreciation and accrued leave, to be expended as circumstances permit. War conditions subjected the Railways to heavy demands, and shortages in man-power and materials rendered it impossible to deal with the resulting rapid deterioration of stock, tracks and works. Leave accrued because shortages in staff prevented the taking of annual leave. The railway authorities therefore took the opportunity, which increased revenues offered, to provide for these future commitments. Particulars of the amounts thus set aside by each State during the years 1940-41 to 1945-46 are shown in the following table. These amounts are included in the maintenance of Way and Works and Rolling Stock sections following. Prior to 1940-41 comparatively small amounts aggregating £500,000 per annum were set apart for this purpose. Subsequently to 1945-46 this practice has been reverted to and nominal amounts only set apart each year for depreciation, etc.

GOVERNMENT RAILWAYS : RESERVES MAINLY FOR DEPRECIATION AND ACCRUED LEAVE.

1947-48 ..	41.22	15.05	14.37	-33.97	-33.17	-53.92	-30.26	16.77

In the graphs accompanying this Chapter the gross and net revenue and working expenses are shown from 1870 to 1948.

6. **Interest.**—The interest payments on expenditure from loans for the construction and equipment of the Government railways in Australia during the years 1938-39 and 1943-44 to 1947-48 were as follows:—

**GOVERNMENT RAILWAYS: INTEREST PAYMENTS ON RAILWAY LOAN
EXPENDITURE.**
(£'000.)

Year.	N.S.W. (a)	Victoria. (b)	Q'land. (a) (b)	S. Aust. (b)	W. Aust.	Tasmania. (b)	C'wealth.	Australia. (a)
1938-39 ..	5,360	1,860	1,642	1,075	1,001	80	395	11,540
1943-44 ..	5,328	1,902	1,579	1,074	1,043	89	363	11,505
1944-45 ..	5,350	1,903	1,592	1,072	1,051	96	356	11,547
1945-46 ..	5,240	1,902	1,480	1,054	1,040	97	341	11,265
1946-47 ..	5,126	1,840	1,440	1,013	1,033	100	338	10,972
1947-48 ..	5,145	1,862	1,431	1,001	1,046	112	317	10,996

(a) Includes interest charges on the Grafton-South Brisbane Line, which for 1943-44 to 1944-45 amounted annually to £225,939 and were contributed by New South Wales, £72,179; Queensland, £27,029; and the Commonwealth, £126,731. During 1945-46 the annual interest charge was reduced to £108,638 and was contributed by New South Wales, £63,457; Queensland, £23,763; and the Commonwealth, £111,418. During 1946-47 and 1947-48 the annual interest charge was further reduced to £146,860, New South Wales, £46,916, Queensland £17,569, Commonwealth £82,375. (b) Capital indebtedness reduced by legislation in these four States. See par. 1, p. 168.

The interest payable on the cost of construction and equipment as shown in the table in par. 1, p. 168, after the expenditure from Consolidated Revenue (£11,475,000 to June, 1948) for that purpose had been deducted, was at the rate of 3.30 per cent. in 1947-48.

Exchange on interest payments abroad and certain other charges are not included in the table above. These items are not charged against the railways in Queensland and Western Australia and have been excluded for the purposes of comparison. In the remaining States the amounts paid on account of exchange in 1946-47 were—New South Wales, £698,62c; Victoria, £169,123; South Australia, £95,731; and Tasmania, £6,531; and in 1947-48—New South Wales, £648,000; Victoria, £168,089; South Australia, £86,288; and Tasmania, £1,104.

7. **Profit or Loss.**—The following table shows, for the years 1938-39 and 1943-44 to 1947-48, the actual profit or loss after deducting working expenses and interest, but excluding exchange, from the gross revenue:—

GOVERNMENT RAILWAYS: PROFIT OR LOSS.
PROFIT OR LOSS AFTER PAYMENT OF WORKING EXPENSES AND INTEREST.
(£'000.)

Year.	N.S.W. (a)	Victoria.	Q'land. (a)	S. Aust.	W. Aust.	Tasmania.	C'wealth.	Australia. (a)
1938-39 ..	43	— 636	— 37	— 886	— 313	— 272	— 490	—2,718

1947-48 ..	1,546	— 765	— 540	— 1,869	— 2,029	— 609	— 519	—4,867

(a) See note (a), par. 6, above.

8. **Traffic.**—(i) *General.* Reference has already been made to the difference in the traffic conditions on many of the lines. These conditions differ not only in the several State and Commonwealth systems, but also on different lines in the same system, and apply to both passenger and goods traffic. By far the greater part of the population of Australia is confined to a fringe of country near the coast, more especially in the eastern

and southern districts. A large proportion of the railway traffic between the chief centres of population is therefore carried over lines in the neighbourhood of the coast, and is thus, in some cases, open to seaborne competition. In recent years competition from road and air transport has become an important factor.

The following table shows particulars for the years 1943-44 to 1947-48 in comparison with 1938-39 :—

£283,000.

(b) Includes agricultural produce, £1,380,000.

(c) Includes wheat.

(iv) *Passenger-Mileage and Ton-Mileage.* Particulars of passenger-mileage and ton-mileage in respect of the Government railways in Australia for the years 1938-39 to 1940-41 and 1946-47 and 1947-48 are shown in the following tables. Figures for the years 1941-42 to 1945-46 are very incomplete owing to the restriction of statistical publications necessitated by staff shortages and extra work caused by the recent world war.

(a) *Passenger-Mileage.* The following table shows particulars of passenger-mileage in respect of the Government railways in Australia for the years 1938-39 to 1940-41 and 1946-47 and 1947-48.

GOVERNMENT RAILWAYS: PASSENGER-MILEAGE SUMMARY.

Year ended 30th June—	Passenger Train-Mileage.	Total Passenger-Miles.	Average Passengers per Train-Mile.	Average Mileage per Passenger Journey.	Passenger Earnings.				Density of Traffic per Average Route-Mile Worked.
					Gross.	Per Average Route-Mile Worked.	Per Passenger-Mile.	Per Passenger Train-Mile.	
	'000.	'000.	No.	Miles.	£'000.	£	d.	d.	No.

work is not under the control of the Railways Commissioners.

(b) In Victoria railway construction

§ 3. Private Railways.

1. **General.**—The bulk of the private railways in Australia has been laid down for the purpose of hauling timber, firewood, sugar-cane, coal and other minerals, and it is not generally used for the conveyance of passengers or for public goods traffic. In many cases the lines are practically unballasted and easily removable.

The railways referred to in this section include only lines open to the public for general passenger and goods traffic. Complete particulars of lines used for special purposes only are not available.

2. **Lines Open for General Traffic, 1947-48.**—The following statement is a summary of the operations of private railways open for general traffic during 1947-48:—

PRIVATE RAILWAYS : SUMMARY OF OPERATIONS, 1947-48.

State.	Route-Miles Open.	Capital Cost.	Gross Revenue.	Working Expenses.	Train-Miles Run.	Passenger-Journeys.	Goods, etc., Carried.	Em- ployees.
	Miles.	£'000.	£'000.	£'000.	'000.	'000.	'000 tons.	No.
N.S.W.(a)	54	1,270	417	328	453	1,092	625	420
Vic. ..	13	44	10	10	13	7	22	16

Australia(a)	648	5,198	946	754	1,097	1,225	3,415	1,339

(a) Incomplete.

(b) Not available.

Some of the particulars given in the table are incomplete in respect of New South Wales, Queensland, South Australia and Tasmania. In New South Wales and Queensland several lines, although owned by private companies, are operated by the Government Railway Departments, and Government rolling stock is used thereon, while some of the companies are not able to supply particulars of the capital cost, revenue and working expenses of the lines which they operate. In some cases the figures relating to tonnage of goods, etc., include particulars of coal, ores, timber, sugar-cane, etc., carried for private purposes, as details relating to goods carried for the general public are not recorded separately.

C. TRAMWAYS.

1. **Systems in Operation.**—(i) *General.* Tramway systems are in operation in all the capital cities and in a number of the larger towns of Australia.

Since 1st April, 1947, when the last private company system to operate (the Kalgoorlie-Boulder electric tramway system in Western Australia) was taken over by the Eastern Goldfields Transport Board, all systems have been operated by governmental or municipal authorities. From 1941-42 all systems have been electric.

In many parts of Australia private lines used for special purposes in connexion with the timber, mining, sugar, or other industries are often called tramways, but they are more properly railways (*see above*), and the traffic on them has nothing in common with that of the street tramways for the conveyance of passengers, which are dealt with in the present section.

(ii) *Total Mileage Open and Classification of Lines.* The following tables show for each State the total mileage of tramway lines open for general passenger traffic for 1947-48 classified (a) according to the controlling authority; (b) according to gauge:—

TRAMWAYS : ROUTE-MILEAGE OPEN, 1947-48.

(a) Estimated. (b) See note (a) to table in para. 2 above. (c) Includes motor omnibus employees. (d) Includes Hobart Municipal Council Omnibus Service. (e) See notes (a) to (d).

D. MOTOR OMNIBUS PASSENGER SERVICES.

1. **General.**—Motor omnibus passenger services have been in operation for some years in the capital cities and some of the larger towns of the States of Australia, and in the Australian Capital Territory.

Governmental and municipal authorities operate certain services and the others are run by private operators; in the States the former are run in conjunction with the existing electric tramway systems.

2. Government and Municipal Services.—(i) *Summary of Operations, 1947-48.* The following table is a summary of the operations during the year ended 30th June, 1948 of omnibus systems controlled by Governmental and Municipal authorities.

GOVERNMENT AND MUNICIPAL MOTOR OMNIBUS PASSENGER SERVICES, 1947-48.

E. FERRY (PASSENGER) SERVICES.

1. *General.*—In New South Wales ferry services have been established by private companies to transport passengers in the ports of Sydney and Newcastle. In Western Australia services are operated on the Swan River at Perth under both Government and private control. Passenger ferries in Tasmania are under both Government and private control and operate on the Derwent River at Hobart and also at Devonport. Inextensive services operate in the States of Victoria and Queensland, but no ferry services are in operation in South Australia.

2. *Summary of Operations.*—The following statement is a summary of operations of ferry passenger services in New South Wales, Western Australia and Tasmania during the years 1943-44 to 1947-48 compared with the year 1938-39. Particulars of passengers carried on vehicular ferries are not included.

(a) Includes administrative staff for years prior to 1944-45.

(b) Particulars are not available for earlier years.

F. MOTOR VEHICLES.

1. Motor Industry.—Although motor cars have not, until recently, been manufactured in Australia, the capital invested in assembling and body-building plants is considerable. The importance of the industry is shown by the following figures which relate to the local manufacture of motor bodies and the importation of motor cars, fuel and tyres during 1938-39 and the five years ended 1947-48. Values of imports are expressed in £A. f.o.b.

MOTOR VEHICLES, ETC. : LOCAL MANUFACTURE AND IMPORTS, AUSTRALIA.

Particulars.	Unit.	1938-39.	1943-44.	1944-45.	1945-46.	1946-47.	1947-48.

2. **Registration.**—The arrangements for the registration of motor vehicles and the licensing of drivers and riders thereof are not uniform throughout Australia. Methods of registration, licence fees payable, etc., in each State are referred to in Official Year Book No. 116, pp. 337-40, and later issues.

3. **Public Vehicles.**—In all the capital cities of the States and in many of the provincial centres taxi-cabs and other vehicles ply for hire under licence granted either by the Commissioner of Police or the local government authority concerned. As most of these vehicles are independently controlled by individuals or small companies, it has not been possible to obtain complete data in respect of their operations.

4. **Motor Omnibuses.**—In both urban and provincial centres motor omnibus traffic has assumed considerable proportions during recent years, and has had a marked effect on railway and tramway services. In some States the railway and tramway systems run motor services complementary to their main services to meet the competition of private enterprise and to endeavour to protect the existing transport utilities provided by public bodies. In addition, there has been a considerable replacement, during the last few years, of existing tramway services by trolley-bus and motor-bus services. (See Section D.)

5. **Motor Vehicles on the Register, etc.**—(i) *Year 1947-48.* Particulars of the registration of motor vehicles, licences issued and revenue received for 1947-48 are contained in the following table. A graph showing motor vehicle registrations since the year 1920 may be found on p. 172.

(a) Not available.

(iv) *Revenue per Motor Vehicle.* The following table shows the average revenue per vehicle (excluding motor cycles) received in respect of registration and motor tax in the several States for the year 1938-39 and for each year from 1943-44 to 1947-48. In some States the revenue from motor tax on cycles is not separately recorded. In these cases an amount based on the flat rate provided for cycles in the registration acts has been deducted from the total revenue received, and the average amounts shown must therefore be regarded as approximate only. Registration fees and motor taxes were reduced, during the year 1941-42, in the States of New South Wales, Victoria and Western Australia. In South Australia the reduction was made in the last half of

1940-41. The reduction was generally 25 per cent., except in the case of New South Wales, where it was 20 per cent. In July, 1942 Australian Capital Territory fees were reduced by 15 per cent. For the State of Western Australia the 25 per cent. reduction in registration fees ceased to operate with the commencement of the 1947-48 registration year and the State of New South Wales has approved legislation to increase motor registration fees as from the end of the year 1949.

Total ..	86,404	13,800	8,964	12,762	45,774	85,822

(a) Excludes Northern Territory. (b) Includes vehicles registered as primary producers' vehicles, Victoria.

7. World Motor Vehicle Statistics, 1949.—The result of the 1949 World Motor Census, conducted by the *American Automobile* magazine, from which the following particulars have been extracted, shows that there were 57,502,898 motor cars, trucks and buses registered in various countries of the world at 1st January, 1949. This shows an increase of 8.8 per cent. on the figure for the previous year, 52,872,891, and is the highest figure attained to that date.

The following table shows the numbers of motor vehicles registered in each continent at 1st January, 1949 :—

MOTOR VEHICLES : WORLD REGISTRATIONS AT 1st JANUARY, 1949.

Continent, etc.	Total Automobiles.	Motor Cars.(a)	Motor Trucks and Buses.(a)
Africa	847,976	559,928	254,321
America (exclusive of United States of America).. .. .	3,475,524	2,324,460	1,057,200
United States of America	40,671,972	33,250,528	7,421,444
Asia	747,677	305,384	418,333
Europe	10,281,929	5,270,396	5,009,513
Oceania	1,477,820	984,342	488,812
Total	57,502,898	42,605,038	14,649,623

(a) Not complete for all territories.

The next table shows particulars of the numbers of motor vehicles registered in various countries, together with their approximate populations for the purposes of comparison :—

COMPARATIVE MOTOR VEHICLE STATISTICS, 1st JANUARY, 1949.

Country.	Approximate Population in Millions.	Motor Cars, Trucks and Buses.
Australia	8	1,064,775
Argentina	16	363,460
Canada	13	1,948,683
France	42	1,715,000
Germany	70	504,890
Great Britain	50	2,713,539
India-Pakistan	415	235,456
Italy	46	427,800
Japanese Empire	81	140,614
New Zealand	2	293,402
Union of South Africa	2	467,100
United States of America	147	40,671,972

The foregoing figures are in some cases approximations based on estimates furnished by Trade Commissioners or representative motor trade organizations in the several countries, and in other cases are incomplete.

8. Petrol Rationing.—A detailed account of the operations of petrol rationing in Australia from its inception in October, 1940, is contained in Official Year Books Nos. 36 and 37, Chapter V. The legality of petrol rationing was challenged in the High Court of Australia in May, 1949, and on the 6th June, 1949 the judgment of the Full High Court declared invalid petrol rationing under the National Security Regulations of the Commonwealth. The rationing of petrol throughout Australia by the Commonwealth Government automatically ceased from the date of the High Court judgment, but was re-introduced under State legislation in all States except Tasmania on 15th November, 1949. On 8th February, 1950 the new Prime Minister (the Rt. Hon. R. G. Menzies, K.C.) announced that rationing would cease as from the next day.

G. TRAFFIC ACCIDENTS.

1. General.—The practice of reporting accidents occurring in public thoroughfares is not uniform throughout Australia. In some States the reporting of minor accidents has not been enforced, while other States require that all accidents be reported. Hence the figures for each State are not entirely comparable with regard to the number of accidents, and to a lesser extent with regard to the number of persons injured.

2. Total Accidents Registered.—(i) Year 1947-48. The following table shows particulars of the number of persons killed and injured in accidents (known to the police) which occurred in public thoroughfares during 1947-48 :—

ACCIDENTS (KNOWN TO THE POLICE) WHICH OCCURRED IN PUBLIC THOROUGHFARES : PERSONS KILLED AND INJURED, 1947-48.

For further particulars of Traffic Accidents see *Transport and Communication Bulletin* No. 39.

H. AVIATION.

1. **Historical.**—A short review of the progress of civil aviation in Australia up to the date of foundation of a Civil Aviation Administration appears in Official Year Book No. 16, pp. 334-5.

2. **Foundation and Administration of Civil Aviation.**—A brief account of the foundation and objects of this Administration will be found in Official Year Book No. 19, p. 299. In 1936 the organization was changed and the responsibility of regulating and controlling civil aviation in Australia was entrusted to a Board, consisting of four members and a secretary. The Board was responsible to the Minister for Defence and continued to function as a unit of the Defence Department organization until November, 1938. In January, 1939 the Civil Aviation Board was abolished and the Civil Aviation Administration was made a separate Department under the Minister for Civil Aviation. The permanent Head of the Department is the Director-General of Civil Aviation.

The broad principles of the operations of the Administration of Civil Aviation are defined by Acts of Parliament and amplified by Regulations under the Acts. The more important relevant Acts and Regulations are (a) the Air Navigation Act and Regulations which prescribe the rules for the control of aircraft and air navigation ; (b) the Carriage by Air Act which gives effect to the International Convention for the unification of certain rules relating to International Carriage by Air ; and (c) the Quarantine (Air Navigation) Regulations which give effect to the International Sanitary Convention for Aerial Navigation.

The principal functions of the Administration are (a) the safety of civil flying ; (b) the licensing of pilots, ground engineers, navigators, and radio operators together with the supervision of all such work ; (c) the supervision of operations and licensing of airline companies for the carriage of mails, passengers, and freight ; (d) the making of contracts and payments of subsidies and payments for the carriage of mails ; (e) the construction and maintenance of aerodromes and seaplane bases and works in connexion therewith ; (f) the provision, operation, and maintenance of aeradio stations throughout Australia and Territories ; (g) the supervision of aircraft maintenance and aircraft design ; (h) the promotion of civil flying and training of pilots and ground staff ; and (i) liaison with international civil aviation organizations.

The organization is controlled from the head office in Melbourne, which directs the policy, planning, finance, and developmental aspects, and from out-stations throughout Australia and Papua-New Guinea at which are stationed the staff supervising aeradio, flight control, and maintenance.

A form of regional organization is under consideration by which a policy of decentralization will enable activities to be effected by a greater measure of local administrative control. In addition, certain field work could be undertaken by the proposed regional staff.

Early in 1946 the Department of Civil Aviation was reorganized so that it could more efficiently encompass its growing responsibilities. This reorganization continued during the period under review and at the time of going to press the work of the Department is divided into two main sections, Administrative and Technical. The three Administrative Divisions, under the control of an Assistant Director-General (Administrative) and their functions are shown below.

(i) *Division of Air Transport and External Relations.* The functions of this Division relate to the promotion and economic supervision of air transport, including the negotiation of contracts in respect of air services (covering routes, types of aircraft, frequencies of services, payments, mail arrangements, etc.); flying training and gliding; issue of operating licences; air route charges; planning of new services; non-scheduled flights; the collation, compilation and dissection of statistics relating to air transport; and the conduct of general inter-departmental and external relations, including international Empire Conventions, bilateral agreements with other countries; and Customs, Health and Immigration matters.

(ii) *Division of Administration and Personnel.* This Division is concerned with the co-ordination of all departmental personnel requirements and associated matters such as appointments, promotions, salary adjustments and application of Arbitration Awards; education and information services; maintenance and control of departmental libraries; staff welfare and office services; oversight of departmental correspondence records (registry) system; and general correspondence.

(iii) *Division of Finance and Stores.* This Division administers the financial aspects of the Department, including the keeping of Treasury and departmental accounts required in accordance with the provisions of the Audit Act, Treasury Regulations and Treasury Instructions. It also administers the Stores organization of the Department, covering the acquisition, storage, inspection in store and the accounting for, and the disposal of, all departmental stores and equipment, including aircraft, marine craft, vehicles and vehicular plant. Other functions are the general administration and control of departmental transport; the investigation of airline operators' financial activities (including the audit and investigation of books, accounts, records, etc.); the supervision of the expenditure incurred by Divisions under delegated powers, calling attention to any unauthorized, wasteful and uneconomic expenditure; and the departmental internal audit.

The functions of the three Technical Divisions administered by the Assistant Director-General (Technical) are described hereunder.

(i) *Division of Air Navigation and Safety.* This Division attends to the preparation, amendment and enforcement of all rules and regulations, etc., pertaining to air navigation, particularly from the aspect of safety; the issue of licences, certificates and approvals, and the undertaking of the necessary examinations, studies, tests, checks and inspections for their proper issuance and to ensure that the qualifications, techniques and conditions they cover are maintained during their currency; the checking of effectiveness of aids to navigation provided and operated by the Division of Airways, together with any procedures promulgated in this connexion; the advising, and co-operating with, Airways and Airports Divisions in the development of new projects, particularly from the aspect of safety control of the plans being developed by these Divisions; the study of all accidents and incidents, both in Australia and abroad, and the recommendations for prevention; the provision of material for publications relating to air navigation and safety; collaboration with other safety organizations and the dealing with any matters arising out of Empire or international standardization on the safety requirements of air navigation; the supervision from a safety aspect of operational requirements in respect of meteorological and hazard protection generally; in conjunction with the Superintendent of Education and Information, the education of both the Department and the

aviation industry in the latest and best safety practices; the supervision of aviation training activities; the prescription of physical standards, examinations, hours of duty and conditions of work of all aircrew personnel; and the prescription of standards relating to aircraft design and layout in so far as they react on the physical aspects of aircrew and passengers in aircraft.

(ii) *Division of Airways.* The functions of this Division cover the planning, specification, construction, maintenance and operation of all airway operational navigational elements, excluding such elements as come within the normal scope of architectural and civil engineering, and including recruitment, training and management of staff for the fulfilment of this objective; the maintenance of mechanical plant and equipment in departmental service, comprising electrical generating sets, motor vehicles, tractors and aerodrome maintenance plant, launches and marine equipment, and the operation of maintenance workshops; collaboration with the meteorological service; and the development and promotion of operational and navigational elements for the improvement of safety and efficiency of air navigation.

(iii) *Division of Airports.* This Division is concerned with airport planning and design, specification of airport works projects, maintenance of airports, seadromes and buildings and other projects of a dominantly civil engineering or architectural character; the specification of plant, tools and all departmental vehicles and equipment required for the maintenance of airports and departmental property; and the routine inspection and survey of all airports, seadromes and landing fields and the maintenance of up-to-date essential information concerning these fields for publication through the Divisions of Air Navigation and Safety and Administration and Personnel.

The Accident Investigation Branch is an independent section of Head Office, concerned mainly with major accidents. The Chief Inspector of Accidents Investigation and his team of experts are directly responsible to the Director-General.

3. *International Activity.*—(i) *International Civil Aviation Organization and South Pacific Air Transport Council.* A full report of the formation of the International Civil Aviation Organization, the Commonwealth Air Transport Council and the South Pacific Air Transport Council appears in Official Year Book No. 37.

Further depositions of ratification by the States during the year 1947-48 raised the membership of ICAO at 30th June, 1948 to 49. At the first Assembly Meeting of ICAO in 1947 Australia was elected to the Council for three years. The streamlining of entrance and clearance procedures was advanced a further step by the Second Session of the Facilitation Division of ICAO in May, 1948. In Australia the F.A.L. Co-ordinating Committee was formed in August, 1947, to co-ordinate the introduction of ICAO standards for Customs and similar procedures. The Commonwealth Departments of Trade and Customs, Health, Immigration, Postmaster-General, Civil Aviation and the Commonwealth Statistician, and all scheduled international airline companies operating in Australia are represented on the Committee. The Second Session of the F.A.L. Division ICAO adopted a resolution sponsored by Australia and supported by the United States, urging all contracting States to establish similar committees so that world-wide implementation of measures for the facilitation of international air transport would be hastened. The International Civil Aviation Organization established the Far East and Pacific Field Office in May, 1948, to replace the South West Pacific Mission which had been in existence since February, 1947.

The second meeting of the South Pacific Air Transport Council was held at Canberra during August, 1947. The United Kingdom, Fiji and the Western Pacific High Commission, New Zealand and Australia took part in the discussions.

(ii) *Oversea Air Services.* Negotiations for the purchase of the fifty per cent. Queensland and Northern Territory Aerial Services Ltd. shareholdings in Qantas Empire Airways Ltd. were successfully concluded, and from 1st July, 1947 Qantas Empire Airways became wholly owned by the Commonwealth Government. On 1st December, 1947 Qantas Empire Airways extended its service right through to London using Constellation aircraft. Survey flights in the South Pacific resulted in a number of regional

services to the islands. Since 1947 Qantas Empire Airways also operated an air service to Japan under charter to the Royal Australian Air Force. Following a survey flight from Sydney on 10th November, 1947, Qantas Empire Airways has operated a Catalina charter service to Lord Howe Island, and on 14th October, 1947 commenced a fortnightly service direct from Sydney to Norfolk Island.

In 1948, route-miles of Australian regular oversea airline services totalled 26,667. During this period Pan-American Airways continued to operate between San Francisco and Sydney.

The agreement between British Commonwealth Pacific Airlines Ltd. and Australian National Airways Pty. Ltd., under which Australian National Airways operated the trans-Pacific services, expired on 21st April, 1948, and British Commonwealth Pacific Airlines itself took over the operation of the service.

(iii) *International Airports, Customs and Quarantine Airports.* Representatives from the Departments of Trade and Customs, Health, Immigration, Civil Aviation and Air attended a conference convened in January, 1948, to consider the designation of international and customs airports. The conference also decided the actual areas to be the subject of close Customs, Health and Immigration supervision, and agreed on detailed co-operation between the staffs of the Departments.

(iv) *Air Transport Agreements concluded by Australia.* Qantas Empire Airways Constellation service to London began in December, 1947, necessitating the securing of traffic and transport rights in the various States en route. The French Government granted an Australian airline provisional traffic rights in Noumea pending formal transport agreement. In December, 1947 the Netherlands Government was formally advised that Australia considered as terminated the 1939 arrangement for the operation of air services between Australia and the Netherlands Indies, and suggested to that government a further temporary arrangement.

4. *Regular Air Services within Australia.*—During the year 1947-48 Australian air transport set new records for the carriage of passengers and freight, in spite of the limited number of aircraft available and the shortage of aviation fuel. The amount of freight carried was more than double the total for the previous year. Because of the shortage of aviation fuel the Department of Civil Aviation did not encourage the establishment of new services, but some operators were able to cover new routes by re-arranging schedules and affecting other economies in fuel consumption. From 1st November, 1947 permission to operate non-scheduled flights within Australia was approved only in the most essential cases.

To compensate the Department of Civil Aviation for the cost of maintaining air route facilities, a total of more than £1,000,000 a year, a scheme of charges for the use of Commonwealth aerodromes and facilities was introduced. The scheme made airline operators liable to a charge for each trip flown and imposed an annual fee on other aircraft owners. Details of the services in operation on the 30th June, 1948 are shown in *Transport and Communication Bulletin* No. 39, 1947-48.

5 *Air Ambulance Services.*—A brief statement of the foundation and objects of the Air Ambulance Services will be found in Official Year Book No. 32, pp. 145 and 146.

The Flying Doctor Service of Australia reported a major increase in the number of flights undertaken and miles flown during the year. Wireless transceivers linked with bases of operations now number 510. Telegrams transmitted through the radio communication system totalled 110,944. The Commonwealth Government's annual grant to this service amounted to £7,500 and was distributed by the Federal Council of the Flying Doctor Service of Australia. The Commonwealth Department of Health operates the Northern Territory Aerial Medical Service with two DH84 aircraft based at Darwin. During 1947-48 the service undertook twice as many flights as during the previous year. The Bush Church Aid Society for Australia and Tasmania, supported by funds from the Church of England, maintained one DH84 aircraft based at Ceduna, and one DH83 at Wudinna, South Australia. Both were busy during the year.

6. **Training of Air Pilots.**—A brief statement of the pre-war policy of the Commonwealth Government regarding assistance to Aero Clubs was given in Official Year Book No. 32, p. 146.

Early in 1948 negotiations were begun between the Associated Australian Aero Clubs and the Department of Civil Aviation to revise the scheme for financial assistance to the clubs, and a new basis of subsidy payment from 1st February, 1947 to June, 1951 was determined and approved by Cabinet.

Payment to the Clubs, under the revised scheme, has been made as follows:— (i) a maintenance grant (for each aircraft flown) at the following rates per hour subject to certain limitations—(a) at home base, £1, (b) away from home base, £1 10s.; (ii) an issue bonus (for each pupil trained “ab initio” to “A” Licence standard)—(a) at home base, £75, (b) away from home base, £90; (iii) a renewal bonus (for each licence renewed on club aircraft)—(a) at home base, £10, (b) away from home base, £12 10s.

In addition, the Commonwealth has accepted a contingent liability to contribute at the rate of 10s. per flying hour towards each club’s replacement reserve. This amount is intended to supplement the club’s reserve for the purchase of aircraft and spares specifically approved by the Department of Civil Aviation.

7. **Gliding Clubs.**—During 1947–48 the Government approved a grant of £1,000 for payment of subsidies to gliding clubs. Distribution was on an active membership basis.

8. **Airways Engineering.**—The backbone of any airways organization is an independent and reliable communications system, both between the various stations on the ground and between those ground stations and aircraft in the air. A comprehensive point-to-point communications network which includes teletype circuits linking Archerfield, Mascot, Rose Bay and Essendon has been installed, and, as traffic density grows, more circuits will be converted to teletypes. An international aeronautical fixed telecommunication service giving direct radio links with Auckland, Honolulu, Tontouta, Singapore, Batavia, Koepang, Ambon, Morotai, Manila, Guadalcanal and Nauru has also been established. Two international radio stations to handle this traffic have been built near Sydney and near Darwin. To improve communications with aircraft in flight, v.h.f. transmitters, which will ensure excellent reception under the worst conditions of static, have been installed. Initially, all Eastern aeradio stations have been equipped; but ultimately aircraft throughout Australia will use these channels for talking to the ground.

Australia has acquired a number of new 112 m.c. v.h.f. radio ranges, which have been installed at 30 locations along the main air routes, intended for regular use by the end of 1949. During 1947, engineers of the Department of Civil Aviation and the Commonwealth Scientific and Industrial Research Organization developed the Multiple Track Radar Range and Radar Distance Measuring Equipment. Radar Distance Measuring has been adopted for use on all Australian air routes. Tenders were called for 89 ground stations, which will be entirely automatic in operation and will cover an area of 2,000,000 square miles, thus ensuring that almost every aircraft flying anywhere in Australia will be within range of at least one of these beacons.

There is published monthly by the Department of Civil Aviation a handbook entitled “ANFAC” in which are shown details of all communication and navigation aids available for aircraft flying in Australia and the South Pacific.

At all the principal airports, electrically operated runway lighting systems have been installed to define runways to be used for night landings. These installations are being extended both in scope and location. The later equipments, now being installed, have the lighting fittings flush with the runway surface thus eliminating possible obstruction to aircraft and the light output is being directionally focussed to provide greater range of visibility in the desired direction.

9. **Air Traffic Control.**—During the year 1947-48 Air Traffic Control organization became a permanent establishment. The opening up of new units, the density of air traffic, and the additional responsibilities given to the Air Traffic Control service have necessitated the increase of employees to 145. Australia and New Guinea have been divided into a number of Flight Information Regions, each having an Air Traffic Control Centre controlling traffic on specific routes and providing flight information to all aircraft operating within the Region. Approach Control Services are located at Essendon, Mascot and Archerfield, the centres where greatest traffic density occurs. New units have recently been installed at Canberra and Rockhampton. Approach Control Procedures and Instructions which have been on trial for some months were consolidated and produced as a manual. A new edition of the *Manual for Air Traffic Control* was distributed in March, 1948. The Air Traffic Control School was active during the year. These courses are the first step in a plan to achieve standardization throughout the Australian sphere of influence.

10. **Meteorological Aids to Civil Aviation.**—Professional meteorological officers of the Department of the Interior are on duty at 36 of Australia's 59 aeradio stations. At the remainder, communications personnel make local weather observations, and take barometer and thermometer readings for transmission to Area Meteorological Offices.

11. **Airports and Landing Grounds.**—During the year 1947-48, 41 new aerodrome licences were issued and maintenance grants paid to the proprietors of 73 airfields. The number of current licensed (non-Government) airports and airfields at 30th June, 1948 was 240. In addition, there were 133 Government aerodromes, 49 emergency landing grounds, 5 flying boat bases and 6 emergency alighting areas.

12. **Construction and Development of Airports.**—Australia's adoption of international standards made it necessary to bring all Australian international airports to these requirements. Similar standards were applied to the principal airports along Australia's domestic air routes.

Since the end of the war, substantial improvements have been made to 28 airports and temporary passenger accommodation has been provided at eleven airports. To avoid taking material from housing, no permanent passenger handling facilities have been constructed since the war.

Kingsford-Smith Airport.—Work continued during the year on the construction of Australia's largest and most important airport. The first stage, estimated to cost £5,000,000, involves the construction of two runways and has necessitated the diversion of Cook's River and the moving of millions of cubic yards of filling.

Essendon Airport.—There has been some progress in the construction of taxiways and additional apron area. Small allocations of cement, which eventually ceased, necessitated the completion of the 79-degree runway in flexible pavement, instead of concrete as planned. Work on roads within the building area continued, but much still remains to be done.

Moorabbin.—Melbourne's second airport has been laid out and work on runways and buildings commenced. Requisitions totalling £191,000 have been placed with the Department of Works and Housing.

13. **Aircraft Parts and Materials.**—The production of aircraft components and materials in Australia has increased considerably during recent years, so that many aircraft requirements can now be met by local production. Two hundred and ninety-two firms and organizations are authorized by the Department of Civil Aviation to issue release notes with their aircraft products, certifying that they have been manufactured to designs and specifications approved by the Department of Civil Aviation.

14. **Aircraft Maintenance Certificates of Repair.**—Aircraft maintenance repair and overhaul is now carried out under the supervision of a works inspection section or licensed ground engineer in workshops approved by the Department of Civil Aviation. Workshops are authorized to issue certificates of repair which serve as evidence to the licensed

ground engineer responsible for the fitment of the part that the work so covered has been done in an authorized workshop by competent tradesmen and has been subjected to proper inspection. Such specialized work as the overhaul of instruments, electrical equipment, aeronautical pumps and carburettors is carried out by these approved workshops.

15. **Test and Examination of Aircraft Parts and Materials.**—A number of laboratories has now been approved by the Department of Civil Aviation and authorized to issue laboratory reports covering the physical test, chemical analysis, radiological and metallurgical examination of materials and parts used in connexion with the civil aircraft industry.

16. **Statistical Summaries.**—(i) *Registrations, Licences, Accidents, etc.* The following table provides a summary of the civil aviation registrations and licences in force in Australia at 30th June of each of the years 1939 and 1944 to 1948, and also of the numbers of persons killed and injured in civil flying accidents during the years 1938-39 and 1943-44 to 1947-48.

CIVIL AVIATION : REGISTRATIONS, LICENCES, ACCIDENTS, ETC., AUSTRALIA.

(a) Includes Qantas Empire Airways Ltd. service, Perth-Karachi. (b) Includes Sydney-Karachi (Lancastrian) service. (c) Perth-Karachi and Sydney-Karachi service routed via Singapore. (d) Includes British Commonwealth Pacific Airlines Service, Sydney-Vancouver. (e) Not available.

17. *New Guinea Activities.* Issues up to and including No. 34, 1941 show particulars of the development of civil aviation in New Guinea and of the companies operating at the outbreak of war with Japan, while subsequent issues carry the accompanying statistical summary of operations up to the end of September, 1941. Similar statistics of post-war operations, however, are not at present available.

During 1947-48 Qantas Empire Airways Ltd. operated a regular service from Australia to Lae and Rabaul. Commercial aircraft operators located at Lae maintained passenger and freight carrying services to Wau, Bulolo, Mt. Hagan, Kainantu, Garoka, Finschhafen, Madang, Wewak, Aitape, Maprik and Angoram. Charters were undertaken to other places as occasion arose.

Mails to all areas except Bougainville are now serviced by air. In addition to the weekly Australia-Port Moresby-Lae-Rabaul service, Qantas Empire Airways Ltd. in 1947-48 conducted an air service Lae-Rabaul-Kavieng-Manus and return, thus providing a bi-weekly service from Australia and Papua to Rabaul. The Royal Australian Air Force operated, approximately monthly, a service between Port Moresby and Manus Island which enabled all Manus surface mails ex-Australia routed via Port Moresby to be cleared by air.

I. POSTS, TELEGRAPHS, TELEPHONES AND WIRELESS.

§ 1. General.

1. The Commonwealth Postal Department.—Under the provisions of the Commonwealth Post and Telegraph Act 1901, the Commonwealth Postal Department was placed under the control of the Postmaster-General, being a responsible Minister. The Director-General of Posts and Telegraphs controls the Department under the Postmaster-General, whilst the principal officer in each State is the Deputy-Director of Posts and Telegraphs.

The considerable expansion of postal business of all kinds is reflected in the gross revenue of the Department which in 1947-48 was 81 per cent. greater than in 1938-39.

2. Postal Facilities.—(i) *Relation to Area and Population.* The following statement shows the number of post offices, the area in square miles and the number of inhabitants to each post office (including non-official offices) in each State and in Australia at 30th June, 1948. In order to judge clearly the relative postal facilities provided in each State, the area of country to each office as well as the number of inhabitants per office should be taken into account. In this and all succeeding tables the returns given for South Australia include those for the Northern Territory, and the returns for the Australian Capital Territory are included in those for New South Wales.

POSTAL FACILITIES: RELATION TO AREA AND POPULATION, AT 30th JUNE, 1948.

State.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	Aust.
Number of post offices (a) ..	2,501	2,470	1,250	348	613	200	8,194
Number of square miles of territory to each office in State ..	124	36	536	1,066	1,592	52	363
Number of inhabitants to each office	1,216	846	902	791	841	515	941
Number of inhabitants per 100 square miles ..	981	2,379	168	74	53	1,001	259

(a) Includes "official," "semi-official," and "non-official" offices.

The foregoing table does not include "telephone" offices at which there is no postal business.

(ii) *Number of Offices.* The following table shows the number of post offices in each State for the years 1918, 1928, 1938 and 1948.

NUMBER OF POST OFFICES.

State.	At 30th June—							
	1918.		1928.		1938.		1948.	
	Official and Semi-Official.	Non-Official.	Official and Semi-Official.	Non-Official.	Official and Semi-Official.	Non-Official.	Official and Semi-Official.	Non-Official.

1947-48 ..	12,386	9,234	4,331	2,602	1,961	876	31,390
Total revenue per capita—							
	£	£	£	£	£	£	£
1938-39 ..	2.55	2.61	2.44	2.36	2.37	1.97	2.50
1943-44 ..	3.43	3.85	4.30	3.68	3.43	2.72	3.67
1944-45 ..	3.54	4.02	4.48	3.70	3.47	2.85	3.79
1945-46 ..	3.69	4.08	4.24	3.54	3.53	3.01	3.83
1946-47 ..	3.97	4.28	3.75	3.73	3.71	3.37	3.96
1947-48 ..	4.10	4.46	3.89	3.92	3.85	3.35	4.11

Compared with the corresponding figures for the previous year, an increase of 5.3 per cent. is shown in the gross revenue earned for the year 1947-48. Increases in the several branches were as follows:—Postal 6.1 per cent., Wireless 2.0 per cent. and Telegraph 6.5 per cent. Gross revenue of the Telegraph Branch decreased by 2.4 per cent.

The gross revenue in 1947-48 was 80.9 per cent. higher than in the last complete pre-war year, 1938-39, the corresponding percentage increases for the several branches being as follows:—Postal 82.9, Telegraph 106.6, Wireless 54.7, and Telephone 76.4.

4. **Expenditure, Postmaster-General's Department.**—(i) *Distribution.* The following table shows, as far as possible, the distribution of expenditure (actual payments) on various items in each State during the year ended 30th June, 1948, as shown by records kept for Treasury purposes. The table must not be regarded as a statement of the working expenses of the Department, since items relating to new works, interest, etc., are included therein.

**POSTMASTER-GENERAL'S DEPARTMENT : DISTRIBUTION OF EXPENDITURE,
1947-48.
(£'000.)**

Grand Total ..	(d)6,401	13,033	9,502	5,188	2,988	2,209	1,070	40,391

(a) Expenditure on air-mail services etc. (b) Includes expenditure from loan. (c) Particulars of apportionment to States not available. Includes superannuation contributions, £575,103; sinking fund payments, £1,857,680; interest on loans, £984,404; exchange, £396,143; and loan redemption, etc., expenses, £57,985. (d) Includes expenditure not apportioned to States.

A similar table for the year 1946-47 is contained in the *Transport and Communication Bulletin* No. 38, p. 52.

(ii) *Total 1938-39 and 1943-44 to 1947-48.* The next table shows the actual payments made for each of the years 1943-44 to 1947-48 compared with the year 1938-39:—

**POSTMASTER-GENERAL'S DEPARTMENT : EXPENDITURE.
(£'000.)**

1938-39.	1943-44.	1944-45.	1945-46.	1946-47.	1947-48.
18,874	25,415	27,389	29,010	32,724	40,391

The total expenditure increased by 23.4 per cent. during 1947-48 and was 114.0 per cent. higher in 1947-48 than in 1938-39.

5. *Profit or Loss, Postmaster-General's Department.*—(i) *States, 1947-48.* The foregoing statements of gross revenue and expenditure represents actual collections and payments made and cannot be taken to represent the actual results of the working of the Department for the year. The net results for each branch in the several States, after providing for working expenses, including superannuation, pensions and depreciation and interest charges including exchange were as follows:—

**POSTMASTER-GENERAL'S DEPARTMENT : PROFIT OR LOSS, 1947-48.
(£'000.)**

Branch.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.

NOTE.—Minus sign (—) indicates loss.

6. **Fixed Assets.**—(i) *Details, 1947-48.* The following statement shows particulars of the fixed assets of the Postmaster-General's Department from 1st July, 1947 to 30th June, 1948 :—

POSTMASTER-GENERAL'S DEPARTMENT : FIXED ASSETS.

(£'000.)

Particulars.	Net Value, 1st July, 1947.	Capital Expendi- ture, 1947-48.	Gross Value, 30th June, 1948.	Less Deprecia- tion, etc., 1947-48. (a)	Net Value, 30th June, 1948
Telephone service plant (excluding trunk lines)	59,178	6,958	66,136	680	65,456
Joint trunk and telegraph plant (aerial wires, conduits, and cables)	17,182	932	18,114	94	18,020
Telegraph service plant	887	162	1,049	11	1,038
Wireless service plant	1,363	142	1,505	1	1,504
Postal service plant	611	28	639	..	639
Sites, buildings, furniture and office equipment	13,783	974	14,757	121	14,636
Miscellaneous plant	2,479	704	3,183	195	2,988
Total	(b)95,483	9,900	105,383	1,102	104,281

(a) Includes dismantled assets, depreciation written off, and assets transferred. (b) Includes £497,541, the value of Shepparton Radio Station taken over by the Postmaster-General's Department, not included in the figure for 1947 below.

(ii) *Net Value 1938-39 and 1943-44 to 1947-48.* The following table shows the net value of the fixed assets of the Postmaster-General's Department at 30th June, 1939 and 1944 to 1948 :—

POSTMASTER-GENERAL'S DEPARTMENT : NET VALUE OF FIXED ASSETS.

(£'000.)

At 30th June—

1939.	1944.	1945.	1946.	1947.	1948.
65,135	79,912	83,645	88,540	94,986	104,281

At 30th June, 1948 the net value of fixed assets was 60.1 per cent. greater than at 30th June, 1939.

§ 2. Posts.

1. *Postal Matter Dealt With.*—(i) *Australia.* The following table is a summary of the postal matter dealt with in Australia during the five years 1943-44 to 1947-48 in comparison with 1938-39. Although mail matter posted in Australia for delivery therein is necessarily handled at least twice, only the number dispatched is included in the following table, which consequently shows the number of distinct articles handled :—

POSTAL MATTER DEALT WITH : AUSTRALIA.

Year.	Letters, Postcards and Letter-cards.		Newspapers and Packets.		Parcels (a)		Registered Articles other than Parcels.

(b) Includes registered, c.o.d. and duty parcels.

Comparable figures of the number of articles dealt with during 1946-47 may be found in the *Transport and Communication Bulletin* No. 39, pp. 55-58.

2. **Cash on Delivery Parcels Post.**—(i) *General.* The Postal Department undertakes, upon prepayment of a prescribed commission, to deliver registered articles sent by parcel post within Australia, or between Lord Howe Island, Norfolk Island, Nauru, the Territory

of Papua-New Guinea, or Fiji and Australia, to recover from the addressee on delivery a sum of money specified by the sender, and to remit the sum to the sender. The object of the system is to meet the requirements of persons who wish to pay at the time of receipt for articles sent to them, also to meet the requirements of traders and others who do not wish their goods to be delivered except on payment.

(ii) *Summary of Business.* The next statement shows particulars regarding the cash on delivery parcels posted in each State for the years 1943-44 to 1947-48 in comparison with 1938-39 :—

The number and value of parcels forwarded in New South Wales and Queensland are much higher than in any of the other States, although the system has also found favour in South Australia and Western Australia. These States have the largest areas, and consequently more people at long distances from business centres avail themselves of the cash on delivery system.

3. *Sea-borne Mail Services.*—In earlier issues of this work particulars of sea-borne mail services were included, but the insertion of the information terminated with Official Year Book No. 22.

4. **Total Cost of Carriage of Mails.**—During 1940-47 and 1947-48 the total amounts paid for the carriage of mails, as disclosed by the Profit and Loss Account of the Postal Branch, were as follows (1946-47 in parentheses):—Inland mails—Road £990,005 (£845,507), Railway £496,869 (£469,465), Air £570,065 (£554,543); Coastwise mails—£17,404 (£18,690); Oversea mails—Sea £694,749 (£476,239), Air £645,588 (£604,186); Grand Total £3,414,680 (£2,968,630).

5. **Transactions of the Dead Letter Offices.**—During the year 1947-48 there were, in the several States of Australia, 1,442,808 letters, post cards and lettercards returned to writers or delivered, 160,983 destroyed in accordance with the Act, and 84,537 returned to other States or countries as unclaimed—a total of 1,688,328. Corresponding particulars for packets and circulars were—366,998, 137,728, 22,241 and 526,967. There were 2,215,295 articles handled in all, and they contained money and valuables amounting to £309,769.

6. **Money Orders and Postal Notes.**—(i) *General.* The issue of money orders and postal notes is regulated by Sections 74-79 of the Post and Telegraph Act 1901. The maximum amount for which a single money order payable within Australia may be obtained is £40 but additional orders will be issued upon request when larger amounts are to be remitted. The maximum amount permitted to be sent to any person in the sterling area is £8 per month but varying conditions apply for remittance to countries outside the sterling area. A postal note, which is payable only within Australia and in Papua, cannot be issued for a larger sum than twenty shillings.

(ii) *States, 1947-48.* Particulars regarding the business transactions in each State for 1947-48 are shown hereunder:—

MONEY ORDERS AND POSTAL NOTES : TRANSACTIONS, 1947-48.

State.	Value of Money Orders Issued.	Value of Money Orders Paid.	Net Money Order Commission Received.	Value of Postal Notes Issued.	Poundage Received on Postal Notes.

(iv) *Classification of Money Orders Issued and Paid.* Of the total money orders issued in Australia during 1947-48, 3,822,221 valued at £29,559,302 were payable in Australia, 15,094 (£37,823) in New Zealand, 40,348 (£121,659) in the United Kingdom and 20,138 (£80,674) in other countries. Of the total money orders paid in Australia during 1947-48, 3,785,851 (£29,804,552) were issued in Australia, 21,887 (£52,180) in New Zealand, 104,127 (£467,945) in the United Kingdom and 36,770 (£207,386) in other countries.

Money orders payable or issued in foreign countries, which have been sent from or to Australia through the General Post Office in London, are included in those payable or issued in the United Kingdom.

(v) *Postal Notes Paid.* The following table shows the number and value of postal notes paid in each State during 1947-48. Particulars regarding the number and value of postal notes issued and paid in each of the last five years have been given in the previous table.

POSTAL NOTES PAID : STATE OF ISSUE, 1947-48.

§ 3. Telegraphs.

1. *General.*—A review of the development of the Telegraph Services in Australia appears in Official Year Book No. 15, p. 625. During the past few years substantial improvements in both the speed and grade of telegraph service throughout Australia have been effected, the entire system being subjected to intensive reorganization. The external circulation system of the Australian telegraph service has been considerably modified, direct communication having been established between cities and towns which formerly were served through intermediate repeating centres. The voice frequency telegraph carrier wave system, which, introduced during 1935, has now superseded the supra-acoustic carrier wave system, has been extended to all the principal interstate and intra-State routes and 763,944 miles of uni-directional voice frequency telegraph carrier wave channels are now in operation. Direct telegraph communication over great distances is rendered possible by the telegraph system in Australia, one of the greatest being Sydney Perth, 2,708 miles. In order to speed up transmission, machine printing telegraph systems have been introduced between capital cities and between important country centres. Murray multiplex machine apparatus provides telegraph outlets which permit the carriage of very heavy loads with a minimum transit time.

Telephone subscribers may telephone telegrams for onward transmission, or have messages telephoned to them. The fee for the service is small, and the system means, in effect, that the telegraph system is brought into the home of every telephone subscriber. The number of telegrams lodged by telephone during the year ended 30th June, 1948 was 7,309,731 or 21.1 per cent. of the total lodgments.

A radiogram service is provided to certain isolated places throughout Australia and a number of privately operated wireless transceiver stations has been established at various centres throughout the Commonwealth, enabling telegrams to be exchanged with departmental telegraph offices. Stations sponsored by the Flying Doctor Service of Australia can communicate by wireless with base stations (*see also Air Ambulance Services, p. 200*).

The picturegram service between Melbourne and Sydney, which was established in 1929, but which was suspended during September, 1942, will be restored and extended as soon as the necessary equipment is obtained from the United Kingdom. The overseas photo-telegram service between Sydney or Melbourne and England has been extended to New Zealand. During the year 1947-48, 685 picturegrams were received from places overseas and 26 despatched from Australia to overseas countries.

The appropriately designed decorative telegraph stationery for use in conveying Christmas and New Year greetings, Mother's Day messages and other congratulatory messages, withdrawn in 1942, will be re-introduced as soon as the paper supply position will permit. The embargo on the lodgment of Christmas, New Year and Mother's Day greeting telegrams was removed in December, 1945.

The teleprinter service (i.e. typewriting over electrical circuits), introduced in 1933, combines the speed of the telegraph and the flexibility and personal touch of the telephone with the accuracy and permanency of the printed word and affords the great advantage of direct and instantaneous communication between points within the same building or separated by distances up to thousands of miles. Printergram services are also available connecting any business premises with the local telegraph office for the transmission and reception of telegrams. At 30th June, 1948, 226 private wire services utilizing more than 124,000 uni-directional channel miles of communication links were in use. These figures include 167 teleprinter and teletype private wire services utilizing 440 machines.

2. **Telegraphs and Telephones—Length of Wire.**—The following table shows, for the year ended June, 1948, the combined single wire mileage for both telegraph and telephone purposes in each State. The lengths of conduits and pole routes are also shown.

TELEGRAPHS AND TELEPHONES : MILEAGES, 1947-48.

Grand Total	12,229	8,136	6,245	3,623	3,506	953	34,692

(a) At 30th June.

A comparative table for the year 1946-47 may be found in the *Transport and Communication Bulletin* No. 38, p. 60.

(ii) *Australia.* The numbers of telegraph offices and of telegrams dispatched to destinations within Australia and to adjacent islands and to ships at sea, for each of the years 1938-39 and 1943-44 to 1947-48, were :—

TELEGRAPH OFFICES AND TELEGRAMS DISPATCHED : AUSTRALIA.

Particulars.		1938-39.	1943-44.	1944-45.	1945-46.	1946-47.	1947-48.
Telegraph offices	No.	9,389	9,521	9,523	9,426	9,458	9,599
Telegrams dispatched	'000	17,252	33,357	35,474	35,971	33,729	34,692

The volume of telegraph business has increased by over 101 per cent. since the year 1938-39.

§ 4. Oversea Cable and Radio Communication.

1. **First Cable Communication with the Old World.**—In earlier issues of the Official Year Book will be found a detailed account of the connexion of Australia with the Old World by means of submarine cables. (*See* No. 6, p. 770.)

2. **General Cable Service.**—Descriptions of the various cable services between Australia and other countries are given in Official Year Book No. 22, pp. 335-6.

3. **Merging of Cable and Wireless Interests.**—Following upon the recommendations of the Imperial Wireless and Cable Conference in London in 1928 which examined the situation that had arisen as the result of the competition of the beam wireless with the cable services, the Imperial and International Communications Limited (since renamed Cable and Wireless Ltd.) was formed and took over the operations of the Pacific Cable Board and the control of the Eastern Extension Cable Company and the Marconi Wireless Company. For further developments, leading eventually to the establishment of the Overseas Telecommunications Commission, *see* Official Year Book No. 37, pp. 220-4.

4. **Oversea Cable and Radio Traffic.**—(i) *States.* The number of telegrams received from and dispatched overseas in each State during 1947-48 is shown hereunder :—

INTERNATIONAL TELEGRAMS, 1947-48.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Australia.
Number received ..	528,858	368,912	41,912	43,109	53,712	10,573	1,047,076
.. dispatched	520,652	330,937	51,220	49,834	57,231	13,522	1,023,396

Total ..	11,566	19,251	30,817	18,086	20,490	38,576

(a) Includes code telegrams.

Words transmitted to "Other places" included 4,128,000 to the United States of America and 5,637,000 to New Zealand and the Pacific Islands. Words received from "Other places" included 3,924,000 from the United States of America and 4,246,000 from New Zealand and the Pacific Islands.

5. *Cable and Beam Wireless Rates.*—Previous issues contained particulars of the rates per word applicable to the various classes of international telegrams. The publication of this information in the Year Book has been discontinued.

§ 5. Telephones.

1. *General.*—Particulars of the total mileage of lines used exclusively for telephone purposes are not now available, but are combined with all other line mileage. A table showing the total single wire mileage used for telephone trunk and or telegraph purposes is shown in § 3 on page 217.

During 1947-48 the total number of telephones added to the post office system was 58,137, compared with 49,100 in 1946-47. With an average of 128 telephones per 1,000 of population, Australia continues to hold a high place amongst the countries of the world in respect of telephone density. Details of the total telephone installations throughout the world are shown in paragraph 7, page 223.

Fifty-five carrier wave telephone systems were installed during 1947-48 on trunk line routes serving capital cities and important provincial centres. The number of carrier systems now in service totals 356, representing a channel mileage of 235,876.

The plan to convert the manual exchanges in the metropolitan networks to automatic working was adversely affected during the year ended June, 1948, owing to interruption to deliveries of automatic exchange equipment which had been on order for long periods, the difficulties associated with the erection of new buildings to accommodate the apparatus, and the shortage of skilled man-power. However, 13 automatic exchanges were established during the year ended June, 1948. At 30th June, 1948 there were 151 automatic exchanges in the metropolitan area and 168 in the country districts to which 579,137 telephones were connected representing 61 per cent. of the total number in use in Australia. The establishment of automatic switching units which have been designed to meet the special needs of rural communities was also retarded by the effects mentioned

above, with the result that two manually operated exchanges only were replaced by automatic switching units during 1947-48. There were 155 of these units in service at the end of June, 1948 and work is proceeding to enable many more additional exchanges to be established. The difficulty in obtaining equipment from the overseas manufacturers will retard the post-war plans to provide an additional 400 units in country areas.

2. Summary for States.—Particulars relating to the telephone service in each State for the years ended 30th June, 1947 and 1948 compared with 1939 will be found in the following table:—

TELEPHONE SERVICES : SUMMARY.

Particulars.	Year (30th June).	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.

Of the total telephones (963,154) in service on 30th June, 1948, 352,077 or 37 per cent. were connected to exchanges situated beyond the limits of the metropolitan telephone networks. The number of telephone offices, including exchanges, increased by 82 during the year 1947-48, bringing the total in Australia to 9,408.

3. *Subscribers' Lines and Calling-rates.*—The next table shows the number of subscribers' lines and the daily calling-rates at central, suburban and country telephone exchanges in the several States for 1947-48 :—

TELEPHONES : SUBSCRIBERS' LINES AND DAILY CALLING-RATE, 1947-48.

State.	Central Exchanges.		Suburban Exchanges.		Country Exchanges.	
	Subscribers' Lines Connected.	Average Outward Calls Daily per line.	Subscribers' Lines Connected.	Average Outward Calls Daily per line.	Subscribers' Lines Connected.	Average Outward Calls Daily per line.
New South Wales ..	24,915	12.40	140,348	4.96	88,539	2.75
Victoria ..	16,765	8.15	120,435	4.31	69,795	1.99
Queensland ..	8,913	10.85	31,192	4.07	42,879	2.90
South Australia ..	6,749	10.09	26,040	3.27	22,371	1.95
Western Australia ..	7,856	8.36	13,201	3.82	12,115	2.09
Tasmania ..	4,379	5.49	2,983	2.89	11,231	2.45

Similar information for the year 1946-47 may be found in the *Transport and Communication Bulletin* No. 38, p. 64.

A comparison of the average daily calling-rates for each class of exchange shows that New South Wales registered the greatest number of calls per line at central and suburban exchanges and Queensland at country exchanges.

.. *Effective Paid Local Calls.*—The numbers of effective paid local calls from subscribers and public telephones in the various States during the years ended 30th June, 1947 and 1948 appear hereunder :—

TELEPHONES : NUMBER OF EFFECTIVE PAID LOCAL CALLS.

('000.)

State.	Subscribers' Calls.		Calls from Public Telephones.		Total Calls.	
	1946-47.	1947-48.	1946-47.	1947-48.	1946-47.	1947-48.
New South Wales ..	305,611	330,527	40,989	42,639	346,600	373,166
Victoria ..	215,541	231,016	20,697	21,397	236,238	252,413
Queensland ..	83,420	91,417	9,590	9,892	93,010	101,309
South Australia ..	54,875	57,280	7,085	7,280	61,960	64,560
Western Australia ..	38,917	41,150	3,380	3,626	42,297	44,776
Tasmania ..	16,343	17,605	1,761	1,795	18,104	19,400
Australia ..	714,707	768,995	83,502	86,629	798,209	855,624

In 1938-39 subscribers' calls numbered 551,511,000, calls from public telephones 44,683,000, and total local calls 596,194,000.

5. **Trunk Line Calls and Revenue.**—In the next table the number of telephone trunk line calls recorded, the amount of revenue received, and the average revenue per call are shown for each of the States for the years 1946-47 and 1947-48 compared with 1938-39.

TELEPHONES : TRUNK LINE CALLS AND REVENUE.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Australia
Total Calls—	'000.	'000.	'000.	'000.	'000.	'000.	'000.
1938-39 ..	14,401	11,198	7,306	4,166	2,311	1,770	41,152
1946-47 ..	20,059	16,792	10,113	5,709	3,015	2,806	58,494
1947-48 ..	21,368	17,558	10,829	6,125	3,339	3,065	62,284
Total Revenue—	£	£	£	£	£	£	£
1938-39 ..	739,472	529,190	412,811	196,780	126,141	73,634	2,078,028
1946-47 ..	1,411,475	1,038,090	761,478	404,461	215,112	145,406	3,976,022
1947-48 ..	1,520,953	1,098,648	820,765	446,514	240,641	162,655	4,290,176
Average Revenue per call—	d.	d.	d.	d.	d.	d.	d.
1938-39 ..	12.32	11.34	13.56	11.34	13.09	9.98	12.12
1946-47 ..	16.89	14.84	18.07	17.00	17.12	12.44	16.31
1947-48 ..	17.08	15.02	18.19	17.49	17.29	12.73	16.53

The number of trunk line calls during 1947-48 increased by more than 3½ millions, or 6.5 per cent., compared with the figures for the previous year, whilst the average revenue per call increased slightly.

6. **Revenue from Telephones.**—Particulars regarding the revenue from telephone services are included in tables in § 1.

7. **World Telephone Statistics, 1948.**—The following table, derived, in the main, from statistics compiled by the American Telephone and Telegraph Company shows the number of telephones in use in the principal countries of the various continental areas of the world. Data are presented as far as possible as at 1st January, 1948. Estimates have been used where current official statistics could not be obtained.

(a) As at 30th June, 1947.

Among the countries listed by the American Telephone and Telegraph Company (more than 60) Australia, with a rate of 11.9, ranked ninth in order of telephones per 100 of population. This related to telephones in Australia as at 30th June, 1947; at 30th June, 1948, the number of telephones was 963,154 and the rate 12.5 per 100, and at 31st January, 1949 the number was 1,000,491 and the rate 12.8 per 100.

§ 6. Radio Telegraphy and Telephony.

1. **General.**—A statement in regard to the initial steps taken to establish radio telegraphy in Australia appears in Official Year Book No. 18, p. 343.

2. **Wireless Licences and Services.**—(i) *Radiocommunication Stations Authorized.* A change has been made in the arrangement of the statistics of the different classes of the wireless licences issued by the Postmaster-General's Department for stations in the States and Territories of the Commonwealth. Particulars now refer to "stations authorized" instead of "licences issued". The change has been made necessary mainly because of the need for inclusion of certain stations authorized in recent times, but for which licences have not been issued (e.g., stations established by the Postmaster-General's Department, services conducted by the Administration of Papua-New Guinea and aeronautical stations of the Department of Civil Aviation). Another factor in the change is that, in a number of instances, single licences have been issued for a group of stations. Figures representing stations authorized for use in ships and in aircraft are shown separately as totals for the Commonwealth and Territories combined, as it is no longer practicable to classify them according to States, etc., as hitherto.

Figures in the following table relate to radio-communication (radio telegraph and radio telephone) stations only; particulars of broadcasting stations and of broadcast listeners are shown in pars. (ii) and (iii) following.

RADIOCOMMUNICATION STATIONS AUTHORIZED, 30th JUNE, 1948.

State for which Authorized.	Class of Station.									
	Transmitting and Receiving.						Receiving Only.			Grand Total.
	Aero-nautical.(a)	Coast. (b)	Land. (c)	Mobile (General).(d)	Miscellaneous.	Total.	Land. (c)	Mobile (General).(d)	Total.

Northern Territory	5	1	92	29	..	127	127
Aust. Cap. Terr...	1	..	5	43	1	50	..	2	2	52
Total, Australia	55	16	902	1,187	68	2,228	331	259	590	2,818
Papua ..	1	2	43	21	..	67	67
New Guinea ..	3	6	64	73	73
Grand Total ..	59	24	1,009	1,208	68	2,368	331	259	590	(e)2,958

(a) Ground stations (aeradio stations) for communication with aircraft stations. (b) Ground stations for communication with ship stations. (c) Stations established at fixed locations on land for the conduct of point-to-point services and for communication with mobile stations. (d) Stations installed in motor vehicles and small harbour vessels not falling within the definition of ship stations or aircraft stations and stations comprising small portable apparatus used for various purposes. (e) Excludes 168 aircraft stations and 345 ship stations (see above).

(ii) *Broadcast Licences Issued, 1947-48.* The following table shows, for the year ended 30th June, 1948, the number of broadcast licences issued in each State and Territory of the Commonwealth.

BROADCAST LICENCES ISSUED, 30th JUNE, 1948.

State in which Issued.		Class of Licence.				
		Broadcasting.		Broadcast Listener's.		Experi- mental.
		National Stations.	Commercial Stations.	One Receiver.	More than one Receiver.	
New South Wales	..	7	35	646,976	48,526	906

1946 ..	575,864	415,785	191,186	164,724	106,529	51,992	1,506,080
1947 ..	679,505	499,944	228,066	180,909	121,149	61,674	1,771,247
1948 ..	699,259	505,106	239,342	197,326	128,703	63,080	1,832,816

(a) Includes Australian Capital Territory.

(b) Includes Papua.

(c) Includes Northern Territory.

(d) Commencing in July, 1942, licences for receivers in excess of one are included.

3. *Broadcasting.*—(i) *The National Broadcasting Service.* The technical services for the National Broadcasting System are provided by the Postmaster-General's Department, and the programmes by the Australian Broadcasting Commission (*see* Chapter XXVIII.—Miscellaneous.)

At the 30th June, 1948, the National Broadcasting System of Australia comprised 39 transmitting stations as follows :—

Medium-wave Stations—

2FC and 2BL Sydney, 2NC Newcastle, 2NA Newcastle, 2CO Corowa, 2NR Lawrence, 2CR Cumnock, 2CY Canberra, 3LO and 3AR Melbourne, 3GI Longford, 3WV Dooen, 4QG and 4QR Brisbane, 4AT Atherton, 4QB Pinalba, 4QL Longreach, 4QN Clevedon, 4RK Rockhampton, 4QS Dalby, 5CL and 5AN Adelaide, 5CK Crystal Brook, 5DR Darwin, 6WF and 6WN Perth, 6WA Minding, 6GF Kalgoorlie, 6GN Geraldton, 7ZL and 7ZR Hobart, 7NT Kelso, 9PA Port Moresby.

Short-wave Stations—

VLG, VLH and VLR Lyndhurst, Victoria, VLQ Brisbane, Queensland, VLW Perth, Western Australia, VLT Port Moresby.

With the exception of the short-wave stations, all transmitters operate in the medium frequency broadcast band 550 to 1,500 kilocycles per second. From the short-wave stations, using frequencies within the band 6 to 20 megacycles per second, service is given to listeners in sparsely populated parts of Australia such as the north-west of Western Australia, Northern Territory, and Northern and Central Queensland.

In addition to the short-wave stations under the National Broadcasting System the Department of Information operates three short-wave stations at Shepparton, Victoria (VLA, VLB, VLC) for oversea services only.

Programmes for country regional stations are normally relayed from the central studio of the nearest capital city, high quality programme transmission lines being used for the purpose. A number of programme channels is utilized to link national broadcasting stations in the capital cities of Australia, and frequently this system is extended to connect both the national and commercial broadcasting stations.

(ii) *Broadcast Listeners' Licences.*—(1) The general position regarding the fees payable for broadcast listeners' licences is as follows :—(a) For a single receiver possessed by a person, Zone 1, £1 ; Zone 2, 14s. ; (b) for receivers in excess of one possessed by a person, Zone 1, 10s., Zone 2, 7s.

(2) Free licences are granted to blind persons and to schools. Invalid and age pensioners who live alone or with another such pensioner are required to pay only half the ordinary fees, i.e. :—(a) For a single receiver, Zone 1, 10s. ; Zone 2, 7s. ; (b) for receivers in excess of one, Zone 1, 5s. ; Zone 2, 3s. 6d.

Zone 1 is the area within 250 miles of a National Broadcasting Station. Zone 2 is the remainder of the Commonwealth.

Under the Australian Broadcasting Act 1942-1946 the Australian Broadcasting Commission received the following amounts (in parentheses) out of the fee for each broadcast listener's licence :—20s. (11s.), 14s. (11s.), 10s. (5s. 6d.), 7s. (5s. 6d.), 5s. (3s.), 3s. 6d. (3s.).

The foregoing procedure was repealed, however, by an amendment to the Australian Broadcasting Act, assented to on the 6th December, 1948, whereby the Commission shall prepare estimates of its receipts and expenditure for each financial year and submit these estimates to the Minister. Appropriations shall be made by Parliament for the purposes of the Commission which, together with all other moneys received by the Commission, shall be paid into an account in the Commonwealth Bank of Australia. From this account all costs, charges, expenses, etc., incurred by the Commission in the exercise of its powers and functions under the Act shall be defrayed.

(iii) *Commercial Broadcasting Stations.* The services of other broadcasting stations are conducted by private enterprise under licence from the Postmaster-General. Licences are granted on conditions which ensure satisfactory alternative programmes for listeners. The fee for a broadcasting station licence is £25 per annum, plus one-half of one per cent. of the gross earnings from the operations of a station which has made a profit in the year preceding. The maximum initial period of a licence is three years, and it is renewed for a period of one year at the discretion of the Postmaster-General. Licensees of these stations do not share in the listeners' licence fees, but rely for their income on revenue received from the broadcasting of advertisements and other publicity. The number of these stations in operation at 30th June, 1948, was 102 and there are other stations in prospect.

(iv) *Radio Inductive Interference.* The Postmaster-General's Department takes active measures to suppress, so far as possible, interference with broadcast reception resulting from the radiations of energy from electrical machinery and appliances. During the year 1947-48, 8,830 instances of interfering noises were eliminated with the co-operation of the owners of the offending equipment.

(v) *Prosecutions under the Wireless Telegraphy Act.* During the year 1947-48, 3,045 persons were convicted for using unlicensed broadcast receiving equipment. The total fines and costs amounted to £8,403.

4. *Overseas Communication by Wireless.*—(i) *Beam Radio Telegraph.* The beam wireless stations provided for under the agreement between the Commonwealth Government and Amalgamated Wireless (A/asia.) Ltd. were completed early in 1927 and a direct beam radio telegraph service to England was established on 8th April, 1927. A similar service to North America was opened on 16th June, 1928, and other radio telegraph services have since been established for communication with Barbados, Ceylon, China, India and the United States of America. Satisfactory communication is maintained daily over a period of hours, and the services are well patronized by the public. On the 1st October, 1946, as a result of the Overseas Telecommunication Act, all external radio services operated by Amalgamated Wireless (A/asia.) Ltd. were transferred to the Overseas Telecommunication Commission (Australia). A brief outline of the operations of the Overseas Telecommunication Commission will be found in § 6, paragraph 4 (iv) of Official Year Book No. 37.

(ii) *Radio Telegraph Communication in the Pacific.*—Radio telegraph services are in existence between Sydney and Manila (Philippine Islands), Noumea (New Caledonia), Port Moresby (Papua), Suva (Fiji) and China.

(iii) *Radiotelegraphic Traffic.* (a) *International.* Particulars of the international radio telegraphic traffic are not now available separately, but are included in the particulars of the total oversea traffic by cable and radio to and from Australia (*see* p. 220.)

(b) *Coast Stations.* Particulars of the traffic handled by the several coast stations during 1947-48 are as follows:—

RADIO TRAFFIC : COAST STATIONS, 1947-48.

State or Territory.	Total Paying Words.	Particulars.			
		Messages.			
		Paying.	Service.	Weather.	Total.
New South Wales	2,317,097	111,118	11,752	5,743	128,613
Victoria	112,720	8,762	961	1,368	11,091
Queensland	217,571	12,906	5,915	7,925	26,746
South Australia	95,128	6,972	580	2,506	10,058
Western Australia	285,299	19,829	2,991	8,542	31,362
Tasmania	23,251	1,620	347	468	2,435
Northern Territory	102,568	4,898	1,022	22,516	28,436
Australia	3,153,634	166,105	23,568	49,068	238,741
Willis Island, Papua and New Guinea	2,014,026	86,161	6,749	2,513	95,423
Grand Total	5,167,660	252,266	30,317	51,581	334,164

During 1946-47 the traffic at Australian coastal stations amounted to 248,576 messages with 3,922,899 paying words.

(iv) *Overseas Telecommunications Commission.* An outline of the constitution, purpose and functions generally of the Overseas Telecommunications Commission (Australia) will be found in § 6, paragraph 4 (iv) of Official Year Book No. 37.

CHAPTER VI.

EDUCATION.

§ 1. General.

1. **Evolution of Educational Systems of the States.**—As the first settlement in Australia was in New South Wales, it was but natural that Australian education should have had its beginning in that State, and consequently the mother State has played a leading part in the evolution of educational method and system in Australia. Detailed particulars may be obtained from the various reports of the State Education Departments. The subject is dealt with in some detail in the first two issues of the Official Year Book, which also contain a more or less detailed account of the origin and earlier development of the educational systems of the other States.

2. **Later Development in State Educational Systems.**—Issues of the Official Year Book up to No. 22 contain an outline of later developments of the educational systems of the various States. The educational systems of the States may now be considered as more or less homogeneous entities, the various stages succeeding one another by logical gradation from kindergarten to university.

3. **School Age.**—The statutory school age for children in each State, set out briefly, is as follows:—New South Wales, 6 to 15 years; Victoria, 6 to 14 years; Queensland, 6 to 14 years; South Australia, 6 to 14 years; Western Australia, 6 to 14 years; and Tasmania, 6 to 16 years. Legislation was passed in 1943 in Victoria and Western Australia increasing the school leaving age to 15 years, and in 1946 in South Australia enabling the Governor-in-Council to raise the leaving age by proclamation to an age not exceeding 15 years, but none of these provisions had been proclaimed at the end of December, 1949.

It is provided in some States that where a child is living outside stated distances from a State school, the age at which the child must commence school is increased. Provision is also made that a scholar having attained a certain standard of education may leave school before reaching the statutory leaving age.

At the 1936 Conference of Directors of Education a resolution was passed urging the necessity of raising the compulsory school leaving age to 15 years. This resolution was submitted to a conference in Sydney of Ministers of Education who agreed to recommend to their respective Governments legislation to implement the proposal by the year 1940, but owing to war conditions its operation was postponed.

4. **Australian Council for Educational Research.**—This Council was constituted on 10th February, 1930, as the result of an endowment from the Carnegie Corporation of New York. The endowment terminated in December, 1942, by which time the total value in Australian currency of the annual payments had amounted to £120,000. The Council now receives grants from the Commonwealth Government and the six State Governments which in 1948 amounted to £7,500 a year.

The Council consists of nine members of whom six are elected by State Institutes for Educational Research established in each of the Australian States. Operations are conducted through a Director assisted by a professional and clerical staff of about twenty persons. The functions of the Council are to conduct surveys and inquiries

in the educational field, to make grants to approved investigators, to act as a centre of information on educational developments both within Australia and overseas, to provide services of a technical character such as those connected with the assessment of knowledge and aptitude, and to provide training for research workers. In general, through the publication of reports and in other ways, the Council aims at improving the standards of education and at stimulating thought about educational problems. So far about 100 reports have been published, two of the latest being respectively "A Study of Accrediting in Australian Schools", and "Training through Latin". The Council also issues a series of information bulletins.

The Council is autonomous, but maintains close contact with State educational authorities, with the Commonwealth Office of Education, with the Universities and with other educational bodies. Its present investigations include a comparative survey of the courses of study and examinations for children between ten and thirteen years, made at the request of the State Education Departments, and a study of the prediction of success of University students.

During the 1939-45 War the Council was called upon for advice and service by a number of Commonwealth departments. The Council acts as the chief centre in Australia for the preparation and distribution of standardized tests of general intelligence, special aptitude, and educational attainment. It has set up a Test Division to deal with this aspect of the work.

The head-quarters of the Council are at 147 Collins-street, Melbourne, C.1, Victoria.

§ 2. Census Records.

1. **Persons Receiving Instruction.**—The Census and Statistics Act 1905-1938 specified "Education" as a subject for inquiry at a Census, but did not indicate the nature or range of the information to be furnished. The Census and Statistics Act 1946, however, provided for the omission of this subject. At earlier Censuses an inquiry regarding the degree of education was restricted to a question as to ability to read and write, but under the system of compulsory education the number of persons in Australia who reach maturity without being able to read and write is very small, and this question was omitted at the 1933 Census. The only question asked concerned those receiving instruction at the time of the 1933 Census and related to the nature of the school they were attending. Details for the Censuses of 1911, 1921 and 1933 were as follows:—

PERSONS RECEIVING INSTRUCTION AT THE DATE OF THE CENSUS, AUSTRALIA. 1911 TO 1933.

Receiving Instruction at—	Number.			Percentage.		
	1911.	1921.	1933.	1911.	1921.	1933.
				%	%	%
Government School ..	593,059	791,724	904,383	76.49	77.36	77.23
Private School ..	156,106	193,774	224,994	20.13	18.93	19.21
University ..	2,465	7,252	8,525	0.32	0.71	0.73
Home ..	23,760	30,712	33,126	3.06	3.00	2.83
Total ..	775,390	1,023,462	1,171,028	100.00	100.00	100.00

2. **Ages of Scholars.**—Details concerning the number of scholars at specified ages in 1933 together with the total number of persons recorded for those ages may be found on page 227 of Official Year Book, No. 37.

3. **Percentage of Persons not Receiving Instruction.**—At the Census of 1933 the compulsory school age in the various States ranged from 6 to 14 years. The proportion of children aged last birthday from 6 to 13 years receiving instruction was 94.1 per cent. Conversely 5.9 per cent. of the children within the compulsory range were not indicated as receiving instruction at the date of the Census. The corresponding ratio in 1921 was 6.7 per cent.

As the minimum compulsory school age in New South Wales and Tasmania at the date of the 1933 Census was 7 years, and as exemptions from further attendance for special reasons on attaining age 13 obtain throughout the States, a more reliable estimate of the percentage of children not receiving instruction may be obtained by ignoring the extreme ages of the compulsory range. The elimination of these ages reduces the percentage from 5.9 to 4.3 per cent. Attendance at school was known to be affected by the severe economic conditions prevailing at the time of the Census, and this latter figure was consequently in excess of the corresponding percentage of 3.7 in 1921. The effect of accessibility to schools may be seen in the further reduction of the percentages of these ages not receiving instruction in the metropolitan areas to 3.5 in 1933 and to 2.9 in 1921.

4. **Religions of Scholars.**—Information showing the class of school at which the young adherents to the principal religious denominations were being educated at the 1933 Census may be found on page 228 of Official Year Book No. 37.

The most prominent feature is the relatively small proportion of Roman Catholics attending State schools. Of the Roman Catholics reported as receiving instruction, 34.66 per cent. were attending State schools compared with 86.84 per cent. for the rest of the community, the proportion for the whole being 77.23 per cent.

§ 3. State Schools.

1. **General.**—The State schools, or, as they are sometimes termed, the "public" schools, of Australia comprise all schools directly under State control, in contradistinction to the so-called "private" schools, the bulk of which, though privately managed, nevertheless cater for all classes of the community. Separate information regarding technical education is given in § 6, but the junior technical schools are included hereunder. The returns include figures relating to correspondence schools as well as subsidized schools, but evening schools and continuation classes, where such are in existence, are not included, but are dealt with separately in par. 3 (v) following.

2. **Returns for Year 1947.**—(i) *General.* The following table shows for 1947 the number of State Schools, together with the teachers employed, teachers in training and the number of individual children in attendance :—

STATE SCHOOLS, 1947.

State or Territory.			Schools at end of year.	Teachers Employed (excluding Teachers in Training).	Teachers in Training.	Net Enrolment.
New South Wales(a)	2,657	11,943	2,056	375,011
Victoria	2,345	8,510	608	213,687
Queensland	1,545	5,531	800	143,634
South Australia	754	3,034	452	76,349
Western Australia	561	2,268	358	(b) 60,382
Tasmania	324	1,510	174	35,952
Northern Territory(c)	5	24	..	724
<hr/>						
Australia—1947	8,191	32,820	4,538	905,739
1946	8,271	32,753	3,559	886,811

(a) Includes Australian Capital Territory.
30th June, 1948.

(b) Average weekly enrolment.

(c) Year ended

(ii) *Average Enrolment and Attendance.* The methods of calculating enrolment are not identical throughout the States. The unit in South Australia is the daily enrolment while New South Wales, Victoria, Western Australia and Tasmania employ the weekly enrolment. In Queensland no average enrolment is compiled, and the mean of the four quarterly gross enrolments is the only figure available.

As with enrolments there is not complete uniformity in arriving at the average attendance, but most of the States aggregate the attendances for the year and divide by the number of school sessions. New South Wales and Western Australia, however, employ averages of term averages. The matter of securing uniformity in these respects has been under consideration for some time, and the Australian Council for Educational Research, already referred to in § 1, par. 4, is devoting attention to the question of securing greater uniformity in methods of collection and presentation of educational data generally. This matter was discussed at a meeting of Directors of Education at a conference held in Sydney in July, 1947. The average enrolment and attendance in each State during 1947 are shown below :—

STATE SCHOOLS : AVERAGE ENROLMENT AND ATTENDANCE, 1947.

State or Territory.				Average Weekly Enrolment.	Average Daily Attendance.	Percentage of Attendance on Enrolment.
New South Wales	340,867	299,970	88.00
Victoria	204,013	184,302	90.34
Queensland	133,564	116,879	87.51
South Australia	72,490	66,548	91.80
Western Australia	60,382	55,966	92.69
Tasmania	34,065	30,483	89.48
Northern Territory ^(a)	724	651	89.92
Australia—1947				846,105	754,799	89.21
194 ⁽¹⁾				834,341	731,058	87.62

(a) Year ended 30th June, 1948.

The percentage of attendance on enrolment is lowest in Queensland, but this figure is not comparable with those of the other States, as no average enrolment is available for Queensland.

Extraordinary epidemics apart, it would appear from the steadiness of the returns in recent years that the percentage of attendance on enrolment is approaching its maximum under present conditions in Australia. Recurring epidemics of contagious diseases, minor illnesses, bad weather and long distances are all serious factors limiting the full attendance of pupils at school.

The average attendance at the State Schools in Australia is shown below for the year 1891 and at varying intervals to 1947 :—

STATE SCHOOLS : AVERAGE ATTENDANCE, AUSTRALIA.

Year.		Total Population. (a)	Average Attendance.	Year.		Total Population. (a)	Average Attendance.
1891	..	3,421	350,773	1941	..	7,144	732,116
1901	..	3,825	450,246	1943	..	7,270	706,650
1911	..	4,574	463,799	1944	..	7,347	722,942
1921	..	5,511	666,498	1945	..	7,430	726,440
1931	..	6,553	817,262	1946	..	7,518	731,058
1933	..	6,657	805,334	1947	..	7,639	754,799
1939	..	7,005	744,095				

(a) At 31st December, in thousands

It is possible, for some Census years, to relate with reasonable accuracy the average attendance of scholars at State Schools to the number of children who are approximately of school age. For this purpose the ages 5 to 15 years, both included, have been taken and the average attendance per thousand children was :—1891, 455 ; 1901, 464 ; 1911, 477 ; 1921, 544 ; and 1933, 585. Although other factors might have affected the results in a minor degree it would appear that considerable improvement has taken place in school attendance.

(iii) *Schools in the Northern Territory.* During 1947-48 five public schools were in operation, the number of pupils enrolled being 724, with an average daily attendance of 651. By arrangement between the Commonwealth and the South Australian Governments, the South Australian Education Department undertook the work of education in the Northern Territory from 1st January, 1945. The Commonwealth Government provides the schools and furniture, while the South Australian Education Department provides the teachers and determines the curricula for the various types of schools.

For further particulars of education facilities in the Northern Territory see Chapter X.—The Territories of Australia, Northern Territory § 10.

(iv) *Schools in the Australian Capital Territory.* During 1947 ten State Schools were in operation in the Australian Capital Territory ; individual pupils enrolled numbered 1,993 ; and average attendance was 1,767. By arrangement with the Commonwealth Government these schools are conducted by the New South Wales Education Department in the same way as the ordinary State Schools, the Department being recouped for expenditure. The cost of the teaching staff in 1947-48 was £48,000, while the cost of general maintenance items for the year amounted to £21,230. Ample provision has been made for both primary and secondary education, and this will be increased to meet requirements. The figures quoted exclude enrolment, etc., at the Trade School and the Evening Continuation School. A reference to the Canberra University College will be found in § 6, par. 9. For further particulars of education facilities in the Australian Capital Territory see Chapter X.—The Territories of Australia, Australian Capital Territory, par. 10.

3. Distribution of Educational Facilities.—(i) *In Sparsely-settled Districts.*

(a) *General.* The methods adopted in the various States to carry the benefits of education into the remotest and most sparsely-settled areas are set out in some detail in previous issues of the Official Year Book (see No. 22, pp. 430-1).

(b) *Correspondence Teaching.* Teaching by correspondence has been adopted to meet the needs of children out of reach of the ordinary means of education, including those prevented from attending school through physical ailment. Approximately 15,800 children received instruction in this way during 1947, the respective numbers in each State being : New South Wales, 5,795 ; Victoria, 1,485 ; Queensland, 5,266 ; South Australia, 1,138 ; Western Australia, 1,721 ; and Tasmania, 401.

(ii) *Centralization of Schools.* The question of centralization of schools adopted so successfully in America and Canada has received considerable attention in Australia. It is recognized that a single adequately staffed and well equipped central institution can give more efficient teaching than a number of small scattered schools in the hands of less highly trained teachers, and the small schools in some districts were therefore closed and the children conveyed to the central institution. The principle was first adopted in New South Wales in 1904, and in 1947 a sum of £97,328 was expended in boarding allowances and conveyance to central schools. Cost of conveyance to State Schools in Victoria during 1947-48 amounted to £310,334. In Queensland during 1947-48 the cost of transport by rail, road and boat, amounted to £46,648. In South Australia the sum of £101,000 was disbursed in travelling expenses of school children in 1947, while £137,372 was spent in Western Australia during 1947-48, £73,705 in Tasmania in 1947 and £10,444 in the Australian Capital Territory in 1947-48.

(iii) *Area Schools.* A new feature in education is the "Area School" established since 1936 in rural districts in Tasmania. These schools cater for certain groups of children brought from surrounding districts by buses and give instruction with a distinct rural inclination. In 1947 there were 16 area schools in operation having an average weekly enrolment of 4,232 scholars with a daily average attendance of 3,722. The net expenditure on these schools in 1947 was £114,136.

(iv) *Education of Backward and Defective Children.* This subject was referred to at some length in preceding issues of the Official Year Book (see No. 22, pp. 431-2).

(v) *Evening Schools.* Evening Continuation Schools have been in existence for many years in some of the States, but their progress has been uncertain. The aim of these schools is to provide a means of furthering the education of those who have left school at the termination of the primary course. Practical and cultural subjects are combined in the curriculum to be of assistance to those attending in their occupations and their civic life. In New South Wales the 25 Evening Youth Colleges with 200 teachers had an average weekly enrolment in 1947 of 3,825 and an average attendance of 2,468. The colleges are divided into three groups, junior technical, domestic science, and commercial. Attendances at the colleges for boys numbered 1,363, and at those for girls 1,105. The cost of maintaining these colleges in 1947 was £13,502.

(vi) *Higher State Schools.* In all the States higher schools have been established which provide advanced courses of instruction for pupils who have completed the primary grades. Reference to the development of these schools will be found in preceding Official Year Books (see No. 22, pp. 433-4).

(vii) *Agricultural Training in State Schools.* Extended reference to the methods adopted in the teaching of agriculture in State Schools was incorporated in preceding Official Year Books (see No. 22, pp. 434-7).

(viii) *Medical and Dental Inspection of School Children.* This subject is dealt with in detail in Chapter VIII. "Public Health and Related Institutions".

(ix) *Broadcasts to Schools.* It is estimated that about 60 per cent. of all schools in Australia are registered listeners to the Australian Broadcasting Commission's school broadcasts. School broadcasting is recognized by the educational authorities, public and private, as an integral part of Australian school education. Free radio licences were granted to all schools under the Broadcasting Act 1948. The broadcasts which are designed to supplement the work of the classroom teacher, are programmed throughout Australia on week-days at times decided upon after consultation with the State Education Departments. There are special broadcast sessions for the benefit of correspondence pupils in the outback areas throughout Australia.

School broadcasts cover a wide range of subjects, for all school grades, including English Literature, Music, Art, History, Geography, Social Studies, Current Affairs, Nature Study, Science, Health and Hygiene and French.

The broadcasts vary in length from 15 to 30 minutes, amounting to a total of about one hour on each school day, and extending through the greater part of the school year.

Audio-visual education, a method combining the radio and film as teaching aids, has been extensively developed in Victoria, where nearly half of the registered listening schools are also equipped with film-strip projectors. Radio-film broadcasts have also been used in experimental stages in Western Australia, South Australia and Tasmania.

The Kindergarten of the Air, primarily designed for the benefit of children unable to attend kindergarten schools, is broadcast on week-days throughout the year, and relayed over all regional and short wave stations; it is also broadcast from Port Moresby and over W.L.K.S., the station of the Army of Occupation in Japan. A weekly excerpt is broadcast by Radio Australia.

During UNESCO week school sessions are broadcast both on National relay and in State programmes.

In collaboration with the Commonwealth Office of Education, a series of two weekly broadcasts has been arranged to help foreign migrants with their English. The scripts for the series, which is called "English for New Australians", are written by experts appointed by the Commonwealth Office of Education, and produced by the Australian Broadcasting Commission. These sessions are broadcast throughout Australia.

4. **Training Colleges.**—The development of the training systems of the various States is referred to at some length in earlier issues of the Official Year Book (see No. 22, pp. 437-9).

5. **Expenditure.**—(i) *Maintenance — All Schools.* The net expenditure on maintenance in all grades of schools, excepting senior technical schools, and in Victoria and Tasmania junior technical schools, and the cost per head of average attendance for 1939 and the five years ended 1947 are shown in the following table. The figures do not include expenditure on buildings, which is given separately in a subsequent table. In all expenditure tables the figures for Victoria, Queensland and Western Australia relate to the financial year ended six months later than the calendar year.

STATE SCHOOLS: NET EXPENDITURE ON MAINTENANCE.

(a) Gross figures, receipts not being available.

(ii) *Maintenance—Secondary Schools.* The figures given in the preceding table refer to expenditure on maintenance of all State primary and secondary schools, excluding senior technical colleges. It has been thought desirable by the State Education Departments to give separate information in regard to the cost of secondary education. The difficulty of making any satisfactory allocation of the kind, however, will be understood when it is realized that both elementary and higher education are in some instances given in the same school and by the same teacher. Unfortunately, too, the term "secondary" has not the same meaning in all States. It might be mentioned here that similar difficulties arise in connexion with the apportionment amongst the various branches of expenditure on administration, inspection and the training of teachers. The figures quoted in regard to cost hereunder have been mainly extracted from the Reports of the State Education Departments, and are subject to those qualifications.

STATE SECONDARY SCHOOLS : EXPENDITURE ON MAINTENANCE.

State.	1946.		1947.	
	Cost.	Cost per Head of Population.	Cost.	Cost Per Head of Population.
	£	s. d.	£	s. d.
New South Wales	1,874,664	12 10	2,347,401	15 7
Victoria	1,123,478	11 0	1,184,629	11 5
Queensland	247,716	4 6	269,662	4 10
South Australia	276,879	8 9	295,775	9 2
Western Australia	243,646	9 10	356,903	14 0
Tasmania	88,964	7 1	92,897	7 2

The figures in all cases exclude the cost of buildings. In Queensland, the figure quoted excludes the cost of the Agricultural High School and College, which amounted in 1946 to £55,993 and in 1947-48 to £73,839. For Western Australia the total for 1946-47 includes £68,760 and for 1947-48, £67,348 on account of "post primary" education.

(iii) *Buildings.* Expenditure on State School buildings, excluding Technical Colleges, for the years 1939 and 1943 to 1947 was as follows :—

STATE SCHOOLS : EXPENDITURE ON BUILDINGS.

(Including Loan Fund Expenditure.)

(£)

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Nor. Terr.	Total.

(a) Gross figures, receipts not being available.

(b) See footnote (a).

The figures in this and the preceding tables refer to all grades of State Schools (with the exception of senior technical schools and in Victoria and Tasmania junior technical schools). Including buildings, the net cost per scholar in average attendance for the whole of the State Schools in Australia amounted in 1946 to £22 17s. 11d., and £26 18s. 1d. in 1947, as compared with £4 9s. 3d. in 1901.

6. *School Banking.*—With the object of inculcating principles of thrift amongst the children, agencies of the Savings Banks have been established at most of the schools throughout Australia. Particulars of operative accounts for each State and Territory at 30th June, 1949, were as follows:—

SCHOOL SAVINGS BANKS AT 30th JUNE, 1949.

State or Territory.	School Agencies.	Operative Accounts.	Amount on Deposit.	Average per Depositor.
	No.	No.	£	£ s. d.
New South Wales	2,583	169,418	769,491	4 10 10

§ 4. Private Schools.*

1. Returns for 1947.—The following table shows the number of private schools together with the teachers engaged therein, and the enrolment and average attendance in 1947:—

PRIVATE SCHOOLS, 1947.

State or Territory.	Schools.	Teachers.	Enrolment.	Average Attendance.
New South Wales	725	5,585	113,296	99,844
Victoria	488	3,011	83,964	(a) 81,812
Queensland	250	1,815	39,623	36,465
South Australia	143	925	16,468	14,742
Western Australia	184	800	18,826	17,695
Tasmania	58	351	8,067	6,636
Northern Territory(b) ..	2	9	299	236
Total—1947	1,850	12,496	280,543	257,430
1946	1,827	12,157	276,561	252,726

(a) Net attendance.

(b) Year ended 30th June, 1948.

The Roman Catholic schools comprise the largest group of private schools in Australia. On the basis of the figures available, approximately 212,000 children, or 76 per cent. of the total in private schools, are educated in Roman Catholic schools.

The figures for Queensland include the returns from Grammar schools, of which there are eight—five for boys and three for girls, with an enrolment of 1,150 boys and 717 girls. These schools are governed by boards of trustees, partly nominated by the Government, and partly by the subscribers to the funds. The trustees make regulations regarding the fees of scholars, the salaries of teachers, and generally for the management of the schools. The Government endowment received in 1946 amounted to £13,200. In addition, a sum of £18,248 was received by way of fees for the tuition of State scholarship holders while £50,875 was paid to denominational schools. The Grammar schools are inspected annually by officers of the Department of Public Instruction.

2. Growth of Private Schools.—The enrolment and average attendance at private schools in 1891 and at varying intervals to 1947 were as follows:—

PRIVATE SCHOOLS: ENROLMENT AND ATTENDANCE.

Year.	Enrolment.	Average Attendance.	Year.	Enrolment.	Average Attendance.
1891	124,185	99,588	1943	264,433	233,538
1901	148,959	120,742	1944	274,793	245,006
1911	160,794	132,588	1945	272,814	249,024
1921	198,688	164,073	1946	276,561	252,726
1931	221,387	189,665	1947	280,543	257,430
1939	247,482	210,171			

3. Registration of Private Schools.—Conditions in regard to the registration of private schools were referred to in previous Official Year Books (see No. 18, p. 451).

§ 5. Free Kindergartens.

The following information regarding Free Kindergartens has been compiled from particulars supplied by the principals of the chief institutions or the organizing secretary in each State, except in the case of Western Australia where the details were furnished by the Education Department. It refers to kindergarten unions or associations, and excludes the kindergarten branches in the Government schools of the various States.

* Private schools include all schools not wholly under State control. The term "private," though popularly applied, is, of course, a misnomer.

FREE KINDERGARTENS, 1948.

State.	No. of Schools.	Average Attendance.	Permanent Instructors.	Student Teachers.	Voluntary Assistants.
New South Wales ..	33	1,385	87	35	..
Victoria	43	1,666	74	37	77
Queensland	5	244	10
South Australia(a) ..	47	1,632	131	..	10
Western Australia ..	23	483	29	19	30
Tasmania	11	377	28	..	1
Total—1948 ..	162	5,787	359	91	118
1947 ..	156	5,279	364	131	107

(a) Includes affiliated suburban and country centres.

Only 20 of these 162 kindergartens in 1948 were located outside metropolitan areas; these were as follows:—New South Wales—three at Newcastle, one at Parramatta; Victoria—two at Geelong, one each at Bairnsdale, Ballarat, Castlemaine, Euroa, Horsham, Maryborough and Mildura; South Australia—one at Nuriootpa; Western Australia—one each at Kojunup and Northam; Tasmania—two at Launceston and one each at Devonport and St. Marys. In each capital city, excepting Hobart, there is a training college and the number of students in training during 1948 was 130 in Sydney, 140 in Melbourne, 39 in Brisbane, 41 in Adelaide, and 44 in Perth.

§ 6. Universities.

1. *Origin and Development.*—A brief account of the origin and development of the Universities in the various States is given in preceding issues of the Official Year Book (see No. 22, pp. 442–3). Details of the Australian National University for the year 1948 are shown in paragraph 8.

2. *Teaching and Research Staff.*—The following table shows the number of professors, readers, associate and assistant professors, lecturers in charge, lecturers, demonstrators, tutors, honorary lecturers and demonstrators, on the teaching and research staffs of the Universities during the years 1946 to 1948:—

UNIVERSITIES: TEACHING AND RESEARCH STAFF, 1948.

University.	Professors.	Readers, Associate Professors, Assistant Professors, Lecturers in Charge.	Lecturers. (a)	Demon- strators and Tutors.	Honorary Lecturers and Demon- strators.	Total.
Sydney	49	16	549	52	68	734

Total 1948 ..	159	97	1,376	511	104	2,247
1947 ..	155	95	1,249	418	130	2,047
1946 ..	148	53	1,132	372	132	1,837

(a) Includes Senior Lecturers and Assistant Lecturers.

(b) Department of External Studies.

The Conservatorium of Music in Sydney is attached to the Education Department, but in Melbourne and in Adelaide the Conservatorium of Music is under the control of the University.

3. Students.—(i) *Total.* The number of students, including Commonwealth Reconstruction Training Scheme students, enrolled for courses at the Universities during the years 1946 to 1948 is shown in the following table:—

UNIVERSITIES : TOTAL STUDENTS ENROLLED, 1948.

University.	Degree Courses.	Diploma Courses.		Certificate Courses.	Miscellaneous Subjects.	Total (a)
		Post-Graduate.	Sub-Graduate.			
Sydney	9,403	207	625	..	275	10,404

1946	19,969	421	2,348	284	2,655	25,585

(a) Adjustment made for students enrolled for more than one course. enrolled but attending Canberra University College.

(b) Includes 18 students

Of the total students in 1948, 25,540 were males and 6,913 females. Included in those enrolled for degrees were 175 enrolled for higher degree courses in Melbourne, 12 in Queensland, 78 in Adelaide, 38 in Western Australia, and 2 at the New England University College.

(ii) *Commonwealth Reconstruction Training Scheme Students.* The number of Commonwealth Reconstruction Training Scheme students enrolled for courses at the Universities during 1946 to 1948 is shown in the following table:—

UNIVERSITIES : COMMONWEALTH RECONSTRUCTION TRAINING SCHEME STUDENTS ENROLLED, 1948.

University.	Degree Courses.	Diploma Courses.		Certificate Courses.	Miscellaneous Subjects.	Total (a)
		Post-Graduate.	Sub-Graduate.			
Sydney	3,863	44	184	..	42	4,107
Melbourne (b) ..	3,271	..	395	74	315	4,055

Canberra University College	98	..	53	..	14	164
Total 1948	10,182	80	1,287	337	614	12,464
1947	9,677	166	1,338	208	1,020	12,401
1946	6,789	100	949	118	568	8,519

(a) Adjustment made for students enrolled for more than one course. enrolled but attending Canberra University College.

(b) Includes 12 students

Of the total Commonwealth Reconstruction Training Scheme students in 1948, 12,011 were males and 453 females. Included in those enrolled for degrees were 35 enrolled for higher degrees in Melbourne, 7 in Queensland, 11 in Adelaide and 16 in Western Australia.

(iii) *External Service Personnel.* In addition to the students shown in the previous tables there were External Service Forces Personnel enrolled at the various universities, the total numbers for years 1944 to 1946 being as follows:—1944, males 2,068, females 120; 1945, males 2,661, females 79; and 1946, males 1,652, females 27.

4. **University Receipts.**—The receipts of the Universities are derived principally from Government grants, students' fees, and income from private foundations, etc. From all sources other than new bequests the receipts during 1948 for general University functions were as shown in the table below. In South Australia Government grants and income from private foundations include amounts in respect of the Waite Agricultural Research Institute. The receipts and expenditure for extra-university activities are shown in par. 7 following.

UNIVERSITIES : RECEIPTS, GENERAL ACTIVITIES, 1948.
(£)

University.	Government Grants.	Students' Fees.	Interest, Rent, Dividends and Donations.	Other.	Total.
Sydney	227,998	379,489	58,051	17,184	682,722
Melbourne	410,319	200,304	25,567	36,606	672,796
Queensland (Brisbane)	154,191	82,157	18,965	19,886	275,199
Adelaide	129,448	74,980	40,313	15,473	260,214
Western Australia (Perth)	131,849	9,896	761	16,074	158,580
Tasmania (Hobart)	82,686	10,586	343	2,914	96,529
New England University College	47,113	5,283	447	15,931	68,774
Canberra University College	18,900	3,289	94	213	22,496
Total 1948	1,202,504	765,984	144,541	124,281	2,237,310
1947	893,614	639,853	130,918	106,011	1,770,396
1946	761,240	520,816	135,649	87,163	1,504,868

The figures in the foregoing table do not include the value of new foundations received by the Universities which, in 1948, were as follows:—Sydney, £9,580; Melbourne, £116,269; Queensland, £42,906; Adelaide, £199,739; Tasmania, £4,312 and the New England University College, £11,665.

5. **Principal University Benefactions.**—In preceding issues of the Official Year Book information is given in some detail in regard to the extent to which the Universities have benefited from private munificence. Space will permit of reference herein to the more important benefactions only.

The endowments to the Sydney University include the Challis Fund, £410,052; the G. H. Bosch Fund, £268,929; the P. N. Russell Fund, £101,457; the Oswald Watt Fund, £115,744; and the Fisher Estate, £43,245. In addition, the University receives a large annual revenue from the trustees of the McCaughey bequest. Excluding the principal of the latter, the credit balances of the private foundations amounted to £1,702,983 at 31st December, 1948.

Mr. Dafydd Edward Lewis in 1941 bequeathed approximately £700,000 to trustees to provide scholarships at the Melbourne University for boys from State elementary and secondary schools. This bequest is the largest made in Australia for educational purposes. Mr. Sidney Myer's gifts for various special and general purposes amounted to £60,000, while Sir Samuel Gillott, Mr. Edward Wilson (Argus Trust), and Sir Samuel Wilson contributed £41,000, £34,000, and £30,000 respectively. The estate of the late Miss Helen Mackie provided £50,000 for the endowment of pre-clinical chairs, while Mr. R. B. Ritchie's gifts for the endowment of a Chair of Economics amounted to £30,000, and two sums of £30,000 and £25,000 were received from the Supreme Court Library Fund for the endowment of a Chair of Public Law and for the development of law teaching respectively. Dr. James Stewart founded scholarships in Anatomy, Medicine and Surgery to the capital value of £26,000. The Hon. Francis Ormond contributed £20,000 to the University as an endowment for the Chair of Music and for scholarships in music, as well as benefactions to Ormond College amounting to considerably over £100,000, and the late Dr. F. Haley left £50,000 for medical research. Bequests of approximately £20,000 each for general purposes were made by Mr. John Hastie and Mr. C. D. Lloyd, while similar sums were bequeathed by the late Sir John Higgins for research scholarships in industrial chemistry and bio-chemistry as related to the pastoral and agricultural industries and by Mr. R. J. Fletcher for medical research. The late Mr. E. Truby Williams gave £54,000 for the Conservatorium of Music, the library and general purposes. Mr. Russell Grimwade has given £50,000 for a new school of biochemistry, and the trustees of the W. L. Baillieu Trust have given £43,330 of a gift of about £100,000 with which a new library will be built. The Melbourne *Herald* gave £30,000 to establish the first Chair of Fine Arts in Australia. From the estate of the late Mr. W. P. Greene, £25,000 has been received for cancer research and from the Baillieu family £30,000 for the erection of a Metallurgy Research School. A bequest of £22,500 has been received from the estate of the late Dr. Georgina Sweet to provide three fellowships in Economic Zoology, Medicine and Economic Geology. Of £30,000 promised by an anonymous benefactor to provide for a Vice-Director of the Conservatorium of Music, £12,000 has been received.

Queensland University, to 30th April, 1949, had received £261,099 from the McCaughey estate and £41,073 from the Walter and Eliza Hall Trust, while the Hon. T. C. Beirne gave £20,000 in 1935 for the endowment of a Chair of Law in Queensland. The permanent site for the University and other land valued at £62,000 were presented by Dr. and Miss Mayne. In 1937 the trustees of Mr. W. Robertson bequeathed £10,400 for the Chair of Agriculture.

The chief benefactors to the Adelaide University have been Sir George Murray, and his sister Miss M. T. Murray, £134,000; Mr. Peter Waite and his daughter Elizabeth Macmeikan, £120,000; Sir Thomas Elder, £100,000; Sir Langdon Bonython, £72,000; Mr. T. E. Barr Smith, £44,000; Dr. F. Lucas Benham, £44,000; Mrs. R. F. Mortlock and her son Mr. J. T. Mortlock, £30,000; Mrs. Jane Marks, £30,000; Broken Hill Prop. Co. Ltd., £30,000; Mr. Edward Neale, £28,000; family of Mr. John Darling, £25,000; Sir William Mitchell, £25,000; Mrs. A. M. Simpson and Miss A. F. Keith Sheridan, £20,000; Sir Walter Hughes, £20,000; and Mr. R. Barr Smith and family, £20,000.

Under the will of Sir Winthrop Hackett the University of Western Australia received £425,000 for the erection and maintenance of University buildings and for studentships, scholarships, bursaries and other financial help for deserving students. In addition, an endowment of £18,000 was made in 1913 for the Hackett Chair of Agriculture. The late Robert Gladden bequeathed an estate valued at £60,000, particularly to provide travelling scholarships, and numbers of bequests, aggregating about £55,000, have been made to the University mainly for the establishment of a medical school or research in connexion therewith.

6. **University Expenditure.**—The principal item of disbursements under the general University activities consists of the salaries of teaching and research staff representing 68.5 per cent. of the total compared with 68.9 per cent. in 1947 and 69.4 per cent. in 1946. The following table shows the expenditure, excluding capital expenditure on buildings, during the years 1946 to 1948:—

UNIVERSITIES : EXPENDITURE, GENERAL ACTIVITIES, 1948.

(£)

7. **Extra-University Activities.**—(i) *General.* The tables shown in paragraphs 4 and 6 relate to the general University activities while those following show the financial position of all extra-university activities. The heterogeneous character of the items in the statements for these activities varies to such extent between the Universities that comparisons of the totals are misleading, but they include all items excluded from the general statement and give useful information within limits.

(ii) *Receipts, Extra-University Activities.* The following table shows the main receipts for the years 1946 to 1948:—

UNIVERSITIES : RECEIPTS, EXTRA ACTIVITIES, 1948.

(£)

8. *The Australian National University.*—By the Australian National University Act No. 22 of 1946 (assented to 1st August, 1946, proclaimed to commence on 7th February, 1947) as amended by Acts Nos. 21 and 56 of 1947, provision is made for the establishment and incorporation of a University in the Australian Capital Territory. The University is to be governed by a Council of not more than thirty members—of whom two are to be elected by each House of Parliament, not more than eight to be appointed by the Governor-General, not more than nine to be elected by Convocation, three to be elected by the teaching staff and three by the students, together with the Vice-Chancellor and co-opted members. Convocation, which is to consist of the graduates of the University and other persons admitted as members, has not yet been constituted. Until the Council is appointed in accordance with the Act there is an Interim Council appointed by the Governor-General, which is authorized to take such steps as are considered necessary in connexion with the establishment of the University and the commencement of its functions. The first chairman is Professor R. C. Mills, Director of the Commonwealth Office of Education and Chairman of the Universities Commission.

Provision is made for the appointment of a Vice-Chancellor, in the first instance by the Governor-General and thereafter by the Council. Sir Douglas Copland has been appointed as the first Vice-Chancellor. Mr. R. A. Hohnen is the Registrar.

The Interim Council in 1947 established an Academic Advisory Committee in England, consisting of Sir Howard Florey, F.R.S., Professor Raymond Firth, Professor W. K. Hancock and Professor Marcus L. Oliphant, F.R.S., to advise the Council in connexion with the establishment of the Research Schools. Professor Hancock subsequently found that he was unable to continue on this Committee and his place was taken by Professor K. C. Wheare.

The Act provides that after the expiration of the period of five years from 1st July, 1946 (during which time such funds not exceeding £325,000 per annum as may be required are to be provided by the Treasurer), the University is to receive an annual grant of £325,000. An annual appropriation for capital outlays is also made in the Parliamentary estimates.

The University is required by the Act to provide facilities for post-graduate research and may establish Research Schools including—(a) a School of Medical Research to be known as “the John Curtin School of Medical Research”; (b) a Research School of Physical Sciences; (c) a Research School of Social Sciences; and (d) a Research School of Pacific Studies. It may also provide facilities for University education generally, for the incorporation in the University of the Canberra University College, and for specialist training for officers of the Public Service. The Interim Council has decided to concentrate in the first instance on the establishment of the Research Schools and the training of research workers.

The Interim Council has in hand the preparatory work connected with the establishment of the Research Schools and has made a number of senior appointments to the academic staff: Professor Marcus L. Oliphant, B.Sc. (Adel.), Ph.D. (Cantab.), Hon. LL.D. (St. And.), Hon. D.Sc. (Melb.), M.Sc., F.R.S., Professor and Director of the Department of Physics of the University of Birmingham, has accepted its invitation to become the first Director of the School of Physical Sciences. In the John Curtin School of Medical Research, Professor A. H. Ennor has accepted the Chair of Biochemistry, Professor A. Albert the Chair of Medical Chemistry, and Professor F. J. Fenner the Chair of Microbiology. Professor G. Sawyer is the Professor of Law in the Research School of Social Sciences. In the Research School of Pacific Studies, Professor S. F. Nadel is Professor of Anthropology, Professor J. W. Davidson, Professor of Pacific History and Professor W. R. Crocker is the Professor of International Relations. Several other senior academic and technical officers have been appointed.

The Council has invited to Australia distinguished overseas scholars to confer with research workers and hold discussions on matters falling within their specialized field. Besides the members of the Academic Advisory Committee, who visited Australia in 1948, Professor R. W. Gerard of the University of Chicago, Professor T. Griffith Taylor of Toronto, Professor H. S. W. Massey, F.R.S., University College, London, Sir Geoffrey Taylor, F.R.S., and Sir Norman Haworth, F.R.S., of Birmingham have toured Australian Universities and research institutions under the aegis of the Australian National University.

Up to the present the Interim Council has also awarded 54 research scholarships to enable younger graduates to obtain further research training in the field of learning contemplated by the establishment of the Research Schools. In addition, eight Fellowships in the Social Sciences have been awarded.

Arrangements are made for the present with research institutions and Universities in Australia and elsewhere for the work of these scholars, and also for the work of members of the academic staff, to be carried on until the establishment of the various schools at Canberra. Two of the Schools (Physical Sciences and the John Curtin School of Medical Research) are in the preliminary stages of construction. Also on the 204 acres of ground set aside for the purposes of the University at Acton, Canberra, there is being constructed University House—a residential college for single members of the University. This building will provide individual quarters and in addition will act as the centre of activity for the social and broader intellectual development of the University community.

Details of staff and financial operations of the Australian National University for the year 1948 were:—

Staff—(i) Teaching and Research: The John Curtin School of Medical Research: one Professor of Biochemistry and two research fellows (one in Biochemistry and one in Experimental Pathology). The Research School of Physical Sciences: Two research fellows. (ii) Library, nine. (iii) Central Administration, sixteen. (iv) Maintenance, one. (v) Laboratories, three. Total, 34.

Research Scholarships—These numbered 26 and 24 of the holders were working abroad.

Library—Number of volumes, 5,948, and pamphlets, 182.

Receipts.—Commonwealth Government Grant, £75,000.

Expenditure—(i) Administration, £22,879. (ii) Teaching staff, £6,614. (iii) Library, £12,744. (iv) Maintenance of Premises, £1,965. (v) Special Grants £7,870; and other Expenses £11,191. Total, £63,263.

9. Canberra University College.—The main functions of the Canberra University College, created in 1930 by an Ordinance of the Australian Capital Territory, are, at present, to establish courses of lectures for degrees in co-operation with the University of Melbourne, and to conduct a School of Diplomatic Studies, chiefly, although not exclusively, for the training of diplomatic staff officers of the Department of External Affairs.

The University of Melbourne recognizes the instruction given at the College, examines students and grants degrees. The curriculum for degrees is that of the University of Melbourne and academic staff is appointed by the College with the approval of that University. The Canberra and Melbourne lecturers work very closely together and in some subjects the Canberra lecturers act as second examiners. The arrangement with the University of Melbourne is regarded as temporary only, and it is expected that the College will eventually be incorporated in the Australian National University, although incorporation is unlikely to take place until the Australian National University is firmly established as a post-graduate centre.

The Ordinance incorporates the Council of the College, which consists of nine members appointed by the Governor-General, and a member of the academic staff of the College co-opted by the Council.

The College is financed by an annual grant from the Commonwealth Government, which in the financial year 1949 amounted to £34,430, plus £4,112 fees received from students.

During 1949 there were 319 students enrolled at the College. The enrolments were distributed as follows:—(a) Melbourne University Courses—Arts 96, Economics and Commerce 178, Law 14, and Miscellaneous 3; and (b) College Courses—School of Diplomatic Studies—First year 10, Second year 11; Patent Law Courses 7.

In courses of the University of Melbourne, lectures in certain subjects are delivered during the day-time, as well as during the evening, commencing at 5 p.m. or later. All lectures in the School of Diplomatic Studies are held during the day-time.

For the present, the full-time academic staff consists of a principal who is also the Professor of Economic History, two professors and fourteen lecturers. There are also a number of part-time lecturers.

Although the College library contains only approximately 7,400 books, the resources of the Commonwealth National Library and the Government departmental libraries are available. Together, these are considerable, especially in the social sciences.

10. New England University College.—New England University College, comprising a Faculty of Arts and Economics and a Faculty of Science, is governed by the University of Sydney. It is situated at Armidale, on the Northern Tablelands of New South Wales. The College is almost entirely residential. The original university building stands in 183 acres of land and was presented to the University College by Mr. T. R. Forster in 1937. The Government of New South Wales bore the expense of converting it to its present use. Two large additional buildings providing lecture theatres and laboratories have already been erected and others are planned. Lectures began at the College on 14th March, 1938. Students wishing to proceed to degrees in the Sydney Faculties of Medicine, Veterinary Science, Agriculture and Economics may take the earlier courses at the College. In 1949 there were 39 lecturers, including four part-time, nine demonstrators and tutors of whom three were part-time, three research assistants and fourteen honorary lecturers. Two hundred and fourteen students were taking courses leading to degrees, 25 students were taking diploma courses; of these 30 were studying under the Commonwealth Reconstruction Training Scheme. Extension Board courses were also conducted during the year. Since the College was established nearly 600 acres have been added to the University property. This area includes a farm of 265 acres presented by Mr. P. A. Wright for the purpose of producing foodstuffs to be used by the College and for the practical applications of a course in Animal Husbandry which it is hoped to establish within two or three years.

11. **University Extension.**—(i) *New South Wales.* University extension lectures in individual subjects were instituted in Sydney in 1886, in order that persons unable to study for degrees and to attend the ordinary lectures might benefit by the work of university teachers. Extension lectures are now controlled by the Sydney University Extension Board, whose main aims are to disseminate and supplement University instruction.

The Board's chief aim is to advance the cause of adult education in New South Wales by bringing University teaching within the reach of men and women who are unable to attend the University. To this end it provides single lectures or courses of lectures, including post-graduate courses, at the University and at other metropolitan and country centres, including schools, and is prepared to consider applications for tutorial classes. The Board also arranges for distinguished lecturers from other States or countries to lecture in Sydney and elsewhere.

In the period 1st October, 1947 to 30th September, 1948, the total number of lectures arranged by the Extension Board in the city, suburbs and country towns was 858. There were 22 special courses arranged in Sydney and the suburbs, and language classes were conducted in Dutch, German, Russian, Spanish, and Scientific German.

(ii) *Victoria.* In 1947, the Victorian Government established the Council of Adult Education, and the University's part in adult education sensibly diminished. The grant to the University Extension Board, which had been £5,900, was reduced to £1,000, and the Board was replaced by the University Extension Committee.

Its chief functions are to arrange and conduct public lectures, designed mostly to be of interest to members of the graduate body; to conduct lectures for school pupils at matriculation level, both in Melbourne and at country centres; to arrange special courses for professional training institutions, such as physiotherapists, optometrists and speech and occupational therapists; to conduct evening lectures in modern languages; and to stimulate interest in Australian literature by conducting lectures and supporting, financially, the literary quarterly journal *Meanjin*, which is produced under the aegis of the University.

(iii) *Queensland.* The Adult Education service in Queensland continued to expand during the year 1947.

A new Regional Centre was opened at Cairns, increasing the number of these centres to five, in addition to the Chief Centre in Brisbane. Each Centre is in charge of a District Organizer who has the duty of arranging classes in the towns within his district, and in all, 29 towns were provided with Adult Education classes during the year.

The number of courses provided was 250, their duration varying from a few meetings to a year's work. In Brisbane an average of 1,500 students were continuously enrolled for a total of twenty classes per week, of which seventeen were held at the main centre and three in suburban schools. In the country the number of class meetings substantially exceeded the total held in Brisbane.

As in previous years, the State String Quartet gave public recitals in towns and townships throughout the State and a selection of paintings from the Queensland National Art Gallery was sent, under the charge of the Curator of the Gallery, on tour throughout the Southern and Western district from Ipswich to Cunnamulla.

A number of University and other highly qualified lecturers also visited country towns as widely separated as Dalby, Clermont, Cairns and Mt. Isa.

The Board's libraries continued to be well patronized by students, and practically the whole of the year's book purchases were allocated to the country.

All Adult Education Board's services were provided free of charge to the public, the total expenditure for the year being £14,330.

(iv) *South Australia.* Since 1917 the University of Adelaide, through the Joint Committee (with the Workers' Educational Association) for Tutorial Classes, has provided each year in the metropolitan area series of tutorial classes, lecture classes and study circles on a wide range of subjects of cultural and current interest for people who have

no intention of proceeding to a degree or diploma and are unable to attend the ordinary University courses. The fee is nominal, and the enrolment for these classes in 1948 was 805. The Joint Committee extends its activities on a limited scale into the larger country centres.

The University also arranges each year a number of free public lectures by distinguished visitors. Eight such lectures were given in 1948.

(v) *Western Australia.* In Western Australia the Extension Services of the University are handled by the Adult Education Board, the staff of which consists of a part-time Director and eight full-time officers.

The objective and the revised policy of the Board in recent years has been defined in the following terms :—" To provide men and women of varying educational attainments in country districts as well as in the metropolitan area with facilities for the constructive use of leisure by use of head or hands and in such a way as to stimulate in the individual a sense of citizenship and to encourage community activities among groups ".

Examples of the application of this policy in 1948 and preceding years include—

Everyman's Music Recitals.—Everyman's Music Recitals are given in the metropolitan area and in larger country towns. Teams of two to three artists now give these performances of carefully graded programmes of classical music with simple commentary based on earlier experimental work with troops in the Australian Army. Total attendances at the Board's musical activities in metropolitan and country districts averaged over 20,000 in the two years 1947 and 1948. A grant of £750 was made to the Board late in 1948 by the Government for the purpose of arranging symphony concerts in country districts. The Board is planning a series of such concerts to take place in 1949.

Country Drama and Ballet.—Two successful tours of the Linley Wilson Australian Caravan Ballet were arranged by the Board during 1948. Large attendances were recorded and numerous requests were received from other country districts for this type of performance.

Summer School.—A substantial broadening of the pre-war Summer School now brings to Perth for 13 days a cross-section of the Western Australian community both in terms of occupation and location. In January, 1948, 120 men and women were in residence in the former United States Bachelor Officer quarters now used as a hostel for ex-servicemen during University term. In addition, 204 non-resident students attended the full-time activities of the Summer School.

Metropolitan Lecture Classes.—Two series of Metropolitan Lecture Classes, each of ten meetings, are conducted each year. The average annual attendance at these classes totalled 800 in post-war years. With a few suburban exceptions, classes are held in the Adult Education Board rooms in Perth.

Box Discussion Group Scheme.—Some attempt has been made with the limited financial resources available to revive and revise the pre-war Box Discussion Group Scheme. The number of groups averaged 40 in the years 1944–1948.

(vi) *Tasmania.* In Tasmania the University Extension Board which had previously controlled the work of providing extra-mural tuition was replaced in 1919 by a Committee for Tutorial Classes. This Committee ceased activities in 1940 and classes are not at present organized through the University.

12. *Workers' Educational Associations.*—In 1913, Workers' Educational Associations were formed in all the States of Australia, and later in New Zealand. The movement has for its object the bringing of the University into closer relationship with the masses of the people, and providing for the higher education of the workers in civic and cultural subjects.

In Victoria the Association has been superseded by the Council for Adult Education, a statutory body appointed by the Government. Statutory Boards have also been appointed in Queensland and Tasmania, but in both these States the Association still

carries on as a purely voluntary organization. Direct grants are made by the Governments of New South Wales and South Australia. The particulars of grants for classes and discussion groups organized by the Association and serviced by their respective State Universities in these two States in 1948 were as follows :—New South Wales, £20,400, 107 tutorial classes, 211 discussion groups; South Australia, £2,250, 23 tutorial classes and extension lectures at country centres.

Direct grants amounting to £6,570 were made to the Association in New South Wales for both organizing work and a teaching service. The teaching service in 1948 included 16 classes, 2 Summer schools (each of 10 days), 24 week-end schools, 12 short courses of public lectures, and 127 lectures to various organizations including W.E.A. clubs. In South Australia the Association receives a grant of £240 for general organizing purposes. In Tasmania the Association conducted 10 classes. The Carnegie Corporation has shown its interest in the work, by allotting at various times substantial grants to the Association and to the Universities. The Association's primary interest has been in subjects related to social change such as Industrial History, Economics, Political Science and Sociology. In recent years, however, there has been a substantial increase in the number of classes studying Psychology, History, Literature, Music, Drama and Popular Science. The Universities in New South Wales and South Australia co-operate with the W.E.A. in the formation of a joint committee for tutorial classes, which supervises the work with the assistance of a University officer with the title of Director of Tutorial Classes.

§ 7. The Commonwealth Office of Education.

1. **Establishment.**—Although, as has been explained elsewhere, education is primarily a concern of the State Governments, the activities of the Commonwealth Government in other directions inevitably brought it into the field of education at a number of points. It thus became necessary to create a permanent Commonwealth authority capable of providing the Government and others with reliable expert advice on the many educational problems that arise. To fulfil this need the Commonwealth Office of Education was established in 1945.

For administrative purposes the Office is attached to the Ministry of Post-war Reconstruction, and at present is accommodated in Sydney. Under the Minister, the control of the Office rests with the Director whose appointment is direct from the Governor-General in Council. By the Education Act, the Director is also *ex-officio* Chairman of the Universities Commission. The administrative staff of the Universities Commission is housed with the Office of Education and shares its facilities. The special work of the Universities Commission is dealt with in the next section of this chapter.

2. **Functions.**—By the Education Act 1945 the functions of the Office of Education are defined as follows :—“(a) to advise the Minister on matters relating to education; (b) to establish and maintain a liaison, on matters relating to education, with other countries and the States; (c) to arrange consultation between Commonwealth authorities concerned with matters relating to education; (d) to undertake research relating to education; (e) to provide statistics and information relating to education required by any Commonwealth authority; and (f) to advise the Minister concerning the grant of financial assistance to the States and to other authorities for educational purposes, and shall include such other functions in relation to education as are assigned to it by the Minister”.

3. **Activities.**—Thus the Commonwealth Office of Education advises the Commonwealth Government and its various Departments on educational matters relative to the States and overseas countries. It provides a very useful channel for negotiations between State Departments of Education and the Commonwealth Government; it organizes consultations between education authorities generally.

Information about recent important developments in education is collected continually from many sources within Australia as well as from countries overseas and is disseminated to State Education authorities and others in a number of ways, one of which is the distribution of a bi-monthly publication "Education News".

General research into educational problems is one of the important activities of the Office. In addition, close attention is being given to special fields of education such as school broadcasting, visual aids to education, youth education and the education of handicapped children. From time to time the results of survey and research work done in the Office or sponsored by the Office are published in monograph form.

The Office of Education is a Commonwealth authority with which overseas countries may deal on educational questions concerning Australia as a whole. Close contact in international education is maintained through a representative of the Office on the staff of Australia House in London. A very important post-war development in this international sphere is that of the United Nations Educational Scientific and Cultural Organization. The responsibility for implementing the constitution of UNESCO in Australia, and for advising the Government on such matters, rests with the Office of Education. To further the aims of UNESCO twelve National Co-operating Bodies have been set up together with a Co-ordinating Committee. The Office of Education acts as the secretariat of these bodies. Two schemes offering scholarships for bringing Asian students, technicians and administrators to Australia are administered by the Office of Education. These schemes were instituted to develop friendly relations with Australia's neighbours and to help reconstruction in these Asian countries. The Office is also supervising the expenditure of a sum of £30,000 voted by the Government for the provision of educational supplies in these Asian countries.

An educational programme for immigrants reaching Australia from displaced persons camps in Europe has been organized by the Office of Education. Instruction involving practice in using the English language and help in understanding Australian ways begins in the pre-embarkation centres in Europe and continues through to the continuation classes and correspondence courses provided for migrants already in employment in Australia.

A substantial part of the work of the Office is concerned with fostering the development in Australia of general educational and cultural activities. A series of publications for use as youth and adult education material has been commenced. A fortnightly "Current Affairs Bulletin" is provided at bulk rates to discussion groups and other bodies. Regular Discussion Posters and other pamphlets are also produced.

§ 8. The Universities Commission.

1. **General.**—The Universities Commission is a Commonwealth instrumentality which was set up at the beginning of 1943 under National Security (Universities Commission) Regulations primarily to achieve the following objects:—(a) To advise the Commonwealth Government on questions of man-power insofar as they relate to the training of university students; (b) to arrange for the training of adequate numbers of the graduates for all kinds of national service and to attract able students to the University for such training; and (c) to administer the scheme of financial assistance.

Thus the Commission was concerned with war-time problems. From the commencement of the 1939-45 War the Commonwealth Government had recognized the vital necessity of a continuing flow of properly trained graduates from certain of the faculties of the Universities, particularly from the six faculties of Medicine, Dentistry, Engineering, Science, Veterinary Science and Agriculture. The policy of the Government was to reserve students to commence and continue their studies in these faculties. In 1943 reservation was extended to cover the faculties of Arts, Economics, Law and Architecture.

With the passing of the Education Act 1945 the Universities Commission became associated with the Commonwealth Office of Education. Its revised functions are set out in Section 14 of Part 3 of the Act which is quoted below :—

“ 14. The functions of the Commission shall, subject to the regulations and any directions of the Minister, be—

- (a) to arrange, as prescribed, for the training in Universities or similar institutions, for the purpose of facilitating their re-establishment, of persons who are discharged members of the Forces within the meaning of the Re-establishment and Employment Act 1945 ;
- (b) in prescribed cases or classes of cases, to assist other persons to obtain training in Universities or similar institutions ;
- (c) to provide, as prescribed, financial assistance to students at Universities and approved institutions ; and
- (d) to advise the Minister with respect to such matters relating to university training and associated matters as are referred by the Minister to the Commission for advice.”

With cessation of hostilities, the Commission was no longer called upon to administer the scheme of reservation but added to its functions that of administering training under the Commonwealth Reconstruction Training Scheme insofar as it applies to Universities and similar institutions. The end of war meant a large increase in the number of applicants for university-type training under the Commonwealth Reconstruction Training Scheme.

To deal effectively with the increased number of intending students it was found necessary at the end of 1945 to establish Branch Offices in each of the five main Universities, that is, Sydney, Melbourne, Adelaide, Queensland and Western Australia, and to have a Branch Officer stationed in Hobart. The Branch Offices handle all applications for assistance under both the Commonwealth Reconstruction Training Scheme and the financial assistance scheme and give individual consideration to each case. They work in close co-operation with the Universities.

2. Financial Assistance.—(i) *General.* In order to make the best possible use of university facilities, the Commonwealth Government has adopted, through the Universities Commission, the policy of endeavouring to attract able students to the Universities. To this end a scheme of financial assistance has been introduced. Under this scheme assistance is available (subject to a means test) to selected full-time students undertaking any one of the following courses :—(1) University Courses : (i) At any Australian University undergraduate courses leading to a primary degree in Agriculture, Architecture, Arts, Dentistry, Economics or Commerce, Education, Engineering, Law, Medicine, Music or Veterinary Science ; and (ii) Courses leading to the Diploma of Social Studies (or Social Science) at the University of Sydney, Melbourne and Adelaide. (2) Technical College Courses : Full-time day diploma courses in Aeronautical Engineering, Applied Chemistry, Applied Science, Architecture, Automotive Engineering, Building Construction, Chemical Engineering, Civil Engineering, Communication Engineering, Electrical Engineering, Industrial Chemistry, Mechanical Engineering, Metallurgical Engineering, Metallurgy, and Mining Engineering at certain approved Technical Colleges, Technical Schools, and School of Mines. (3) Other Courses : (i) Course in Almonry at the New South Wales Institute of Hospital Almoners ; (ii) Course in Dentistry at the Perth Dental College.

(ii) *Scale of Assistance.* The maximum amount of assistance granted to a student is the payment of all his university fees plus a living allowance of £130 per annum if he is living with a parent, or £169 per annum if he is not living with a parent. In addition, an allowance of up to £10 may be made over the whole course towards the cost of the purchase or hire of necessary instruments. The maximum assistance is payable when the adjusted income does not exceed £250 per annum. For every £10 by which the adjusted income exceeds £250 per annum, the assistance is reduced by £4 per annum.

The adjusted income is ascertained by taking the taxable income of the student and of his parents and by deducting therefrom £50 for each dependent child under sixteen years of age. The assistance is supplementary to any other assistance which a student receives and the Commission deducts from its assistance the value of any scholarship or other award held by a student. From 1st July, 1948 until 10th January, 1949, the amount of the living allowance was £117 per annum if living with a parent or £156 per annum if not living with a parent. Until 1st January, 1949, the reduction rate was £5 4s. for every £10 by which the adjusted income exceeded £250.

(iii) *Number of Students Assisted.* The following table shows the number of students assisted in the various faculties in each University in 1948 :—

NUMBER OF STUDENTS ASSISTED IN EACH FACULTY, 1948.

Course.	Sydney.	Mel-bourne.	Queens-land.	Adelaide.	Western Australia.	Tasmania.	Total.
Agriculture	30	17	6	8	17	1	79
Almonry	5	2	..	2	7
Architecture	18	3	1	2	24

Music	4	..	1	5
Total	753	312	188	234	184	23	1,694

(a) Includes Applied Science.

(b) Includes Medical Science.

The number of students assisted in Technical Colleges in 1948 was 214.

3. *Commonwealth Reconstruction Training Scheme.*—(i) *Benefits.* A general description of the Commonwealth Reconstruction Training Scheme is given in section 11 which is devoted to the scheme as a whole. In addition to the normal benefits there described, some further benefits are available to university students.

At the request and the cost of the Commission, Guidance Officers have been appointed to help Reconstruction Trainees, and students are encouraged to consult the Guidance Officers on any of their problems. These Officers have contacts with the teaching and administrative staffs of the Universities and are able to obtain advice regarding the students' progress and difficulties.

One of the main activities of Guidance Officers has been to arrange for full-time and part-time interim training in the period between the date of discharge and the commencement of the university year. A limited amount of special concurrent tutorial assistance also was arranged.

(ii) *Number of University and University-Type Trainees who have Completed Courses.* The following table gives the number of full-time trainees who have completed various University-type courses in the several States.

NUMBER OF RECONSTRUCTION TRAINEES WHO HAVE COMPLETED FULL-TIME UNIVERSITY-TYPE COURSES (INCLUDING REFRESHER COURSES) UP TO 31st OCTOBER, 1948.

(iv) *University Facilities.* With the influx of students under the Commonwealth Reconstruction Scheme immediate provision had to be made for the alterations and extensions of existing University buildings and for the erection of new ones. Additional equipment also had to be supplied.

The Commonwealth Government offered to provide finance on the following terms and each State and University accepted these terms :—

- “(a) That the Commonwealth meet the cost in the first instance of erecting essential additional buildings and plant required for Reconstruction Training at Universities ;
- (b) In the case of temporary buildings or plant of a temporary nature, the assets to remain the property of the Commonwealth and to be disposed of as necessary after the need for their use is ended ;
- (c) Where the buildings or plant are of a permanent nature the Commonwealth to meet the cost of erection in the first instance so as to ensure expedition on the distinct understanding that the buildings and plant will be taken over by the University on a basis to be determined by agreement between the Commonwealth and State and the University having regard to the permanent value of the buildings and plant to the University ; and
- (d) The Commonwealth would bear the cost of special internal structural alterations ”.

The following table shows the amount of Commonwealth moneys allocated to finance buildings at the Universities :—

University.	Permanent Buildings.	Permanent Alterations.	Temporary Buildings.	Total
	£	£	£	£
Sydney	191,256	14,238	63,118	268,612
Melbourne	177,725	1,498	14,159	193,382
Queensland (Brisbane)	4,322	4,322
Adelaide	262,589	262,589
Western Australia (Perth)	89,247	..	25,069	114,316
Tasmania (Hobart)	11,672	1,500	32,302	45,474
New England University College	39,180	39,180
Total	732,489	17,236	178,150	927,875

For equipment the following amounts have been allocated :—

University.	Permanent Equipment.	Temporary Equipment.	Gift.	Total.
	£	£	£	£
Sydney	40,000	40,000
Melbourne	98,015	3,525	..	101,540
Queensland (Brisbane)	109,318	15,271	..	124,589
Adelaide	97,556	7,628	..	105,184
Western Australia (Perth)	42,786	3,513	..	46,299
Tasmania (Hobart)	19,766	19,766
Total	367,441	29,937	40,000	437,378

The Commonwealth Government agreed to pay the Universities the full cost of teaching all Reconstruction Trainees. The Universities Commission therefore pays each University a subsidy as running costs in addition to fees.

In 1948 the Commission made fee payments to Universities for Reconstruction Trainees amounting to £499,122 and in addition paid subsidies amounting to £359,536.

§ 9. Technical Education.

1. **General.**—Provision has been made in all States for many forms of technical education and the rapid expansion of manufacturing industries in recent years is increasing the demand for technically trained personnel, while the technical training by the Department of Labour and National Service and the Commonwealth Reconstruction Training Schemes have been in operation for some years. (*See §§ 10 and 11 following.*)

In preceding issues of the Official Year Book an outline was given of the origin and development of technical education in each State (*see No. 22, pp. 447-51*), but considerations of space preclude the inclusion of more up-to-date information.

2. **Schools, Teachers and Students.**—The numbers of schools, teachers and enrolments of individual students during 1947 are given in the following table:—

TECHNICAL EDUCATION : SCHOOLS, TEACHERS AND ENROLMENTS, 1947.

State.	Schools or Colleges.	Teachers.			Individual Students Enrolled.	
		Full-time.	Part-time.	Total.	Male.	Female.
New South Wales ..	36	1,002	1,659	2,661	45,242	14,058
Victoria(a) ..	32	1,090	1,160	2,250	42,955	10,895
Queensland ..	12	114	202	316	9,319	3,023
South Australia ..	22	(b)	(b)	542	9,548	6,804

Tasmania(a) ..	7	31	234	265	3,568	1,525
Total 1947 ..	119	6,239	117,635	39,049
1946 ..	117	5,939	109,098	36,356

(a) Includes junior enrolments, 9,400 males and 1,510 females in Victoria, and 820 males and 72 females in Tasmania, as teaching staff and expenditure cover both senior and junior sections. (b) Not available.

The numbers of individual scholars enrolled during the years 1939 and 1943 to 1947 are given in the table following. In order to make the figures comparable, enrolments at Junior Technical Schools are omitted from the Victorian and Tasmanian figures.

TECHNICAL EDUCATION : INDIVIDUAL STUDENTS.

State.	1939.	1943.	1944.	1945.	1946.	1947.
New South Wales ..	37,264	34,940	39,750	42,767	49,952	59,300
Victoria ..	28,844	27,389	31,533	33,905	41,942	42,040
Queensland ..	6,397	6,659	8,416	10,049	11,912	12,342
South Australia ..	9,721	10,952	12,534	14,178	16,175	16,352
Western Australia ..	5,673	5,499	5,417	6,991	9,750	10,647
Tasmania ..	1,316	2,130	2,559	2,951	4,207	4,201
Total ..	89,215	87,569	100,209	110,841	133,938	144,882

3. **Expenditure.**—The expenditure on technical education in each State for 1947 is shown below :—

TECHNICAL EDUCATION : EXPENDITURE, 1947.

(Including Loan Fund Expenditure.)

(£)

State.	Salaries and maintenance.	Equipment.	Buildings.	Total Expenditure.	Receipts—Fees, etc.	Net Expenditure.
New South Wales ..	786,390	164,186	75,248	1,030,296	221,738	808,558
Victoria(a) ..	762,431	33,003	140,825	1,012,639	181,217	..
Queensland ..	120,586	38,325	8,097	176,008	28,455	147,553
South Australia ..	151,065	4,603	34,642	190,710	35,993	154,717
Western Australia ..	114,015	20,345	30,601	164,961	26,762	138,199
Tasmania(a) ..	74,523	18,937	17,822	111,282	2,209	109,073
Total 1947 ..	2,018,010	279,399	307,235	2,685,896	496,374	..
1946 ..	1,657,554	193,879	286,121	2,216,141	427,116	..

(a) Includes the expenditure on Junior Technical Schools.

Fees and other receipts are paid into Consolidated Revenue in all States except Victoria, where they are retained and spent by the Technical School Councils. The expenditure on buildings is largely financed from loan moneys, the sums provided from this source in 1947 being (the expenditure in 1946 is shown in brackets) :—New South Wales, £39,633 (£46,004); Victoria, £131,040 (£158,342); Queensland, £5,091 (£7,086); South Australia, £10,231 (£4,138); Western Australia, £20,351 (£694); and Tasmania, £13,818 (£16,315).

The expenditure on maintenance for technical education in Australia in 1947 amounted to 6s. 3d. per head of population, as compared with 48s. per head expended on maintenance for primary and secondary education.

§ 10. Commonwealth War-time Technical Training Scheme.

1. **Origin of the Scheme.**—The Commonwealth Technical Training Scheme was originated during the 1939–45 War to provide for the training of civilians and Armed Services personnel to make up the deficiency of skilled artisans for the production of aircraft and munitions and to meet the demand of the Armed Services for skilled technicians.

The origin of the Scheme and its administration by the Industrial Training Division, Department of Labour and National Service, is given on page 250 of Official Year Book No. 37.

2. **Training.**—Training under the Scheme did not terminate with the cessation of hostilities in September, 1945, as the Navy Department continued to make use of the facilities for the training of some of its personnel as radio mechanics. However it was eventually decided to establish a school for this type of training within the Navy Department and training under the Scheme terminated on 29th April, 1949. During the period of operation of the Scheme—from 18th December, 1939, to 29th April, 1949—instruction was given in 78 different types of courses in centres established in 60 Technical Colleges throughout Australia.

3. **Persons Trained.**—Up to the 29th April, 1949, 119,717 persons had completed a course of training. The figures for each State and Service are as follows:—

**COMMONWEALTH WAR-TIME TECHNICAL TRAINING SCHEME: PERSONS
COMPLETED TRAINING AT 29th APRIL, 1949.**

Service.	N.S.W.	Vic.	Q'ld.	S.A.	W.A.	Tas.	A.C.T.	Total.

Munitions and Aircraft Production	6,223	9,819	2,609	2,433	1,321	533	314	23,252
Total	34,830	41,806	8,759	19,441	8,262	1,082	5,537	119,717

§ 11. Commonwealth Reconstruction Training Scheme.

1. **Object of the Scheme.**—The object of the Commonwealth Reconstruction Training Scheme is to provide training to enable ex-service men and women and certain special non-service personnel to become re-established in suitable civilian occupations.

2. **Persons Eligible under the Scheme.**—Applications for full-time or part-time training under the Scheme may be lodged within twelve months of discharge by members of the Defence Forces who enlisted before 30th June, 1947, and who, after at least six months' service (except in war-disablement cases), are honourably discharged on or before 30th June, 1949, provided they come within one of the approved categories of eligibility. Provision is made for similar training benefits to be granted to war widows. Members who have a war-caused disability, and widows of servicemen whose death is accepted as being due to war service, may apply for benefits up to 30th June, 1950.

Certain non-service personnel are also eligible to apply for training, viz., representatives of philanthropic bodies, such as the Red Cross, accredited to and serving with the Forces, war correspondents and photographers employed by the Commonwealth, Australian merchant seamen and canteen personnel of R.A.N. ships, and members of the Australian Women's Land Army, who because of war-caused incapacity are unable to return to their pre-war employment.

Selection of eligible applicants for training depends on their suitability for the proposed course and, in the case of vocational trainees, on the existence of satisfactory opportunities for remunerative employment in the calling for which they have applied.

3. **Types of Training.**—The Commonwealth Reconstruction Training Scheme provided three types of training—(a) University type (professional); (b) Technical type (professional or vocational); and (c) Rural training.

Professional training follows normal lines at a university or similar institution. Vocational training includes most types of trade training given at technical colleges or schools. Members selected for vocational training usually receive approximately six months' basic training. On reaching an assessed proficiency of 40 per cent., they are placed in subsidized employment and are paid the full adult wage or determination for the trade concerned, the employer being reimbursed in the form of a wage subsidy according to the trainees' lack of proficiency. Proficiency is reviewed regularly and the subsidy adjusted accordingly.

Rural training is available in the following forms, according to the circumstances in each case:—(a) Practical training for a period of up to two years on an approved farm; (b) An intensive course in farm management of about eight weeks' duration; and (c) Courses at agricultural colleges or similar institutions.

4. **Allowances.**—Full-time trainees receive allowances ranging from £3 15s. per week for a single man to £5 15s. per week for a married man with dependants. In addition, all tuition fees are paid and allowances provided for fares, books and instruments. Trainees may claim a special allowance if they are required to live away from home.

5. **Part-time Training.**—Tuition fees and expenses incidental to tuition (such as books), up to a limit of £60, are payable in respect of members accepted for part-time training.

6. **Legal Authority.**—Legal authority for the scheme is contained in the Re-establishment and Employment Act, No. 11, 1945, Part III.

7. **Organization and Administration.**—The Scheme is administered by executive committees within the Ministry of Post-war Reconstruction. The Commonwealth Reconstruction Training Committee as the central committee has the functions of general planning, organization and direction. Membership of this committee comprises representatives of the Ministry of Post-war Reconstruction (Chairman), Repatriation Commission, Universities Commission and the Department of Labour and National Service, and three members appointed by the Minister and drawn from organizations of employers, employees and ex-servicemen.

The detailed administration and execution of the scheme is carried out by Regional Reconstruction Training Committees, of which there is one in each capital city. Associated with the Regional Committee are Professional, Industrial and Rural Sub-Committees made up of employee and employer representatives in the particular calling with a representative of the training authority concerned.

To 31st May, 1949, full-time enrolments had been made in approximately 375 different courses and part-time enrolments in more than 750 different courses.

The Scheme commenced to operate in a limited way in March, 1944, and the number of ex-service men and women who had commenced training between that date and 31st May, 1949, was as follows :—

**COMMONWEALTH RECONSTRUCTION SCHEME: NUMBER OF TRAINEES AT
31st MAY, 1949.**

Particulars.	Males.	Females.	Persons.
Technical Type Training—			
Full-time	58,456	5,493	63,949
Part-time	145,711	15,817	161,528
University Type Training—			
Full-time	15,830	3,189	19,019
Part-time	11,559	1,149	12,708
Rural Training—Full-time	4,811	23	4,834
Total	236,367	25,671	262,038

§ 12. Libraries.

1. **Commonwealth.**—(i) *Parliamentary and National Library.* When the Commonwealth Parliamentary Library was created in 1902, it was recognized that when the Australian Capital was established it would be necessary to have available there, for the use of Members, Government Departments and the public, a library sufficient for their requirements, and therefore wider in scope than a purely Parliamentary Library. The ideal of a great general library was kept in view, and standard works were systematically acquired. At the same time, the first Library Committee conceived the idea of a National Library for the use and benefit of the people of Australia. The policy was therefore pursued of securing, as far as possible, all works and documents connected with the discovery, settlement and early history of Australia, New Zealand and the Pacific Islands.

In 1909 a valuable collection of *Australiana*, comprising about 10,000 volumes and 6,500 pamphlets, maps, documents and pictures—the library of Mr. E. A. Petherick—was acquired. In 1912 a provision was included in the Commonwealth Copyright Act requiring the publisher of every book, pamphlet, etc., printed in Australia to supply a copy free to the library. In the same year the publication of the *Historical Records of Australia* was begun, and 34 volumes were issued before publication was temporarily suspended in 1926. During 1945 arrangements were completed for the microphotographic copying of all material relating to Australia and the Pacific in the Record Office, London. This project, which was interrupted by the war, is being undertaken by the Commonwealth National Library and the Mitchell Library in partnership, and will enable compilation of the *Historical Records of Australia* to be resumed.

The rapid development of the Australian and National sections of the Library, together with the purchase of the Cook manuscripts, persuaded the Library Committee in 1923 that the title "Commonwealth National Library" should be adopted. Consequent upon the transfer of the Library to Canberra in 1927 the policy of dividing the library into two sections was adopted—the Parliamentary reference collection to be housed in Parliament House and the National and Public section in a separate building, both to remain under the one general administration. The erection of the first wing of the permanent National Library building was completed in 1935, and is designed to meet the requirements of University students and the general public, to whom the privileges of the Library have been extended in respect to borrowing as well as reference. The design for the complete building makes ample provision for the housing of special collections and for the proper display of the valuable records of Australian history which the Library possesses. In 1936 a further development in the scope of the National Library was the establishment of an Historical Film and Speaking Record Section.

The work of the National Library was also extended in 1936 as the result of a grant of \$7,500 in three annual instalments of \$2,500 from the Carnegie Corporation of New York for the establishment of library and reading facilities in outlying Australian Territories. This amount was subsidized by the Commonwealth Government on a £1 for £1 basis. The war resulted not only in the cessation of much of this service, but in the loss of much material in New Guinea, Papua and the Northern Territory. The system is being reconstituted in an enlarged way on the basis of free library service provided by various Commonwealth administration authorities.

The free Papua-New Guinea Public Library established at Port Moresby is administered by an officer of the National Library. Branches have been established at Rabaul and Lae and a country section sends book boxes and parcels to outlying residents, such parcels being accepted for free delivery by the post office.

In 1940 Gregory M. Mathews, O.B.E., presented to the National Library his collection of Australian ornithological works comprising approximately 4,000 items.

To meet increased demands made on the library during the war by Government Departments in Melbourne, the library operated a liaison office there from 1942 to 1946.

Consequent on the report of the War Archives Committee appointed by the Prime Minister in 1942 the Library was created a provisional archives repository for administrative records of the non-service departments, and the War Memorial for those of the Services.

During the war, overseas information libraries were established in six countries, those in London and New York being administered by trained officers of the Library. In 1946, following an agreement between the Departments of External Affairs, Information, and Commerce and Agriculture, the Library undertook to provide information and reference libraries for all overseas posts where there was official Australian representation. The amount provided for these services has risen from £500 in 1944 to £2,500 in 1946, the number of overseas libraries having increased from two in 1944 to thirty-five in 1948.

With the establishment of the National Film Board early in 1945, the National Library became a central library and distributing agency for educational and documentary films. The collection now includes over 1,000 titles and detailed information on more than 2,000 films has been provided by the Library's advisory service. A provisional catalogue of known films at present in Australia has been issued.

By direction of Cabinet, and as a result of the establishment of a Publications Exchange Advisory Committee, an exchange agency will shortly be operated by the Library, with the object of co-ordinating and developing Commonwealth exchanges with State and foreign institutions and governments.

The number of volumes in the National and Parliamentary collections was, at the end of June, 1948, 234,700, the outstanding feature of the National section being a unique collection of Captain Cook manuscripts, while the Parliamentary section contains an extensive series of official publications of Great Britain, the Dominions, and foreign countries. The following publications are issued by the Library :—Historical records of Australia—34 volumes, 12s. 6d. per volume ; Parliamentary Handbook and record of elections—ten issues, 10s. 6d. per volume ; Annual catalogue of Australian publications—eleven issues, 2s. per volume ; Select list of representative works dealing with Australia (reprinted from the Official Year Book) eleven issues ; Australian Public Affairs Information Service : subject index to current literature (monthly).

Training of librarians has been undertaken by the Library since 1939, and there is now a formal course for departmental and other librarians. This was limited in 1948 to residents of Canberra owing to the acute shortage of accommodation.

(ii) *Patent Office Library.* The free library attached to the Commonwealth Patent Office, Canberra, contains over 64,000 volumes. Patent specifications of inventions are received from the principal countries of the world, together with official publications dealing with Patents, Trade Marks and Designs. A wide range of technical literature and periodicals is available.

(iii) *Other Departmental Libraries.* Several Commonwealth Departments in Canberra now have libraries. The following Departments have specialized collections in their own fields, and in addition draw largely on the National Library :—Attorney-General's Department, Australian War Memorial, Bureau of Agricultural Economics, Commonwealth Bureau of Census and Statistics, Department of Commerce and Agriculture, Department of External Affairs, Department of External Territories, Department of Health and Department of Trade and Customs. Libraries established in various war-time departments have functioned chiefly as reference and borrowing agencies, having very small book collections of their own.

For the past few years the library of the Department of Commerce and Agriculture has had its main activities in Melbourne, where important sections of the Department were located in the war years. The Department of Labour and National Service has its main library in Melbourne, and a branch library in Sydney. Other departmental libraries in Melbourne are those of the Department of Air, Department of Defence, Department of Social Services and Postmaster-General's Department. The library of the Commonwealth Office of Education was begun in Sydney during 1945.

(iv) *Commonwealth Scientific and Industrial Research Organization.* In addition to the library at the head office at East Melbourne, the Commonwealth Scientific and Industrial Research Organization now has libraries of varying sizes attached to each of its Divisions, Laboratories and Sections. Of these, there are six in New South Wales, six in Victoria and one in South Australia. The head office catalogue records all material held in branch libraries.

2. *States.*—(i) *General.* Library activity has developed to a marked degree in recent years, and in five States legislation has been passed to increase the scope and usefulness of library service.

(ii) *Metropolitan Public Libraries.* In each of the capital cities there is a well-equipped Public Library, the institutions in Melbourne and Sydney especially comparing very favorably with similar institutions elsewhere in the world. The following statement gives the number of volumes in the Public Library of each capital city at 30th June, 1948 :—

METROPOLITAN PUBLIC LIBRARIES, 30th JUNE, 1948.

		Number of Volumes in—			Total
City.		Reference Branch.	Ordinary Lending Branch.	Country Lending Branch.	
Canberra(a)	234,700	..	(b)	234,700
Sydney	(c)	445,653	(d)	123,117	568,770
Melbourne	505,884	61,127	24,542	651,553
Brisbane	51,472	51,472
Adelaide	209,831	18,719	(e) 60,514	289,064
Perth	180,688	..	(f) 10,162	190,850
Hobart	36,161	16,807	(g) 71,518	124,516

(a) Includes Parliamentary section. (b) Books are lent to libraries or students throughout Australia whenever necessary for research work. (c) Includes 146,013 volumes in the Mitchell Library. (d) The maintenance and control of the ordinary lending branch of the Public Library at Sydney were transferred in 1908 to the Municipal Council. At 31st December, 1946, the books numbered 67,519. (e) Includes 17,945 in the Country Lending Service, 5,257 in Children's Branch and 21,192 in Children's Book Service, 7,510 in the Symon Library and 8,610 in the Australian duplicate collection. (f) Includes 7,563 volumes in the School Libraries Branch. (g) Includes 45,333 volumes in the Children's Branch.

(iii) *New South Wales.* The Free Library Movement in New South Wales, founded for the establishment of a system of public libraries on the basis suggested in the Munn-Pitt Report of 1935, helped to pave the way for the Library Act, 1939, which was fully proclaimed as from 1st January, 1944. The Library Board was fully constituted in 1944, and came into effective operation in September of that year. Seventy local authorities have adopted the Library Act, and during 1947 spent £65,255 on their libraries from rates, as well as £25,600 received in subsidy. This represents in all 2s. per head for 30.43 per cent. of the State's population. There are 43 libraries being operated by 56 councils.

The Joint Coal Board made grants for library purposes to Councils in coal mining areas, a grant of £5,000 having been made to the City of Greater Wollongong to help establish a mobile library service to mining centres, and a grant of £4,150 to the City of Greater Newcastle to meet part of the cost of establishing a library at Wallsend.

The State Library has been housed since 1942 in a new building, whose reading room provides seating accommodation for 500 persons, and has 50,000 volumes in open access. Within four years, however, the old building had to be reoccupied in part owing to lack of space caused by the Library's extended functions.

New South Wales departmental libraries are staffed by officers seconded from the State Library, which also provides a central book buying and master cataloguing service for departmental libraries, and municipal and shire libraries constituted under the 1939 Act.

The Library School, which was established in 1939, has increased rapidly in numbers, until in 1946 the number of students reached 60. Students are trained in librarianship and are prepared for the examinations of the Australian Institute of Librarians.

In 1943 the Banks Memorial Trust was set up to report on the best use of funds which had accumulated since 1905. The government has approved of a memorial at Kurnell, and of the publication of the Banks Papers, a project which will be undertaken by the State Library in the next two or three years.

The State Library has undertaken to reorganize the libraries of the University Tutorial Class and the Workers' Educational Association, and all class libraries, discussion notes, and gramophone records for university tutorial classes are circulated from the State Library.

The State Library grant, including the vote for the Country Circulation Department, after being unchanged for about twenty years, is gradually being increased. In connexion with the Country Circulation Department it may be noted that books are forwarded on loan to State schools, to Schools of Arts and to individual students. During 1947-48, 94,519 books were lent to small State schools, 33,384 to Schools of Arts and small country libraries, while 39,250 reference works were lent to individual country students.

The Mitchell Library in Sydney of more than 60,000 volumes and pamphlets, and 300 paintings, principally relating to Australasia and the Southern Pacific, and valued at £100,000, was bequeathed to the trustees of the Public Library in 1905 by Mr. D. S. Mitchell, together with an endowment of £70,000. The testator stipulated that the regulations of the British Museum were to be adopted as far as was practicable, hence the library is the resort of specialists. There are now 146,013 volumes in the library in addition to valuable manuscripts, collections of Australian postage and fiscal stamps, and various pictures, coins, etc.

In Newcastle, Dr. Roland Pope has given his collection, worth £10,000, which is being housed temporarily at the School of Arts until a reference library is built.

Other important libraries in New South Wales are the Australian Museum, 32,500 volumes; Teachers' Colleges, 90,236; Technical Education Branch, 46,416; Public Schools (Primary), 601,652; (Secondary), 240,314; Railways' Institute, 151,230; Road Transport and Tramways Institute, 40,912; Cooper Library of the New South Wales Public School Teachers' Federation, 17,467; and the library at the National Herbarium, 10,000 volumes. At 30th June, 1948, the Parliamentary Library contained 99,750 volumes.

(iv) *Victoria.* A Library Service Board was appointed in 1940 to inquire into the adequacy of existing library service and prepare plans for development. In November, 1944, it produced a comprehensive report, which recommended the establishment of a State Libraries Board, and suggested a plan for State financial aid. This has been implemented by the passing in December, 1946, of the Free Library Service Board Act, and the establishment of a Free Library Service Board of nine members representing the Public Library of Victoria, municipalities within and outside the metropolis, the Library Association of Victoria, the Education Department, the Victorian Branch of the Australian Institute of Librarians, and the Government itself. The functions of the Board are to assist in the organization and promotion of free library services by municipal and other authorities, to register libraries, recommend the allocation of grants, promote library service in State schools, and to provide advisory services to registered free libraries and associated institutions. The Act empowers the Public Library of Victoria, after consultation with the Board, to establish a school for the training of librarians, and to conduct examinations in librarianship.

Present library service in Victoria is for the most part confined to Mechanics' Institutes, which are not largely effective apart from those at Geelong and Ballarat. Several excellent municipal libraries exist in the metropolitan area. A conference on public libraries in Victoria was held in June, 1948, to formulate plans for the improvement of library services.

The Government makes a grant of £5,500 to country libraries, distributed as follows:—Each applicant library receives £10 10s.; a further grant of £2 for £1 is made to libraries which receive grants from their own municipal authorities, while £1 for £1 is granted for local donations. The maximum amount granted to any library is £200. The main condition is that the library make a certain number of books (not a fixed number, and not necessarily all its books) freely accessible to the public. The subsidy of £1 for each £1 donated is reckoned on the total donations received, even if they are in very small individual amounts.

Two bibliographical works issued in Victoria are a union list of medical periodicals in Melbourne hospitals and libraries, compiled by the staff of the University Library, and a list of periodicals held by all branches of the Commonwealth Scientific and Industrial Research Organization.

With the passing of the Public Library Act 1944, the Public Library of Victoria was separated for administrative purposes from the National Gallery and the Museum, and is now controlled by a Board of seven members concerned with the Library only. The Library provides reference services with a collection of some 566,000 volumes, 2,500 current periodicals and 450 current newspapers; lending services to metropolitan borrowers; country lending services to individual readers throughout the State; and travelling library services by a box system to rural and provincial libraries.

The Reference Library reading room ranks amongst the finest in the world. It was opened in 1913 and has a diameter and height of 114 feet, and is capable of seating 320 readers at a time, with an additional 50 readers in a special Art Room. The Library is particularly strong in *Australiana*, early and fine modern printing, English county records and genealogy, *Shakespeareana* and the fine arts. Associated with the Reference Library is the Victorian Historical Collection containing 13,000 documents, maps, paintings and other items illustrating the history of the State.

(v) *Queensland*.—Prior to 1945 Queensland's library needs were met by the State Public Library, established in 1902 and administered by the Chief Secretary's Department, and by Schools of Arts or similar libraries established in metropolitan and country districts and supported chiefly by members' subscriptions.

The Libraries Act, 1943, constituted a Library Board "to attain efficient co-ordination and improvement of the library facilities of the State with the object of placing such facilities on a sound basis for the benefit and educational improvement of the citizens generally throughout the State". To the Board which has been appointed are entrusted the control and management of the Public Library and of branches which, under the Act, may be established in various parts of the State by the Governor-in-Council.

With regard to the Public Library, the Board has initiated a large-scale buying programme with the object of building up a well-balanced book collection and of so making the Library not only an educational and cultural centre but also a public information bureau. The Public Library's holdings number 50,000 volumes.

The Board's long-range policy is the planning of a State-wide and co-ordinated system which will eventually measure up to accepted modern standards of library service. Meantime a short-range programme is being put into effect for the purpose of obtaining as complete a coverage of the State as possible. Subsidy is allowed to local bodies on a £1 for £1 basis, and books have been made available in bulk to the Queensland Schools of Arts Association, also to the Queensland Bush Book Club and the Bardon Children's Free Library, but they remain the property of the Board and are subject to recall.

The Act empowers local authorities to establish library facilities and to take over the management, control and conduct of Schools of Arts when requested to do so by the trustees of the Schools of Arts or when the local authority deems it advisable. To date, nine Schools of Arts have been taken over by local authorities, while 90 local bodies in all have received subsidy.

A country extension service for people residing outside the metropolitan area is in course of preparation. Its function will be primarily educational and it is designed to bring library facilities to readers in remote areas.

The Oxley Memorial Library was established under the terms of a Declaration of Trust dated 26th August, 1926, from the balance of moneys remaining in the Oxley Centenary Fund. Its object is the promotion of the study and general knowledge of Australian literature and of literature relating to Australia. The Library, housed in the Public Library since 1934, remained under separate administration until 1946 when, by the Oxley Memorial Library of Queensland Act, its assets were transferred to and vested in the Library Board. Since that date it has been administered as a department of the Public Library and the collection, now consisting of some 40,000 items built up by

purchases and donations, has been kept segregated. It is Queensland's historical research centre, containing journals of the early explorers, records of the convict settlement at Moreton Bay and numerous volumes dealing with Queensland history and development. A notable feature is its collection of Queensland poetry.

The library of the Parliament of Queensland was established in 1860. It contained at 1st July, 1948, approximately 72,000 volumes devoted largely to history and the social sciences. The library is being reorganized and in February, 1948, the task of installing a standard card catalogue and the Dewey system of classification was commenced.

(vi) *South Australia.* Following the Price Report of 1937, which stressed the need for a free lending service for metropolitan and country readers, and suggested the establishment of a State Libraries Board, the Public Library of South Australia was separated from the Museum and Art Gallery early in 1940 and became a government department, administered by a Principal Librarian and a Libraries Board.

In March, 1946, the greater part of the Library was thrown open for free public borrowing. Over 14,430 borrowers have been enrolled and books are being lent at the rate of about 217,000 volumes a year.

The Library's Country Lending Service, begun in 1938, has 7,763 registered borrowers, including children, and has built up its collection from 4,000 to 17,945 volumes for adults and 21,192 books for children. In addition 614 schools use the box service, 101,883 books being issued during 1947-48.

A Research Service, established in 1942, receives about 500 inquiries per month. It supplies lists of references, and arranges for borrowing of books and periodicals selected from those lists as well as books and photostats procured from interstate and overseas libraries. The service has an extensive trade catalogue collection.

During the year ended 30th June, 1948, books added to the reference library numbered 1,908, making a total of 209,831. In addition there were 7,510 in the Symon Library, 30,137 (including 21,192 in the Children's Book Service) in the Country Lending Service, 5,257 in the Children's Library, 8,610 in the Australian duplicate collection, 18,719 in the Adelaide Lending Service, making a total of 289,064 at 30th June, 1948.

In 1921 the Archives Department of the Public Library of South Australia was established for the collection of original South Australian historical material. Legislation has been passed forbidding the destruction of government documents without reference to the Libraries Board. Considerable use is made of the collections, which on 30th June, 1948, consisted of 358,647 documents, 20,681 views, and 2,175 maps.

The Institutes Association in 1948 comprised 258 suburban and country libraries with 768,046 volumes.

(vii) *Western Australia.* During 1944 the Government appointed a provisional committee to report on the question of establishing free lending libraries in country centres. The scheme outlined in its report of January, 1945, was accepted, and a permanent Country Free Lending Libraries Committee established. In order to commence a library service for rural areas £1,000 was placed on the estimates for 1945 and 1946, funds being made available on a £1 for £1 basis up to £50. By July, 1945, eight such libraries had been started, and by 1948, 47 libraries were receiving aid under the scheme, which is worked through the Municipalities and Road Boards. In each case the local authority makes its own arrangements for the supervision and lending of books.

In 1945 an Archives Branch was established at the Public Library, through which historical material can be collected, indexed and made available to the public. Also, the collection of the Western Australian Historical Society is being housed at the Public Library.

An Adult Education Library, in existence for the past eleven years, provides for readers in metropolitan and country areas.

(viii) *Tasmania.* Library service in Tasmania has expanded rapidly during the past few years. Under the Libraries Act, 1943, the Tasmanian Library Board was constituted, and the State Library of Tasmania was established on 1st January, 1944. The Board, in

addition to administering the State Library head-quarters in Hobart, is responsible for the extension of library services throughout the State and for the control of State aid. Municipalities adopting the Act spend the proceeds of local rates on library premises, salaries and maintenance, and books for permanent retention. State aid is provided in the form of books of a value equal to the amount collected in rates, which are exchanged at intervals. In Launceston State aid is given in cash. The Launceston City Council now contributes approximately £2,100 per annum, and a like amount is received in State aid. Since the library became free under the Act, membership has increased from 1,000 to over 13,000, and the newly established children's library now has about 3,400 borrowers.

Of the 49 municipalities in the State, 33 have adopted the Act and six libraries have been established with the support of the Hydro-Electric Commission. This means that municipalities representing 80 per cent. of the population now have free libraries. Expenditure on library service has risen to 2s. 4d. per head of the population.

The State Library provides lending and reference services for the people of Hobart and operates a reference service for people throughout the State. It conducts regular showings of documentary films, and has assumed responsibility for the extension of these programmes in the State. As a result of a recent gift from the British Council, the library has a collection of musical recordings and scores which are available for loan to the public. The Library also arranges on its own behalf, or in association with other bodies, winter recitals of recorded music, summer schools, lectures, library weeks in country centres, puppetry demonstrations, etc.

The Parliamentary Library works in close collaboration with the State Library, which provides a reference officer to serve members during session, and undertakes to catalogue all new books added to the library as well as supplying recreational reading. Mr. K. Binns, former Librarian of the Commonwealth National Library, inspected the Library in June, 1948, and has presented a comprehensive report to Parliament.

3. University Libraries.—The libraries of the Australian Universities perform two important functions in Australian life and development; they provide material not only for the education of graduates and undergraduates, but for scholars, research workers and practical investigators all over the continent, since no genuine student is refused access to them. Much of the material they contain is not available elsewhere, for although in most cases smaller, they are in many directions more highly specialized than the public libraries, whose resources they are thus able to supplement. They lend to one another and to State and private institutions as well as to individual investigators, and they both lend to and borrow from the public and scientific libraries. Each of them is governed by a librarian, who is responsible as a rule to an executive sub-committee and a committee which is practically co-extensive with the professional staff. In size the Library of the University of Sydney is the third in Australia, and the Libraries of the Universities of Adelaide and Melbourne are respectively seventh and eighth. The following table shows the sizes and rates of growth and expenditure of the Australian university libraries; it is impossible to give borrowing statistics, as they differ too widely to be comparable without much explanation.

UNIVERSITY LIBRARIES, 1948.

University.	Volumes.	Accessions during year.	Expenditure.
	No.	No.	£
Sydney	305,340	6,367	17,045
Melbourne	149,283	4,805	14,713
Queensland	95,000	4,558	7,886
Adelaide	154,800	4,000	9,914
Western Australia	85,030	4,641	5,530
Tasmania	67,896	3,637	6,587
New England University College	10,407	1,361	2,405
Canberra University College	5,587	764	1,193

The first books were bought for the Library of the University of Sydney as early as 1851; only since 1910, however, has it possessed a building of its own. It is named after its principal benefactor, Thomas Fisher, who bequeathed to it in 1885 the sum of £30,000. It contains an up-to-date bookstack of glass and steel and a fine reading room in which since the beginning of 1941 about 18,000 volumes of the collection have been made available on open access shelves. In addition, members of the teaching staff and certain classes of undergraduates are admitted to the bookstacks; all readers are encouraged to borrow freely. The Library possesses a large number of periodicals, especially scientific, valuable collections of seventeenth-century pamphlets and Elizabethan translations from the classics, and an extensive collection of Australian literature. Besides medical and law branches, there are a number of departmental libraries.

Early in 1854 the Council of the University of Melbourne made its first allocation for books, but the Library was housed in temporary and unsatisfactory quarters for a number of years, and consequently growth was slow and complaints were frequent. In recent years the university authorities have treated the Library generously, and there have been some welcome benefactions, but accommodation is insufficient and a new library building is one of the most pressing needs of the University. The W. L. Baillieu Trust has given £36,000 as the first instalment of a £100,000 gift with which a new library will be built. All the books are accessible on open shelves and though the Library is intended primarily for reference purposes, borrowing, except of text-books and certain valuable volumes, is made as easy as possible. The Library is administered from the centrally situated general library; there is a large medical branch library specially rich in periodicals, and smaller branch libraries are accommodated in some of the science departments.

The Library of the University of Queensland began 34 years ago with £3,000 worth of books, £2,000 having been raised by public subscription and £1,000 granted by the Government. At present it shares a building with a science department. The library contains 95,000 volumes including the numbers in the several departmental libraries.

The Adelaide University Library bears the title of its original benefactor, Robert Barr Smith, who, with members of this family in and after 1892, gave the University about £50,000 for library purposes. Some 20,000 volumes are shelved in the reading room and are available to the ordinary student. Up-to-date steel bookstacks provide accommodation for about 100,000 volumes, and additions now planned will be capable of housing a further 500,000. Borrowing facilities are available to all matriculated students, to country students and to graduates. There are medical and law departmental libraries. The medical library has on permanent loan the collection of the Institute of Medical and Veterinary Science, and also incorporates the library of the British Medical Association (South Australian Branch).

In the University of Western Australia the first permanent library staff was not appointed until 1927. Provision of permanent library accommodation was not possible when the university moved to its present site, and space and facilities have consequently been inadequate. Extensions to the temporary quarters were made in 1946. The whole collection, consisting of about 85,000 volumes, is accessible on open shelves, and there are several departmental libraries. A special feature is the use made of student co-operation.

The Library of the University of Tasmania was founded in 1893, but for many years it comprised little more than a collection of text-books. In 1913 a substantial increase of funds was allotted and important gifts were received. In 1919 it was organized for the first time in accordance with modern library practice. A full-time librarian was appointed for the first time at the end of 1945, and the staff has increased from two to ten. Although accommodation for both books and readers has been more than doubled, space is still an acute problem and plans are being prepared for a new building. The grant from University funds for books and periodicals has been doubled, and an additional special grant is being provided by the Government to fill some of the more serious deficiencies in the collection. The Library is now providing a cataloguing service for the library of the Royal Society of Tasmania.

The New England University College Library was founded in 1938, and bears the name of its first benefactor, Sir William Dixon. At the end of 1948 it contained some 16,500 volumes mainly on open shelves.

The Canberra University College Library was established in 1938. At the end of 1948 it contained 5,587 volumes, which are on open shelves; reference books may be borrowed.

The announcement during 1947 that a National University Library is to be established in Canberra heralds a further expansion in library activity.

4. *Children's Libraries and School Libraries.*—(i) *General.* A survey conducted early in 1946 revealed that only a small percentage of children was being catered for by adequate library service. The effective use made of the few existing children's libraries is proof that the growing interest in this branch of library work will be well rewarded.

During November, 1945, a Children's Book Week was held for the first time in several States, to stimulate interest in children's reading.

(ii) *New South Wales.* Children's libraries are being developed as departments of municipal and shire libraries. Three formerly independent children's libraries at Mosman, Wollongong and Moss Vale are now departments of municipal and shire libraries and have greatly increased budgets.

From 1937-38 school library work has been fostered by the State Library in co-operation with the Education Department. A "Model School Library" was established, and vacation classes for teacher librarians are held. To date these classes have been attended by 495 teachers. Twenty-eight schools are receiving grants of books under the Department of Education School Library Project and since 1945, 97 other schools have been assisted by officers of the School Library Service in purchasing books.

(iii) *Victoria.* Since 1943-44 children's libraries have shared a grant of £500 between them, the number participating in 1945 being 27.

The Education Department has an annual grant which it distributes among approximately 1,000 schools. In addition, the Government subsidizes the purchase of approved books for school libraries on a £1 for £1 basis, with a maximum of £30. During 1947-48 the total government contribution was £8,206. A State Schools' Library Advisory Committee has been set up by the Education Department to advise on all matters pertaining to school libraries, and six teachers underwent a full course of library training during 1947 in order to be able to direct and supervise library service within the Department. A Libraries Service Officer visits schools and group conferences of teachers to advise and assist in matters relating to school libraries.

In several country districts circulating group libraries have been established, financed by school committees and municipal authorities. Boxes of books are despatched to each school in the group, usually at the commencement of the school term. Financed by a bequest by the late William Gillies, a scheme of circulating libraries for schools, particularly remote ones, has been operating for some years. In 1948, 25 groups, each comprising three schools, were operating under this scheme. During 1947-48, £750 was paid in subsidies to these groups.

The Kirby survey of secondary schools, 1945, revealed that only 5 per cent. have satisfactory libraries, and 50 per cent. are without libraries or merely possess collections of books. Most of the larger government and private schools are making an effort to establish better libraries.

(iv) *Queensland.* The purchase of books in State school libraries in Queensland is financed by school committees and parents' associations, with a subsidy from the Department of Public Instruction on a £1 for £1 basis. The subsidy was suspended from 1931 to 1943.

In 1937 a system of Circulating Supplementary Readers was commenced. Books are graded for age levels and are moved from school to school, sufficient copies of each book for a whole class being sent, and reading being done in school. There are 96,000 such books now in use, the distribution at present being confined to primary schools.

(v) *South Australia.* The Children's Library houses 5,000 volumes. Its work lies largely with classes from metropolitan schools which come to study subjects, for simple library instruction, or epidiascope talks. Week-ends and school holidays bring many readers. A lending service has not yet been established. (*See also Country Lending Service*, page 264.)

The government recently recognized the importance of children's reading by appointing an organizer of school libraries.

(vi) *Western Australia.* A travelling library service to country schools has been operated from the Public Library for some years. The Charles Hadley Library since 1938 has also provided boxes of books to one- and two-teacher schools. Financed by commission for the teachers' services by the Commonwealth Bank, together with an annual grant of £250 by the Government, some 180 boxes are kept in circulation.

A new departure in 1948 was the establishment of fixed reference libraries in all small schools, for which a government grant of £4,000 was made. For the larger State schools a similar grant on a £1 for £1 subsidy basis has been provided. These grants are to be continued each year.

Children in isolated areas are catered for by books sent out by the State Correspondence Schools Library. The children are kept in touch with the Library by means of radio talks and appropriate leaflets issued from time to time. There is as yet no general scheme to serve children in the metropolitan area.

The Federation of Police and Citizens Boys' Clubs of Western Australia aims at establishing a system of circulating boxes of books at an estimated cost of £10,000 of which £2,000 has already been received; 2,400 books have been purchased and are in circulation to 32 centres, and there is a sum of £500 in hand.

The Western Australian Children's Book Council was formed in 1947 to sponsor Book Week and to interest people in juvenile books. The scope of its activities was widened to include also assistance in establishing children's libraries in the State.

(vii) *Tasmania.* Early in 1945 an appeal fund was opened for the establishment of Lady Clark Memorial Children's Libraries. The fund closed on 30th June, 1947, with an approximate total of £17,000. With its head-quarters at the State Library, in Hobart, it aims to serve all children in Tasmania with books. It works through the municipal authorities: at 30th June, 1948, children's libraries had been established in 27 municipalities, including Hobart, and four special Hydro-electric districts, children's books being provided on a population basis.

Practically all State secondary schools in Tasmania have libraries, with full-time librarians in four of them, and part-time librarians in the others. The Friends' School, Hobart, has a good library with a full-time trained librarian in charge. This library and that of the Hobart High School are among the foremost of their kind in Australia.

A Schools' Library Service assists with loans of curriculum books, 30 at a time, and provides advice and guidance in the use of books. The majority of primary schools have libraries; most area schools, in particular, have good ones.

The Education Department sends, each year, selected students or teachers to the Library School in Sydney.

5. Industrial Libraries. Before the war industrial libraries were practically unknown in Australia, but during recent years many manufacturing firms have found it necessary to establish libraries to keep their scientific staffs informed of the latest technical advances. At present there are seventeen libraries staffed by trained librarians attached to commercial organizations in Sydney, and 38 libraries in government and semi-government departments and scientific institutions. There are some 30 industrial libraries in Victoria, and several in other States.

6. Microfilms. Several libraries in Australia have adopted the practice of providing microfilm or photostat copies of material required for borrowing. In addition to the great convenience of this method of borrowing, it has the advantage of lessening the possibility of the loss or deterioration of valuable library material. A small charge is usually made for the service. The following is a list of libraries which undertake this service. The letter "P" signifies photostat supplied and "M" microfilm supplied:—
Australian Capital Territory—Australian War Memorial (P). Commonwealth National

Library (PM); New South Wales—Metropolitan Water Sewerage and Drainage Board (P), Public Library of New South Wales (M), Standards Association of Australia (P), School of Public Health and Tropical Medicine (M), Fisher Library, University of Sydney (PM); Victoria—Commonwealth Serum Laboratories (P), Technical Information Section, Munitions Supply Laboratories (PM), Public Library of Victoria (M), Standards Association of Australia (Melbourne Branch) (P), University of Melbourne (PM); Queensland—Public Library (P), Parliamentary Library (P), Queensland University (P); South Australia—Public Library of South Australia (PM), University of Adelaide (PM), Waite Agricultural Research Institute (P); and Tasmania—University of Tasmania (PM.)

§ 13. Public Museums.

The Australian Museum in Sydney, founded in 1836, is the oldest institution of its kind in Australia. In addition to possessing fine collections of the usual objects to be met with in kindred institutions, the Museum contains a very valuable and complete set of specimens of Australian fauna. The cost of construction of the building to 30th June, 1948, was £86,560. The number of visitors to the institution during 1947-48 was 197,807, and the average attendance on week-days 434, and on Sundays 1,187. The expenditure for 1947-48 amounted to £25,330. A valuable library containing 32,404 volumes is attached to the Museum. Courses of evening popular lectures are delivered and lecturers also visit distant suburbs and country districts, while afternoon lectures for school children are provided. Nature talks are also broadcast by radio. Representative collections illustrative of the natural wealth of the country are to be found in the Agricultural and Forestry Museum and the Mining and Geological Museum. The latter institution prepares collections of specimens to be used as teaching aids to country schools. The "Nicholson" Museum of Antiquities, the "Macleay" Museum of Natural History, and the Museum of Normal and Morbid Anatomy, connected with the University, and the National Herbarium and Botanical Museum, at the Sydney Botanic Gardens, are all accessible to the public. There is a Museum of Technology and Applied Science in Sydney with branches in six country centres. Valuable research work is being performed by the scientific staff in connexion with oil and other products of the eucalyptus, and the gums, kinos, tanning materials, and other economic products of native vegetation generally.

The National Museum at Melbourne, devoted to natural history, geology, and ethnology, is located in the eastern section of the Public Library Building. The National Art Gallery is situated in the same building. The Museum of Applied Science also housed under the same roof, contained at 30th June, 1948, 22,870 exhibits which cover applied and economic aspects of all branches of science. There is a fine Museum of Botany and Plant Products in the Melbourne Botanic Gardens. In addition to the large collection in the geological museum attached to the Mines Department in Melbourne, well-equipped museums of mining and geological specimens are established in connexion with the Schools of Mines in the chief mining districts.

The Queensland Museum founded in 1855 comprises exhibited and reference collections of zoology, geology and ethnology. It is entirely maintained by the State Government and cost of the building was £29,673. The collections are principally but not exclusively, Australian; there is, for example, the excellent series of ethnological material formed by Sir William McGregor in New Guinea. The publication is *Memoirs of the Queensland Museum* which was preceded by the *Annals of the Queensland Museum*. The library is extensive and valuable, and of great assistance to research workers in the State.

The Queensland Geological Survey Museum has branches in Townsville, opened in 1886, and in Brisbane, opened in 1892.

Under the Public Library Act of 1884 the South Australian Institute ceased to exist, and the books contained therein were divided amongst the Museum, Public Library, Art Gallery and the Adelaide Circulating Library. The South Australian Museum has considerable collections of most branches of natural history and was attended by 110,000 visitors in 1947-48. Cost of construction of the Museum building was returned as £65,000. In 1947-48 expenditure was £14,015.

The latest available returns show that the Western Australian Museum and Art Gallery contains altogether 177,000 specimens, of an estimated value of £100,000. The Museum, Art Gallery, and Library are housed in one building, and the visitors to the combined institutions during the year reached 64,000. At the 30th June, 1948, the structure was valued at £65,500.

There are two museums in Tasmania—the Tasmanian Museum at Hobart, and the Victoria Museum and Art Gallery at Launceston—both of which contain valuable collections of botanical, mineral, and miscellaneous products. The Museums received aid from the Government during 1947 to the extent of £8,156. The cost of construction in each case is included in that of Art Galleries given below.

§ 14. Public Art Galleries.

The National Art Gallery of New South Wales originated in the Academy of Art founded in 1871. Cost of construction of the present building amounted to about £96,000. At the end of 1947 its contents, which are valued at £239,000, comprised 1,001 oil paintings, 633 water colours, 1,713 black and white, 228 statuary and bronzes, and 1,050 ceramics, works in metal and miscellaneous. During the year the average attendance on week-days was 395, and on Sundays 1,232. Since the year 1895 loan collections of pictures have been regularly forwarded for exhibition in important country towns.

The National Gallery at Melbourne at 30th June, 1948 contained 2,120 oil paintings, 7,746 objects of statuary, bronzes, ceramics, etc., and 21,671 water colour drawings, engravings, and photographs. The Gallery is situated in the same building as the Museum and Public Library, the total cost of construction being £439,000. Cost of purchases during 1947-48 was £70,612 and the total to that date amounted to £692,812. Several munificent bequests have been made to the institution. That of Mr. Alfred Felton, given in 1904, amounts to about £8,000 per annum. In 1913, Mr. John Connell presented his collection of art furniture, silver, pictures, etc., the whole being valued at £10,000. There are provincial art galleries at Ballarat, Bendigo, Geelong, Castlemaine and Warrnambool and periodically pictures are sent on loan from the National Gallery.

The Queensland National Art Gallery, situated in the Executive Buildings, Brisbane, was founded in 1895, and contains a small, but well chosen collection of pictures. At the end of 1947 there were on view 253 oil paintings, 121 water colours, 235 black and white, and 43 pieces of statuary, together with various prints, mosaics, and miniatures. Exclusive of exhibits on loan, the contents are valued at about £24,500. Visitors during the year averaged 925 on Sundays and 214 on week-days.

The Art Gallery at Adelaide dates from 1880, when the Government expended £2,000 in the purchase of pictures, which were exhibited in the Public Library Building in 1882. The liberality of private citizens caused the gallery rapidly to outgrow the accommodation provided for it in 1880 at the Exhibition Building, and on the receipt of a bequest of £25,000 from the late Sir Thomas Elder, the Government erected the present building which was opened in April, 1900. The Gallery also received bequests of £16,500 in 1903 from the estate of Dr. Morgan Thomas, and valuable prints and £3,000 in 1907 from Mr. David Murray. In 1935 Mr. Alex Melrose gave £10,000 for the extension of the building. At the 30th June, 1948, there were in the Gallery 1,379 paintings in oil and water colour, 462 drawings and black and white, and 66 items of statuary, the contents being valued at £84,300. The cost of construction of the Art Gallery amounted to £48,000.

The foundation stone of the present Art Gallery at Perth in Western Australia was laid in 1901, and the Public Library, Museum, and Art Gallery are all situated in the one structure. The collection comprises 202 oil paintings, 104 water colours, 385 black and white, 276 statuary, and 1,200 ceramic and other art objects, the whole being valued at £31,000. Cost of construction of the buildings amounted to £10,000.

In Tasmania, the Art Gallery at Hobart was opened in 1887. At December, 1947, the contents consisted of 82 oil paintings, 46 water colours, 6 black and white, 3 statuary, and 12 etchings, engravings, etc. The cost of construction of the building was £4,500.

The Art Gallery at Launceston was erected in 1888 at a cost of £6,000, and opened on the 2nd April, 1891. Only a small proportion of the contents belongs to the gallery, the bulk of the pictures being obtained on loan. At December, 1947 there were on view 42 oil paintings, 35 water colours, 8 black and white, 8 statuary and 47 engravings and miscellaneous exhibits.

§ 15. Scientific Societies.

1. **Royal Societies.**—In previous issues of the Official Year Book an outline was given of the origin and progress of the Royal Society in each State (*see* No. 22, pp. 454–5). The accompanying table contains the latest available statistical information regarding these institutions, the head-quarters of which are in the capital cities.

ROYAL SOCIETIES : PARTICULARS, 1948.(a)

Particulars.	Sydney.	Melbourne.	Brisbane.	Adelaide.	Perth.	Hobart.
Year of foundation ..	1866	1854	1884	1834	1913	1843
Number of members ..	354	244	238	160	212	395
Vols. of transactions issued ..	81	92	59	72	33	82
Number of books in library	40,393	18,500	4,000	10,000	6,500	23,518
Societies on exchange list ..	466	350	240	200	100	297
Income .. £	2,028	713	365	761	468	723
Expenditure .. £	1,800	700	340	766	350	707

(a) The Royal Society of Australia, with head-quarters at Canberra, was founded on 25th July, 1930, and received permission to use its title on 14th January, 1931. The members numbered 55 in 1948. Income and expenditure for the year amounted to £36 and £13 respectively.

2. **The Australian and New Zealand Association for the Advancement of Science.**—This Association was founded in 1887. Its head-quarters are at Science House, Gloucester-street, Sydney, and meetings are usually held biennially within the various States and in the Dominion of New Zealand. The last meeting was held in Hobart in January, 1949.

3. **Other Scientific Societies.**—The Linnean Society of New South Wales, with head-quarters in Sydney, was founded in 1874. The soundness of its present position is due to the benefactions of Sir William Macleay, who during his lifetime and by his will endowed the society to the amount of £67,000, which has been increased by judicious investment to approximately £100,000. The Society maintains a research bacteriologist and offers annually, to graduates of the University of Sydney, four research fellowships in various branches of natural history. Four fellowships were awarded in 1949. The library comprises some 18,000 volumes, valued at about £9,000. Seventy-three volumes of proceedings have been issued, and the Society exchanges with about 250 kindred institutions and Universities throughout the world. The membership at the end of 1948 was 220.

The British Astronomical Society has a branch in Sydney, and in each of the States the British Medical Association has a branch.

In addition to the societies enumerated above, there are various others in each State devoted to branches of scientific investigation.

§ 16. State Expenditure on Education, Science and Art.

The expenditure in each State on education, science and art during the years 1946-47 and 1947-48 is shown in the following table. Owing to the details not being available in all States, the figures exclude officers' pensions and superannuation, pay-roll tax, and interest and sinking fund on capital expended on buildings. The cost of the medical inspection of school children is also excluded, as this service is more appropriately classified under Public Health, etc. :—

STATE EXPENDITURE ON EDUCATION, SCIENCE AND ART.

(£)

State.	Expenditure from—				Receipts.	Net Expenditure.
	Revenue.	Loan.	Other Funds.	Total.		
1946-47.						
New South Wales	8,768,883	284,539	..	9,053,422	287,980	8,765,442
Victoria.. ..	5,230,389	591,686	5,369	5,827,444	(a) 81,745	5,745,699
Queensland ..	2,816,679	206,198	13,616	3,036,493	49,607	2,986,886
South Australia ..	1,828,457	122,597	..	1,951,054	54,221	1,896,833
Western Australia	1,388,061	88,551	21,000	1,498,513	97,000	1,400,819
Tasmania ..	797,916	81,513	..	879,429	6,476	872,953
Total ..	20,831,285	1,375,085	39,985	22,246,355	577,723	21,668,632
1947-48.

Victoria.. ..	6,226,272	592,359	6,002	6,824,722	(a) 196,994	6,627,729
Queensland ..	3,151,480	238,734	56,538	3,446,761	62,428	3,384,333
South Australia ..	2,154,713	276,755	..	2,431,468	135,625	2,295,843
Western Australia	1,815,320	146,034	72,199	2,063,553	126,707	1,936,846
Tasmania ..	940,172	100,038	..	1,040,210	3,722	1,036,488
Total ..	24,148,273	1,909,571	134,829	26,192,673	1,034,250	25,158,423

(a) In addition, fees in respect of technical education amounting to £177,626 in 1946-47 and £181,217 in 1947-48 were received and spent by the School Councils.

CHAPTER VII.

PUBLIC JUSTICE.

§ 1. Lower (Magistrates') Courts.

1. **General.**—In considering the criminal returns of the various States, due allowance must be made for certain factors, such as the relative powers of the higher and lower courts. In the case of lower courts, the actual number of laws in each State whose breach renders a person liable to fine or imprisonment must be taken into account. Again, the attitude of the magistracy and police towards certain classes of offences is a factor, for in the case of liquor laws or laws connected with vagrancy or gaming, the views of the magistrates, and instructions issued to the police, may be responsible for considerable variations in the numbers. The strength and distribution of the police forces, and the age-constitution and distribution of the population of the States, also influence the results. Due weight should be given also to the prevalence of undetected crime, but information on this point is not available for all States. It may be mentioned that each State has its own separate judicial system, the Commonwealth jurisdiction being confined to the High Court of Australia (largely a Court of Appeal intermediate to the Privy Council although it has also original jurisdiction), the Commonwealth Court of Conciliation and Arbitration and the Federal Court of Bankruptcy. Full particulars regarding the judicial power of the Commonwealth will be found in Chapter III. of the Commonwealth Constitution which appears on page 18 of this issue.

2. **Powers of the Magistrates.**—(i) *New South Wales.* There is no general limit to the powers of the magistrates in regard to offences punished summarily, their authority depending in each case on the statute which creates the offence and gives them jurisdiction. Except in the case of a very few statutes, and excluding cumulative sentences, the power of sentence is limited to six months. Imprisonment in default of fine is regulated by a scale limiting the maximum period according to the sum ordered to be paid, but in no case exceeding twelve months. Actions for debt and damage within certain limits also come within magisterial jurisdiction. In cases of debt, liquidated or unliquidated and damage, the amount recoverable is not exceeding £50 before a court constituted by a stipendiary magistrate at certain authorized places, and not exceeding £30 at any other place before a court constituted by a stipendiary magistrate or two or more justices of the peace. The amount in actions of damage before two or more Justices of the Peace is limited to £10, but may extend to £30 by consent of defendant. Outside the Metropolitan Area of Sydney and certain other prescribed districts one justice of the peace may hear cases of debt, liquidated or unliquidated, or damage up to £5 and to £30 by consent of parties.

(ii) *Victoria.*—The civil jurisdiction of magistrates is restricted to what may be designated ordinary debts, damages for assault, restitution of goods, etc., where the amount in dispute does not exceed £50, and to actions arising out of torts or contracts. No definite limit is fixed to the powers of the magistrates on the criminal side, and for some offences sentences up to two years may be imposed. The proportion of long sentences is, however, comparatively small.

(iii) *Queensland.* Generally speaking, the maximum term of imprisonment which justices can inflict is six months, but in certain exceptional cases such as offences against sections 233, 344, and 445 of the Criminal Code (betting houses, aggravated assaults, and illegally using animals) sentences of twelve months may be imposed.

There is provision for applying cumulative sentences, but in practice, in general, not more than one sentence is made cumulative on a previous sentence.

Magistrates have no power to deal with habitual offenders, but there are such powers vested in the Supreme Court.

(iv) *South Australia.* In South Australia the power of special magistrates to impose fine and imprisonment is defined by the special act creating the offence and conferring jurisdiction. In the case of common law misdemeanours triable summarily, a maximum penalty of £100 fine or 2 years' imprisonment is fixed by the Justices Act 1921-1947. Magistrates also have power to hear certain civil actions in which the amount claimed is less than £750.

(v) *Western Australia.* The powers of magistrates and justices in regard to offences triable summarily are governed by the act creating the offence and giving them jurisdiction. Imprisonment in default of payment of a fine is regulated by a scale limiting the period according to the amount of the fine but not to exceed six months.

The civil jurisdiction of magistrates and courts is restricted in general to £250 but disputed actions, the subject matter of which exceeds £100, must be tried by a judge. By consent of the parties, any action that might be brought in the Supreme Court may be dealt with in a Local Court. Justices may act in the case of illness or absence of the magistrate.

Magistrates are coroners and justices may be appointed as acting coroners.

Magistrates have appellate jurisdiction under some statutes and in country districts act as Chairman of the Courts of Session. They may be appointed as Commissioners of the Supreme Court.

On the goldfields, the magistrate is also the warden.

(vi) *Tasmania.* Magistrates may hear and determine in Courts of Petty Sessions all offences other than those punishable on indictment. Stealing and analogous crimes where the property involved does not exceed £10 in value may be dealt with by magistrates unless the defendant objects.

No general limit is fixed in respect of sentences, the statute creating the offence almost invariably laying down the penalty. Where this is not the case, the Contravention of Statutes Act 1889, provides that a fine of £50 may be imposed. Generally speaking, sentences which justices can inflict are limited to six months, although in several cases sentences of up to two years may be imposed. The aggregate term of cumulative sentences cannot exceed two years.

The civil jurisdiction of magistrates is divided into two categories. A Commissioner of the Court of Requests, who must be a legal practitioner, and is invariably a police magistrate, may hear actions for the recovery of debts and damages not exceeding £100. The jurisdiction of these courts may be increased by proclamation to £250, and this has been done in five instances. Courts of General Sessions, constituted by at least two justices, exercise similar powers, but the jurisdiction cannot exceed £50. Only one court has the maximum jurisdiction, the other being limited to £30.

3. *Cases Tried at Magistrates' Courts.*—The total number of arrest and summons cases tried at Magistrates' Courts in each State is given below for 1939 and for the years 1944 to 1948:—

CASES TRIED AT MAGISTRATES' COURTS.

State or Territory.	1939.	1944.	1945.	1946.	1947.	1948.
New South Wales ..	144,848	126,501	141,079	173,311	180,835	198,456
Victoria ..	82,858	64,889	60,741	64,487	73,990	76,516
Queensland(a) ..	32,501	24,040	27,838	33,096	34,664	36,149
South Australia ..	22,776	(a)22,646	(a)22,837	(a)27,067	(a)27,005	(a)25,376
Western Australia ..	24,111	21,682	19,716	24,831	22,893	26,257
Tasmania ..	9,498	6,318	6,422	9,390	9,024	9,060
Northern Territory(a)	1,494	244	349	786	1,102	1,598
Aust. Cap. Territory..	284	409	354	633	893	777
Total ..	318,370	266,729	279,339	333,601	350,406	374,189

(a) Year ended 30th June following.

Investigation of the returns shows that considerable variations in the figures for single States are occasioned by breaches of new Acts, or the more stringent enforcement of the provisions of existing Acts. Any deductions drawn from the total returns as to the increase or decrease of criminality should, therefore, be based upon a careful analysis of the detailed list of offences.

4. **Convictions at Magistrates' Courts.**—The figures given in the previous table include, of course, a number of people who were charged without sufficient reasons, and, statistically, are not of general importance. A classification of convictions of persons who appeared before the lower courts in each State during 1947 and 1948 is given in the following table :—

CONVICTIONS AT MAGISTRATES' COURTS.

Class of Offence.	N.S.W.	Vic.	Qld.(a)	S.A.(a)	W.A.	Tas.	N.T.(a)	A.C.T.	Aust.
1947.									
Against the Person ..	2,668	944	320	309	298	149	25	16	4,729
Against Property ..	11,731	4,071	1,921	1,268	2,143	769	68	123	22,094
Forgery and Offences against the Currency..	227	13	..	2	..	19	6	..	267
Against Good Order ..	90,007	21,050	19,541	6,914	5,696	1,145	608	530	145,491
Other Miscellaneous ..	60,839	40,008	9,533	15,671	12,958	5,230	351	60	144,650
Total ..	165,472	66,086	31,315	24,164	21,095	7,312	1,058	729	317,231

1948.									
Against the Person ..	2,777	898	350	248	308	175	62	41	4,859
Against Property ..	10,427	4,066	2,084	1,188	2,266	629	129	87	20,876
Forgery and Offences against the Currency..	104	4	4	1	1	1	117
Against Good Order ..	105,606	22,747	23,007	7,276	6,048	1,227	1,122	559	167,592
Other Miscellaneous ..	64,453	40,532	8,028	14,118	15,734	5,669	200	26	148,760
Total ..	183,367	68,243	33,469	22,834	24,360	7,701	1,516	714	342,204

(a) Year ended 30th June following.

The following table shows the number of convictions in 1939 and in each year from 1944 to 1948 :—

CONVICTIONS AT MAGISTRATES' COURTS.

State or Territory.	1939.	1944.	1945.	1946.	1947.	1948.
New South Wales ..	126,353	111,008	125,982	157,108	165,472	183,367
Victoria ..	72,186	56,939	53,101	56,628	66,086	68,243
Queensland(a) ..	28,920	20,926	25,417	30,623	31,315	33,469
South Australia ..	20,429	(a)20,554	(a)20,585	(a)24,491	(a)24,164	(a)22,834
Western Australia ..	22,539	20,302	18,263	23,042	21,095	24,360
Tasmania ..	8,722	5,229	5,048	7,529	7,312	7,701
Northern Territory(a)	1,394	194	244	738	1,058	1,516
Aust. Cap. Territory..	260	286	308	440	729	714
Total ..	280,803	235,438	248,948	300,599	317,231	342,204

(a) Year ended 30th June following.

5. *Convictions for Serious Crime at Magistrates' Courts.*—(i) *General.* While the figures given in the preceding table refer to the entire body of convictions, the fact must not be overlooked that they include a large proportion of offences of a technical nature, many of them unwittingly committed, against various Acts of Parliament. Cases of drunkenness and minor breaches of good order, which, if they can be said to come within the category of crime at all, at least do so in a very different sense from some other offences, also help to swell the list. The following table has therefore been prepared for the purpose of showing the convictions at magistrates' courts for what may be regarded as the more serious offences, i.e., against the person and property, either separately or conjointly, and forgery and offences against the currency. Owing to the smallness of the population, the rates for the Northern and the Australian Capital Territories are subject to considerable variation.

(ii) *Number and Rates, Years 1939, 1944 to 1948.* The following table shows the number and rates of convictions for serious crime at magistrates' courts for the years 1939, 1944 to 1948 :—

CONVICTIONS FOR SERIOUS CRIME AT MAGISTRATES' COURTS.

State or Territory.	1939.	1944.	1945.	1946.	1947.	1948.

(a) Year ended 30th June following.

(iii) *Rate of Convictions, 1881 to 1948.* Statistics of convictions reveal a consistent increase in the rate of serious crime from 1925 to 1931, when 37.1 convictions per 10,000 of the population were recorded. Following this comparatively high figure the rate declined to 32.4 in 1933 but increased considerably to 36.9 in 1939. In 1941 the rate declined to 33.6 but rose in the next two years to 43.2, the highest recorded since 1891,

when the average number of convictions was 44.8. The rate declined in 1944 to 40.7, in 1947 to 35.7 and in 1948 to 33.4. The rate of convictions over a series of years is shown below; only the more serious offences particularized in the preceding sub-section have been taken into consideration.

RATE OF CONVICTIONS FOR SERIOUS CRIME AT MAGISTRATES' COURTS :
AUSTRALIA.

Year	1881.	1891.	1901.	1911.	1921.	1931.	1941.	1948.
Convictions per 10,000 persons	69.3	44.8	29.1	24.6	29.2	37.1	33.6	33.4

6. *Committals to Superior Courts.*—(i) *General.* In a previous paragraph it has been pointed out that comparisons of criminality based on a consideration of the total returns from magistrates' courts are somewhat inadequate, inasmuch as the figures include numbers of cases which are merely technical breaches of laws having in some instances a purely local significance. The committals to higher courts give a better basis of comparison, although even in this connexion allowances must be made for the want of uniformity in jurisdiction. A classification of the offences for which persons appearing in the lower courts were committed to higher courts in each State and Territory for the years 1947 and 1948 is shown in the following tables :—

COMMITTALS TO SUPERIOR COURTS.

Class of Offence.	N.S.W.	Vic.	Qld.(a)	S.A.(a)	W.A.	Tas.	N.T.(a)	A.C.T.	Aust

Total	7.1	7.0	7.7	8.2	8.0	7.8

(a) Year ended 30th June following.

(ii) *Rate of Committals since 1881.* With occasional variations the rate of committals for serious crime has remained fairly stable during recent years, and, if the comparison be carried back further, the movement in the rate has undergone very little change during the present century. The rate at intervals since 1881 is as follows :—

RATE OF COMMITTALS TO SUPERIOR COURTS : AUSTRALIA.

Year	1881.	1891.	1901.	1911.	1921.	1931.	1941.	1948.
Committals per 10,000 persons	12	11	8	6	7	8	5	8

7. **Drunkenness.**—(i) *Cases and Convictions.* The number of arrest and summons cases of drunkenness and the convictions recorded during the year 1939 and for the years 1945 to 1948 are given in the following table :—

DRUNKENNESS : CASES AND CONVICTIONS.

State or Territory.	1939.		1945.		1946.		1947.		1948.

(a) Year ended 30th June following.

Under the heading "drunkenness" are included cases of ordinary drunkenness, drunkenness and disorderliness, and habitual drunkenness.

The number of convictions is, as might naturally be expected, almost identical with the number of cases.

(ii) *Convictions per 10,000 of Population.* The convictions for drunkenness per 10,000 of the mean population during 1939 and each of the years from 1944 to 1948 are given in the following table :—

CONVICTIONS FOR DRUNKENNESS PER 10,000 OF THE MEAN POPULATION.

State or Territory.	1939.	1944.	1945.	1946.	1947.	1948.
New South Wales ..	117.8	119.8	149.3	210.9	225.5	272.7
Victoria ..	60.8	62.3	52.0	57.3	72.3	78.5
Queensland (a) ..	108.9	69.3	107.2	146.2	155.1	186.2
South Australia ..	43.5	(a) 63.0	55.6	(a) 67.1	(a) 75.2	(a) 82.1
Western Australia ..	56.6	85.6	82.9	82.2	84.5	84.8
Tasmania ..	17.0	11.9	9.0	17.8	16.9	18.9
Australian Capital Territory	91.2	43.7	24.7	85.6	165.1	227.8
Total ..	88.0	85.9	99.4	132.1	144.4	170.4

(a) Year ended 30th June following.

In the twenties the convictions for drunkenness averaged approximately 100 per 10,000 of mean population, but the rate fell away considerably during the following years and was only 57.1 in 1931. With the improvement in the social condition of the people following that year, the average rose steadily to 84.1 in 1936. The annual average for the period 1936 to 1939 was 82.7 as compared with 90.8 for the years 1940 to 1945. Following an appreciable increase in the previous year the convictions per 10,000 rose very steeply in 1946 to 132.1 and increased still further to 144.4 in 1947 and to 170.4 in 1948. Figures for the consumption of beer have followed a somewhat similar course. The average consumption of beer per head, which in the twenties was slightly over eleven gallons, fell to 7.32 gallons in 1931-32. It rose to 10.34 in 1936-37, averaged 11.75 gallons for the years 1936-37 to 1939-40 and increased further to an average of 13.23 for the years 1940-41 to 1945-46. Consumption increased in 1945-46, and appreciably so in 1946-47 to 15.94 gallons. In 1947-48 however, there was a slight decline to 15.33, but this was followed in 1948-49 by a substantial increase to 17.96 gallons.

The convictions for drunkenness taken by themselves are not altogether a satisfactory test of the relative sobriety of the inhabitants of each State, inasmuch as several important factors must be taken into consideration. The age and sex constitution of the people, for example, are by no means identical in all the States. Another factor is the distribution of the population. Arrest or summons for drunkenness obviously is more likely in the regions densely populated than in those sparsely populated. In addition allowance must be made for the attitude of the magistracy, the police and the general public in regard to the offence. Due account also must be taken of the effect of legislation dealing with the limitation of hours during which liquor may be sold in hotels.

(iii) *Consumption of Intoxicants.* The following table shows the consumption of spirits, wine and beer per head of the mean population in Australia during the years 1938-39 and 1943-44 to 1948-49 :—

CONSUMPTION OF INTOXICANTS IN AUSTRALIA.
(Imp. Galls.)

				Consumption per Head of Mean Population.		
Year.				Spirits.	Wine.	Beer.
1938-39	0.22	0.65	12.13
1943-44	0.23	1.17	13.00
1944-45	0.23	1.18	12.90
1945-46	0.32	0.96	13.45
1946-47	0.29	1.09	15.94
1947-48	0.31	1.37	15.33
1948-49	0.33	1.41	17.96

(iv) *Treatment of Drunkenness.* (a) *General.* Though the problem of the correct method of dealing with dipsomania is by no means an easy one, it seems fairly clear that the present plan of bringing offenders before magistrates, and subjecting them to the penalty of imprisonment or fine, has little deterrent effect, as the same offenders are constantly reappearing before the courts. During recent years the dangers of moral contamination in this way have been more accurately appreciated, and a system of classification of prisoners has been adopted whereby the petty offender is as far as possible kept from association with those convicted of more serious offences.

(b) *Remedial.* Legislation has been passed in each State providing for the commitment of inebriates to special Government institutions. The laws in the various States are as follows :—New South Wales, Inebriates Act 1912; Victoria, Inebriates Act 1928; Queensland, Inebriate Institutions Act 1896; South Australia, Inebriates Act 1908-1934, Convicted Inebriates Act 1913-1934; Western Australia, Inebriates Act 1912-1919; Tasmania, Inebriates Act 1885, Inebriate Hospitals Act 1892. Curative work was first undertaken by the Government of New South Wales in 1907. In most cases the institutes are connected with the gaols, and, naturally, custodial measures are still a strong feature in their management; nevertheless, the results of remedial measures have been encouraging.

8. *First Offenders.*—In all the States, statutes dealing with first offenders have been in force for many years. Existing legislation is as follows :—New South Wales, Crimes Act 1900 amended in 1924 and 1929, First Offenders (Women) Act 1919; Victoria, Crimes Act 1928; Queensland, Criminal Code Acts 1899 to 1945; South Australia, Offenders Probation Act 1913-1941; Western Australia, Criminal Code Act 1913-1942; Tasmania, Probation of Offenders Act 1934. The method of procedure is practically the same in all cases, i.e., with regard to most first offenders convicted of a minor offence the magistrate or judge is empowered to allow the offender to go free on recognizances being entered into for his good behaviour for a certain period. In practice, this humane law has been found to work excellently, very few of those convicted under it having been found to relapse into crime.

9. *Children's Courts.*—Special courts for the trial of juvenile offenders have been established in New South Wales, Victoria, Queensland, Western Australia and Tasmania, while Children's Courts, although not under that title, are provided for by the Maintenance Act 1926-1941 in South Australia. The object of these courts is to avoid, as far as possible, the unpleasant surroundings of the ordinary police court.

§ 2. Superior Courts (Judges' Courts).

1. Convictions at Superior Courts.—The following table shows for each State and Territory during 1948 and in Australia as a whole in that and the previous year the number of convictions at Superior Courts for each of the principal offences.

CONVICTIONS AT SUPERIOR COURTS, 1948.

Offence.	N.S.W. (a)	Vic.	Qld. (a)	S.A.	W.A.	Tas.	N.T. (a)	A.C.T.	Australia.

Total	3.2	3.3	3.4	3.8	3.7	3.7

(a) Year ended 30th June following.

The rate of convictions per 10,000 of mean population for Australia, which in 1930 stood at 4.0, fell each year thereafter until 1936 when the record low level of 2.3 was reached. It rose during each of the next three years to 3.2 in 1939 and after falling to 2.8 in 1940 rose in each of the next three years reaching 3.5 in 1943. Following a fall to 3.3 in 1944 the rate rose during 1945 and 1946 and stood at 3.7 in 1947 and 1948. Owing to the smallness of the population and the particular conditions prevailing there, the rates for the Territories naturally show considerable variation.

3. **Habitual Offenders.**—An account of the methods adopted in each State in connexion with habitual offenders is given in the following paragraphs.

(i) *New South Wales.* The *Habitual Criminals Act* of 1905 gives judges the power of declaring a prisoner, after a certain number of sentences, to be an habitual criminal, and as such to be detained until, in the opinion of the authorities, he is fit to be at large. At the 30th June, 1949, there were 50 persons in prison under this Act. Since the passing of the Act, 287 offenders, including 2 females, have been declared to be habitual criminals. So far the indeterminate sentence has been applied to the older hardened offender, but under the *Crimes Amendment Act* of 1924, when an accused person has been convicted on more than three occasions before a magistrate, the magistrate may direct an application to be made by the Clerk of the Peace to a Judge, to have the person so convicted declared an habitual offender.

(ii) *Victoria.* The *Indeterminate Sentences Act* came into force in Victoria in July 1908, and up to the end of June, 1948, 5,711 individual prisoners had been detained under its provisions. Of the 4,984 who were released on parole or probation, 2,063 were

reconvicted or returned, 2,582 had completed probation or not offended again, as so far known, and 311 were reporting on parole or probation. The report of the Indeterminate Sentences Board states that, allowing for those who were recommitted as a precautionary measure while in the indeterminate stage, as well as for those who were convicted on some minor charge after many years of freedom, the percentage of successful results approximates 59. It is claimed that this figure compares favorably with that obtained under the Borstal system in England. Section 516 of the Crimes Act 1928 provides that a Court of Petty Sessions consisting of two or more justices, one of whom is a stipendiary magistrate, may direct that a person who has been convicted and sentenced to not less than three months and who has previously been convicted on at least two occasions to certain offences be brought before a higher court to determine whether he shall be sentenced to detention in a reformatory prison during the Governor's pleasure. The higher court determines whether such sentence shall be imposed.

This provision is rarely if ever exercised and committals to reformatory prisons generally are by Supreme Court Judges, Chairmen of General Sessions and Children's Courts Magistrates pursuant to the provisions of 514 and 515 of the Crimes Act and 28 of the Children's Court Acts respectively.

(iii) *Queensland.* Sections 659A to 659I of the Queensland Criminal Code deal with habitual criminals. Only the Supreme Court or a judge thereof may declare a person to be an habitual criminal. An habitual criminal is to be detained in a reformatory prison (Section 659D) and there employed (Section 659F) under the provisions of 659G.

Where the Supreme Court or a judge recommends the discharge of an habitual criminal, the Governor may direct his discharge and may order him so long as he remains in Queensland to report at intervals during any period not exceeding two years.

(iv) *South Australia.* The Criminal Law Consolidation Act 1935-1940, provides that persons convicted of a certain number of indictable offences shall be detained, upon further conviction, during the Governor's pleasure. Proof of previous conviction is always relevant to the question of penalty.

(v) *Western Australia.* Under the Criminal Code Amendment Act of 1918, power is given to sentence prisoners to be detained in a reformatory prison during the Governor's pleasure, where such prisoner is deemed to be an habitual criminal, or in other special circumstances where the Court considers such a sentence is fit.

The number under preventative detention on 30th June, 1948 was 15, and the total number dealt with since the passing of the Act was 109.

(vi) *Tasmania.* Since the Indeterminate Sentences Act came into operation in 1922, 52 persons have been confined under its provisions; at present five are in custody, two being re-committals.

Of the 47 released on probation, 13 have been re-committed, two of them on three occasions.

4. **Capital Punishment.**—There were seven executions in Australia during the period 1939 to 1948. One took place in New South Wales (in 1939), three in Victoria (two in 1939 and one in 1942), two in South Australia (one in 1944 and one in 1946) and one in Tasmania (in 1946).

Under the Criminal Code Amendment Act 1922 capital punishment was abolished in Queensland.

In the early days of the history of Australia the penalty of death was attached to a large number of offences, many of which at the present time would be dealt with in the lower or magistrates' court. With the growth of settlement and the general amelioration in social and moral conditions, the list was, however, considerably curtailed, and the existing tendency is practically to restrict death sentences to cases of murder. It may be stated that in cases of rape, which is a capital offence in some of the Australian States, the penalty has been but sparingly inflicted during the last few years. Juries are reputed to be loth to convict on this charge, owing to the uncertainty whether sentence of death will be carried out.

The average annual number of executions in Australia from 1861 to 1880 was 9; from 1881 to 1900, 6; from 1901 to 1910, 4; from 1911 to 1920, 2; from 1921 to 1930, 2; and from 1931 to 1940, 1.

§ 3. Civil Courts.

1. **Lower Courts.**—The total number of plaints entered and the amounts awarded to plaintiffs during the years 1947 and 1948 are shown in the following table. Particulars for earlier years appear in preceding issues of the Official Year Book.

The figures represent the returns from the Small Debts Courts in New South Wales, Petty Session Courts in Victoria, Magistrates' Courts in Queensland, Local Courts of South Australia and Western Australia, Courts of Requests in Tasmania, Courts of Summary Jurisdiction in Northern Territory and Court of Petty Sessions in the Australian Capital Territory.

2. **Superior Courts.**—The following table shows the transactions on the civil side in the Superior Courts during the years 1947 and 1948. The particulars given below include the number and amount of judgments entered by default or confession, or agreement, and differ from those in issues of the Official Year Book prior to No. 29, which related in most States only to causes actually tried during the year.

The New South Wales returns refer to judgments in the District Courts only, and exclude 1,130 judgments in 1947 and 1,313 judgments in 1948 signed in the Supreme Court, for which the amounts entered are not available.

(a) Excludes South Australia.

4. *Bankruptcies.*—Particulars relating to bankruptcy in each State up to the end of 1927 were incorporated under this heading in issues of the Official Year Book prior to No. 23. Under the terms of the Bankruptcy Act 1924-1948 jurisdiction in bankruptcy and insolvency was taken over by the Commonwealth from 1st August, 1928. The Act made provision for the declaration of districts, and each State (except Queensland and Northern Territory) has been declared a bankruptcy district. The bankruptcy district of New South Wales includes the Australian Capital Territory. Queensland has been divided into three districts corresponding to the three Supreme Court districts in that State. Operations under the Act for the year ended 31st July, 1948 are given in the following table. For the purposes of comparison, the annual averages for periods between the years 1920 and 1948 are appended to the table.

FEDERAL BANKRUPTCY ACT, 1947-48.

It is pointed out that the procedure in certain States has been influenced largely by the procedure in force prior to the passing of the Commonwealth Act, and that, therefore, no particular significance attaches to the large number of compositions, etc., in South Australia and Western Australia.

The Bankruptcy Act 1930 created a Federal Court of Bankruptcy and provided for the appointment of a Judge or two Judges thereto. In 1930 a Commonwealth Judge in Bankruptcy was appointed in addition to the State Judges to deal with bankruptcy work in New South Wales and Victoria, as the Courts in these States were unable to cope with the business. All the bankruptcy cases in these States are now heard in the Federal Court which sits in Sydney and Melbourne alternatively.

5. **High Court of Australia.**—Under the provisions of Section 71 of the Commonwealth Constitution, the judicial power of the Commonwealth is vested in a Supreme Court called the High Court of Australia, and in such other courts as the Parliament creates or invests with federal jurisdiction. The Commonwealth High Court possesses both original and appellate jurisdiction. The powers of the Court are defined in the Commonwealth Constitution, and in the Judiciary Act 1903-1946. The Court consists of a Chief Justice and six other judges. Sittings of the Court are held in the capitals

of the various States as occasion may require. The High Court functions as a Court of Appeal for Australia. The following statement shows the transactions of the High Court for 1947 and 1948.

TRANSACTIONS OF COMMONWEALTH HIGH COURT.

Original Jurisdiction.	1947.	1948.	Appellate Jurisdiction.	1947.	1948.
Number of writs issued	104	92	Number of appeals set down for hearing ..	87	85
Number of causes entered for trial ..	28	13	Number allowed ..	26	29
Verdicts for plaintiffs	21	19	Number dismissed ..	47	44
Verdicts for defendants	14	9	Otherwise disposed of	16	8
Otherwise disposed of ..	4	7			
Amount of judgments	£84,554	£23,689			

During 1947 and 1948 respectively the High Court dealt also with the following: Appeals from Assessments under Taxation Assessment Act, 23, 23; Special cases stated for the opinion of the Full Court, 12, 9; Applications for Prohibitions, etc., 47, 16. The fees collected amounted to £1,171 in 1947 and £1,042 in 1948.

6. Commonwealth Court of Conciliation and Arbitration.—A detailed statement regarding the operation of this Court, which was established under the Commonwealth Conciliation and Arbitration Act 1904-1949 will be found in Chapter XI. "Labour, Wages and Prices", and in the *Labour Report*.

§ 4. Police and Prisons.

1. *General*.—Early issues of the Official Year Book (see No. 4, p. 918) contain a *résumé* of the evolution of the police force in Australia up to the passing of the Police Act 1862 (25 Vic. No. 16) in New South Wales.

2. *Duties of the Police*.—In addition to the ordinary employment attaching to their office, the police are called upon to perform many duties which in other countries are carried out by various functionaries. Thus, in New South Wales, it has been estimated that one-fifth of the time of the force was taken up in extraneous duties not connected with the protection of life and property, while the cash value of the services rendered to other Government departments was stated as over £200,000 per annum. The Queensland Commissioner refers to the circumstance that in 1941-42 no less than 54 important subsidiary offices were held by the police. In South Australia, the Commissioner alludes to the large number of subsidiary duties performed by police officers, and mentions that for the year ended June, 1948, many inquiries were made on behalf of other State and Commonwealth departments.

3. *Strength of Police Force*.—(i) *General*. The strength of the police force in each State during 1939 and the years 1944 to 1948 is given in the following table. It may be mentioned that the police forces (with the exception of the small body of Commonwealth police maintained in the Northern Territory and in the Australian Capital Territory) are entirely under State control, but, by arrangement, the Commonwealth Government utilizes their services in various directions, such as acting as aliens registration officers, and policing the liquid fuel regulations, etc.

STRENGTH OF POLICE FORCES.

State or Territory.	Area of State in Sq. Miles.	No. of Police.					
		1939.	1944.	1945.	1946.	1947.	1948.

Total	2,974,581	9,566	9,373	9,515	9,880	10,368	10,850

(a) 30th June of year following.

The figures for New South Wales for 1948 exclude 19 "black trackers" and one "cadet tracker" (i.e., natives employed in detection of offenders chiefly in outlying districts) and 4 matrons, while the Victorian returns exclude one black tracker. For Queensland the figures exclude 33 black trackers, for South Australia 4 wardresses and 4 black trackers, for Western Australia 33 black trackers and 5 female searchers, and for the Northern Territory 42 black trackers. Women police are employed in all the States, the respective numbers for 1948 included in the table above being:—New South Wales 33, Victoria 14, Queensland 7, South Australia 19, Western Australia 8, Tasmania 4, and Australian Capital Territory 1. Their work is mainly preventive, and the importance and usefulness of their duties have been referred to in very high terms by the Chief Officers of Police. In his report for 1948 the Commissioner of Police in New South Wales refers to the valuable work performed by the women police in connexion with vice and crime, particularly in relation to females and neglected children. They also carry out escort duties in respect of female prisoners. The experience in other States has been of a similar nature.

(ii) *Proportion to Population.* The average number of persons in the various States to each police officer during 1939 and the years 1944 to 1948 is shown in the following table. In considering these figures allowance must, of course, be made for the unequal area and unequal distribution of the population of the various States.

POLICE FORCES IN RELATION TO POPULATION.

State or Territory.	Number of Persons per Sq. Mile, 1947 Census.	Persons to each Police Officer.					
		1939.	1944.	1945.	1946.	1947.	1948.

Total	2.55	733	786	782	763	739	721

(a) 30th June of year following.

4. Prison Accommodation and Prisoners, 1947 and 1948.—The table below shows the number of prisons in each State, the accommodation therein, and the number of prisoners under sentence at the end of 1947 and 1948 :—

PRISON ACCOMMODATION AND PRISONERS.

State or Territory.	Number of Prisons.		Accommodation in—				Prisoners at End of Year.	
			Separate Cells.		Wards.			
	1947.	1948.	1947.	1948.	1947.	1948.	1947.	1948.
New South Wales(a) ..	15	15	2,214	2,242	1,587	1,717
Victoria ..	9	9	1,288	1,288	340	340	915	912
Queensland ..	9	(a) 8	611	(a) 570	141	(a) 109	359	(a) 376
South Australia ..	15	15	673	673	173	173	267	230
Western Australia(a) ..	21	21	556	551	146	61	281	314
Tasmania(a) ..	2	2	154	154	4	1	100	93
Northern Territory(a) ..	2	2	12	12	19	19	32	40
Total ..	73	72	5,508	5,490	823	703	3,541	3,682

(a) Year ended 30th June following.

The figures refer to prisoners under sentence and exclude aborigines. There are no gaols in the Australian Capital Territory, but there is a lock-up consisting of three cells attached to the police station at Canberra and a lock-up at Jervis Bay, where offenders are held while awaiting trial or serving short sentences not exceeding one week imposed by the Magistrate's Court.

5. Prisoners in Gaol, 1939, 1944 to 1948.—The number of prisoners in gaol at 31st December in each of the years 1939 and 1944 to 1948 and the proportion per 10,000 of the population are given in the following table. The figures refer to prisoners under sentence and exclude aborigines and debtors.

PRISONERS IN GAOL.

State or Territory.	1939.	1944.	1945.	1946.	1947.	1948.
NUMBER.						
New South Wales(a) ..	1,357	1,856	1,684	1,847	1,587	1,717
Victoria ..	1,144	1,101	966	952	915	912
Queensland ..	261	473	493	356	359	(a) 376
South Australia ..	199	224	213	250	267	230
Western Australia(a) ..	244	291	279	290	281	314
Tasmania(a) ..	108	87	96	120	100	93
Northern Territory ..	23	22	4	19	(a) 32	(a) 40
Total	3,336	4,057	3,735	3,834	3,541	3,682

PER 10,000 OF THE POPULATION.

New South Wales(a) ..	4.9	6.4	5.7	6.2	5.2	5.5
Victoria ..	6.1	5.5	4.8	4.7	4.4	4.3
Queensland ..	2.6	4.4	4.5	3.2	3.2	(a) 3.3
South Australia ..	3.3	3.6	3.4	3.9	4.1	3.5
Western Australia(a) ..	5.2	6.0	5.7	5.8	5.5	5.9
Tasmania(a) ..	4.5	3.5	3.8	4.7	3.8	3.5
Total	4.8	5.5	5.0	5.1	4.6	4.7

(a) 30th June of year following.

After remaining stationary at 6.5 per 10,000 for the four years ended 1932 the proportion of prisoners in gaol to the total population declined each year to 4.5 in 1937. It fluctuated slightly during the next four years but remained under 5.0. The proportion was 4.9 in 1942 and rose slightly above this rate to 5.5 in 1944 and fell to 5.1 in 1946 and to 4.7 in 1948. This figure compares most favourably with that obtaining in 1891, when the proportion was as high as 16 per 10,000. Rates for the Northern Territory have not been included on account of the prevailing abnormal conditions.

6. Improvement in Prison Methods.—In previous issues of the Official Year Book a fairly detailed account is given of the improvements effected in each State during recent years in regard to methods of prison management (*see* Official Year Book No. 22, pp. 471-4), but this information is not repeated in the present volume.

§ 5. Cost of Administration of Justice.

1. Expenditure by the States.—The table below shows the expenditure from Consolidated Revenue during 1938-39 and 1946-47 and 1947-48 in connexion with the administration of justice in each of the States.

It is difficult to obtain comparable figures of the total costs of the various services under this heading, therefore net costs have been substituted for gross expenditure. It will be noted that in South Australia and Western Australia the receipts for legal fees and registrations exceed the actual expenditure under "Justice".

NET EXPENDITURE ON ADMINISTRATION OF JUSTICE.

State.	Net Expenditure.			Per Head of Mean Population.		
	Justice.	Police.	Prisons.	Justice.	Police.	Prisons.
	£	£	£	s. d.	s. d.	s. d.

Tasmania ..	37,823	173,906	27,705	2 11	13 3	2 1
Total ..	637,532	5,729,463	774,931	1 8	15 1	2 0

2. **Commonwealth Expenditure.**—The expenditure shown in the previous table is that incurred by the State Governments only, and does not include expenditure of the Commonwealth Attorney-General's Department, which is given hereunder for the years 1938-39 and 1943-44 to 1947-48 :—

EXPENDITURE OF THE COMMONWEALTH ATTORNEY-GENERAL'S DEPARTMENT.

(£.)							
Year.					Gross Expenditure.	Receipts.	Net Expenditure.
1938-39	281,497	111,036	170,461
1943-44	386,749	117,128	269,621
1944-45	433,646	140,198	293,448
1945-46	472,604	135,239	337,365
1946-47	569,234	155,419	413,815
1947-48	688,572	178,591	509,981

The totals for each year include expenditure in connexion with patents and copyright which amounted in 1947-48 to £127,862. The Commonwealth took over jurisdiction in bankruptcy in August, 1928, and the expenditure thereon in 1947-48 amounted to £49,200, including the salary of the Commonwealth Judge, £3,500. Expenditure in connexion with the Australian Capital Territory police amounted in 1947-48 to £24,720, and £11,150 was expended on miscellaneous items including the Law Court, Titles Office and Industrial Board. Revenue of the Attorney-General's Department amounted for the year 1947-48 to £178,591, comprising £124,418 for patents, copyright, trademarks and designs, £16,550 for bankruptcy and £37,623 miscellaneous, including fees and fines.

In addition to the foregoing a sum of £38,849 was expended in the Northern Territory during 1946-47 and £51,111 in 1947-48 by the Department of the Interior on the administration of justice, including the costs of the police force and prisons.

CHAPTER VIII.

PUBLIC HEALTH AND RELATED INSTITUTIONS.

A—PUBLIC HEALTH.

§ 1. State Public Health Legislation and Administration.

1. *New South Wales*.—The Department of Public Health comes under the jurisdiction of the Minister for Health, with an Under Secretary as Permanent Head of the Department for administrative purposes.

There is also a Director-General of Public Health and Chief Medical Adviser to the Government, who is ex-officio President of the Board of Health and Chairman of the Nurses' Registration Board. He is assisted by a Deputy Director-General.

The Inspector-General of Mental Hospitals who, under present arrangements, is also the Director-General of Public Health, is responsible for the administration of that part of the Lunacy Act relating to the care and treatment of mental patients. There is also a Deputy Inspector-General.

The following statutory authorities are constituted under Acts administered by the Minister for Health—Board of Health (Public Health Act), Hospitals Commission of N.S.W. (Public Hospitals Act), Milk Board (Milk Act), Metropolitan Meat Industry Commissioner (Meat Industry Act), Dental Board (Dentists Act), Pharmacy Board (Pharmacy Act), Medical Board (Medical Practitioners Act), Board of Optometrical Registration (Opticians Act), Ambulance Transport Service Board (Ambulance Transport Service Act), Physiotherapists Registration Board (Physiotherapists Registration Act) and Nurses' Registration Board (Nurses' Registration Act).

The Department's activities extend over the whole of the State and embrace all matters relating to the public health and the general medical work of the Government. These include the following :—(a) Supervision of the work of local authorities (municipal and shire councils) in relation to public health matters connected with the following Acts :—Public Health Act, Noxious Trades Act, Pure Food Act and Private Hospitals Act; (b) Scientific Divisions (Government Analyst, Microbiological Laboratory, and Division of Industrial Hygiene); (c) Tuberculosis and Social Hygiene Divisions; (d) Medical Officers of Health at Sydney, Broken Hill, Newcastle, Wollongong, Bathurst and Lismore; (e) State Hospitals and Homes and State Sanatoria; (f) Mental Hospitals; (g) Public Hospitals (Hospitals Commission); (h) Maternal and Baby Welfare (Baby Health Centres); (i) School Medical and Dental Services; and (j) Publicity, Nutrition and Library Services.

2. *Victoria*.—Administration of all the provisions of the Health Acts insofar as they can be carried out within the geographical limits of any municipality, is entrusted to the Council of that municipality.

Municipal administration is co-ordinated and supervised by the Commission of Public Health, composed of the Chief Health Officer as chairman, and six members representing the Government and municipalities—cities, towns, boroughs and shires. On this basic structure the manifold activities of a modern Health Department have been built.

The Health Act 1919 and later Amending Acts were consolidated in Health Act 1928 without any essential amendments bearing on administration.

The Ministry of Health Act 1943, made the Minister responsible for all Acts administered up to the time by the Department of Health, as well as the Hospitals and Charities Acts and the Mental Hygiene Acts, thus placing under one Ministry the many and diverse operations of State medicine.

The Chief Health Officer administers the Maternal and Child Hygiene Branch, embracing pre-natal hygiene, infant health, pre-school child hygiene, school medical and dental services, and the newly constituted Tuberculosis Branch, which comprises State sanatoria, tuberculosis clinics and tuberculosis bureaux.

Infectious disease control is carried out by the eight District Health Officers and their staffs, in collaboration with the local health authorities where any specific infection is unduly prevalent. Immunization against diphtheria is constantly practised, and largely owing to this work the incidence of the disease has been reduced from 3,254 cases and 93 deaths in 1927 to 400 cases and 13 deaths in 1948. More than half the school children have been immunized in municipal campaigns, in addition to many others who have received treatment from their family doctors.

Most large country towns in Victoria are now sewered and apart from a mild epidemic in a suburb of Melbourne in 1944 typhoid fever has been reduced to a negligible disease.

Sewerage projects, public buildings and hospital construction are the responsibility of the Engineering Division of the Health Department. This Division performs an advisory and supervisory function in municipal undertakings.

The Industrial Hygiene Division supervises the environmental conditions of the 300,000 persons employed in industry in the State and consists of two medical officers, two special scientific officers and four inspectors.

The control and treatment of venereal diseases is undertaken by a special division of the Department, and clinics for prophylaxis and treatment are attached to all hospitals receiving Government aid throughout the State.

Food and drug standards are specified by a committee of specially qualified members. Municipal and departmental officers ensure that these standards are observed.

Acts administered by the Department of Health include—Health Acts, Goods Act, Infectious Diseases Hospital Acts, Masseurs Acts, Midwives Act 1928, Nurses Acts, Venereal Diseases Act 1928, Heatherton Sanatorium Act, Birth Notification Acts, Hairdressers Registration Acts, Anti-Cancer Council Act, Dietitians Registration Act, Mental Hygiene Acts, Mental Deficiency Acts, Hospitals and Charity Acts.

3. **Queensland.**—(i) *General.* The Health Acts 1937 to 1948, are administered by the Director-General of Health and Medical Services, under the direction of the Minister for Health and Home Affairs. The executive staff consists of the Director-General, Deputy Director-General, State Health Officer, and twenty-seven food and sanitary inspectors and cadets. In addition, there is a Laboratory of Microbiology and Pathology under the control of a Director assisted by a medical officer, bacteriologists, and ancillary staff. Among other duties, the staff of this laboratory performs any necessary medico-legal work. A medical officer controls the Enthetic Diseases Section with the assistance of a female medical officer, nurses, and trained attendants, while a microscopist and an inspector have charge of the Hookworm Campaign. A Weil's Disease Campaign with head-quarters in Innisfail, North Queensland, is operating with a staff of five health inspectors.

The following services also come under the purview of the Department:—School Health Services, Maternal and Child Welfare Services, Chemical Laboratory, Mental Hygiene, Industrial Hygiene, and supervision of private hospitals.

The Health Act of the State have made it obligatory for cases of certain diseases to be notified to the Health Department. These diseases are either of an infectious or contagious nature.

Branch offices, in charge of inspectors, are located at Toowoomba, Rockhampton, Mackay, Townsville, Cairns and Thursday Island, which, in conjunction with the Brisbane staff, are responsible for the enforcement of provisions of the Health Acts and Regulations dealing with food and drugs, milk sellers, health (food supply), fish supply, poisons, etc., and are concerned in a supervisory capacity with Local Authority health administration.

(ii) *Immunization*.—A system of immunization of young children is being carried out by Local Authorities as a preventive of diphtheria and whooping cough.

Diphtheria. Diphtheria prophylaxis by means of formalized toxoid has continued to grow in favour, and, in proportion to population, more children have been immunized in Queensland than in any other State in Australia. It has been observed that in a few instances children who have submitted to immunizing measures have later developed diphtheria, but no deaths have occurred in such cases.

Within the Greater Brisbane area, the City Health Authority, in conjunction with the School Health Services, carries out a full programme of diphtheria immunization of school and pre-school children, both at the schools and daily at the City Hall. These measures are exercising a beneficial effect. It is estimated that 88 per cent. of children in Brisbane between the ages of 1 and 14 years have been immunized. Similar campaigns are carried out by many other Local Authorities.

Among the many thousands of children annually immunized against diphtheria in Queensland by the formalized toxoid method, no instance of dangerous symptoms arising therefrom has been reported, and the people of the State are educated to the value of diphtheria immunization. Alum toxoid has not been employed for public immunization in Queensland to any extent.

Whooping Cough.—As a result of the improvement in efficacy of the pertussis or whooping cough vaccine, several Local Authorities have inaugurated a campaign against this disease. The Brisbane City Council has already commenced, and is immunizing children free of charge at four sessions per week, in addition to which its Medical Officer of Health visits institutions for this purpose.

Immunizing agents against diphtheria and whooping cough are provided free to Local Authorities by the Commonwealth Government.

(iii) *Hospitals*. (a) *General*. There is a system of public hospitals throughout the State. The Brisbane General, South Brisbane Auxiliary, the Children's and the Brisbane Women's Hospitals, provide public hospital accommodation for Brisbane. In addition, there are 68 private hospitals registered in the State, 35 per cent. of which are in Brisbane. The Mater Misericordiae has public, intermediate, private, and children's sections, and St. Martin's is a large private hospital. In the whole State, during 1947-48, there were 112 public hospitals, a tuberculosis sanatorium, and seven ambulance brigades, which were administered by 63 District Hospital Boards. Five other hospitals received aid from the Government. There were also 105 public maternity hospitals or sections of the above hospitals.

Public hospitals supply free consultation and treatment, including radiological and pathological service, to out-patients. In-patient treatment in the public wards is also free. In conjunction with public hospitals, nineteen dental clinics (excluding the Brisbane Dental Hospital) and sixteen branch clinics are in operation.

The above-mentioned 68 private hospitals in Queensland, are registered under the provisions of the Health Acts 1937 to 1948 (Division XI.). Licences may be issued under four categories:—(a) A general private hospital for medical, surgical, and maternity cases; (b) A lying-in hospital for maternity cases only; (c) A hospital for mental cases only (other than persons who have been certified as insane pursuant to the *Insanity Acts*); (d) Any hospital for the treatment of mothers and/or infants.

Convalescent homes are not licensed or registrable.

Lepet settlements are situated at Peel Island, in Moreton Bay, and at Fantome Island, near Townsville, each with a full-time medical officer. The former is for white persons only, and the latter for aborigines. In Brisbane there is an Institution for the Blind, and an Institution for the Deaf.

(b) *Public Hospitals*.—The Hospitals Act Amendment Act 1944, provided, as from 1st July, 1945, that all the public hospitals in the State would come within the jurisdiction of District Hospitals Boards. Each board consists of not less than five and not more than nine members, including the chairman. One of the members is a representative elected by the component Local Authorities. The chairman and the remaining members are appointed by the Governor in Council.

The State Government is responsible for the net annual cost of administration and maintenance of all hospitals controlled by Hospital Boards but from 1st January, 1946, the Commonwealth, under the Hospital Benefits Scheme, paid six shillings per patient per day for patients in public and private sections of public hospitals. The State Government agreed not to make any charge for patients in public sections of public hospitals. The Commonwealth subsidy extends to approved private hospitals. The amount was increased to eight shillings per day from 1st July, 1948, for patients in public wards of public hospitals, and from 1st November, 1948, for all other public hospital patients and private hospital patients.

4. **South Australia.**—The Central Board of Health consists of five members, three of whom (including the Chairman, who is a permanent head of the Department) are appointed by the Government, while one each is elected by the metropolitan local boards and all other local boards. The Health Act 1935-1947 provides that every municipal and district council shall be the Local Board of Health for their respective districts. There are 143 of these local boards under the general control and supervision of the Central Board. The Central Board of Health Department administers the following Acts—The Health Act, 1935-1947; The Food and Drugs Act, 1908-1943; The Noxious Trades Act, 1943; The Dangerous Drugs Act, 1934; The Bakehouses Registration Act, 1945-1947; The Venereal Diseases Act, 1947; The Early Notification of Births Act, 1926; and the Vaccination Act, 1936.

The Board is also concerned to some degree with Acts relating to local government, abattoirs and cremation. The Department also conducts the State X-ray Health Survey. There are two full-time medical officers who assist the Chairman in the administration of the various Acts. Four inspectors appointed under the Health and Food and Drugs Act periodically visit the local districts and see generally that the local boards are carrying out their duties. An inspector in company with an analyst visits country districts and purchases samples of milk which are analysed on the spot. A nurse inspector is employed in advising and assisting local boards in connexion with outbreaks of infectious diseases. In outlying districts there are three part-time officers of health and fifteen part-time inspectors directly responsible to the Board.

5. **Western Australia.**—The legislation in this State is the Health Act 1911-1948. This was consolidated and reprinted in 1944 but since that date three separate amendments have been passed. The central authority is the Department of Public Health, controlled by a Commissioner, who must be a qualified medical practitioner. The local authorities comprise (a) Municipalities, and (b) Road Boards.

It is also provided that a Local Board of Health may be set up in lieu of a Road Board. This method of control is no longer used and in fact the whole State is under the local administration of the respective Municipality or Road Board. In case of emergency the Commissioner may exercise all the powers of a Local Health Authority in any part of the State.

Interesting features of recent legislation are as follows :—(a) Act No. 70 of 1948 which gives compulsory power to control sufferers from tuberculosis; and (b) Act No. 71 of 1948, which provides that within areas declared for the purpose, all still-born infants must be submitted for post-mortem examination and provides for compulsory notification of still births to the Commissioner by the attending medical practitioner.

All the usual provisions for public health control are embodied in the Health Act including the medical and dental examination of school children, control of public buildings, inspection of food and the provision of standards thereof. The Nurses Registration Act now makes provision for the registration of nurses in each of the following branches of the nursing profession—general, midwifery, tuberculosis, infant health, mothercraft, mental, and children's.

6. **Tasmania.**—The Department of Public Health is under the jurisdiction of the Minister for Health with an Under Secretary as permanent head of the Department through whom the following medical directors are responsible for the administration of the laws and services &c. indicated :—(a) Director of Public Health, responsible for the administration of the laws relating to public health, food and drugs, places of public entertainment and cremation; and for the following services, &c. :—School Medical

Service, Maternal and Child Welfare, Venereal Disease Clinics, Analytical Laboratory, and Mothercraft Home; (b) Director of Hospital and Medical Services, responsible for the administration of the laws relating to hospitals and nurses' registration, and for the following services, &c. :—Government Medical Service, Bush Nursing Service, Institutions for the Aged and Infirm at St. John's Park and the Home for Invalids; (c) Director of Tuberculosis, responsible for the administration of the laws relating to tuberculosis, and for the management of Chest Clinics, and Sanatoria at New Town and Perth; and (d) Director of Mental Hygiene, responsible for the administration of the laws relating to mental hospitals, and for the management of Lachlan Park Hospital (Hospital for Insane) and Millbrook Psychopathic Home.

§ 2. The National Health and Medical Research Council.

In 1926 the Commonwealth Government established a Federal Health Council, in accordance with a recommendation of the Royal Commission on Health (1925), "for the purpose of securing closer co-operation between Commonwealth and State Health Authorities". This Council held sessions each year except in 1932. In 1936, the Commonwealth Government decided to create a body with wider functions and representation, and the National Health and Medical Research Council was established with the following functions :—

- To advise Commonwealth and State Governments on all matters of public health legislation and administration, on matters concerning the health of the public and on medical research;
- To advise the Commonwealth Government as to the expenditure of money specifically appropriated as money to be spent on the advice of this Council;
- To advise the Commonwealth Government as to the expenditure of money upon medical research and as to projects of medical research generally;
- To advise Commonwealth and State Governments upon the merits of reputed cures or methods of treatment which are from time to time brought forward for recognition.

The Council consists of the Commonwealth Director-General of Health (as Chairman), two officers of his Department, the official head of the Health Department in each State, together with representatives of the Federal Council of the British Medical Association, the Royal Australasian College of Surgeons, the Royal Australasian College of Physicians, the Australian Regional Council of the Royal College of Obstetricians and Gynaecologists, the Australian Dental Association, and (jointly) the four Australian Universities having medical schools. A prominent layman and laywoman, appointed by the Commonwealth Government, also serve on the Council.

The first session of the National Health and Medical Research Council met at Hobart in February, 1937; the twenty-sixth session met at Sydney in November, 1948.

Under the Medical Research Endowment Act 1937, the Commonwealth Government has made an annual appropriation of funds to provide assistance :—

- (a) to Departments of the Commonwealth or of a State engaged in medical research;
- (b) to Universities for the purpose of medical research;
- (c) to institutions and persons engaged in medical research;
- (d) in the training of persons in medical research.

Approved research institutions under this system now number 49. During the year 1948, grants numbered 50 in the following fields :—allergy, bacteriology, biochemistry, bio-physics, clinical, dentistry, epidemiology, neurology, neuro-physiology, nutrition, obstetrics, ophthalmology, physiology and pharmacology, and tuberculosis and virus diseases. In certain instances, equipment and apparatus have been made available by the Council; this has greatly facilitated some specialized lines of research. The wide scope of work being carried out is greatly assisted by the formation of committees which meet regularly and advise the Council in such subjects as—industrial hygiene, maternal and child welfare, nutrition, radio-active isotopes, streptomycin control and distribution, tropical physiology and hygiene, tuberculosis and the latest developments in X-ray technology and application.

The research work being done under these grants is of a high standard, many of the individual investigators enjoying international reputation. Beyond this practical achievement, the original objectives of the Council are being attained in encouraging young graduates to take up research work and in securing a continuity and permanence of medical research in Australia.

Since the cessation of hostilities, the Council has had the responsibility of selecting persons to take up fellowships awarded by the Nuffield and Rockefeller Foundations, the Carnegie Corporation and the Australian Red Cross Society.

In addition to this, the Council has set aside monies for the specific purpose of sending its fellows abroad for overseas experience and training.

§ 3. The Commonwealth Department of Health.

1. **General.**—An Order-in-Council dated 3rd March, 1921, defined various functions to be performed by the Commonwealth Department of Health in addition to Quarantine which at that time was the only specific public health power of the Commonwealth Parliament under the Commonwealth Constitution. An amendment of the Constitution in 1946 gave the Commonwealth Government power to provide a complete Health Service to the nation including medical advice and treatment. The National Health Services Act 1948 assented to on 21st December, 1948, provides for Commonwealth activity in establishing hospitals, laboratories, health centres and clinics, post-graduate training in all branches of medicine, courses of training in the Auxiliary Medical Services, research, prevention of disease and medical education. Many essential services have been developed by the Department to meet current needs and to further public health throughout Australia. In earlier issues of the Official Year Book reference has been made to several features of this development, including: The Royal Commission on National Health, 1925 (see No. 22, pp. 509–10), the International Pacific Health Conferences (see No. 22, p. 510 and No. 29, p. 334), Industrial Hygiene (see No. 18, pp. 522–55), Tropical Hygiene (see No. 22, pp. 506–7, No. 25, pp. 415–7, and No. 32, p. 226), and the Commonwealth Advisory Council on Nutrition (see No. 32, pp. 222–3). Reference to quarantine is made below (see § 4, par. 2).

2. **The Commonwealth Serum Laboratories.**—The establishment for the preparation of Jennerian vaccine situated at Royal Park, near Melbourne, formerly known as the "Calf Lymph Depot" was in 1918 greatly enlarged by the Commonwealth. The remodelled institution is designated the "Commonwealth Serum Laboratories" and is administered by the Commonwealth Department of Health. The laboratories are now installed in fully equipped buildings and a large staff is employed. At Broadmeadows, near Melbourne, a farm of 254 acres has been developed, under veterinary supervision, for the many thousands of animals required for the work of the laboratories.

The list of biological preparations produced by the laboratories has been extended until at the present time almost the whole range of these products is manufactured and Australia is practically independent of other countries in thus producing its own requirements. Penicillin is being produced in increasingly large quantities, which it is anticipated will shortly suffice for total Australian requirements. Constant research is being conducted into every relevant aspect of bacteriology and immunology and new sera and prophylactic agents are being tested as the growth of medical knowledge opens up new avenues of treatment, prevention and diagnosis. Other original and applied research relating to all aspects of public health is maintained. The laboratories serve as the national centre for the maintenance in Australia of the international standards of the Permanent Commission on Biological Standards (World Health Organization Interim Commission). For the past 25 years the production of veterinary biological products has been a feature of the work of the laboratories. In recent years an extensive development has occurred in this direction and the products are being used in greatly increased amounts in all States for the prevention or treatment of diseases in domestic animals and stock.

3. **The Commonwealth Health Laboratories.**—The fifteen health laboratories of the Department are situated at strategic points throughout Australia. They are located at Darwin, Cairns, Townsville, Rockhampton, Toowoomba, Lismore, Bendigo, Launceston,

Hobart, Port Pirie, Kalgoorlie, Broome, Tamworth, Wollongong and Albury. These laboratories were established as an essential part of the quarantine system but were also to undertake research into local health problems and to provide medical practitioners of each district with up-to-date facilities for laboratory investigation and diagnosis. It was realized that co-operation between the general practitioner with his clinical observations and knowledge of the environment of disease on the one hand, and the staff of a well-equipped laboratory on the other hand, is essential to the efficient investigation of disease and the effective operation of control measures.

From this standpoint, the laboratories have already proved their value in the determination of Weil's disease and endemic typhus in North Queensland, in the investigation of special local problems at Darwin, of undulant fever throughout Australia, of silicosis and tuberculosis at Kalgoorlie and of plumbism at Port Pirie. In these investigations close co-operation has existed with State and local health and hospital services; especially is this so in Queensland where collaboration has yielded exceptionally valuable results in differentiating the groups of fevers hitherto unclassified in that State. In this investigational work, as well as in more routine activities, the laboratories have at their disposal the full resources and technical and specialist facilities available at the Commonwealth Serum Laboratories and the Sydney School of Public Health and Tropical Medicine.

A major part of the work performed at the Kalgoorlie laboratory, since its establishment in 1925, has been the medical examination, on behalf of the State Department of Mines, of employees and applicants for employment in the metalliferous mines in Western Australia. These examinations are performed in accordance with the provisions of the State Mines Regulation Act and the Mine Workers' Relief Act, the objects of which are to provide a healthy body of men for the industry and to free the industry of, and protect the future of, those found to be suffering from serious pulmonary disease. The examinations include clinical, laboratory and radiographic investigation. By means of a mobile X-ray unit an annual tour is also made of outlying mining centres.

X-ray facilities are also provided at the Bendigo laboratory, as part of the campaign against tuberculosis, for the examination of miners and other radiographic work in the district.

4. **Commonwealth Acoustic Laboratories.**—The Department of Health established the first of the series of Acoustic Laboratories in January, 1947, in Erskine House, York-street, Sydney.

The laboratory continued and expanded the work of the Acoustic Research Laboratory which was sponsored by the National Health and Medical Research Council during the years 1942–1946 for the purpose of investigating problems of noise and difficulties of intercommunication in aircraft and tanks. With the cessation of hostilities the Acoustic Research Laboratory directed its attention to the problem of deafness in children, particularly the group whose affliction was caused by the mothers contracting rubella in the early months of pregnancy.

The taking over of the Acoustic Research Laboratory by the Department of Health was influenced by the request from the Repatriation Commission for technical assistance in the matter of the supply of hearing aids to deafened ex-servicemen. Arrangements for this purpose were completed and branch laboratories were established in all other State Capital Cities.

During the year 1948 the Acoustic Laboratories Act was passed to allow the expansion of activities on the following lines :—(1) To carry out the requirements of the Repatriation Commission for deafened ex-Service personnel and to provide a similar service for the Commonwealth Department of Social Services in respect of deafened ex-Service personnel whose disability was not caused by war service; (2) to assist the Education Departments of the States in measuring deafness, fitting aids, and maintaining hearing aid equipment for school children; (3) to act on behalf of various State and other authorities who desire to have independent tests made before assisting financially in the purchase of hearing aids for people under their care; and (4) the investigation of problems associated with noise in industry.

The laboratory in Sydney is now known as the Commonwealth Central Acoustic Laboratory and is responsible for the training of personnel for the whole Acoustic Service, the production of equipment, the calibration of hearing aids and audiometers and the technical administration of the branch laboratories.

5. **Commonwealth Bureau of Dental Standards.**—The National Health and Medical Research Council sponsored the Dental Materials Research Laboratory during the years 1939–1946, for the purpose of assisting the Defence Services, the Medical Equipment Central Committee and other Government Departments in the selection of, and purchase of, suitable dental equipment and materials. Valuable assistance was also given to Australian manufacturers of dental materials in relation to improvement of their products and the development of new materials.

Much of the work was of a routine nature and with the cessation of hostilities the National Health and Medical Research Council decided to *cease* its sponsorship but recommended that the Department of Health should take over the laboratory as it was serving a good purpose. This was done in January, 1947, and the laboratory was renamed the Commonwealth Bureau of Dental Standards and is at present situated in the grounds of the University of Melbourne.

The functions of the Bureau are as follows:—(1) Original research into dental equipment, materials, techniques and processes; (2) the development, in consultation with a representative committee of the Commonwealth Department of Health, of the Australian Dental Association and the Standards Association of Australia of specifications for dental materials and equipment; (3) regular systematic surveys of dental materials on sale to the profession in Australia, and the reporting of the results of such investigations in recognized Australian scientific journals; and (4) the provision of a consultative service and testing facilities for local manufacturers of dental materials with the view to assisting them in the improvement of existing products and the development of new materials.

6. **The School of Public Health and Tropical Medicine.**—The Commonwealth Government, under an agreement with the University of Sydney, established a School of Public Health and Tropical Medicine at the University of Sydney as from 4th March, 1930, for the purpose of training medical graduates and students in the subjects of public health and tropical medicine. The organization of the Australian Institute of Tropical Medicine at Townsville was merged in the new school, and the staff, equipment and material were transferred to Sydney.

The work of the school comprises both teaching and investigation. Courses are held for the University post-graduate diploma of public health and the diploma of tropical medicine and tropical hygiene. Lectures are given in public health and preventive medicine as prescribed for the fifth year of the medical curriculum. Other classes include students in architectural, social and school hygiene, and lay officers and nurses in the tropical services and missionaries. In addition to this work, throughout the war all the resources of the School were made available for the training of medical and hygiene officers and other ranks from all the Services of the Australian and Allied Forces.

Investigational work covers a wide field of public health and medical subjects, both in the laboratory and in the field. Field work has been carried out not only in Australia but in co-operation with the local administrations in Papua, New Guinea, Norfolk Island and Nauru. During the year initial steps to set up sections of Child Health and Occupational Disease were made and selection of suitable staff is proceeding. Further details may be found in previous issues of the Official Year Book (see No. 29, p. 334).

7. **The Australian Institute of Anatomy.**—Information concerning the Australian Institute of Anatomy at Canberra is given in previous issues of the Official Year Book (see No. 32, p. 919–21). In 1931 the Institute became an integral part of the Commonwealth Department of Health. The work of the Institute on general problems of comparative anatomy has now been concentrated on aspects of structure and function with special reference to the development of the growing child. Biochemical and biological research in this field is being developed in close association with the model kindergarten centres established by the Department in each capital city (see par. 10 below). Work in specialized

aspects of nutrition has steadily increased. The Institute now plays an important part in research and the scientific application of nutritional knowledge under Australian conditions. The background of comparative anatomy and the museums of the Institute are maintained as part of the general plan of work, and an expert zoologist is a member of the body of research workers at the Institute. See also Chapter XXVIII. "Miscellaneous".

8. **The Northern Territory Medical Service.**—As from 1st April, 1930, the Commonwealth Department of Health assumed administrative responsibility for the medical and health services of the Northern Territory, absorbing the Northern Territory Medical Service. With the growing importance of Darwin as the northern gateway to Australia and as an administrative and service centre its health services were strengthened, a new hospital at Darwin was built and the hospital at Alice Springs was enlarged.

With civilian evacuation during the Pacific war, military control of the medical services operated in the years 1942 to 1945. Civilian control was resumed by the Department during the period November, 1945 to May, 1946, starting at Alice Springs and gradually extending north to Darwin. The hospitals at Alice Springs, Tennant Creek, Katherine and Darwin, and the Health Laboratory at Darwin were re-established as civilian institutions.

An aerial medical service, operated by the Department, is based on Darwin, and comprises two Dragon aircraft and a pilot. The Flying Doctor Service of Australia has a base at Alice Springs, and the medical officers at the hospital act as the doctors for this service.

9. **National Fitness.**—Health authorities in Australia have closely followed the world-wide movement for the advancement of physical fitness and in several States active work has been proceeding over some years. In 1938, following a recommendation of the National Health and Medical Research Council, the Commonwealth Government agreed to appoint a Commonwealth Council for National Fitness, under the Commonwealth Minister for Health, to effect collaboration of Commonwealth, State and local government authorities in the movement. Meetings of this Council are held at regular intervals, at least annually. Meanwhile, active State Councils have been formed in all States. As a result of the recommendations of the central Council, the Commonwealth Government agreed to make available an annual sum of £20,000 for five years and grants were allocated to each State for purposes of organization and to each of the six Australian universities to establish lectureships in physical education. In July, 1941, a National Fitness Act was passed by the Commonwealth Parliament to ensure greater permanence to the movement, and in June, 1942, the Commonwealth grant was increased to £72,500 to include grants to State Education Departments and for the work in the Australian Capital Territory. In 1946 the total grants were extended for a further period of five years. The movement continues to develop and to gain public interest and support throughout Australia.

10. **The Pre-school Child.**—Sessions of the National Health and Medical Research Council and the reports of the Commonwealth Advisory Council on Nutrition have called attention to the need for greater effort throughout Australia directed towards the care of the growing child, especially during the pre-school period. Movements for the care of the infant and the welfare of the school child are already developed by State authorities as recorded in §§ 7 and 8 below. The Commonwealth Government felt that more could be done for the child of pre-school age, and it was decided to give a lead by making it possible to demonstrate what could be done and the practical methods which could be applied.

The Commonwealth Government therefore decided to establish in each capital city a pre-school demonstration centre, known as the Lady Gowrie Child Centre, and in order to achieve the best results in association with those who have had experience in this field it has secured the co-operation of the Federal Organization of Kindergarten Unions which is operating under the title of "The Australian Association for Pre-school Child Development". A suitable site was secured in each capital city and the necessary school structure was built. Formerly the administration of these centres was under the direction of the local Kindergarten Union and the employment of staff was made

with the approval of the Commonwealth Department of Health. Recently the local Lady Gowrie Child Centre Committees were given a greater degree of autonomy, so that while the technical supervision still rests with the Australian Association for Pre-school Child Development, the management of each centre, including staffing, is in the hands of the local Committee. This development is associated with a change in the method of financial control. An annual grant is made to each Committee towards the cost of the centre, the disbursement of these funds being at the discretion of the local Committee, subject to the general supervision of the Australian Association for Pre-school Child Development. This applies in so far as the educational side is concerned, and in this field advantage is being taken of the opportunity to try new methods and to make systematic records of observations with the object of securing reliable knowledge of the educational technique of this pre-school period.

Along with this educational practice there proceeds also the study of physiological requirements of the child and of the interaction between physical and mental health under varying conditions. The children available at these centres provide a considerable mass of human material for control and study, which is of great value in view of the importance of the study of growth and of nutrition of their age-period. Not only are routine measurements made of height, weight and other bodily data, but problems of nutrition are studied in detail. The medical work at each State centre is carried on on a uniform basis, according to a scheme formulated at, and directed from, the Australian Institute of Anatomy, Canberra, where parallel investigations on the laboratory side are being undertaken.

II. Organization for the Control of Cancer.—The persistent increase in cancer mortality has led to the development in Australia of a national organization directed towards the control of this disease. The Commonwealth Department of Health has actively participated in this movement. Since 1928 the Australian Cancer Conferences, convened by the Department, have provided an opportunity each year for those actively engaged in the campaign against the disease to meet for the discussion of problems and the determination of lines of action and further development. The tenth conference in this series met in New Zealand in February, 1939, and so marked an association which has been maintained between Australia and the Dominion since the inception of the conferences. No further conferences have been held since 1939 due to the intervention of the 1939-45 War.

A large amount of radium purchased in 1928 by the Commonwealth Government for use in treatment and research has been distributed on loan to treatment centres throughout Australia. Under the terms of this loan, treatment at well-equipped clinics is available to all requiring it, irrespective of ability to pay. This work is co-ordinated by the Department.

Close co-operation is maintained between research workers, physicists and bio-chemists and the medical men engaged in the clinical investigation and treatment of the disease, so that problems are mutually investigated and treatment is applied with the highest attainable degree of scientific accuracy.

Realizing the essential importance of accuracy in determining the quality of radiation used in the treatment of cancer and in measuring the dosage of this radiation actually delivered to the tumour, and the need for the investigation of physical problems in connexion with the utilization of X-rays and radium in the treatment of disease, the Commonwealth Department of Health in 1935 extended the work of the Commonwealth Radium Laboratory, established in 1929, to include the investigation of the physical problems of radiation therapy generally. This laboratory, known as the Commonwealth X-ray and Radium Laboratory, is situated by agreement with the University of Melbourne, within the University grounds, and is maintained, controlled, and staffed by the Commonwealth Department of Health. It is accommodated in a building specially designed for work with X-rays and radium, and is amply provided with all necessary equipment for research work, including a 500,000 volt high tension generator.

The laboratory co-operates closely with the local physical services which have been developed in the other capital cities of Australia to provide local facilities for the production of radon, for the calibration of X-ray therapy equipment, and for the measurement of radiation exposure of X-ray and radium workers.

The laboratory has continued to repair radium containers. It also undertakes investigations into physical problems arising in the use of X-ray and radium in treatment.

During the year 1948, a total of 72,528 millicuries of radon was prepared and issued from the laboratory, while 40,835 millicuries were issued by the associated centres in Sydney, Adelaide and Brisbane. The corresponding figures for 1947 were 58,848 and 39,252 millicuries respectively. The issue of radon from a few centres to serve hospitals all over the continent is a unique Australian development, and enables a very efficient use to be made of the radium available.

12. **Veterinary Hygiene and Plant Quarantine.**—In 1927 Directors were appointed to control divisions of the Commonwealth Department of Health which have been created to deal with veterinary hygiene and plant quarantine.

§ 4. Control of Infectious and Contagious Diseases.

1. **General.**—The provisions of the various Acts in regard to the compulsory notification of infectious diseases and the precautions to be taken against the spread thereof may be conveniently dealt with under the headings—Quarantine; Notifiable Diseases, including Venereal Diseases; and Vaccination.

2. **Quarantine.**—The Quarantine Act is administered by the Commonwealth Department of Health, and has three sections of disease control, as follows:—(i) Human quarantine which controls the movements of persons arriving from overseas until it is apparent that they are free of quarantinable disease; (ii) Animal quarantine which controls the importation of animals and animal products from overseas and the security of other animals present on vessels in Australian ports, and (iii) Plant quarantine which regulates the conditions of importation of all plants and plant products with the object of excluding plant diseases, insect pests and weeds.

In regard to interstate movements of animals and plants, the Act becomes operative only if the Governor-General be of opinion that Federal action is necessary for the protection of any State or States: in general, the administration of interstate movements of animals and plants is left in the hands of the States.

The Commonwealth controls stations in each State for the purposes of quarantine of humans, animals and plants.

3. **Notifiable Diseases.**—(i) *General.* (a) *Methods of Prevention and Control.* Provision exists in the Health Acts of all the States for the observance of precautions against the spread and for the compulsory notification of infectious disease. When any such disease occurs, the local authority must at once be notified, and in some States notification must be made also to the Health Department. The duty of making this notification is generally imposed, first, on the head of the house to which the patient belongs, failing whom on the nearest relative present, and, on his default, on the person in charge of or in attendance on the patient, and, on his default, on the occupier of the building. Any medical practitioner visiting the patient is also bound to give notice.

As a rule the local authorities are required to report from time to time to the Central Board of Health in each State as to the health, cleanliness and general sanitary state of their several districts, and must report the appearance of certain diseases. Regulations are prescribed for the disinfection and cleansing of premises, and for the disinfection or destruction of bedding, clothing, or other articles which have been exposed to infection. Bacteriological examinations for the detection of plague, diphtheria, tuberculosis, typhoid and other infectious diseases within the meaning of the Health Acts are continually being carried out. Regulations are provided in most of the States for the treatment and custody of persons suffering from certain dangerous infectious diseases, such as small-pox and leprosy.

(b) *Diseases Notifiable and Cases Notified in each State and Territory.* The following table, which has been compiled by the Commonwealth Department of Health, shows for each State and the Australian Capital Territory the diseases notifiable in 1947 and 1948 and the number of cases notified. Diseases not notifiable in a State or Territory are indicated by an asterisk.

DISEASES NOTIFIABLE IN EACH STATE AND TERRITORY AND NOTIFICATIONS FOR THE YEARS ENDED 31st DECEMBER, 1947 AND 1948.

* Not notifiable. † Victorian and Western Australian cases of Hookworm were ex-service personnel infected overseas. ‡ Hydatid became notifiable in Western Australia as from 15th October, 1948.

(a) Includes "Mossman" and "Sarina" fevers. (b) Includes Amoebic and Bacillary. (c) Malaria figures for all States except Queensland and the Northern Territory represent relapse cases amongst ex-servicemen infected overseas. Queensland figures are mainly ex-service cases. (d) Includes all forms except in New South Wales and Northern Territory where only pulmonary tuberculosis is notifiable. (e) Includes Enteric and Paratyphoid fevers. (f) Cases reported include scrub, murine and tick typhus. (g) Includes Leptosperosis, Weil's and Para-Weil's Diseases.

(ii) *Venereal Diseases.* (a) *General.* The prevention and control of venereal diseases are undertaken by the States. Each State has a Venereal Diseases Act, or provisions in the Health Act govern the working of the measures taken to combat these diseases. Under these Acts notification has been made compulsory in every State except South Australia, where the Venereal Diseases Act has not yet been proclaimed. Steps have been taken to ensure free treatment by medical practitioners or in subsidized hospitals and clinics. Registered pharmaceutical chemists are allowed to dispense prescriptions only when signed by medical practitioners. Clinics have been established and, in some cases, beds in public hospitals have been set aside for patients suffering from these diseases.

Penalties may be imposed on a patient who fails to continue under treatment. Clauses are inserted in the Acts which aim at preventing the marriage of any infected person and the employment of an infected person in the manufacture or distribution of foodstuffs.

For several years the Commonwealth Government granted a subsidy to each of the States to assist in providing hospital treatment and administrative control of venereal diseases, but this subsidy has been discontinued. Yearly subsidies have been paid to the States to assist in coping with the special conditions created by the large numbers of people in the Armed Forces during the Pacific war.

In 1927 a Division of Tuberculosis and Venereal Disease was established in the Commonwealth Department of Health, with a medical officer as Director. This Division ceased to exist in April, 1932.

(b) *Details by States.* A statement of the preventive provisions in each State, together with certain statistical data, appeared in earlier issues of the Official Year Book (*see* No. 22, pp. 503-4).

4. **Vaccination.**—(i) *Demand for Vaccination.* There is statutory provision for compulsory vaccination in all States except New South Wales. Jennerian vaccine for vaccination against small-pox is prepared at the Commonwealth Serum Laboratories in Melbourne. There has been a considerable increase in the demand for vaccination, especially by people about to travel overseas by air, so that they may conform with the quarantine requirements of countries to which they are travelling.

(ii) *Details by States.* In earlier issues of the Official Year Book (*see* No. 22, pp. 504-5) information was given concerning the provisions regarding vaccination in each State.

§ 5. Inspection and Sale of Food and Drugs.

Public Health legislation in force in all States provides for the inspection of foods and drugs with the object of ensuring that all those goods which are sold shall be wholesome, clean and free from contamination or adulteration; and that all receptacles, places and vehicles used for their manufacture, storage or carriage shall be clean. For further particulars in this connexion, and with respect also to the sale and custody of poisons, reference should be made to § 1 State Public Health Legislation and Administration, pp. 295-9.

§ 6. Supervision of Dairies, Milk Supply, Etc.

1. **General.**—In earlier issues (*see* No. 22, p. 498), reference is made to the legislation in force in the various States to ensure the purity of the milk supply and of dairy produce generally.

2. **Number of Dairy Premises Registered.**—The following table shows, so far as the particulars are available, the number of dairy premises registered and the number of cows in milk thereon. In some States registration is compulsory within certain proclaimed areas only.

DAIRY PREMISES REGISTERED, AND COWS IN MILK THEREON, 1948.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust. (a)	Tasmania.
Premises registered ..	17,513	25,783	22,500	12,471	482	(b) 7,297
Cows in milk thereon..	592,320	669,976	c 647,100	129,137	23,961	(d)

(a) Dairy farms registered with the Milk Board for milk for Metropolitan Area and Country towns.
 (b) March, 1948. (c) Estimated. (d) Not available.

§ 7. Medical Inspection of School Children.

1. **General.**—Medical inspection of school children is carried out in all the States and the Australian Capital Territory. Medical staffs have been organized, and in some States travelling clinics have been established to deal with dental and ocular defects.

2. **New South Wales.**—A complete system of medical inspection of school children is carried out by the School Medical Service which passed from the control of the Minister for Education to that of the Minister for Health as from 1st July, 1946. Medical inspection was continued as formerly, viz., in the metropolitan area, full medical examination of all children in first and fifth classes, and review of children in other classes who have been found defective in previous years, and, in country districts, the full medical examination of every child two or three times during the usual period of school attendance (6–15 years). Parents are notified of the defects found, and urged to have them treated. In the metropolitan area these notices are reinforced by “follow-up” work of school nurses, who also arrange hospital and clinic treatment in many cases.

During 1948 resignations and new appointments resulted by the end of the year in a staff of 21 medical officers (including the Director, School Medicine Service, the 3 psychiatrists of the Child Guidance Clinics and the Area School Medical Officer, Wagga), 4 psychologists, 13 school nurses, 4 social workers and a speech therapist. The School Dental Service was incorporated as a part of the newly created division of dental services.

Special attention is paid to the supervision of the health of high school pupils, both girls and boys, and medical inspection is carried out annually in high schools in the metropolitan area, as well as certain country schools.

Every student, before entering a Teachers' College, is medically examined, and any defects found must be remedied before final acceptance. Health supervision is maintained at these Colleges by women medical officers, who give courses of lectures on hygiene and physiology.

The Child Guidance Clinics examine free of charge children referred by school medical officers, teachers, officers of the Child Welfare Department and various outside bodies. Boys coming before the Children's Court were examined at the Clinic at the Metropolitan Boys' Shelter attached to the Court and at Yasmarr Hostel for Boys.

Similar examinations are made in the case of girl delinquents.

The medical examination of certain children under the jurisdiction of the Child Welfare Department and the Widows' Pensions Branch is also carried out by medical officers of this service.

The following summary furnishes particulars of children medically examined in schools in 1948:—

Number fully examined (routine inspection)	84,297
Number reviewed	24,946
Of those fully examined—percentage notified for defects, medical and/or dental.	39.10 per cent.

These figures do not include record of the medical examination and health supervision of children (1) in residence at the Glenfield Special School for backward children, and (2) attending the Department's Nursery Schools.

The School Medical Service carries out regular and/or periodical investigations into problems affecting the health of children, and special investigations into outbreaks of infectious diseases occurring in schools. The sanitary condition of school buildings is also inspected. One medical officer attached to this service was included on the panel of lecturers to parents' groups on sex education of children.

The foregoing statement does not include record of the numerous medical examinations of teachers, and other Departmental work of a medical nature, done by the School Medical Service.

The cost of this service, excluding administration charges, for the year ended 30th June, 1948, was £44,160.

3. **Victoria.**—Medical inspection of school children was established in 1909, one of the objectives of the system being to have each child medically examined once every three years in its school life.

At the medical inspection every child is first weighed and measured, tested for vision and hearing, then undressed to the waist and medically examined as for life assurance, but with a fuller investigation of many hygienic factors, which at that age greatly influence the health and growth of the child. Opportunity is also taken to teach the child healthy habits and how to correct faults, and get its co-operation for the remedying of defects found. School nurses employed by the Department are devoted to "follow-up" work, i.e., visiting the homes and obtaining treatment for children found defective by the school medical officers. Owing to the smallness of the staff their work is confined to the metropolitan area. The school nurse provides the liaison between the child, parent, teacher and appropriate medical or hospital services. Special attention is given to mentally and physically handicapped children. Retardants attending "special" schools and "opportunity" grades are examined annually. Those with defective eyesight ineligible for admission to the Blind Institute attend a "partially sighted" class and are kept under constant supervision. Others with minor postural defects attend a "remedial" gymnasium where special exercises are given under medical attention.

Triennial visits to State Schools within ten miles of Melbourne are fairly well maintained, but it has not been possible to visit more than a few of the registered and institutional schools. It has not been practicable to extend school medical services to country and rural districts. A limited number of metropolitan (industrial areas) and rural schools are covered by the School Dental Service. Owing to staff shortages, it has not been possible to maintain the desired policy of providing dental treatment at regular yearly intervals, with initial treatment at a maximum age of eight years. Children from metropolitan schools attend the School Dental Centre, South Melbourne, and are transported to and from the centre by motor bus hired by the department. It has been the aim to staff and maintain two dental vans on regular country itineraries and to give preference to children resident in institutions situated in the metropolitan and urban areas.

During the year ended 30th June, 1948, 17,526 children and 2,457 teachers were medically examined, and 13,282 children received dental treatment involving 17,694 visits with 25,662 extractions, 15,704 fillings and 6,431 other treatments.

The cost of the School Medical and Dental Services for 1947-48 was £22,327.

4. **Queensland.**—The School Health Services Branch, under the direction of the Chief Medical Officer, consists of three sections known as the Medical, Dental and Nursing Sections.

Medical inspection of schools and school children is carried out by one full-time and one part-time officer under the general direction of the Chief Medical Officer, School Health Services. These officers, as far as possible, examine children for cardiac and pulmonary conditions, and in addition make a thorough examination of all children referred to them by the school nurses.

The nurses now number 20. Each nurse is assigned a group of schools and is instructed to make a list at each school of those children who should be seen by the medical inspector at his next visit. She supervises the sanitation, cleanliness and ventilation of the school and notifies the head teacher of all infectious or verminous children or those suffering from impetigo, scabies, etc., who are then excluded. During 1947-48, school nurses examined 74,206 children. In the metropolitan area the nurses examine the teeth and report all eligible carious cases to the Dental Hospital for treatment.

The Department now has in its employ a staff of 19 dentists, and one part-time dental inspector. These officers are each assigned a district, which is not changed for three years unless for reasons which the Chief Medical Officer, on the recommendation of the Chief Dental Inspector, considers advisable. During 1947-48, 29,520 children were examined; 20,601 extractions were performed; and there were 67,875 fillings and 24,747 other treatments.

At the Wilson Ophthalmic School Hostel children suffering from trachoma are treated and educated. They are admitted from time to time on the recommendation of the part-time Ophthalmic Officer. Beneficial results have already been obtained. The Institution is situated at Eildon Hill, Windsor, and is fully equipped to treat all types of eye cases.

The work of Hookworm Control (the dealing with ankylostomiasis duodenale and necator Americanus infestation) throughout the State is under the control of the Director-General of Medical Services and his deputy. This activity has resulted in a marked reduction of the incidence of this dangerous menace on the northern coastal belt. Five sisters of the School Health Services are seconded for hookworm duty. The personnel consists of a microscopist, a health inspector and two trained sisters.

In order to give the same medical and dental facilities to the children of the back country as are obtainable by city dwellers, three Rail Dental Clinics equipped on the most modern lines have been constructed. Another one is in course of construction and will shortly be in commission. A motor car is carried on a railway wagon attached to each clinic for use at each stopping place to visit the surrounding villages served by the rail centre.

This service cost £51,945 in 1947-48.

5. South Australia.—The system of medical inspection in force requires the examination of all children attending both primary and secondary schools. As a rule they are examined three times during their primary course in Grades I., IV. and VII., and twice during their secondary course in the 2nd and 4th years. Country schools are not visited annually because of staff shortage, but approximately every three or four years. On these visits all the children are examined. Reports are furnished to the parents of any remediable defects found during these examinations. The medical inspectors meet the parents after the examination of the children and give an address on the prevention and treatment of the conditions which were found during the inspection. After these lectures the parents are given an opportunity to ask questions regarding their children. When there is an epidemic or a threatened epidemic in a district, similar lectures are given and special visits paid to all the schools in that locality. All students are examined before they enter the Teachers' College and before they begin teaching. Medical and physiological tests are conducted four times during the course (two years) on all candidates taking the Diploma of Physical Education. Courses of lectures in Hygiene and in First Aid are given to all College students.

The medical staff consists of a principal medical officer, 3 full-time and 1 part-time medical inspectors and 5 trained nurses. Two dentists, 2 dental assistants and a speech therapist are attached to the Medical Branch. The speech therapist examines children with defective speech, ascertains the nature of the defect and teaches the child how to overcome it.

During 1948, 21,236 children were examined by medical inspectors; of these, 525 required notices for defective vision, 108 for defective hearing, and 936 for tonsils and adenoids.

The following table shows the percentages of primary school children who were wearing spectacles in 1947 and 1948:—

Year.		Grade 1.	Grade 2.	Grade 3.	Grade 4.	Grade 5.	Grade 6.	Grade 7.
Boys.								
1947	..	1.29	1.66	2.76	3.07	4.54	4.61	2.42
1948	..	1.50	2.20	1.70	3.60	4.10	4.20	4.50
GIRLS.								
1947	..	1.44	2.36	3.30	3.29	5.16	5.34	7.32
1948	..	1.80	1.80	2.90	3.60	6.50	6.00	4.80

The Psychology Branch consists of a psychologist, assistant psychologist, vocational guidance officer, aptitude testing officer, employment officer, social worker and advisory teacher of opportunity classes. The work of the Branch may be divided into three sections—clinical, educational and vocational.

Clinical. The clinical work involves examining difficult children of many types, including such problems as backwardness, retardation, behaviour, truancy, delinquency, etc. In addition the parents of all children examined are always interviewed and their co-operation is sought.

Educational. In addition to supervising 36 opportunity and special classes for children backward in school work, the Branch advises on questions of placement and types of education for ordinary children in schools.

Vocational. The vocational guidance officer tests and advises all children about to leave school.

The Branch also undertakes lectures to students of the Teachers' College as well as to other interested organizations such as mothers' clubs.

The cost of these services in 1947-48 was £10,760.

6. **Western Australia.**—Under the Public Health Act 1911-1935 the medical officers appointed by the local authorities became medical officers of schools and of school children. The principle aimed at is—

- (a) in the metropolitan area, that each child shall be examined three times during its school life—
 - (i) when it enters school between 5 and 6 years,
 - (ii) in its eighth year, and
 - (iii) between the ages of 12 and 13 years;
- (b) in the country, that the child is examined twice during its school life, or more often if it is possible to arrange such medical examinations.

In the Health Department there are 2 full-time and 1 part-time medical officers for schools and 4 school nurses are employed. One of the medical officers is employed full-time in the country, and one full-time officer and one half-time officer are employed in the metropolitan area. One school nurse is employed in the country in special work connected with eye epidemics, etc. The other three nurses are employed in the metropolitan area. During 1948, 23,237 children were examined (metropolitan, 13,272, and country, 9,965 of whom 11,670 were boys and 11,567 girls). There were 285 schools visited, comprising—metropolitan, 75 State schools and 32 convents, and country, 149 State schools and 29 convents. During 1948 the 4 full-time dental officers employed visited 16 metropolitan and 45 country schools and gave attention to 2,957 children, of whom 1,792 had their parents' consent.

The cost of this service for 1947-48 was £8,737.

7. *Tasmania*.—During the year 1947-48 the School Medical Service occupied the full-time service of three medical officers and the part-time service of 18 government medical officers. Nine school nurses were engaged full-time on this work in association with the doctors and two nurses were engaged part-time.

Two dental clinics, one each in Hobart and Launceston, attended to the needs of children in those centres, and one mobile dental clinic was in operation in the north-western part of the State.

The number of children examined during 1948 by medical inspectors was 15,903, of whom 8,447 had defects. First visits to dentists numbered 6,774 and repeat visits 5,941.

The cost of medical and dental services for the year ended June, 1948, was £11,748.

8. *Australian Capital Territory*.—By arrangement, education facilities are provided by the Education Department of New South Wales. The Commonwealth Department of Health, however, took over from the State in 1930 the medical inspection of school children and carried out examinations of entrants and those leaving during 1930.

Subsequent to 1931, examinations of entrants and those leaving the primary schools have taken place. During 1937 this examination was supplemented by examinations of all pupils of all rural schools (including Duntroon and Molonglo). No examinations were made in 1942. Since 1943 all primary pupils of Government schools in the Territory have been medically examined annually. During 1948 a total of 1,392 children were examined, comprising 729 boys and 663 girls. Dental defects numbered 611 (43.9 per cent.); 82 (6 per cent.) children were notified to seek treatment for tonsils and adenoids; 25 cases (1.9 per cent.) were reported for defective vision. Defective hearing represented 28 notifications or 2 per cent. Chest deformities totalled 92 or 6.6 per cent., whilst 71 children (5.1 per cent.) were 10 per cent. or more under weight for their height and age.

§ 8. Supervision and Care of Infant Life.

1. *General*.—The number of infantile deaths and the rate of infantile mortality for the last five years are given in the following table, which shows that during the period 1944 to 1948 no less than 24,096 children died in Australia (excluding Territories, before reaching their first birthday. Further information regarding infantile mortality will be found in Chapter XIV. "Vital Statistics"—

INFANTILE DEATHS AND DEATH RATES.

(a) Excludes Territories.

(b) Number of deaths under one year per 1,000 births registered.

During recent years greater attention has been paid to the fact that the health of the community depends largely on pre-natal as well as after-care in the case of mothers and infants. Government and private organizations, therefore, provide instruction and treatment for mothers before and after confinement, while the health and well-being of mother and child are looked after by the institution of baby health centres, baby clinics, creches, visits by qualified midwifery nurses, and special attention to the milk supply, etc.

2. **Government Activities.**—In all the States acts have been passed with the object of supervising and ameliorating the conditions of infant life and reducing the rate of mortality. Departments control the boarding-out to suitable persons of the wards of the State, and wherever possible the child is boarded out to its mother or near female relative. Stringent conditions regulate the adoption, nursing and maintenance of children placed in foster-homes by private persons, while special attention is devoted to the welfare of ex-nuptial children. (*See also* in this connexion Chapter IX. "Welfare Services".) Under the provisions of the Maternity Allowances Part V. of the Social Services Consolidation Act 1947-1949 from 1st July, 1947 a sum of £15 is payable to the mother in respect of each confinement at which a living or viable child is born. Where there are one or two other children under 16 the amount payable is £16, and where there are three or more other children under 16 the amount payable is £17 10s. Where more than one child is born at a birth the amount of the allowance is increased by £5 in respect of each additional child born at that birth. Detailed particulars regarding Maternity Allowances are given in Chapter IX. "Welfare Services."

3. **Nursing Activities.**—(i) *General.* In several of the States the Government maintains institutions which provide treatment for mothers and children, and, in addition, subsidies are granted to various associations engaged in welfare work.

(ii) *Details by States.* In earlier issues of the Official Year Book (*see* No. 22, pp. 515-6) information may be found concerning the activities of institutions in each State.

(iii) *Summary.* The following table gives particulars of the activities of Baby Health Centres and Bush Nursing Associations:—

BABY HEALTH CENTRES AND BUSH NURSING ASSOCIATIONS, 1948.

(c) Includes four mobile units.

The number of attendances at the Baby Health Centres has increased very considerably in recent years. The following are the figures for the years 1939 to 1947:—1939, 1,869,770; 1940, 2,035,299; 1941, 2,128,961; 1942, 2,240,294; 1943, 2,327,279; 1944, 2,677,030; 1945, 2,927,764; 1946, 2,816,586; and 1947, 3,048,498.

§ 9. Hospital Benefits Act.

Under the Hospital Benefits Act 1945-1948 the Commonwealth has entered into agreements with the States to pay to the States hospital benefits at an agreed rate for each bed occupied by a qualified person in a public ward in a public hospital, provided that the States abolish the means test for admission into public wards and cease charging fees to qualified persons admitted thereto. The benefit rate for public wards, which was

six shillings per day until 30th June, 1948, was increased to eight shillings per day from 1st July, 1948. For dates of operation and payments made in the several States *see* page 318.

The agreements provide for the Commonwealth to pay benefits towards the cost of treatment of qualified persons occupying beds in non-public wards in public hospitals, and for the State Governments to reduce the hospital fees by the equivalent of the benefit rate, thus relieving qualified persons of fees to this extent. The benefit rate for non-public wards which was six shillings per day until 31st October, 1948, was increased to eight shillings per day from 1st November, 1948.

Private hospitals are entitled to claim benefits for beds occupied by qualified patients. These hospitals must be approved by a joint committee of Commonwealth and State Health authorities before payment of benefit is made. The hospitals are required to reduce each qualified patient's account by the amount of the benefit payable by the Commonwealth. The benefit rate for private hospitals which was six shillings per day until 31st October, 1948, was increased to eight shillings per day from 1st November, 1948.

Hospital benefits are payable also to or in respect of any person who whilst temporarily absent from Australia has been a qualified patient in a hospital in any country outside Australia. The benefit rate for persons temporarily absent from Australia which was six shillings (Australian currency) per day until 31st October, 1948, was increased to eight shillings (Australian currency) per day from 1st November, 1948. Arrangements have been made for these benefits to be paid in several countries overseas where Commonwealth Officers are established. Any claims not dealt with overseas received attention in Australia.

The Commonwealth and States have agreed to form a National Hospital Council of Commonwealth and State representatives, the functions of which will be to advise the Commonwealth and State Governments on any hospital matters referred to it by the Commonwealth or State Governments.

§ 10. Mental Institution Benefits Act.

The Mental Institution Benefits Act was assented to on 17th December, 1948. It authorizes the execution, on behalf of the Commonwealth, of agreements with all or any of the States, relating to the provision of mental institution benefits.

These agreements will provide for the Commonwealth to pay to the States in respect of qualified persons in mental institutions benefits at an agreed rate per patient-day and for the States to ensure that no means test is imposed on and that no fees are charged to or in respect of qualified persons.

§ 11. Tuberculosis Act.

With the exception of two sections, this Act came into operation when it received the Royal Assent on 25th November, 1948.

Sections 3 and 9 of this Act do not come into operation till a day to be fixed by proclamation. Section 3 refers to the repeal of the Tuberculosis Acts of 1945 and 1946 and Section 9 concerns allowances payable to sufferers from tuberculosis and their dependants.

Section 5 provides for an arrangement to be entered into between the Commonwealth and a State whereby the Commonwealth undertakes to provide—(1) Capital expenditure by the State on or after the 1st July, 1948, in the provision by the State of land and buildings for use in the diagnosis, treatment and control of tuberculosis, and in the erection and improvement of buildings and the provision of furnishings, equipment and plant for such use; and (2) the net maintenance expenditure by the State in any financial year after the year which ended on the 30th June, 1948, in relation to the diagnosis, treatment and control of tuberculosis, to an extent not exceeding the amount by which that expenditure is in excess of the net maintenance expenditure in relation to the diagnosis, treatment and control of tuberculosis incurred by the State during that last-mentioned year.

Any such expenditure shall be subject to the approval of the Minister before that expenditure is re-imbursed to the State by the Commonwealth.

Any arrangement entered into under this section shall provide—(a) that any assets acquired by the State, the cost or part of the cost of which has been re-imbursed to the State under the arrangement, shall not, without the approval of the Minister, be used otherwise than for the diagnosis, treatment and control of tuberculosis; and (b) for the indemnification of the Commonwealth—(i) against payment by way of compensation for property, the cost of which is being re-imbursed to the State by the Commonwealth under the arrangement in the event of the acquisition of that property by the Commonwealth; and (ii) where the cost of the property was re-imbursed in part to the State by the Commonwealth under the arrangement—against payment by way of compensation proportionate to the cost so re-imbursed to the State in the event of the acquisition of the property by the Commonwealth.

In Section 6 the powers of the Director-General are defined. Subject to the direction of the Minister he can establish or take over and conduct hospitals, sanatoria, laboratories, diagnostic centres, after-care and other units and clinics for the diagnosis, treatment and control of tuberculosis. He can arrange for the provision of scholarships for post-graduate study and can assist and provide for research.

The functions of any Advisory Council are described in Section 8. This Council, under the chairmanship of the Director-General, will advise the Minister on such matters as the measures to be taken for the prevention, diagnosis, treatment and control of tuberculosis; on standards of equipment, training of personnel, hospitals and sanatoria and the after-care of sufferers.

Realizing that it is essential to provide economic security, adequate nutrition and good living conditions for sufferers from tuberculosis and their dependants, the Government provides special allowances. The purposes of these allowances are—(a) to encourage sufferers to refrain from working and undergo treatment; (b) to minimize the spread of tuberculosis; (c) to promote treatment, after-care and rehabilitation; and (d) to provide an adequate level of nutrition and living conditions for the dependants.

All expenditure under this Act other than—(a) payments for the re-imbusement of a State in respect of expenditure of a capital nature; (b) payments for the re-imbusement of a State in respect of administrative expenses in the control of tuberculosis; and (c) payments under Section 8 dealing with the Advisory Council shall be made out of the Trust Account established under the National Welfare Fund Act 1943-1945 and known as the National Welfare Fund.

All expenditure by the Commonwealth referred to in paragraphs (a), (b) and (c) above shall be made out of moneys from time to time appropriated by the Parliament for the purpose.

§ 12. Pharmaceutical Benefits Act.

A Pharmaceutical Benefits Act passed all stages of the Commonwealth Parliament in March, 1944 and was amended in September, 1945. This Act was the subject of a High Court action, as a result of which the Government sought by means of a referendum of the people the constitutional power necessary to implement the Act. For further information on legal and constitutional action in this matter, *see* Chapter III.—General Government, pages 83 and 84. This power having been granted, a further Pharmaceutical Benefits Act, which repealed the Acts of 1944 and 1945, was assented to on 12th June, 1947. This Act embodies a scheme for providing pharmaceutical benefits to all persons ordinarily resident in Australia. The benefits to be provided are contained in a Commonwealth Pharmaceutical Formulary, which is subject to periodic revision by a Formulary Committee comprised of members of the medical and pharmaceutical professions. Benefits are supplied without cost to the person receiving the benefit, payment being made by the Commonwealth to authorized suppliers from the National Welfare Fund. Special arrangements exist for supplying benefits or their equivalent to persons residing in isolated areas. These pharmaceutical benefits were first made available to the public on 1st June, 1948.

B. INSTITUTIONS.

§ 1. General.

In Australia institutions related to public health may be classified in three groups: (a) State; (b) public; and (c) private. To the first group belong those institutions wholly provided for by the State, such as the principal mental hospitals in the various States and the Government and leased hospitals in Western Australia. To the second group belong public institutions of two kinds, namely:—(i) those partially subsidized by the State or by State endowments for maintenance, but receiving also private aid, and (ii) those wholly dependent upon private aid. To the first of these two kinds belong such institutions as the principal metropolitan hospitals; in the second are included institutions established and endowed by individuals for the benefit of the needy generally. All institutions of a private character are included in the third group. A more or less accurate statistical account is possible in classes (a) and (b), but in regard to (c) general tabulation is, for obvious reasons, impossible. Owing to differences in the dates of collection and tabulation it is impossible to bring statistics of some charitable institutions to a common year.

§ 2. Public Hospitals (other than Mental Hospitals).

1. *General*.—All the State capitals have several large and well-equipped hospitals, and there is at least one in every important town. In large centres there are hospitals for infectious diseases, tubercular patients, women, children, incurables, etc.

The particulars given herein refer to public hospitals at the latest available date and include all institutions affording hospital relief, whether general or special, with the exception of mental hospitals, repatriation hospitals and private hospitals conducted commercially. The particulars for New South Wales in the following tables relate to hospitals operating under the control of the Hospitals Commission.

2. *Principal Hospitals in each State*.—In earlier issues of the Official Year Book (*see* No. 22, pp. 481–2) particulars respecting staff, accommodation, etc., of each of the principal hospitals were given.

3. Number, Staff and Accommodation, 1947-48.—Details regarding the number of hospitals, staffs and accommodation for the year 1947-48 are given in the following table :—

PUBLIC HOSPITALS : NUMBER, STAFF AND ACCOMMODATION, 1947-48.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Total.

Average Daily Number Resident	12,206	5,118	5,574	2,192	2,148	1,200	116	28,554

In addition to those admitted to the institutions there are large numbers of out-patients. During 1947-48 there were 823,084 out-patients treated in New South Wales, 342,136 in Victoria, 387,269 in Queensland, 81,682 in South Australia, 88,317 (estimated) in Western Australia, 45,846 (estimated) in Tasmania and 4,429 in the Australian Capital Territory, making a total for Australia of 1,772,763.

5. **Revenue and Expenditure.**—Details of the revenue and expenditure for the year 1947-48 are shown in the next table. The revenue includes the Commonwealth Hospital Benefit Scheme which operated in Victoria, Queensland, Western Australia and Tasmania from 1st January, 1946, in South Australia from 1st February, 1946, and in New South Wales and the Australian Capital Territory from 1st July, 1946.

(a) Estimates for South Australia, Western Australia and Tasmania.

§ 3. Leper Hospitals.

Isolation hospitals for the care and treatment of lepers have been established in New South Wales (Little Bay); Queensland (Peel Island, near Brisbane, and Fantome Island, North Queensland); Western Australia (Derby); and the Northern Territory (Channel Island, near Darwin). At the end of 1948 there were 18 cases in residence at Little Bay, 55 at Peel Island, 77 at Fantome Island, 248 at Derby, 85 at Channel Island, and one isolated case at Wooroloo, Western Australia. Of the 484 cases, 373 were full-blood aborigines, 40 half-caste aborigines, 5 Asiatics and 66 Europeans.

§ 4. Mental Hospitals.

1. **General.**—The methods of compiling statistics of insanity are fairly uniform throughout the States, but there is an element of uncertainty as to possible differences in diagnosis in the early stages of the disease. The figures for the States cannot be brought to a common year; consequently the following particulars relate to a combination of calendar and financial years. Licensed houses are included in all particulars excepting revenue and expenditure for New South Wales. The figures exclude those of reception houses and observation wards in gaols. In New South Wales the expenditure includes the cost of Broken Hill patients treated in South Australian hospitals.

2. **Hospitals, Staff, etc., 1947-48.**—Particulars regarding the number of institutions, the medical and nursing staffs, and accommodation are given in the following table for the year 1947-48 :—

MENTAL HOSPITALS : NUMBER, STAFF, ACCOMMODATION, 1947-48.(a)

Average number of patients resident in mental hospitals per 1,000 of mean population—							
Males	3.55	2.89	3.56	3.27	3.40	2.34	3.30
Females	3.53	3.20	3.28	3.20	2.34	2.69	3.27
Total	3.54	3.04	3.43	3.24	2.88	2.52	3.29

(a) See footnote (a) to previous table.

Persons who are well advanced towards recovery are allowed to leave the institutions and reside with their relatives or friends, but they are under supervision and their names are kept in the records.

4. Revenue and Expenditure, 1947-48.—The revenue of Government mental hospitals is small in comparison with their cost, and consists chiefly of patients' fees. The proportion of expenditure borne by the State amounts to about 86 per cent. In New South Wales the expenditure includes the cost of Broken Hill patients treated in South Australian hospitals.

5. Summary for Australia, 1938-39 and 1944-45 to 1947-48.—The following table gives a summary of mental hospitals in Australia during 1938-39 and for each of the years 1944-45 to 1947-48:—

MENTAL HOSPITALS : SUMMARY, AUSTRALIA.

Particulars.	1938-39.	1944-45.	1945-46.	1946-47.	1947-48.
Institutions No.	35	32	33	33	34
Medical Staff	92	89	95	99	108
Nursing Staff	4,922	4,104	3,803	4,078	4,198
Beds	25,654	26,177	26,520	26,984	27,219
Admissions	3,757	3,074	3,919	3,925	4,061
Discharged as recovered, relieved, etc.	1,800	1,703	1,792	2,150	1,969
Deaths	1,632	1,834	1,976	1,888	1,923
Inmates at end of year ..	26,509	26,978	27,158	27,045	27,214
Revenue (excluding Government Grants) ..	£ 262,817	427,278	428,951	457,131	508,201
Expenditure—Total ..	£ 1,903,817	2,409,317	2,579,399	2,893,208	3,575,676
—Per Average Daily Resident ..	£79/2/4	£97/10/4	£102/19/8	£116/6/11	£143/7/11

6. **Number of Mental Patients, 1938-39 and 1944-45 to 1947-48.**—The total number returned as under treatment shows slight fluctuations during the period but the proportion to total population shows a slight decline to 1947-48. A more rational attitude towards the treatment of mental cases has resulted in a greater willingness in recent years to submit afflicted persons to treatment at an early stage, and an increase in the number of recorded cases, therefore, does not necessarily imply an actual increase in insanity.

MENTAL PATIENTS IN INSTITUTIONS.

State.	1938-39.	1944-45.	1945-46.	1946-47.	1947-48.
NUMBER.					
New South Wales	11,678	11,850	11,865	11,834	11,836
Victoria	7,326	7,242	7,262	7,037	7,052
Queensland	3,650	3,840	3,876	3,933	4,008
South Australia	1,747	1,925	2,024	2,107	2,165
Western Australia	1,477	1,465	1,475	1,471	1,505
Tasmania	631	656	656	663	648
Australia	26,509	26,978	27,158	27,045	27,214

PER 1,000 OF POPULATION.

New South Wales	4.25	4.06	4.03	3.96	3.91
Victoria	3.92	3.62	3.60	3.45	3.42
Queensland	3.59	3.57	3.56	3.55	3.55
South Australia	2.93	3.07	3.19	3.26	3.29
Western Australia	3.16	3.02	3.01	2.96	2.96
Tasmania	2.66	2.64	2.60	2.58	2.47
Australia	3.81	3.66	3.65	3.59	3.56

The difference between States in the number of mental patients in institutions per 1,000 of population may be due to some extent to differences in classification.

7. **Causes of Insanity.**—The general information available respecting the causes of the insanity of persons admitted to institutions is too unsatisfactory to enable a classification of patients by cause of insanity to be given.

8. **Length of Residence in Hospital, 1947-48.**—(i) *New South Wales and Victoria.* Particulars are not available regarding the average length of residence in hospitals of persons who died or were discharged during the year.

(ii) *Queensland.* The average residence of those who died during 1947-48 was 7 years 360 days for males, and 6 years 104 days for females; of those discharged, 357 days for males, and 1 year 142 days for females.

(iii) *South Australia.* The average residence of those who died during 1947-48 was 5 years 4 months 12 days for males, and 5 years 3 months 29 days for females; of those discharged, 5 years 3 months 12 days for males, and 2 years 10 months 19 days for females.

(iv) *Western Australia.* The average residence of those who died in 1947 was 10 years 6 months 4 days for males, and 9 years 2 months 9 days for females; of those discharged, 2 years 6 months 4 days for males, and 4 years 4 months 23 days for females.

(v) *Tasmania.* The average residence of those who died during 1947-48 was 3 years 35 days for males, and 5 years 295 days for females; of those discharged, 1 year 55 days for males, and 1 year 355 days for females.

CHAPTER IX.

WELFARE SERVICES.

A. COMMONWEALTH SOCIAL SERVICE BENEFITS.

§ 1. Introduction.

Commonwealth social service benefits are provided under the Social Services Consolidation Act 1947-1949 which came into operation on 1st July, 1947. This Act provided for the repeal of the existing laws relating to age and invalid pensions, maternity allowances, child endowment, widows' pensions and unemployment and sickness benefits, and for the immediate re-enactment of the necessary provisions for the grant and payment of these benefits under a unified law. Its more important effects were the elimination of obsolete provisions, the removal of anomalies, the amalgamation of like provisions, and the modernizing and grouping of the legislation so that it presented a symmetrical part of a well-defined pattern of social security. The history of the variations in the rates and conditions of age and invalid pensions, maternity allowances, child endowment, widows' pensions and unemployment and sickness benefits prior to 1st July, 1947 is referred to in earlier issues of the Official Year Book.

The benefits provided under the Consolidation Act are financed from the National Welfare Fund.

§ 2. Age and Invalid Pensions.

1. **General.**—Age pensions are payable to men, 65 years of age and over, and women, 60 years of age and over, who have resided in Australia for a continuous period of 20 years. Any periods of absence during which a person's home remained in Australia, and absences in certain other circumstances, are counted as residence. Absence in a Territory of the Commonwealth does not break continuity of residence.

Invalid pensions are payable to persons, 16 years of age and over, who have resided in Australia for a continuous period of five years, and who are permanently incapacitated for work or permanently blind. For the purpose of the residential qualification, the position in regard to absences is the same as for age pensions. A person is deemed to be permanently incapacitated for work if the degree of his permanent incapacity is not less than 85 per cent. The claimant must have become permanently incapacitated or permanently blind while in Australia or during a temporary absence from Australia, but this condition is waived if he has resided in Australia for not less than 20 years (continuous or otherwise), which may be partly before or partly after the occurrence of the permanent incapacity or blindness.

2. **Persons Disqualified.**—A pension is not payable to:—an alien (except a woman who, prior to marriage, was a British subject); a person who has deprived himself of property or income in order to qualify for a pension; a person in receipt of income of £188 10s. per annum or more (blind persons £416 per annum) or £377 per annum for

a married couple (£526 10s. per annum where both husband and wife are blind); a person who owns property, apart from his permanent home and other exempt property, to the net value of more than £750 (£1,500 for married persons); a person who is not deserving of a pension; a person who is not of good character or who has deserted his wife (or her husband) or children for six months or upwards immediately preceding the date of the claim (age pension only); or a person under 21 years of age who is adequately maintained by his parents (invalid pension only).

3. **Aboriginal Natives.**—Pensions may be granted to aboriginal natives of Australia who have been granted exemption from State control laws, or who, in any State where exemption is not provided for, are considered suitable persons to receive pensions by virtue of character, standard of intelligence and social development.

4. **Pension Rate.**—The maximum rate of pension from 21st October, 1948, is £110 10s. per annum.

5. **Effect of Income.**—Permissible income is £78 per annum. Any income in excess of this amount is deducted from the pension. The income of a married person is deemed to be half the total income of husband and wife except where they are legally separated or in certain other circumstances. Permissible income for blind persons, whether single or married, is £305 10s. per annum. Any excess income is deducted from the pension. Where both husband and wife are blind, half the amount of any income in excess of £305 10s. per annum is deducted from each pension. "Income" does not include gifts or allowances from children or parents, benefits from friendly societies, payments in respect of illness, infirmity or old-age from any trade union, the value of State food relief, child endowment or other payments for or in respect of children, benefits under the Commonwealth Hospital Benefits, Pharmaceutical Benefits and Tuberculosis Acts and interest on Commonwealth war gratuities.

6. **Effect of Property.**—The rate of pension is reduced by £1 per annum for every complete £10 of that portion of the net value of property which exceeds £100 but does not exceed £450, and by £2 per annum for every complete £10 of the remainder (if any) of the net value of the property up to £750. The value of property of a married person is deemed to be half the total value of property of husband and wife.

The value of a home, furniture and personal effects, the surrender value (up to £200) of any life assurance policies, the capital value of any life interest, annuity or contingent interest, the present value (up to £500) of any reversionary interest, the value of any property from the estate of a deceased person which has not been received and the amount of any Commonwealth war gratuity are disregarded in the computation of property.

7. **Claimants Receiving War Pensions.**—A person receiving a war pension may be granted an age or invalid pension in addition to the war pension, but the total amount payable in respect of the two pensions must not exceed £162 10s. per annum. In the case of a married couple where husband and wife each receive a civil pension (age or invalid, wife's allowance or service pension), the total amount which may be received in respect of war pensions and civil pensions is £317 4s. per annum; in other cases of married persons the limit is £260 per annum. Where the war pension (or pensions) and the civil pension (or pensions) together exceed the appropriate limit, the civil pension (or pensions) is (or are) reduced by the amount of the excess, but the pensioner is permitted to have other income to bring the total war pension and civil pension payments, plus the other income, up to the appropriate limit of income plus pension, £188 10s. per annum for a single person or £377 per annum for a married couple, both qualified for pensions.

8. **Inmates of Institutions.**—A pensioner who is an inmate of a benevolent asylum is paid £30 per annum of his pension and the balance of the pension is paid to the institution for his maintenance.

9. **Wives' Allowances.**—An allowance, not exceeding £62 8s. per annum, may be granted to the wife of an invalid pensioner (or an age pensioner who is permanently incapacitated for work or permanently blind) if she is living with her husband and is not receiving an age or invalid pension or a service pension. The rate of the allowance is affected by income and property on the same basis as an age or invalid pension.

10. **Children's Allowances.**—An allowance of £23 8s. per annum in respect of one child under the age of 16 years may be granted to the wife of an invalid pensioner living with her husband. The allowance may also be granted to any invalid pensioner who has the custody, care and control of a child under the age of 16 years, but where both husband and wife are invalid pensioners (living together) the child's allowance is payable only to the wife.

11. **Rehabilitation of Invalid Pensioners.**—The scheme for the rehabilitation of invalid pensioners, by which invalid pensioners may be given suitable treatment and vocational training at the Commonwealth's expense with a view to enabling them to learn some suitable craft or occupation whereby they may eventually become self-supporting, came into operation from the 10th December, 1948. The cases selected for treatment and training are those in which the pensioner's disability is remediable and where there are reasonable prospects of his engaging in a suitable vocation within two years after the commencement of treatment or training.

During the period of treatment payment of the pension is continued, and when vocational training is commenced the pension is suspended and, in its place, the trainee is paid a rehabilitation allowance at a rate equivalent to the rate of invalid pension (including any wife's or child's allowance) for which he is qualified, plus a training allowance of £1 per week. Where it is necessary for a trainee to live away from home for the purpose of receiving training, an additional allowance is paid. The cost of fares regularly incurred by the pensioner in travelling for the purpose of receiving treatment or training may also be paid by the Commonwealth. A pensioner undergoing treatment or training may be provided with any artificial replacements, surgical aids and appliances and with such books, equipment and tools of trade (costing not more than £10) as are required for his treatment or training or to enable him to engage in employment. The pensioner, however, is required to pay the cost of any articles which he retains for his own use, but payment may be made by small instalments after he has commenced employment.

If, in any case, the treatment or vocational training of a pensioner does not result in his being able to engage in employment, his right to continuance of his invalid pension is not thereby prejudiced in any way.

The grant or continuance of an invalid pension may be refused unless the claimant or pensioner undergoes such treatment or training as the Director-General of Social Services considers is reasonable for him to undergo, having regard to the pensioner's age and physical and mental capacity and to the facilities available.

12. **Funeral Benefits.**—From 1st July, 1943 a funeral benefit of up to £10 has been payable to the person who has paid, or is liable to pay, the cost of the funeral of an age or invalid pensioner or of a claimant who, but for his death, would have been granted an age or invalid pension. Where the cost of the funeral has been partly met by payment from a contributory funeral benefit fund of an organization other than a friendly society, funeral benefit is payable to the extent of the amount (not above £10) by which the cost of the funeral exceeded the amount paid from the fund. A funeral benefit is not payable to a person administering a contributory funeral benefit fund.

13. Rates of Pension Payable.—The following statement shows the rates of pension at 1st July, 1909 and the rates as they have been varied since that date :—

MAXIMUM RATES OF PENSION PAYABLE.

(a) Additional pension of £10 10s. per annum (2s. 6d. per week) was payable to a pensioner with no income. Pensioners with income of less than 2s. 6d. per week were paid additional pension of 2s. 6d. less the amount of income.

(b) Variation according to rise in retail price index number. (c) Increase paid on 9th July, 1942, retrospective to 2nd April, 1942. (d) Rate restored to £70 4s. per annum under National Security (Supplementary) Regulation 112A—Statutory Rule 315 of 1943.

NOTE.—Provision for variations according to retail price index numbers repealed 6th April, 1944.

14. Age Pensions.—(i) *Number in force.* At 30th June, 1948 there were 302,854 age pensions in force. During 1948-49, 43,785 age pensions claims were granted and 1,041 pensioners were transferred from the invalid pension list, while 26,353 pensions expired through cancellations and deaths. The net increase for the year was 18,473 and the total in force at 30th June, 1949 was 321,327.

(ii) *Sexes of Age Pensioners—States.* Of the age pensioners at 30th June, 1949, 112,803 (or 35 per cent.) were males, and 208,524 (or 65 per cent.) were females. Details for each State are as follows :—

AGE PENSIONERS : SEXES OF PENSIONERS AT 30th JUNE, 1949.

State.	Males.	Females.	Total.	Masculinity.(a)
New South Wales (b)	48,194	83,747	131,941	57.55
Victoria	26,178	55,575	81,753	47.10
Queensland	16,086	27,598	43,684	58.28
South Australia (c)	9,377	19,881	29,258	47.16
Western Australia	9,019	14,720	23,739	61.28
Tasmania	3,949	7,003	10,952	56.40
Total—30th June, 1949	112,803	208,524	321,327	54.09
„ 1948	105,674	197,180	302,854	53.59

(a) Number of males to each 100 females.

(b) Includes Australian Capital Territory.

(c) Includes Northern Territory.

(iii) *Age and Conjugal Condition of Age Pensioners.* The recorded ages of the 43,785 persons (16,699 males and 27,086 females) to whom age pensions were granted during the year 1948-49 varied considerably, ranging from 7,048 at age 60 to 2 at age 97, but 32,040 were in the 60-70 group. The conjugal condition of these new pensioners was as follows:—Males—single, 2,208; married, 11,315; and widowed, 3,176: Females—single, 3,663; married, 13,098; and widowed, 10,325.

15. *Invalid Pensions.*—(i) *Number in force.* The number of invalid pensioners increased from 73,073 in 1947-48 to 76,056 in 1948-49, an increase of 2,983. Total pensions granted during the year were 11,752 while 7,728 pensions ceased through cancellations or deaths, and 1,041 were transferred to the age pension list.

(ii) *Sexes of Invalid Pensioners—States.* Of the 76,056 persons in receipt of invalid pensions on 30th June, 1949, 40,313 (or 53 per cent.) were males, and 35,743 (or 47 per cent.) were females. Details for each such State are as follows:—

INVALID PENSIONS : SEXES OF PENSIONERS AT 30th JUNE, 1949.

State.	Males.	Females.	Total.	Masculinity.(a)
New South Wales (b)	19,426	16,095	35,521	120.70
Victoria	7,779	7,796	15,575	99.78
Queensland	6,792	5,677	12,469	119.64
South Australia (c)	2,404	2,583	4,987	93.07
Western Australia	2,337	2,003	4,340	116.67
Tasmania	1,575	1,589	3,164	99.12
Total—30th June, 1949	40,313	35,743	76,056	112.79
„ 1948	38,015	35,058	73,073	108.43

(a) Number of males to each 100 females.

(b) Includes Australian Capital Territory.

(c) Includes Northern Territory.

(iii) *Age and Conjugal Condition of Invalid Pensioners.* The recorded ages of the 11,752 persons (7,216 males and 4,536 females) to whom invalid pensions were granted during 1948-49 varied from 16 to 88, 5,377 or 46 per cent. being in the 45-59 years age-group.

The conjugal condition of persons to whom invalid pensions were granted during the year was as follows:—Males—single, 2,270; married, 4,488; and widowed, 458: Females—single, 2,257; married, 1,686; and widowed, 593.

16. *Age and Invalid Pensions : Payments and Annual Liability.*—Separate particulars of the payments to age and invalid pensioners are not available but the total payments in 1948-49 in each State together with the annual liability of each class of pensioner at 30th June, 1949 are shown in the following table:—

AGE AND INVALID PENSIONS : PAYMENTS AND ANNUAL LIABILITY. (£.)

State.	Total Payments Age and Invalid Pensions, 1948-49.(a)	Annual Liability at 30th June, 1949.		
		Age Pensions.	Invalid Pensions.	Total.

South Australia (c)	3,584,978	3,114,258	542,758	3,657,016
Western Australia	2,921,040	2,505,992	461,211	2,967,203
Tasmania	1,513,285	1,133,040	337,349	1,470,389
Total—1948-49	41,693,680	33,920,239	8,159,001	42,079,240
1947-48	36,526,395	28,221,549	6,912,671	35,134,220

(a) Includes amounts paid to Benevolent Asylums and Hospitals for the maintenance of pensioners, and allowances to wives of invalid pensioners.

(b) Includes Australian Capital Territory.

(c) Includes Northern Territory.

17. **Cost of Administration.**—The total cost of administering age and invalid pensions, including allowances to wives of invalid pensioners, was £399,304 in 1948-49 or 0.96 per cent. of the amount paid to pensioners, benevolent asylums and hospitals and for wives' allowances. The corresponding cost in 1947-48 was £309,146 or 0.85 per cent. of the total payments.

The actual sum disbursed in age and invalid pensions in the financial year 1948-49, apart from the cost of administration but including the amount paid to asylums and hospitals for the maintenance of pensioners and allowances to wives of invalid pensioners, was £41,693,680 (£5 6s. 11d. per head of mean population). In 1947-48 it was £36,526,395 (£4 15s. 7d. per head of mean population).

18. **Summary.**—The following table gives details of age and invalid pensions and approximate cost of administration for the five years 1938-39 and 1944-45 to 1948-49 :—

(a) Based on an estimate of the aggregate of males aged 65 and over and females aged 60 and over at 30th June of each year. (b) Includes allowances to wives of invalid pensioners payable from the 8th July, 1943, but excludes funeral benefits in respect of deaths of pensioners, £163,993 in 1944-45; £184,478 in 1945-46; £209,349 in 1946-47; £209,588 in 1947-48 and £252,979 in 1948-49.

§ 3. Maternity Allowances.

1. **General.**—A maternity allowance is payable to a woman who, at the date of giving birth to a child, is residing in Australia or is in Australia and intends to remain. The allowance is payable in respect of a birth which occurs in Australia or on board a ship proceeding from a port in Australia or a Territory of the Commonwealth to another port in Australia or a Territory of the Commonwealth. The allowance is also payable in respect of a birth which occurs on board a ship proceeding to Australia, provided the mother receives no maternity benefit in respect of the birth from the country from whence she came. Payment may be made in respect of the birth of a still-born child, or a child which lives for less than twelve hours, if the period of intra-uterine life of the child was at least 5½ calendar months. There is no means test.

2. **Alien Mothers.**—Payment may be made to an alien mother if she was a British subject prior to her marriage, or if she or her husband resided in Australia for at least twelve months immediately prior to the birth of the child, otherwise payment is deferred until the expiration of twelve months from the date of the mother's arrival in Australia, unless she is likely to remain in Australia.

3. **Aboriginal Natives.**—Maternity allowances may be paid only to those aboriginal natives of Australia who have been granted exemption from State control laws or who, in any State where exemption is not provided for, are considered suitable persons to receive the allowance by virtue of character, standard of intelligence and social development.

4. **Amount Payable.**—From 1st July, 1947, the amount of a maternity allowance has been £15 where there are no other children; £16 where there are one or two other children; and £17 *ros.* where there are three or more other children. "Other children" means children under the age of sixteen years who were in the custody, care and control of the claimant on the date of the birth in respect of which the claim is made. The amount payable is increased by £5 in respect of each additional child born at a birth. Payment of £5 on account of a maternity allowance may be made available, upon application, within a period of four weeks prior to the expected date of birth. The balance is payable immediately after the birth.

5. **Persons Temporarily Abroad.**—Maternity allowances may be paid, under certain conditions, to persons ordinarily resident in Australia who are temporarily abroad.

6. **Summary.**—The following table gives details of the maternity allowance claims paid and rejected and of the amount paid since the inception and for the six years 1938-39 and 1944-45 to 1948-49:—

MATERNITY ALLOWANCES: SUMMARY.

(c) Includes

§ 4. Child Endowment.

1. **General.**—Any person who is resident in Australia and has the custody, care and control of more than one child under the age of 16 years may claim endowment. There is a twelve months' residential requirement in respect of a claimant and a child who were not born in Australia, but this is waived if the claimant and the child are likely to remain permanently in Australia. A child born during the mother's temporary absence from Australia is deemed to have been born in Australia. There is no means test.

2. **Child of Alien Father.**—Endowment may be paid in respect of a child of an alien father if the child was born in Australia, or the mother is a British subject or has made a declaration under Section 18A of the Nationality Act 1920-1940, or the child is likely to remain permanently in Australia.

3. **Aboriginal Natives.**—Endowment may be paid to aboriginal natives of Australia unless they are nomadic or unless the children concerned are wholly or mainly maintained by the Commonwealth or a State.

4. **Rate of Payment.**—The rate of endowment payable to any qualified person (other than an institution) from 9th November, 1948 has been 10s. per week in respect of each child under 16 years of age in excess of one, and to an approved institution (not including a hospital for the insane maintained wholly or mainly by the Commonwealth or a State) 10s. per week for each child inmate under 16 years of age.

5. **Divided Families.**—There is special provision to meet cases of families divided by reason of divorce, separation, unemployment, death of a parent or other circumstances. In these cases endowment may be paid in respect of such children in excess of one, and to such persons, as is considered just.

6. **Persons Temporarily Abroad.**—Endowment may be paid, under certain conditions, to persons ordinarily resident in Australia who are temporarily abroad.

7. **Summary.**—During the year 1948-49, 65,602 claims were granted, cancellations amounted to 31,198 and the number of endowed family group claims in force at 30th June, 1949 was 620,819, an increase of 34,404 during the year. The following table shows particulars of the operations during the year ended 30th June, 1949, and earlier years :—

(a) Includes Australian Capital Territory.

(b) Includes Northern Territory.

In addition to the children endowed in families, child endowment benefits were paid in respect of children in approved institutions during 1944-45 to 1948-49 as follows : 1944-45, 18,116; 1945-46, 18,989; 1946-47, 19,743; 1947-48, 20,580; and in 1948-49 21,305.

In 1948-49 the cost of administration was £206,241 or 0.85 per cent. of the total payments made, compared with £173,607 or 0.89 per cent. in 1947-48.

8. **Number of Children.**—The following table shows the number of claims in force, the number of endowed children and the number of unendowed children in endowed families, classified according to the number of children in the family :—

CHILD ENDOWMENT : NUMBER OF CHILDREN(a) AT 30th JUNE, 1949.

(a) Under 16 years of age.

§ 5. Widows' Pensions.

1. **General.**—Widows' pensions and the rates in each class, as from 12th October, 1948, have been payable to the following classes of women :—

Class "A"—A widow who has the custody, care and control of one or more children under the age of 16 years. Rate £123 10s. per annum.

Class "B"—A widow, not less than 50 years of age, who has no children under 16 years of age in her custody, care and control. Rate £96 4s. per annum.

Class "C"—A widow, under 50 years of age, who has no children under the age of 16 years in her custody, care and control, but is in necessitous circumstances within 26 weeks after the death of her husband. Rate £2 2s. 6d. per week for not more than 26 weeks.

Class "D"—A woman whose husband has been serving a term of imprisonment for at least six months, if she has the custody, care and control of one or more children under the age of 16 years or is not less than 50 years of age. Rate £96 4s. per annum.

The term "widow" includes :—a "dependent female" (i.e. a woman, who, for not less than three years immediately prior to the death of a man, was wholly or mainly maintained by him as his wife on a permanent and *bona fide* domestic basis); a deserted wife (i.e. a woman deserted by her husband for not less than six months); a divorcee (i.e. a woman whose marriage has been dissolved and who has not remarried); and a woman whose husband is an inmate of a hospital for the insane.

The residential qualification is five years' continuous residence in Australia immediately prior to the date of lodgment of the claim. Concessions in respect of absences are the same as for age pensions.

2. **Persons Disqualified.**—A widow's pension is not payable to :—an alien (except a woman who, prior to marriage, was a British subject); a woman who is in receipt of an age or invalid pension, or a war widow's pension under the Australian Soldiers' Repatriation Act in respect of the death of her husband; a woman who has deprived herself of property or income in order to qualify for a pension; a deserted wife or a divorcee who has not taken reasonable action to obtain maintenance from her husband or former husband; a woman who is not of good character; a woman who is not deserving of a pension; a woman in Class "A" in receipt of income of £201 10s. per annum or more or owning property, apart from her permanent home and other exempt property, to the net value of more than £1,000; or a woman in Classes "B" or "D" in receipt of income of £174 4s. per annum or more or owning property, apart from her permanent home and other exempt property, to the net value of more than £750.

3. **Aboriginal Natives.**—Widows' pensions may be granted to aboriginal natives of Australia under the same conditions as age pensions.

4. **Effect of Income.**—Permissible income is £78 per annum. Any income in excess of this amount is deducted from the pension. "Income" has the same meaning as for age pensions. Any amount in excess of 15s. per week received by a deserted wife or a divorcee from her husband or former husband in respect of the maintenance of a child is taken into account in the claimant's income for pension purposes.

5. **Effect of Property.**—The rate of pension for women in Classes "B" and "D" is reduced by £1 per annum for every complete £10 of that portion of the net value of property which exceeds £100 but does not exceed £450, and by £1 per annum for every complete £7 of the remainder (if any) of the net value of the property up to £750. Property disregarded in determining eligibility for pension is the same as for age pensions.

6. **Claimants Receiving War Pension.** A widow is not permitted to receive, in respect of the death of her husband, both a war widow's pension under the Australian Soldiers' Repatriation Act and a civil widow's pension. Other widows, however, may receive a civil widow's pension in addition to a war pension, but the total amount payable in

respect of the two pensions must not exceed £188 10s. per annum in the case of a Class "A" widow or £162 10s. per annum in the case of a widow coming within Classes "B", "C" or "D". Where the war pension and the widow's pension together exceed the limit applicable, the widow's pension is reduced by the amount of the excess. The widow is permitted to have, in addition, other income to bring her total war pension and widow's pension payments up to the appropriate limit of income plus pension, £201 10s. per annum for a Class "A" widow, £174 4s. for a Class "B" or "D" widow.

7. **Payment of Class "A" Pension for Children Continuing Education.**—The pension payable to a Class "A" widow may be continued after her child attains the age of 16 years if the child goes on with full-time education at a school or university and is still dependent on the widow and is not in employment. These conditions apply until the child reaches the age of 18 years.

8. **Summary.**—The number of widows' pensions current at 30th June, 1949 was :—Class "A", 17,891; Class "B", 25,127; Class "C", 117; Class "D", 116; total, 43,251, and the amount paid during 1948-49 was £4,388,468. The following table shows details of widows' pensions paid in each State in the year 1948-49 and for Australia for each of the years 1944-45 to 1948-49 :—

(a) The Commonwealth Government commenced to pay widows' pensions from 1st July, 1942.

(b) Excludes eleven (1948-49), six (1947-48), thirteen (1946-47), ten (1945-46), nine (1944-45) pensions in respect of pensioners in Benevolent Asylums.

(c) Payments were four-weekly up to the 24th June, 1947 pay.

(d) Based on mean population for the financial year.

(e) Includes Australian Capital Territory.

(f) Includes Northern Territory.

§ 6. Unemployment and Sickness Benefits.

1. **General.**—From 1st July, 1946, men over 16 and under 65 years of age, and women over 16 and under 60 years of age, have been eligible to apply for an unemployment benefit or a sickness benefit. There is a twelve month's residential requirement but this is waived if the claimant is likely to remain permanently in Australia. A person in receipt of an age, invalid or widows' pension, or a service pension (as distinct from a war pension) under the Australian Soldiers' Repatriation Act is ineligible to receive a benefit.

2. **Unemployment Benefit.**—To qualify for an unemployment benefit a person must establish that he is unemployed and that his unemployment is not due to his being a direct participant in a strike; that he is capable and willing to undertake suitable work; and that he has taken reasonable steps to obtain such work.

3. **Sickness Benefit.**—To qualify for a sickness benefit a person must establish that he is temporarily incapacitated for work by reason of sickness or accident and that he has thereby suffered a loss of salary, wages or other income.

4. **Married Women.**—A married woman is not qualified to receive a sickness benefit if it is reasonably possible for her husband to maintain her. Where her husband is able to maintain her only partially, a benefit may be paid at such rate as is considered reasonable in the circumstances.

5. **Aboriginal Natives.**—A benefit may be paid only to those aboriginal natives of Australia who are considered suitable, by reason of character, standard of intelligence and social development, to receive payment.

6. **Maximum Rates of Benefits and Income.**—The maximum weekly rates of benefit and permissible income are as follows:—

MAXIMUM RATES OF BENEFITS AND INCOME.

(s. d.)

Age and Conjugal Condition.	Maximum Weekly Benefit.				Permissible Income.
	Claimant.	Dependent Spouse.	Child.	Total.	
Unmarried—					
16 years and under 17 years	15 0	15 0	5 0
17 " " " 18 "	15 0	15 0	10 0
18 " " " 21 "	20 0	20 0	15 0
21 years and over ..	25 0	25 0	20 0
Married	25 0	20 0	5 0	50 0	20 0

Where an unmarried claimant has the custody, care and control of a child under the age of sixteen years, the total income may be increased by 5s. per week.

Additional benefit of up to 20s. per week may be paid in respect of a claimant's housekeeper where no such benefit is payable in respect of his wife, provided there are one or more children under 16 years of age in the house and the woman is substantially dependent on the claimant but is not employed by him.

7. **Means Test.**—Any income in excess of the permissible income shown in the previous table is deducted from the rate of benefit. For unemployment benefit purposes, the income of the claimant and his spouse are taken into account, but where the claimant and his spouse are permanently separated any income received by the spouse may be disregarded. "Income" does not include child endowment, or other payments for or in respect of children, benefits under the Commonwealth Hospital Benefits, Pharmaceutical Benefits and Tuberculosis Acts or an amount paid in reimbursement of medical, dental or similar expenses actually paid. For sickness benefit purposes, there is disregarded £1 per week of any payment received from an approved friendly society or other similar approved body in respect of the incapacity for which sickness benefit is payable.

Where a person qualified for sickness benefit receives or is entitled to receive (in respect of the same period and the same incapacity for which sickness benefit is payable) any payment by way of compensation (including workers' compensation), damages, or otherwise under any law (except payments for which he has contributed), the amount of the compensation, etc., is not taken into account as income but is deducted from the rate of sickness benefit otherwise payable.

8. *Waiting Period.*—There is a waiting period of seven days in respect of which unemployment or sickness benefit is not payable.

9. *Special Benefit.*—A special benefit may be granted to a person not qualified for unemployment or sickness benefit who is not in receipt of an age, invalid or widow's pension or a service pension, if, by reason of age, physical or mental disability or domestic circumstances, or for any other reason, he is unable to earn a sufficient livelihood for himself and his dependants, if any.

10. *Rehabilitation.*—Unemployment and sickness beneficiaries are eligible for participation in the Commonwealth rehabilitation scheme under the same conditions as invalid pensioners. The grant or continuance of an unemployment or sickness benefit may be refused if the claimant or beneficiary, on being required, fails to undergo a medical examination or to receive treatment or undertake training or to do any suitable work.

11. *Statistics, 1947-48 and 1948-49.*—(i) *Claims admitted, Exits, Persons on Benefit.* At 30th June, 1948, 12,411 persons were in receipt of benefit, comprising 1,838 unemployment, 9,940 sickness and 633 special benefits. During the year 1948-49, 83,406 claims were admitted (12,126 unemployment, 68,864 sickness and 2,416 special), whilst 81,762 benefits were discontinued (12,813-unemployment, 66,804 sickness and 2,145 special), leaving 14,055 benefits in force at 25th June, 1949 (1,151 unemployment, 12,000 sickness and 904 special). Particulars of special benefits exclude those granted to new Australians.

The total number of benefits granted and discontinued during the year 1948-49 and persons on benefit at the beginning and end of that year, in each class of benefit, are shown in the following table :—

CLAIMS ADMITTED, DISCONTINUANCES AND PERSONS ON BENEFIT, 1948-49 : AUSTRALIA.

§ 7. Reciprocity with New Zealand.

1. **Original Agreement.**—A reciprocal agreement between Australia and New Zealand in respect of invalid and age pensions and the corresponding benefits in New Zealand came into operation from 1st September, 1943 under the provisions of the Invalid and Old-age Pensions (Reciprocity with New Zealand) Act 1943.

2. **Existing Agreement.**—A new agreement between the two countries was signed on 15th April, 1949, and was given effect from 1st July, 1949 by the Social Services (Reciprocity with New Zealand) Regulations. The Invalid and Old-age Pensions (Reciprocity with New Zealand) Act 1943 was repealed from the latter date by the Social Services Consolidation Act 1949.

The new agreement covers age, invalid and widows' pensions, child endowment and unemployment and sickness benefits in Australia and the corresponding benefits in New Zealand. It provides a new basis of entitlement for reciprocal benefits which is, broadly speaking, that citizens of one country who take up permanent residence in the other country shall be entitled to the social service benefits of the new country on the same basis as citizens of that country. For this purpose residence in New Zealand is regarded as residence in Australia (and *vice versa*); a person born in New Zealand is regarded as a person born in Australia (and *vice versa*); and permanent incapacity or blindness which occurred in New Zealand is treated as if it had occurred in Australia (and *vice versa*).

Persons going from one country to the other for temporary residence continue to receive any benefits which they have been receiving in their own country. The home country continues to provide the benefits during these temporary periods, but the payments are made, on an agency basis, by the country in which the person is temporarily resident.

B. OTHER SERVICES.

§ 1. Benevolent and Destitute Asylums.

1. **General.**—The public provisions for the care of indigent old people have been a feature of the social development of recent years in most countries. Numerous establishments exist in Australia for the housing and protection of persons no longer able to provide for themselves. These institutions are supported by Government and municipal aid, public subscriptions, bequests, etc.; while in many cases relatives of poor and afflicted persons contribute to their maintenance.

An entirely satisfactory statistical tabulation in regard to all forms of charitable aid is especially difficult in the case of benevolent institutions, because the services provided by these institutions are not always identical.

2. **Principal Institutions.**—Particulars respecting the accommodation and the number of inmates of the principal institutions were published in earlier issues of the Official Year Book (*see* No. 22, p. 485).

3. Revenue and Expenditure.—Details regarding revenue and expenditure for the year 1947-48 are given in the following table :—

BENEVOLENT ASYLUMS : REVENUE AND EXPENDITURE, 1947-48.

(£.)

 (b) Includes £18,992 in Victoria, £11,980 in Queensland, £109 in South Australia and £2 in Western Australia, covering such items as purchases of land, cost of new buildings and additions to buildings.

§ 2. Orphanages, Industrial Schools, etc.

1. **General.**—The methods of caring for orphans and neglected children differ extensively, inasmuch as some of the children are more or less segregated in orphanages and industrial schools, while others are boarded-out with their mothers or female relatives or with approved foster-mothers. The children in orphanages and similar institutions may receive, in addition to primary education, some craft training. In all cases employment is found for the children on their discharge from the institution, and they remain for some time under the supervision of the proper authorities. The conditions under which orphans, neglected children and children boarded-out live are subject to frequent departmental inspections.

2. **Principal Institutions.**—Particulars concerning the principal institutions in each State were published in earlier issues of the Official Year Book (*see* No. 22. p. 486).

3. **Transactions of State Departments.**—The following table summarizes the transactions of State Departments during 1947-48, in connexion with children under their control or supervision. In addition to neglected children, the figures include

uncontrollable and convicted children who are wards of a Government authority, as well as poor children whose parents obtain assistance from the Government without giving up the legal right of custody:—

(a) Year ended 31st December, 1947.
4,989 children in receipt of ration relief.

(b) Includes inmates of hospitals.

(c) Includes

The total expenditure on children's relief in the foregoing table shows considerable variation amongst the States owing to the different methods of treating assistance to mothers with dependent children. In South Australia, Western Australia and Tasmania large amounts have been excluded from the total expenditure on this account owing to the difficulty of obtaining separate amounts for allowances made in respect of the dependent children only.

§ 3. Protection of Aborigines.

For the protection of the aboriginal Australian race there are institutions, under the supervision of Aborigines Boards, where these people are housed and encouraged to work, the children receiving elementary education. The work is usually carried on at mission stations, but many of the natives are nomadic, and receive food and clothing when they call, whilst others but rarely come near the stations. The native race is extinct in Tasmania. The expenditure from Consolidated Revenue in 1947-48 was as follows; figures in brackets are for year 1946-47 :—New South Wales, £68,952 (£57,588); Victoria, £6,464 (£6,077); Queensland, £184,838 (£154,656); South Australia, £41,752 (£40,862); Western Australia, £102,915 (£85,001); Northern Territory, £45,792 (£39,303); Australian Capital Territory, £1,140 (£575); total for Australia, £451,853 (£404,092). At a census of aborigines taken at 30th June, 1944 in all States except New South Wales the number of full-blood and half-caste aborigines living in supervised camps was as follows (particulars for New South Wales as at 30th June, 1941 have been added) :—

ABORIGINES IN SUPERVISED CAMPS, 30th JUNE, 1944.

Particulars.	New South Wales. (a)	Victoria.	Queensland.	South Australia.	Western Australia.	Northern Territory.	Total. (b)
Full-bloods ..	373	18	4,298	726	4,450	8,361	18,227
Half-castes ..	4,114	229	2,271	1,118	1,698	449	9,980

(a) At 30th June, 1941.

(b) Includes one full-blood and 101 half-castes in the Australian Capital Territory.

Particulars regarding the total number of aborigines in each State will be found in Chapter XIII. "Population".

§ 4. Royal Life Saving Society.

In each of the State capitals, "centres" of the Royal Life Saving Society have been established, and in some States sub-centres have also been established in the larger provincial districts. In 1934 an Australian Federal Council of this Society was formed with head-quarters at Melbourne, and each State centre, or branch, as it is now called, is controlled by the new organization. Saving of life from drowning and other forms of asphyxiation is the object of the Society, and its immediate aims are (a) educative and (b) remedial. The encouragement of swimming and life-saving in schools, colleges, clubs, etc., will bring about a more widespread knowledge of these necessary matters, and there is increasing provision of life-belts, reels, lines, warning provisions, and other first-aid appliances on ocean beaches, wharves and other suitable places. Numerous certificates of proficiency in various grades are issued annually after examination throughout Australia, the number for the individual States for 1947-48 being :—New South Wales, 8,092; Victoria, 6,516; Queensland, 1,938; South Australia, 758; Western Australia, 1,956; Tasmania, 874; and Fiji, which comes under the control of the Australian Federal Council, 662.

§ 5. Royal Humane Society.

The Royal Humane Society of Australasia has for its objects (a) to grant awards for skill, promptness and perseverance in life-saving, where the rescuer has risked his or her life; (b) to provide assistance in cases of danger and apparent death; (c) to restore the apparently drowned; (d) to collect and circulate the latest information regarding approved methods and apparatus for life-saving. Awards of medals and certificates are made, numbering about 100 annually.

§ 6. Other Charitable Institutions.

Owing to the variety of name and function of other charitable institutions it has been found impracticable to give detailed results. The aid given in kind—food, clothing, tools of trade, etc.—is considerable, whilst the shelter and treatment afforded range from a bed for a night for casual callers in establishments ministering minor charity, to indoor treatment over long periods in those that exist for the relief of the aged and the infirm. The institutions not so particularized include asylums for the deaf, dumb and blind, infant homes, homes for the destitute and aged poor, industrial colonies, night shelters, crèches, rescue homes for females, free kindergartens, auxiliary medical charities, free dispensaries, benevolent societies and nursing systems, ambulance and health societies, boys' brigades, humane and animals' protection societies, prisoners' aid associations, shipwreck relief societies, bush fire, flood and mining accident relief funds, etc.

CHAPTER X.

THE TERRITORIES OF AUSTRALIA.

GENERAL.

The Territories under the control of Australia are: The Northern Territory the Australian Capital Territory; Papua (formerly British New Guinea); Norfolk Island; the Territory of New Guinea (under Trusteeship Agreement with the United Nations); Nauru (under Trusteeship Agreement with the United Nations); the Territory of Ashmore and Cartier Islands; and the Australian Antarctic Territory.

Under the Ashmore and Cartier Islands Acceptance Act 1933 the Commonwealth Government accepted these islands from the British Government. They were administered by Western Australia until July, 1938, when the Act was amended to annex them to the Northern Territory.

The Australian Antarctic Territory, estimated area 2,472,000 square miles of a total area of approximately 5,000,000 square miles for the Antarctic Continent, was established by an Order in Council dated 7th February, 1933, which placed under the control of the Commonwealth of Australia that part of the Territory in the Antarctic Seas which comprises all the islands and territories, other than Adélie Land, situated south of the 60th parallel of south latitude and lying between the 160th and 45th meridians of east longitude. The Territory was accepted by the Commonwealth of Australia on 24th August, 1936, when the Antarctic Territory Acceptance Act 1933 came into force by proclamation issued by the Governor-General.

The results of the census of the Territories at 30th June, 1947, may be found in the separate Census bulletins and parts published by this Bureau.

In the Territories of Papua, Norfolk Island and Nauru. Australian currency is used. In the Territory of New Guinea, however, local coins consisting of silver shillings, cupro-nickel sixpences and threepences, and bronze pennies are used, supplemented by Australian currency.

THE NORTHERN TERRITORY.

§ 1. Post-war Activity.

By June, 1948, the Northern Territory had almost returned to normal following the 1939-45 War. New plans for expansion and development led to considerable activity throughout the Territory. Intensified interest overseas stimulated a general programme of expansion in the pastoral, mining and other industries. A plan for a new town on the existing site of Darwin was approved and building was commenced almost immediately. There was an influx of skilled and unskilled workers into Darwin to engage in work connected with the town plan, and departmental staffs increased. By this time, the population of Darwin exceeded 5,000.

For information regarding the return of civil activity in Darwin, see *Official Year Book No. 37*, p. 326.

§ 2. Area and Population.

1. *Area*.—Upon the extension of New South Wales westward to the 129th meridian in 1825, the Northern Territory was incorporated in that colony, but in 1863 was annexed by Royal Letters Patent to the province of South Australia. With the adjacent islands it was transferred to the Commonwealth on 1st January, 1911. The total area is 523,620 square miles, or 335,116,800 acres—about six times as large as Victoria.

2. *Population*.—(i) *Europeans*. At the census taken in 1881 there were only 670 Europeans in the Territory. The number increased slowly, reaching 3,767 persons in 1918. At the census of 1933 the white population had decreased to 3,306. This number, however, was 34.5 per cent. greater than the figure at the census of 1921. At the census of 1947 it had risen to 9,116, an increase of 176 per cent. on the 1933 figures.

(ii) *Non-Europeans*. The number of full-blood non-Europeans, excluding Australian aboriginals, in the Northern Territory on 30th June, 1947 was 388, of whom 250 were Chinese, the remainder being mainly Filipinos (47), Fijians (23), Japanese (21), and Malays (20). There were at one time over 4,000 Chinese in the Territory.

The half-caste population recorded at the census of 1947 numbered 1,364, of whom 1,247 were half-caste Australian aboriginals. Corresponding figures at the 1933 census were, respectively, 800 and 743.

(iii) *Total Population*. The estimated population at 31st December in each of the years 1939 and 1944 to 1948, revised in accordance with the results of the 1947 census, is given in the following table :—

NORTHERN TERRITORY : POPULATION (EXCLUDING FULL-BLOOD ABORIGINALS).

31st December.			Males.	Females.	Total.
1939	5,136	2,151	7,287
1944	7,235	3,242	10,477
1945	7,252	3,294	10,546
1946	7,263	3,379	10,642
1947	7,403	3,588	10,991
1948	8,065	4,429	12,494

The population at the Census of 30th June, 1947, was 7,378 males and 3,490 females, total 10,868.

(iv) *The Aboriginals*. The total number of full-blood aboriginals at 30th June, 1948, was estimated at 14,000, of whom approximately 3,000 were in regular employment. Part-aboriginals numbered about 2,000. There are fifteen "aboriginal" reserves, comprising an area of approximately 70,000 square miles. (*See also* Chapter XIII, "Population".)

§ 3. Legislation and Administration.

On 1st January, 1911, the Territory was transferred by South Australia to the Commonwealth. The terms are outlined in Official Year Book No. 15, p. 940. By the Northern Australia Act 1926, the Territory was divided into two parts, Central Australia and North Australia, separated by the 20th parallel of south latitude, each administered by a Government Resident. In addition, Advisory Councils and a Development Commission were provided for. The Act of 1926 was repealed by the Northern Territory (Administration) Act 1931. The administration of the Territory was placed in the hands of an Administrator, residing at Darwin, assisted by a Deputy

Administrator, residing at Stuart (Alice Springs). The designation of the latter office was later changed to that of District Officer. The Governor-General was empowered to make ordinances having the force of law in and in relation to the Territory, subject to disallowance by either House of the Commonwealth Parliament (repealed by 1947 amendment).

An amendment to the Northern Territory (Administration) Act, assented to in June, 1947, enabled the Northern Territory to set up a Legislative Council. The Council consists of the Administrator, seven official members (nominees of the Administrator) and six members elected from five districts (two from Darwin district). The normal term of office of the elected members is three years. The Council is able to make ordinances for the Territory, but it must submit each one to the Administrator for assent. The Administrator may, or may not, assent, or he may refer the ordinance to the Governor-General. The Governor-General may also disallow any ordinance assented to by the Administrator within six months from the date of assent. Ordinances that (1) grant or dispose of Crown lands, (2) make leases or grants of land or money, donations or gratuities to the Administrator, or (3) relate to aborigines or aboriginal labour, must contain a clause suspending their operation until the signification of the Governor-General's pleasure thereon. All ordinances must be laid before Parliament after assent. Money votes may be proposed in the Council only by the Administrator himself, or by his permission or direction.

The Territory elects a member to the House of Representatives, who may take part in debates, but may not vote, except on a motion for the disallowance of any ordinance of the Northern Territory or on any amendment of any such motion.

§ 4. Physiography.

1. **Tropical Nature of the Country.**—The Territory is within the torrid zone, with the exception of a strip $2\frac{1}{2}$ degrees wide which lies south of the Tropic of Capricorn.

2. **Contour and Physical Characteristics.**—The low flat coast-line seldom reaches a height of 100 feet. Sandy beaches and mud flats, thickly fringed with mangroves, prevail. Sandstone, marl and ironstone form the occasional cliffy headlands. The sea frontage of more than 1,000 miles is indented by bays and inlets and intersected by numerous rivers, many of which are navigable for considerable distances from their estuaries.

The principal features of the coast-line are enumerated in Official Year Book No. 1, p. 66; the rivers in No. 2, p. 76; the mountains in No. 3, p. 67; the lakes in No. 4, pp. 77, 78; the islands in No. 5, pp. 71, 72; and the mineral springs in No. 6, p. 65.

Inland, the country generally is destitute of conspicuous landmarks. From the coast there is a general rise southwards to the vicinity of the 17th or 18th parallel of south latitude, where the higher lands form the watershed between the rivers that flow northwards to the sea and those that form the scanty supply of the interior systems. Towards the centre of the continent the land over a wide area is of considerable elevation, and there are several mountain ranges, generally with an east and west trend.

§ 5. Climate, Fauna and Flora.

1. **The Seasons.**—There are two main climatic divisions—the wet season, November to April, and the dry season, May to October, with uniform and regular changes of weather. Nearly the whole of the rainfall occurs in the summer months. Fuller particulars appear in Official Year Book No. 6, p. 1116.

2. **Fauna.**—The ordinary types of native Australian fauna inhabit the Territory. As elsewhere on the continent, the higher *Theria* are rare, but marsupials, birds, crocodiles, fresh-water turtles, snakes (mostly non-venomous) and frogs abound. There are many varieties of freshwater fish and littoral mollusca. Butterflies and beetles are strongly represented. The white ant is a pest, anthills in the Territory sometimes

attaining great dimensions. Mosquitoes and sandflies are very troublesome, particularly in the wet season. Native fauna are in some cases protected. Buffalo formerly existed in large herds, but their number has been greatly reduced by indiscriminate shooting. Buffalo shooting is now controlled.

3. *Flora*.—The vegetation is North Australian in type, but a number of the forms belong to the Malayan and Oceanic regions. The timber trees are not of great commercial value, but in the coastal regions tropical vegetation grows luxuriously to the water's edge. In the north, cypress pine, bloodwood and paperbark timbers are now cut and milled for local building purposes. These three timbers are resistant to termites. On the wide expanses of plain country in the interior there is little vegetation, the principal orders represented being:—*Euphorbiaceae*, *Compositae*, *Convolvulaceae*, *Rubiaceae*, *Goodenoviaceae*, *Leguminosae*, *Utricaceae*.

Fuller particulars regarding fauna and flora are given in Official Year Book No. 6, pp. 1116-7.

§ 6. Production.

1. *Agriculture*.—Up to the present agriculture has made little progress in the Territory, although it has been proved that rice, tobacco, coco-nuts, mangoes, bananas, cotton, various fodder plants, and peanuts can be successfully grown. Expense of harvesting is, at present, an obstacle to the economic production of rice, and until labour-saving machinery is procured it cannot be produced with profit. There is a large stretch of first-class coco-nut land on the coast, but hitherto planting has not been attempted on a commercial scale. For the encouragement of primary production a Primary Producers' Board was established in 1931. After the end of the 1939-45 War, returned servicemen and others began to grow with some initial success vegetables, fruit and other crops in the Darwin environs and as far south as Katherine. Vegetables grown were of consistently good quality and found ready local markets. In 1949 a group of Queensland farmers began an experiment in large-scale sorghum growing near Newcastle Waters. It was expected that results would be known by May, 1950, when the first harvest was due.

2. *Pastoral Industry*.—The pastoral possibilities of certain parts of the Northern Territory were recognized at an early date, and in 1866 stock was brought into the Macdonnell Range country from South Australia. Six years later cattle were moved from Queensland to the northern parts of the Territory, and in 1879 Giles reached the Katherine River with 2,000 head of cattle and 12,000 sheep from South Australia. For various reasons sheep-raising did not succeed. The cattle industry, however, progressed steadily.

Cattle exported during 1947-48 numbered 113,181—58,953 to Queensland, 41,225 to South Australia, and 13,003 to Western Australia. Sheep exported totalled 1,478—all to South Australia. Importations of live-stock were:—bulls, 572; other cattle, 2,770; stallions, 4; other horses, 339; rams, 20; other sheep, 2,445.

The estimated number of live stock in the Territory at the end of the years 1939 and 1944 to 1948 is given in the table hereunder:—

NORTHERN TERRITORY: LIVE STOCK.

31st December—	Horses.	Cattle.	Sheep.	Pigs.	Goats.	Camels.	Donkeys.	Mules.
1939	32,721	922,581	38,587	483	20,335	331	1,443	366
1944	31,803	984,370	29,269	146	11,384	284	1,167	426
1945	31,883	960,039	18,561	407	12,810	298	1,275	471
1946	30,019	972,990	28,005	208	11,914	296	1,621	513
1947	32,318	991,429	19,058	680	15,260	193	1,232	632
1948	33,197	1,052,811	25,791	384	14,045	173	1,192	609

3. **Hides and Skins.**—The number of hides and skins exported from the Territory during 1947-48 was as follows:—buffalo, 8,250; cattle, 3,905; sheep, 2,694; crocodile, 1,271; horse, 11; and goat, 9. In addition, a considerable number of kangaroo skins were exported, but exact figures are not available.

4. **Mining.**—(i) *General.* Alluvial gold-digging in the Northern Territory commenced in 1869, and up to the end of 1880 gold to the value of £79,022 had been produced. In 1881 gold production from alluvial deposits reached its maximum, the value for that year being £111,945. During the following years it fluctuated considerably but as long as the alluvial deposits lasted the output was satisfactory. In the transition period from alluvial to reef mining the industry declined considerably. The production of metals other than gold has suffered on account of the vagaries of prices, and the high cost of transport and of white labour. Owing to the exceptionally high price, the search for gold was stimulated and production increased annually from 1931 to 1940, but decreased thereafter owing to lack of manpower occasioned by the war. Since the end of the war, production has recovered rapidly. The Warramunga Goldfield, of which Tennant Creek is the centre, has been the principal producing goldfield and gives every indication of increasing production for a number of years. The necessity for satisfying Australian requirements of mica of strategic quality led to the regional development of the Harts Range mica fields, where roads and water supplies, hitherto unknown in this part of the Territory, were made and established, and as a result, the mica fields were better exploited in the war years. Development has continued under a scheme of Government assistance. Production of wolfram concentrates also continues. The demand for tantalite for radar work and non-corrosive surgical equipment resulted in a production valued at £1,043 in 1943, when the Commonwealth Government purchased concentrates for forwarding to the United States of America. The use of ochre for camouflage paints caused an increase in production from the Rumbalara deposits. Tin concentrates were produced from the Finnis River area and the Marantboy tinfield.

(ii) *Mineral Production.* The following table shows the value of mineral production, for the years 1944 to 1948 compared with 1939:—

NORTHERN TERRITORY : MINERAL PRODUCTION.

(£.)

Year.	Gold.	Tin Concentrates.	Ochre.	Copper Ore.	Mica.	Wolfram.	Tantalite.	Total Value all Minerals. (a)
1939 ..	163,414	4,487	607	2,248	15,539	58,183	..	244,478
1944 ..	57,803	2,086	5,090	1,878	26,621	31,583	962	120,025
1945 ..	76,811	5,026	2,078	3,812	44,955	42,937	578	176,197
1946 ..	105,376	3,228	1,983	6,282	27,969	21,696	..	166,543
1947 ..	118,563	4,698	2,564	..	62,547	41,020	45	229,437
1948 ..	163,482	12,055	2,374	7,370	75,816	30,780	889	294,173

(a) Includes bismuth—£2 in 1944 and £9 in 1946; and silver-lead ore—£1,407 in 1948.

The value of all minerals produced to the end of 1948 was approximately £6,366,000.

In 1934 the Governments of the Commonwealth and the States of Queensland and Western Australia agreed to co-operate in the conduct of a geological and geophysical survey of certain areas in the northern parts of Australia, including the Northern Territory. More detailed reference to the survey, which was completed in 1940, appears in Official Year Book No. 35, page 744.

5. **Pearl and Other Fisheries.**—In 1884 mother-of-pearl-shell was discovered in the harbour of Port Darwin. Difficulty in working, principally through heavy tides and muddy water, retarded the development of the industry for many years. The production of pearl-shell has declined rapidly since 1937-38. The production for 1939-40 amounted to only 179 tons, valued at £14,350, compared with 804 tons, £67,000, in 1937-38 and

410 tons, £31,500, in 1938-39. In view of the importance of the industry it was included in the terms of reference of the Northern Australia Development Committee. A conference was held in Melbourne in March, 1946, between representatives of the Western Australia pearl-shell industry, the Northern Territory Administration, the Western Australian and Commonwealth Governments, as a pearling sub-committee, which reported and made recommendations to the Northern Australia Development Committee. The sub-committee considered the following matters—labour, boats and equipment, financial assistance, the marketing problem and economic survey, institution of administrative arrangements and biological investigations. The recommendations were placed before the Minister for the Interior by the Northern Australia Development Committee. On the question of labour the Committee recommended that approval be given for the admittance to Australia of indentured men while the possibility of training and employing alternative labour was being investigated, and suggested that the whole position should be reviewed in five years. The depleted condition of the known beds and the depressed market were responsible for fewer Japanese vessels competing with local vessels during 1939-40.

In 1947-48, eleven vessels resumed fishing for pearl-shell. Inexperienced crews and initial difficulty in locating good deposits of shell are given as the reasons for a disappointing return—45 tons to December, 1948. Owing, however, to the high price (up to £600 per ton for first grade shell) offering at that time, the value of the catch is estimated at £22,500. An agreement between master pearl-ers and oversea buyers, in 1949, fixed the top price for first grade shell at £325 per ton for the next three years. This represents a drop of £150 to £200 per ton on the 1947-48 price.

Darwin continues to provide a firm and ready local market for fish. The lack of suitable refrigerating plants on the fishing-boats is responsible for the deficiency of regular supplies of fish except in limited quantities obtained from traps close to the town.

§ 7. Land Tenure.

1. **General.**—A description of the system of land tenure in force in the Territory in 1928 was given in Chapter V. "Land Tenure and Settlement", Official Year Book No. 22. This description has been brought up-to-date in the following three paragraphs.

2. **Pastoral, Agricultural, etc., Leases.**—(i) *Pastoral Leases.* A pastoral lease may be granted for such term, not exceeding 42 years, as the Administrator determines. The rental for the first period is fixed by the Administrator, and is subject to re-appraisal on such dates as are specified in the lease or as are prescribed. Upon application by a lessee who proposes to develop his lease extensively, the Administrator may grant special terms and conditions to enable the development of the lease, and may grant an extension of the lease for a term not exceeding 30 years.

(ii) *Pastoral Development Leases.* These leases may be granted for periods up to 50 years and may be subject to special conditions in order to secure the development of the land.

(iii) *Agricultural Leases.* Agricultural lands are classified, and the maximum area which may be included in any one lease is as follows :—Division A, Cultivation Farms, Class 1, 1,280 acres, Class 2, 2,560 acres : Division B, Mixed Farming and Grazing, Class 1, 12,800 acres, Class 2, 38,400 acres. Agricultural leases are granted in perpetuity, and the rent for the first period is fixed by the Administrator, and is re-appraised every 21 years. The lessee must—(a) in the case of lands for mixed farming and grazing, stock the land to the extent prescribed by the regulations and keep it so stocked ; (b) establish a home within 2 years and reside on the leased land for 6 months in each year in the case of land for cultivation, and for 4 months in each year in the case of land for mixed farming and grazing ; (c) cultivate the land to the extent notified by the Administrator ; and (d) fence the land as prescribed.

(iv) *Leases of Town Lands.* Except in Darwin, leases of town lands are granted in perpetuity, the rental being fixed every 14 years. Such leases must, in the first instance, be offered for sale by public auction, and if not so sold, may be allotted by the Administrator to any applicant, at the rental fixed by the Administrator. The lessee must erect, within such time as is notified, buildings to the value specified in the conditions of sale. Leases in the town of Darwin are granted for periods up to 99 years under the Darwin Town Area Leases Ordinance 1947. Short-term leases of up to 5 years' duration are also granted in the Darwin area under the Darwin Short-term Leases Ordinance 1946.

(v) *Miscellaneous Leases.* The Administrator may grant a lease of any portion of Crown lands, or of any dedicated or reserved lands, for any prescribed or approved purpose. Such leases are for a term not exceeding 21 years, and may be offered for sale by public auction, or granted to an applicant at an annual rental fixed by the Administrator.

(vi) *Leases of Garden Lands.* Leases of garden lands may be granted over areas within 10 miles of a town, provided the Administrator has declared the area as garden lands.

(vii) *Grazing Licences.* Licences may be granted to graze stock on Crown lands for such period, not exceeding one year, as is prescribed, and at the rent and on the conditions specified.

(viii) *Occupation Licences.* Licences may be granted for any period not exceeding 5 years, and on specified rentals and conditions, for the purpose of drying or curing fish, or for any manufacturing or industrial purpose, or for any prescribed purpose.

(ix) *Miscellaneous Licences.* The Administrator may grant licences for miscellaneous purposes for a period not exceeding 12 months on prescribed terms and conditions.

(x) *Leases to Aborigines.* The Governor-General may grant to any aboriginal native, or to the descendant of any aboriginal native, a lease of Crown lands not exceeding 160 acres for any term of years upon such terms and conditions as he thinks fit.

3. *Mining Leases, etc.*—(i) *General.* Mining generally is governed by the Mining Ordinance 1939–1947, and special Ordinances have been promulgated by the Commonwealth respecting mining for mineral oil and coal, encouragement of mining, inspection and regulation of mining and inspection of machinery.

(ii) *Holdings under Miners' Rights.* The fee for a miner's right is 5s. for 12 months from the date of issue, and a holder thereof is entitled to occupy Crown lands for mining purposes, to construct races, to divert water, to reside on his holding, etc.

(iii) *Gold-mining Leases.* The area of a gold-mining lease must not exceed 20 acres, and the term is 21 years, renewable for a further 21 years. The rent is 2s. per acre per annum. A royalty of 3d. in the £ on the gross value of all gold and minerals won must be paid, and leases must be worked constantly by not less than 2 men for the first 12 months and thereafter by not less than 1 man for every 5 acres with a minimum of 2 men, unless exemption is obtained.

(iv) *Mineral Leases.* Mineral leases may be granted in blocks not exceeding 40 acres each. A mineral lease is issued for the same term as a gold-mining lease, with similar right of renewal. The rent is 1s. per acre per annum, and the royalty on minerals is the same as in the case of a gold-mining lease, except that payment was suspended as a war-time measure, and such temporary suspension still obtains.

(v) *Dredging Claims.* These claims may be granted for dredging for gold or minerals at a rental of 2s. per acre per annum. The maximum area of each claim must not exceed 300 acres, and 6 months after registration the holder must employ continuously on the claim not less than 3 men and fully manned machinery valued at not less than £1,000.

(vi) *Mineral Oil and Coal Licences.* A licence to search for mineral oil or coal, or for both, may be granted over an area not exceeding 1,000 square miles for a period of 5 years on payment of an annual fee of £10. At least 4 white men must be employed for not less than 6 months in each year. A holder of a mineral oil licence who discovers payable mineral oil on the land held under his licence has a preferential right to a mineral oil lease of 160 acres, together with a reward area of 640 acres thereon. A discoverer of coal in payable quantities has a preferential right to an area of 640 acres as a coal lease.

(vii) *Mineral Oil and Coal Leases.* Leases may be granted for a period of 21 years, renewable for a further 21 years, for mining for mineral oil or coal, the maximum areas being (a) for mineral oil, 160 acres; and (b) for coal, 640 acres. In the case of mineral oil and coal, the annual rent is 1s. per acre, and a royalty of 5 per cent. on the gross value of all crude oil obtained is payable; the lessee must also work the land to the satisfaction of the Minister. In the case of coal, the royalty and conditions are fixed by regulation.

(viii) *Business and Residence Areas.* A business area may be granted at the prescribed fee and authorizes the holder to occupy on a gold-field or mineral field, for the purpose of residence and carrying on his business, an area not exceeding 1 acre, provided that when the area is for residence only it shall not exceed one-quarter of an acre.

(ix) *Garden Areas.* The warden may grant market garden areas upon any gold-field or mineral field for the purpose of growing fruit or other garden produce. The conditions as to rent, etc., are as prescribed, but the area of each garden area must not exceed 5 acres.

4. *Areas Occupied, Reserved, etc.*—Areas occupied, reserved and unoccupied at 30th June, 1948, totalled 335,116,800 acres, 455,321 of which were alienated and 157,595,520 leased or held under licence (pastoral, 115,144,320; other tenures 42,451,200). Reserves amounted to 45,451,833 acres, and 131,614,126 acres were unoccupied and unreserved. Land revenues collected for the year amounted to £35,929.

§ 8. Commerce, Shipping and Air Services*.

1. *Trade.*—No record is kept of the trade between the States and the Territory. The value in Australian currency of the direct oversea imports and exports for 1901 and for the years 1938–39, 1940–41, 1941–42 and 1945–46 to 1947–48 is given hereunder:—

NORTHERN TERRITORY: OVERSEA IMPORTS AND EXPORTS.

(£.)

Items.	1901.	1938–39.	1940–41.	1941–42. (a)	1945–46.	1946–47.	1947–48.
Imports	37,539	36,831	106,079	175,211	196,714	89,204	277,779
Exports	29,191	12,729	24,865	13,341	221,406	17,098	73,239

(a) July to April.

2. *Shipping.*—The Territory is dependent for its shipping facilities chiefly on the services of vessels trading between the Eastern States and Singapore. In addition to pearlers and other small craft, larger vessels make occasional visits, while a periodic service between Fremantle and Darwin is carried out by vessels belonging to or under charter to the Western Australian State Shipping Service. The following figures show

* Owing to the war the port of Darwin was closed as a Customs station from April, 1942—when Customs officers were withdrawn—till July, 1945, and for this period no details of trade and of shipping movements are available for the port, which remained purely military in character and under the control of the Defence authorities.

the number and net tonnages of oversea and interstate vessels which entered at and cleared from the port of Darwin during the years 1938-39, 1940-41, 1941-42 and 1945-46 to 1947-48 :—

NORTHERN TERRITORY : SHIPPING.

Year.	Entered.		Cleared.	
	No. of Vessels.	Net Tonnage.	No. of Vessels.	Net Tonnage.

1945-46	9	31,164	8	25,347
1946-47	23	50,890	23	48,136
1947-48	28	54,067	29	55,854

(a) July to April.

3. **Air Services.**—Darwin is the first port of arrival in Australia for virtually all planes from Europe and Asia. Qantas Empire Airways Ltd. (under contract to the Commonwealth Government) operates, through Darwin, a Sydney-Singapore-London passenger service four times a week; a freight service to London once monthly; a passenger-freight service to Hong Kong once monthly; and a regular courier service to Japan. British Overseas Airways Corporation operates a London-Singapore-Sydney service four times weekly, and Australian National Airways, in conjunction with Air-Ceylon, operates a service to London once monthly. Both these services call at Darwin. Regular inland services calling at Darwin are Trans-Australia Airlines (Adelaide-Darwin and Brisbane-Darwin), and MacRobertson-Miller Aviation, which runs a regular service between Darwin and Perth. Now established as a first-class international airport, Darwin is also visited by aircraft from many other overseas airlines, besides privately-owned machines. For further information see Chapter V.—Transport and Communication, H. Aviation.

§ 9. Internal Communication.

1. **Railways.**—Under the agreement made between the Commonwealth and the State of South Australia for the transfer of the Northern Territory, which was ratified by the Northern Territory Acceptance Act 1910, the Commonwealth was to construct the Northern Territory portion of the transcontinental railway line (connecting Adelaide and Darwin via Port Augusta).

The northern line from Adelaide terminates at Alice Springs, about 192 miles north of the southern boundary of the Territory. The Commonwealth Government acquired on 1st January, 1911, the property in the line from Port Augusta to Oodnadatta (478 miles), and on 1st January, 1926, the control thereof was transferred to the Commonwealth Railways Commissioner. The line from Darwin to Katherine River, about 200 miles, has been extended as far as Birdum, 316 miles from Darwin.

The Clapp plan for the standardization of Australian railways recommended, *inter alia*, the construction of a standard gauge (4 ft. 8½ in.) strategic and developmental railway between Dajarra (Queensland) and Birdum, and the conversion to standard gauge of the Birdum–Darwin line (see Chapter V.—“Transport and Communication,” B. Railways, § 1 General), but not the conversion of the Port Augusta–Alice Springs line nor the construction of a 4 ft. 8½ in. line between Alice Springs and Birdum. Provision for both of the last two projects, however, was included in the Railway Standardization Agreement Act 1946, involving the Commonwealth and the States of New South Wales, Victoria and South Australia. The Birdum–Dajarra project is dependent on the completion of the Queensland section of the general plan.

2. **Roads.**—During the war roads were built connecting Alice Springs with Darwin, and Mount Isa (Queensland) with Tennant Creek. The first of these roads, known as the North–South Road or Stuart Highway, is 950 miles long, and runs via Larrimah and Tennant Creek. The Mount Isa–Tennant Creek Road (Barkly Highway) is 403 miles long. Both were used extensively during the war, the Stuart Highway, in particular, experiencing very heavy and continuous traffic. Since the war, the Stuart Highway has been used continuously as a means of transporting foodstuffs and other supplies to Darwin and northern centres, and is now the main route for overland tourists and travellers from the southern States to Darwin. The introduction of road trains for the rapid transport of fat cattle and other stock to State markets has further proved the value of both the Barkly and Stuart Highways as national assets. Both roads have good water bores and communications. As part of the post-war plan to increase beef production in the Territory a new network of roads is to be constructed and survey work has already commenced (1949).

3. **Posts.**—Postal communication is maintained by a regular service of vessels between the Territory and the Eastern States. In addition, the vessels belonging to the Western Australian State Shipping Service give a periodic service between Fremantle and Darwin. Mail is carried between the capital cities of Australia and Darwin by the airway companies operating in each State. Inland, the northern part of the Territory receives its mail via Darwin or by means of the aerial services, and the southern districts are served via Adelaide.

4. **Telegraphs.**—The transcontinental telegraph line, covering a length of 2,230 miles, was completed on 22nd August, 1872, at a cost of nearly £500,000. The line runs in a northerly direction from Adelaide to Darwin, whence telegraphic communication is provided with Asia and Europe, via Banjoewangie (Java), Singapore and Madras. Between Darwin and Banjoewangie the submarine cable is duplicated.

Long-distance telephone communication between Darwin and the other capital cities of Australia was established after the outbreak of war in the Pacific.

High-power wireless stations have been constructed by the Commonwealth Government at Wave Hill in the Territory, and at Camooweal, just over the eastern boundary, in Queensland.

§ 10. Educational Facilities.

Education in the Northern Territory has been under the control and direction of the South Australian Education Department since January, 1945. An officer of the Department is on loan to the Northern Territory Administration as a full-time staff officer on the Education Branch. This officer, designated Assistant Supervisor of Education, Northern Territory, works in close co-operation with the Administrator.

The number of teachers in the Northern Territory in 1948 was 24—all officers of the South Australian Education Department.

When the war ended, the only schools functioning in the Northern Territory were Tennant Creek, with 30 pupils, and Alice Springs, with 120. Katherine and Pine Creek re-opened in August, 1945, and the school at Darwin re-opened in May, 1946.

Enrolments at the end of 1948 were:—Alice Springs Higher Primary School, 288 primary, 36 secondary; Alice Springs Convent School (Roman Catholic), 100.6; Darwin Higher Primary School, 440.44; Darwin Convent School (Roman Catholic), 147.20; Tennant Creek Public School, 62 primary; Katherine Public School, 42 primary; and Pine Creek Public School, 30 primary. In addition, 92 children were enrolled in correspondence classes conducted through the South Australian Education Department for Northern Territory children who are too isolated to attend established schools. Including correspondence pupils, the Northern Territory had a total school enrolment of 1,307 children at December, 1948.

About 40 per cent. of Darwin and Alice Springs schoolchildren are in the lower grades (1 and 2), and on the present rising birth-rate it is estimated that by 1954 Alice Springs will have a school population of approximately 600 and Darwin 800. Plans have been prepared for new schools at Darwin and Alice Springs. It is proposed to build a "comprehensive" school at Alice Springs to take children at the infant, primary and secondary stages. A site of 11 acres has been set aside and a further 20 acres has been reserved for agricultural education. Secondary education was established at Alice Springs in 1945, with facilities for instruction in general and commercial courses to the Intermediate standard of the University of Adelaide. The secondary block in the proposed new school will have practical rooms including woodwork, sheet metalwork, domestic arts, science laboratories, millinery, dressmaking, library and commercial.

Alice Springs is now regarded as the educational centre for the greater part of the Northern Territory. At the end of 1948 there were 93 boarders attending the Alice Springs Higher Primary School and a further 50 boarders at the Convent School. These came from remote areas of the Northern Territory and from places as far away as Wyndham and Derby (W.A.), Mount Isa (Q.), Oodnadatta (S.A.) and Darwin. Boarding students at Alice Springs are accommodated at hostels provided by Methodist, Church of England and Roman Catholic Church organizations. A boarding allowance (£30 primary and £40 secondary) for each child is paid by the Commonwealth Government to assist parents to keep their children at school. In addition, six exhibitions are offered annually on the results of the Intermediate examination. These exhibitions carry a subsistence allowance of £50 a year, £5 for books and return fares between home and school once a year, and are tenable at any approved secondary school in Australia.

Plans have been completed for a new primary school at Darwin, built on tropical lands. The new school will be erected on an 8.8 acre site in the town proper. This site has been specially allocated in the Darwin town plan. It is estimated that Darwin will have 100 secondary students by 1954 and consideration is being given to building a separate technical high school in the town. A site has been set aside in the town plan for this purpose. Because of the scattered nature of Darwin, transport is provided for school children, and more than 400 children are conveyed to school every day in special buses. At Alice Springs, 100 go to school each day in buses provided.

Approximately 30 per cent. of all children attending school in the Northern Territory are part-aboriginal. Relationships with other children are normal and their scholastic progress compares favourably with that of white children. A special school for full-blood aboriginal children was begun at Bagot, near Darwin, in February, 1949. Attendance at the school averages 10 to 25.

§ 11. Finance.

Revenue and expenditure for the Territory for the years 1938-39 and 1943-44 to 1947-48 are shown below :—

(a) This table covers the transactions of the Commonwealth Consolidated Revenue Fund in relation to Northern Territory administration and the revenue and expenditure of Commonwealth business undertakings in the Northern Territory. Collections of general Commonwealth taxes (e.g. Income Taxes, Customs and Excise Duties, Sales Tax, etc.), previously included, and other revenue and expenditure in the Territory of a general nature (e.g., Pensions, etc.), are excluded. (b) Arrears. (c) Included with Territory Administration. (d) Included with Miscellaneous.

AUSTRALIAN CAPITAL TERRITORY.

1. **Introductory.**—In Official Year Books Nos. 4 and 5 information was given in Section XXXI. in regard to the events leading to the selection of the Australian Capital Territory and the necessary legislation and the progress of operations in connexion with the establishment of the capital city. The physiography of the Territory was dealt with extensively and topographical and contour maps accompanied the letterpress, as well as reproductions of the award-winning designs for the laying out of the city. On 12th March, 1913 the official ceremony to mark the initiation of operations in connexion with the establishment of the Seat of Government was carried out. At this ceremony the selection of "Canberra" as the name of the capital city was announced. The Seat of Government Acceptance Act 1909-1938 provides that the Territory shall be known as the Australian Capital Territory. (A special article contributed by Dr. F. Watson, entitled "Canberra Past and Present", appears on p. 454 of Official Year Book No. 24).

2. **Transfer of Parliament.**—On 9th May, 1927 Parliament House at Canberra was officially opened by His Royal Highness Albert, Duke of York, our present Monarch His Majesty King George VI., the occasion being the 26th anniversary of the opening of the first Parliament of the Commonwealth at Melbourne by His Royal Highness George, Duke of Cornwall and York—afterwards His Majesty King George V.—on 9th May, 1901. (For particulars of the opening ceremony see Official Year Book No. 21, p. 604.)

3. **Administration.**—In Official Year Book No. 18 a summary is given of the development of the administration prior to the taking over of the control of the Territory by the Federal Capital Commission, and in Official Year Book No. 22 a summary is given of the administrative activities of the Federal Capital Commission.

The administration of the Territory by the Federal Capital Commission was continued until 30th April, 1930, when the Seat of Government (Administration) Act 1924-1929 was repealed, and the powers and functions of the Commission reverted to the Government.

Since April, 1932 the general control of the Territory has been exercised by the Minister for the Interior, certain specific services, however, being undertaken by the Department of Health, the Department of Works and Housing, and the Attorney-General's Department.

4. **Progress of Work.**—The general progress of the work of construction up to the time the Territory was taken over by the Commission is outlined in Official Year Book No. 18. Later progress under the Commission is described in Official Year Book No. 22.

Since the reversion of the powers and functions of the Commission to the Government in 1930, there has been great development of works in the Territory, despite the halts in activity caused by the general reduction in Governmental expenditure during the depression years, and the necessity for restricting labour and materials to purely defence purposes during the war years. A summary of the work carried out to 30th June, 1946 is given in Official Year Book No. 37.

During the years 1946-47 and 1947-48, a marked increase in housing construction in the Australian Capital Territory was evident; seventy-five houses of a steel-framed partially-prefabricated type, designed for simple and speedy erection, were completed at Narrabundah in this period. These houses were the forerunners of several hundred of a similar design, built specially to accommodate workmen engaged on the Australian Capital Territory building construction programme. Dwellings under construction at 30th June, 1948, apart from the normal brick and timber types, included 114 steel and timber-framed demountables at Narrabundah, 48 brick flats at Griffith and 20 brick veneer War Service Homes at Griffith and Narrabundah, and the first of the "corner-shops", consisting of a shop with attached residence, at Ainslie and Narrabundah.

Contracts were let for the erection of 100 concrete-type houses. These were the first of a group of 300, at Turner and O'Connor, but construction had not begun at the close of the year.

In the years following the war, building operations in Canberra were accelerated in order to provide housing and office accommodation to meet the growing needs. It was realized that a large labour force would be required and accommodation to house such labour would necessarily have to be provided. The first step taken in overcoming this problem was the commencement of a number of workmen's hostels, these hostels to be timber-framed buildings with individual rooms, modern toilet accommodation, cafeteria-style dining rooms and recreation and canteen facilities. The old R.A.A.F. Technical

School at Eastlake was converted and extended to provide the first of these hostels, capable of housing 555 men, followed by Riverside Hostel at Barton, where accommodation was provided for 320 men. At 30th June, 1948, construction had also begun on hostels at Capital Hill and Ainslie, with additions scheduled for Riverside Hostel, a further three hostels planned at Reid, Turner and Capital Hill, and workmen's camps designed for siting at the Cotter River and Fairbairn Aerodrome.

A point of interest was the arrival in Canberra in December, 1946, of the first batch of tradesmen from Great Britain, these men being housed in Riverside Hostel on arrival. To ensure the availability of employees for continuous brick production at the Canberra Brickworks, hostel accommodation was provided at the Brickworks, together with an amenities block, etc.

In order to meet the demand for hostel accommodation for public servants, work was commenced on two permanent brick hostels at Turner and Barton. These hostels, of a high standard comparable with first-class hotels, will be centrally heated throughout and will provide accommodation for approximately 400 persons. In this regard, further accommodation was also provided by the erection of a timber-framed hostel at Parkes, housing 172 guests, with work in hand on additions thereto to bring the full capacity up to 240 guests.

To relieve the congestion of Departments already located in Canberra, work was begun on the construction of four timber-framed two-story office buildings at Barton, one of which was completed during 1947-48. The work on the Administrative Building at Parkes, a large and modern office unit, designed to accommodate 2,500-3,000 public servants, was also commenced in 1947-48. This building will be a reinforced concrete frame structure, equipped with all modern facilities, such as kitchen, cafeteria, recreation and rest rooms. At 30th June, 1948, work was well in hand on the excavations for the basement and sub-basement on this project. Additions and extensions to existing office buildings in Canberra included timber-framed buildings for the Parks and Gardens Section, Department of the Interior, at Acton, offices for the Department of Works and Housing staff at Acton, and the construction of additional office space at No. 2 Secretariat. Extensive additions to Parliament House, consequent upon the increase in numbers of members, were planned during this period. Other buildings erected included a Mothercraft and Baby Welfare Centre and pre-school play centres.

In the Causeway-Kingston industrial area, a Government-controlled hardwood sawmill, with an annual output of 1,300,000 super. feet of sawn timber, was erected. Plans were in hand for the duplication of this mill, with a resulting increased output double the present one. Preliminary plans were prepared for proposed development in workshop and industrial areas, with work planned to commence in 1948-49.

At Acton, construction was begun on temporary accommodation for the Australian National University, with plans well in hand for the permanent buildings which are to be sited in the immediate vicinity.

The major engineering and electrical works undertaken comprised the provision of essential services to houses and buildings being erected in new areas in various suburbs; extensions to high and low tension electricity supply mains; construction of roads and footpaths; replacement of two timber bridges by concrete structures; improvements to existing sports fields and the construction of new grounds; the provision of services such as water supply, sewerage and stormwater drainage; runway construction and obstruction lighting improvements at Fairbairn Aerodrome; and the extension of electricity supply lines to rural areas. To ensure an adequate water supply to the growing township of Queanbeyan, the 6in. supply pipe line from Canberra was replaced with a 9in. diameter line.

New roads, opening up the forestry area adjoining the City, were completed. These roads will ensure a constant supply of timber to the hardwood sawmill.

Mechanical engineering services included the installation of modern kitchen equipment in the various hostels erected during the two years, and the construction of timber-drying kilns, etc., at the Government-operated sawmill.

5. Forestry.—A considerable amount of reafforestation work has been undertaken and plantations have been established at Uriarra, Mount Stromlo, Pierce's Creek, Green Hills and Kowen. Experimental plots have also been established in the Brindabella mountains.

The total area of plantations to 30th June, 1948, was 15,000 acres. Forestry operations were begun on Mount Stromlo in 1915, and up to 1925 approximately 700 acres had been planted with pine and other trees. The plantings up to this time were chiefly on aesthetic lines, but since the initiation of a wider programme, arrangements have been made for pruning and thinning, and sawmill timber is now being obtained from the logs resulting from thinning operations. The yearly output of sawmill logs from thinnings is gradually improving and has increased from 30,000 super. feet in 1930-31 to 10,000,000 super. feet in 1947-48.

In 1926 a comprehensive review was undertaken of the Territory's potentialities in regard to forest development. A system of forestry management was instituted in the existing forest areas, and a considerable amount of survey and assessment work has been completed. *Pinus radiata* has been most extensively planted, and also, as a result of experimental work, pinus areas of better quality pines on a longer rotation, such as *Pinus ponderosa* and *laricio*, have been planted during recent years, but *Pinus radiata* remains the principal species.

6. Lands.—(i) *General*. Reference has been made in previous issues of the Official Year Book to the general conditions of land tenure in the Australian Capital Territory and to the area of alienated and leased land.

As considerable portions of the Territory lands are not required in connexion with the establishment of the city, large areas have been leased under special improvement conditions in regard to the extermination of noxious weeds and the destruction of rabbits and other pests. The lands are classified into three grades of agricultural and three grades of grazing land. Leases may be granted for grazing, fruitgrowing, horticulture, agriculture, residential, business, or other purposes for a period not exceeding 25 years. The annual rental is 4 per cent. of the assessed value of the land, including improvements which are the property of the Crown, plus the amount of rates payable. No person may hold under lease land of a greater value than £10,000, exclusive of the value of buildings and fences thereon. About 293,306 acres comprising 471 leases and 12 grazing licences were held under lease and licence at 30th June, 1948, for periods varying from quarterly tenure to 25 years.

Under the Seat of Government (Administration) Act 1910, Crown lands in the Territory may not be sold or disposed of for any estate in freehold except in pursuance of some contract entered into before the commencement of that Act. Leases of land in the City Area are granted under the City Area Leases Ordinance 1936-1947, and leases of other lands under the Leases Ordinance 1918-1937. Land is also leased for various purposes in the City Area under the Church Lands Leases Ordinance 1924-1932, and the Leases (Special Purposes) Ordinance 1925-1943.

(ii) *City Leases*. The Government may grant leases in the city area of any Crown land for business or residential purposes. Such leases may be issued for a period not exceeding 99 years at a rental equal to 5 per cent. of the unimproved value of the land, which value is subject to re-appraisal at the expiration of 20 years, and thereafter every 20 years. A suitable building must be commenced within 6 months and completed within 12 months unless an extension of time is allowed.

Auction sales of city leaseholds are described in Official Year Book No. 22, p. 599.

Six leases under the Church Lands Leases Ordinance 1924-1932, which require the lessees to submit a definite building programme within a specified period, and one lease under the Church of England Lands Ordinance 1926 have been granted for church purposes. A further eight leases under the Leases (Special Purposes) Ordinance 1925-1943, one lease under the City Area Leases Ordinance 1936-1947, and two leases under the Leases Ordinance 1918-1937 have been granted for church and scholastic purposes.

The total number of leases granted under the City Area Leases Ordinance, excluding surrendered leases, at the end of the financial year 1947-48 was 791 representing a capital value of £295,072. During the year 80 new leases were granted. The number of business and residential blocks surrendered to or determined by the Commonwealth to the end of the year was 354.

Under the terms of the City Area Leases Ordinance 1936-1947 each block is leased for a period of 99 years at a rental of £5 per cent. per annum of the unimproved capital value as assessed by the Commonwealth or bid at auction. At present such rentals are subject to a 20 per cent. rebate.

(iii) *In the Jervis Bay Territory.* The Commonwealth acquired from the State of New South Wales sovereign rights over the area comprising about 28 square miles of land and water at Jervis Bay for possible use as a port in connexion with the Australian Capital. The Royal Australian Naval College was established in this area on a site known as Captain's Point, but was removed in 1930 to Flinders Naval Base, Victoria. Leases have been granted over an area of 11,788 acres in the Jervis Bay Territory.

7. *Railways, etc.*—Canberra is connected with the railway system of New South Wales at Queanbeyan by a line $4\frac{1}{4}$ miles long. This line was opened for goods traffic on 25th May, 1914, and for passenger traffic on 15th October, 1923. The railway terminus is situated in the area known as Kingston.

A direct passenger service is in operation connecting Canberra with Sydney and Melbourne, and trains leave both cities for Canberra daily.

There are two companies operating air services each several times daily on the Melbourne—Canberra—Sydney route.

Regular motor-coach services link Canberra with New South Wales, Victoria and South Australia.

8. *Population.*—The census return of population on 30th June, 1938, was 11,290 in the Australian Capital Territory and 272 in the Jervis Bay Territory, or a total of 11,562 persons. The population at the Census of 30th June, 1947, was 16,905 persons—15,156 in the city area, 1,389 in the rural districts and 360 in the Jervis Bay area. The estimated population at 30th June, 1949, was 19,333.

9. *Production.*—During 1947-48 the production of the more important items of the agricultural and pastoral industry was—Wheat, 99,945 bushels; wool, 1,767,000 lb.; butter, 5 tons; meat (bone-in weight, fresh), 1,506 tons. The numbers of live stock depastured at 31st March, 1948, were—Horses, 973; cattle, 8,748; sheep, 215,227; and pigs, 566.

10. *Educational Facilities.*—Arrangements exist with the New South Wales Education Department for the administration of education up to and including the secondary stage in the Territory, the expenditure involved being refunded annually to the State. There are seven schools in the Australian Capital Territory and two in the Jervis Bay Territory. The largest school is situated at Telopea Park, Barton, with accommodation for 800 scholars. Secondary education is provided at the Canberra High School, Acton, and the Telopea Park Central School has a secondary department. The High School has accommodation for 550 scholars, and its curriculum provides a standard of education comparable in range of subjects with that provided at the Government High Schools in New South Wales. The School also provides for commercial and junior technical classes, and there is an Evening Youth College attached, with commercial, matriculation and other classes.

The Canberra Technical College at Kingston is provided with modern equipment for supplementary courses for apprentices, journeymen desirous of improving their trade qualifications, and for others who desire to take any special courses. Provision is also made for the training of ex-service personnel under the Commonwealth Reconstruction Scheme.

The Canberra Nursery School, Acton, established in 1944, provides for the training of children between the ages of 3 and 5 years.

Pre-school centres at Reid, Duntroon and Griffith-Forrest provide modified nursery school facilities for children between the ages of 3 and 5 years from those suburbs. Additional centres of this type are to be established in other areas.

There are at present four private schools in the Territory. The Canberra Grammar School, the Canberra Church of England Girls' Grammar School, and St. Christopher's Convent School provide for sub-primary, primary and secondary education, and St. Patrick's School provides sub-primary and primary education.

Reference to the establishment of the Canberra University College will be found in Chapter VI. "Education".

An area of approximately 250 acres has been set aside at Acton—at the foot of Black Mountain—within easy distance of the City, for an Australian National University. Provision is made for the establishment of such research schools as may be deemed desirable, including a School of Medical Research, and Research Schools of Physical Sciences, Social Sciences and Pacific Studies. Further reference to this University appears in § 6 pages 244-5 of Chapter VI. "Education".

11. **Finance.**—(i) *Financial Year 1947-48.* Receipts and expenditure for the financial year 1947-48 are given in the following table:—

AUSTRALIAN CAPITAL TERRITORY : RECEIPTS AND EXPENDITURE, 1947-48.

The aggregate receipts for 1946-47 were £1,303,248 and expenditure was £2,774,444. Details will be found on p. 41 of *Finance Bulletin* No. 38, 1946-47.

(ii) *From 1901-2 to 30th June, 1948.*—The total receipts and expenditure from 1901-2 to 30th June, 1948, were as follows:—

AUSTRALIAN CAPITAL TERRITORY : RECEIPTS AND EXPENDITURE TO 30th JUNE, 1948.

Receipts.		£	Expenditure.		£
Commonwealth Treasury—			Lands	917,324
Parliamentary Appropriations—			Engineering works	5,974,925
Revenue	11,471,575	Architectural works	5,512,054
Loan	5,755,004	Other capital expenditure, sundry
			debtors, etc.	1,625,912
					14,030,215
			Seat of Government Establishment		
			Account, being maintenance and		
			administration less revenue; ex-		
			penditure of a capital nature for		
			which assets no longer exist;		
			profit and loss accounts of trading		
			activities, etc.	(a) 3,196,364
Total Receipts	17,226,579	Net Expenditure	17,226,579

(a) Excludes interest £4,965,625 net.

The foregoing table was prepared by the Department of the Interior and excludes part cost of national buildings (Parliament House, the secretariats, etc.), federal highways within the Territory, the Queanbeyan-Canberra Railway, the housing loan etc., and loans for housing—£2,175,537.

NORFOLK ISLAND.

1. **Area, Location, etc.**—Norfolk Island, discovered by Captain Cook in 1774, is situated in latitude 29° 3' 45" South, longitude 167° 56' 29" East. Its total area is 8,528 acres, the island being about 5 miles long and 3 miles wide. From Sydney it is distant 930 miles, and from Auckland, 630 miles. The length of the coast line is 20 miles, and its form that of an irregular ellipse. Except for a portion on the south side, inaccessible cliffs rise from the water's edge. The climate is equable, the temperature ranging between 49° and 85° F. with a mean of 68° F. The average annual rainfall is 52 inches. It has been said that the salubrious climate, coupled with the beauty of its landscapes and seascapes, should render Norfolk Island "the Madeira of the Pacific". Before the war the island was visited annually by a number of tourists. With the inauguration of direct air services from Australia and New Zealand, this traffic is again rapidly increasing.

2. **Settlement.**—The first colonization, in 1788, was by Lieutenant King, who in H.M.S. *Supply* established a small penal station as a branch settlement of that at Port Jackson. The settlement was abandoned in 1813, and for 13 years thereafter its chief use was as a whaling station and place of call for British warships.

From 1826 to 1855 it was again made a penal station. In 1844 it was annexed to Van Diemen's Land (Tasmania).

The descendants of the *Bounty* mutineers, having become too numerous to subsist on Pitcairn Island, were removed thence to Norfolk Island in 1856. The new community numbering 94 males and 100 females were the descendants of British sailors and Tahitian women. The last of those transferred died at Norfolk Island on 1st March, 1943.

3. **Administration.**—In 1856 the island was created a distinct and separate settlement under the jurisdiction of New South Wales. In 1896 it was made a dependency under the Governor of that Colony, and finally by the passage of the Norfolk Island Act 1913 it was accepted by the Federal Parliament as a territory of Australia. From July, 1914 until 1st January, 1929, Norfolk Island was administered by the Department of Home and Territories, and then, until 25th June, 1941, by the Territories Branch of the Prime Minister's Department, but is now administered by the Department of External Territories through an Administrator. An amending measure, the Norfolk Island Act 1935, provided for the establishment of an Advisory Council of eight elected members to advise the Administrator.

4. **Population.**—The population as disclosed by the Census of 30th June, 1947, was 938, consisting of 505 males and 433 females. During 1947-48, 17 births, 12 deaths, and 6 marriages were recorded. The average age of the persons who died was 68 years. Arrivals to the island exceeded departures by 4, the respective figures being arrivals 607, departures, 603. The population at 30th June, 1948, was 947 (497 males and 450 females).

5. **Live Stock.**—The latest returns of live-stock show that at 30th September, 1946, there were on the island 1,464 cattle, 527 horses, 327 sheep and 25 pigs. In addition there were 5,369 head of poultry.

6. **Production, Trade, etc.**—The soil throughout is good and is specially suitable for the cultivation of bananas, citrus and other fruits. The Hawkesbury Wonder bean seed is one of the staple crops of the island. Since the promulgation of the Ordinance regulating the export of seed the area planted with bean seed has increased. Of the 1947-48 crop, 2,242 bushels were exported, the average price realized being approximately £3 per bushel.

Apart from the bean, agriculture generally has been depressed. A modern pulping factory was erected on the island during 1938, but whilst 82 tons of passion fruit pulp were produced during 1939-40, the quantity of pulp produced during 1947-48 amounted only to about 5½ tons. The pulping of cherry guavas for jelly has also been experimented with and investigations carried out with a view to cultivating flax and ramie.

The citrus trees in full bearing on the island are capable of producing over 3,000 cases of fruit, but owing to a lack of marketing facilities, production has been retarded. Lemon and orange juice, have, however, sold readily, the combined value of these two items of export during 1946-47 amounting to £460. There were no exports during 1947-48 as barrels were not available. Lemon seed exported during the year 1947-48 was valued at £206.

Large numbers of whales pass the island throughout the season. However, whaling had not been conducted for a number of years until 1948, when the industry was revived by the formation of a whaling company. The preserved fish industry which was established some years ago has met with a number of setbacks but several consignments of frozen fish valued at £220 were exported to Australia during 1947-48.

On 30th June, 1948, the total area of land held under freehold and Crown leasehold amounted to 6,330 acres, consisting of 4,140 acres freehold and 2,190 leasehold.

Imports and exports for the six years 1938-39 and 1943-44 to 1947-48 are shown hereunder; the values are expressed in Australian currency:—

No duties are chargeable on goods imported into Australia from Norfolk Island if the goods are (a) the produce or manufacture of Norfolk Island; (b) shipped direct to Australia; and (c) not goods which if manufactured or produced in Australia would be subject to excise duty.

7. **Communication.**—The “all-red” cable from Great Britain via Vancouver, Fanning Island and Fiji bifurcates at Norfolk Island, one line connecting with New Zealand, the other with Brisbane.

A shipping service to the Territory is maintained at approximately three-monthly intervals by vessels of Burns Philp & Co. Ltd., Sydney. The journey from Sydney to Norfolk Island occupies about four days.

The construction of an aerodrome on the island was completed during 1943. A fortnightly passenger and air freight service between Sydney and Norfolk Island is maintained by Qantas Empire Airways Ltd., and regular air services are also in operation from New Zealand and Fiji.

Until 10th June, 1947, the post office at Norfolk Island was part of the Commonwealth postal system, but as from that date Norfolk Island was established as a separate postal administration with its own issue of stamps.

8. **Social Condition.**—Education is free and compulsory up to the age of fifteen years. The school conforms to the Australian standard of public education, ranging from kindergarten to the intermediate certificate, with a two years' super-primary course of instruction in cultural subjects and in woodwork, needlework, leatherwork, basketry and hat-making. The headmaster and assistant teachers are lent by the New South Wales Education Department, but they are paid by the Norfolk Island Administration. The number of scholars enrolled on 30th June, 1948 was 128.

The Court of Norfolk Island presided over by a Chief Magistrate is a court of record with dual jurisdiction. Sitting in its Limited Jurisdiction the Court has power to hear and determine actions of claims not exceeding £30 and to punish summarily all crimes and offences involving a pecuniary penalty or a sentence of imprisonment not exceeding six months. In its Full Jurisdiction the Court can hear and determine all actions, punish all crimes and offences, grant probate and letters of administration, hear and determine appeals from any conviction of the Court sitting in its Limited Jurisdiction, and has authority in all other matters. An appeal lies to the High Court of Australia from any judgment, order, decree or sentence of the Court sitting in its Full Jurisdiction.

9. **Finances.**—The whole of the Territorial revenue together with an annual grant from the Commonwealth Government in aid of the administrative expenses is paid to the credit of the Norfolk Island Trust Fund Account, and all administrative and developmental expenses are paid from that account. The operations for 1947-48 were as follows :—

PAPUA AND NEW GUINEA.

Administration.

Following the outbreak of the Pacific War civil administration in Papua and New Guinea was suspended on 11th February, 1942, and military control commenced. The Territory of New Guinea came under Japanese occupation in 1942, but the greater part had already been recaptured by Australian and Allied Forces when the Japanese surrendered in August, 1945. During the period of military control matters relating to the former civil administration were dealt with by the Department of External Territories, Canberra. The Minister for External Territories was empowered by National Security Regulations to exercise the powers and functions of the Administrator, officers, and authorities of the territories, and jurisdiction of the Supreme Courts of Papua and New Guinea was vested in the Supreme Court of the Australian Capital Territory.

Pursuant to the provisions of the Papua-New Guinea Provisional Administration Act 1945, a single Provisional Administration Service was formed to take over from the military authorities in the Territories of Papua and New Guinea. Colonel J. K. Murray was appointed Administrator of the combined Territories on 11th October, 1945, and the transfer from military to civil control in Papua and the portion of the Territory of New Guinea south of the Markham River was effected on 30th October, 1945. Jurisdiction of the Supreme Courts of Papua and New Guinea was then vested in the Supreme Court of the Territory of Papua-New Guinea. As circumstances permitted, civil control was extended to other areas until the whole of the Territory of New Guinea came under control of the Provisional Administration of Papua-New Guinea on 24th June, 1946.

The Papua-New Guinea Provisional Administration Act 1945-1946 was repealed by the Papua and New Guinea Act 1949 which came into force on 1st July, 1949. The latter Act approved the placing of the Territory of New Guinea under the International Trusteeship system and provides for an Administrative Union, one Administrator, one Supreme Court and one Public Service.

Provision is made for an Executive Council of not less than nine officers of the Territory, who shall be appointed by the Governor-General, and a Legislative Council consisting of twenty-nine members, namely :—(a) the Administrator ; (b) sixteen officers of the Territory (who shall be known as official members) ; (c) three non-official members possessing such qualifications as are provided by Ordinance and elected, as provided by Ordinance, by electors of the Territory ; (d) three non-official members representing the interests of the Christian missions in the Territory ; (e) three non-official native members ; and (f) three other non-official members.

The Legislative Council shall commence to perform its powers and functions under the Act as soon as practicable after 1st July, 1950. The date will be fixed by Proclamation.

Subject to the Act, provision may be made by Ordinance for the establishment of Advisory Councils for Native Matters and Native Village Councils.

The Act also makes provision for the continuance of the existing laws of the Territory of Papua and the Territory of New Guinea.

PAPUA.

§ 1. General Description.

1. **Early Administration.**—Particulars of the early administration of Papua are given in Official Year Book No. 19, p. 576.

2. **Administration by Commonwealth of Australia.**—The Territory was placed under the authority of the Commonwealth on 1st September, 1906, by proclamation issued in pursuance of Letters Patent of 18th March, 1902, and was accepted by the Commonwealth by the Papua Act 1905, which came into force by virtue of the aforesaid proclamation. The transfer was made under the authority of Section 122 of the Constitution. The Territory is now under the control of the Commonwealth, but not included within it, and is divided into nine magisterial divisions, viz. :—Central Highlands, Western, Delta, Gulf, Central, East Central, Eastern, Northern and South-Eastern.

3. **Area, etc.**—Papua lies wholly within the tropics. The northernmost point touches 5° S. latitude; its southernmost portion, comprising Sudest and Rossel Islands, lies between 11° S. and 12° S. latitude. It is separated from Australia by Torres Strait. The length of Papua from east to west is upwards of 920 miles; towards either end the breadth from north to south is about 200 miles, but about the centre it is considerably narrower. The Territory comprises also the islands of the Trobriand, Woodlark, D'Entrecasteaux and Louisiade groups. The length of coast-line is estimated at 3,664 miles—1,728 on the mainland, and 1,936 on the islands. The total area is about 90,540 square miles, of which 87,786 are on the mainland, and 2,754 on the islands. A reference to the physical characteristics of the Territory appears in previous issues of the Official Year Book (*see* No. 18, p. 633).

§ 2. Population.

1. **Non-indigenous Population.**—(i) *General.* The number of the non-indigenous population enumerated at the Census of 30th June, 1947, was 3,239 of whom 2,057 were males and 1,182 females. There were 2,736 full-bloods, of whom 2,542 were Europeans and 194 non-Europeans; half-castes with one of the parents a European numbered 503.

The table following shows the non-indigenous population enumerated at the last three censuses and as estimated at 30th June, 1948 :—

PAPUA : NON-INDIGENOUS POPULATION.

Race.				4th April, 1921.	30th June, 1933.	30th June, 1947.	30th June, 1948.
Full-blood—

(a) Persons who have European blood to the extent of one-half.

(b) Not available.

An Immigration Restriction Ordinance prohibits the immigration of persons who fail to pass the dictation test, or who are of bad character, or likely to become a charge upon the public. Exemptions may, however, be granted by the Administrator to persons of special skill required for employment as overseers or foremen.

(ii) *European Population.* The European population of Papua at the Census of 30th June, 1947, was 2,542, made up of 1,700 males and 842 females. The numbers recorded in earlier years were:—1937, 1,323; 1938, 1,488; 1939, 1,608; 1940, 1,822; and 1941, 3,070. At 30th June, 1948, the European population was estimated at 2,641.

(iii) *Non-European Population.* The non-European section of the non-indigenous population at 30th June, 1947 was 697 of whom 194 were full-bloods and 503 were half-castes with one of the parents a European.

2. *Native Population.* It is not possible to give exact data regarding the number of natives, because a large area of the interior has not as yet been under complete Government control. The official estimate is 300,000. Such censuses of the native population as have been taken during recent years point to a slight increase.

§ 3. Native Labour, Taxation, Health, etc.

1. *Native Labour.*—The existing laws relating to native labour are uniform in Papua and New Guinea, and are contained in the Native Labour Ordinance 1946 of the Territory of Papua-New Guinea and in the regulations made thereunder. Employers may recruit personally or by associations of employers or by salaried persons in the regular employment of those employers or associations. The administration determines the numbers that may leave a village for employment. Service on the part of the native is voluntary and he must be justly treated, properly housed and fed and given adequate medical attention when necessary. Natives under 16 years may not be employed and a minimum monthly wage (15s.) and working week (44 hours) are prescribed. Employment under contract is limited to a maximum of 12 months and re-engagement is not permitted until the native has been returned to his village for a period of three months. Employers must repatriate native labourers on termination of their contracts. Provision also exists for compensation for injury or death arising out of employment.

The number of natives engaged under contract of service on 30th June, 1949 was 4,916. In addition, it is estimated that there were 8,355 non-indentured employees.

2. *Native Taxes.*—Under the Native Taxes Ordinance 1917–1936, a tax not exceeding £1 per annum may be imposed on natives, except native constables, mission teachers and mission students, natives unfit for work, and those who have four living children. The proceeds of the tax must be expended on native education, or devoted to purposes directly benefiting the natives, but no taxes have been collected since 1941.

3. *Health.*—At 30th June, 1948, there were three European hospitals (one privately controlled), twenty-one native hospitals (one private and four mission), sixty-nine aid-posts (fifty-one mission), thirty welfare clinics (twenty-nine mission) and two leprosaria functioning in the Territory. Hospitals are also conducted by the various plantation companies. The mission societies employ a number of doctors and trained nurses. European medical assistants are employed by the Government. A training school has been established for the purpose of training natives in first-aid, elementary physics, chemistry, anatomy, physiology and pathology in preparation for their employment as native medical assistants. Native students also attend the Native Medical Practitioners' School at Fiji. The chief complaints treated are malaria, yaws, ulcers, lung affections, hookworm, venereal and skin diseases.

§ 4. Land Tenure.

1. *Method of Obtaining Land.*—The broad principles upon which the land laws of Papua are based are (a) no land can be alienated in fee simple; (b) the rental of the land leased is assessed on the unimproved value of the land, and is subject to re-appraisal at fixed periods. The terms upon which land may be leased are very liberal. Leaseholds of the best class of agricultural land may be obtained for 99 years. No rent is payable during the first ten years of the lease on areas less than 1,000 acres. During the following ten years the rent is charged at the rate of 5 per cent. on the unimproved value of the land. The unimproved value of the land is appraised every

twenty years and the rent determined accordingly. If on any appraisalment the rent is raised by more than one-third the lessee may disclaim the lease and shall be entitled to receive compensation for his improvements. The unimproved value of agricultural land has been fixed at 5s. per acre. Rent is immediately payable on areas exceeding 1,000 acres, and survey fees on areas exceeding 100 acres.

2. **Crown Lands.**—Private sales of native-owned land in the Territory have now ceased. The Government buys from the natives, and then leases to planters, who are forbidden to have direct dealings in land with Papuans. The total area of Papua is a little less than 58,000,000 acres, and of this, 1,791,117 acres have been alienated. Of the latter area, 282,814 acres are held under leasehold tenure, and 24,285 acres in fee simple (freehold) by non-native inhabitants, the Administration holding the balance (approximately 1,483,648 acres), which includes land that has been declared waste and vacant. These figures are approximate only, owing to the loss during the war of some survey records which it has not been possible to reconstruct.

§ 5. Production.

1. **General.**—The products of the Territory are obtained from its agricultural, timber, fishing, mining and manufacturing industries. Gold is the principal mineral mined, and rubber and copra are the most important amongst plantation products. Portions of the Territory appear well suited for cotton cultivation, and there is a possibility of obtaining petroleum in marketable quantities.

2. **Agriculture.**—(i) *Soil and Rainfall.* Rich soils at varying elevations and heavy and evenly distributed rainfall favour the cultivation of a variety of tropical products including sugar-cane, coco-nuts, sago palm, bread fruit, dyewoods, spices, ginger, nutmegs, bananas and other fruits. There are large areas of rich alluvial and volcanic soils along the coast, and fertile land is found at elevations up to 6,000 feet. Heavy rainfalls occur, except over a belt of country which runs back from the coast at Port Moresby to the hills and which has its dry season from May to November. This "dry" area is admirably suited for the production of tobacco, fibres, cotton, etc.

(ii) *Plantations.* Agricultural settlement has been mostly in the Central and Eastern Divisions, with coco-nuts and rubber as the principal crops. The Native Plantations Ordinance provides for the establishment of plantations in which half of the proceeds is paid to the natives entitled thereto, and the remaining half paid into the Native Education Fund. The basis of a contract to stabilize the copra industry of Papua and New Guinea on a long term agreement with the United Kingdom has been reached. The contract will be for a period of nine years and the price for 1949 £stg. 48 per ton f.o.b. Territory ports. The price for each subsequent year will not be more than 10 per cent. higher or lower than the preceding year and will be negotiated before the end of the preceding year.

(iii) *Government Plantations.* There are five Government plantations, the Orangerie Bay and Kikori coco-nut plantations and the Gebaregere, Cupola and Kokoda rubber plantations.

3. **Forestry.**—The principal softwood timber is known as "ilimo," while among satisfactory timbers of the lowlands are "nara," "medobi," and "melila." There are large numbers of woods, varying from the softest to the hardest, including beautiful cabinet woods, but research is necessary to determine their usefulness. The development of a coniferous belt at the higher altitudes offers great possibilities. It is believed that teak and sandalwood are well suited for cultivation.

4. **Live Stock.**—At 31st December, 1940, the live stock in the Territory consisted of 587 horses, 5,994 head of cattle, 87 mules, 1,244 goats, 665 pigs, 30 sheep and 6,320 fowls. The introduction of rabbits, foxes, hares and monkeys is prohibited. Post-war live-stock statistics are not available, but at 30th June, 1948, it was estimated that there were 312 horses, 2,100 head of cattle, 45 mules, 1,200 goats, 560 pigs and 4,500 fowls in the Territory. These figures exclude native-owned live stock.

5. **Fisheries.**—Pearl-shell fishing is one of the industries of Papua. The species of tortoise which supplies the commercial tortoise-shell is also a native of Papua. Bêche-de-mer and trochus are found along the shores and reefs and form valuable articles of export.

6. **Mining.**—(i) *Variety of Minerals.* Minerals have been found over a wide range of country. Those discovered so far are gold, copper, tin, lead, zinc, cinnabar, iron, osmiridium, gypsum, manganese, sulphur, graphite, chromite, lignite, platinum and petroleum.

The existence of petroleum has been traced at scattered intervals over a large area. Three companies hold permits under the provisions of the Petroleum (Prospecting and Mining) Ordinance 1938-1939 and oil prospecting has been carried on in the Western, Delta, Gulf and Central Divisions.

Of precious stones, only the topaz and beryl have been obtained. Large beds of apparently good coal also exist.

(ii) *Gold.* Gold was discovered in 1888 and the search gradually spread over every division, finds being reported wherever the explorers went. The estimated quantity in fine ounces and the value of the gold yield for the years 1938-39 to 1940-41, 1946-47 and 1947-48 are given below :

PAPUA : GOLD YIELD.(a)

1938-39.		1939-40.		1940-41.(b)		1946-47.		1947-48.	
Quantity.	Value.	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
Fine oz.	£	Fine oz.	£	Fine oz.	£	Fine oz.	£	Fine oz.	£
35,808	325,116	30,422	316,203	10,348	110,501	446	4,077	283	2,299

(a) Valued at average price realized for fine gold in Australia, 1941.

(b) Nine months ended March,

The total value of gold won to 31st December, 1948 was £3,275,626.

(iii) *Other Minerals.* Some good samples of galena (sulphide of lead) have been obtained, while cinnabar (sulphide of mercury), graphite (or plumbago), zinc-blende, native sulphur, and other minerals are known to exist. In 1924 a deposit of lignite was discovered on Smoky Creek, a tributary of the Era River. Copper matte to the value of £5,999 was exported during 1940-41. The principal value of this item is its gold content.

7. **Water Power.**—Most of the rivers in Papua carry a large volume of water from a great height over a relatively short distance, thereby offering opportunities for the installation of hydro-electric power plants. It is estimated that there is at least 10,000,000 h.p. available for this purpose.

§ 6. Trade and Shipping.

1. **Customs Tariff.**—In the Schedule to the Customs Tariff of Papua 136 items are mentioned, of which approximately one-third is on the free list and consists of a number of foodstuffs and certain manufactures for use in the development of the Territory or its industries. Where duties are imposed they are generally on a 10 per cent. ad valorem basis, with the exception of ale, spirits, beverages and tobacco on which high revenue rates are imposed. Preference is given to Australian wines. On 16th July, 1931, a primage duty of 4 per cent. ad valorem was imposed on all goods, whether dutiable or not, in addition to the ordinary customs dues; the rate was subsequently reduced to 2½ per cent. and the duty ceased to operate on 1st July, 1937. From 12th July, 1940, the duty has been re-imposed, but certain specified articles have been exempted. The value of imports into Papua during 1947-48 was £2,393,497 and the duty collected, £145,189. In 1947-48, £30,412 was received in export duties.

Provision is made in the Australian Customs Tariff (Papua and New Guinea Preference) 1936 for the free entry into Australia of certain goods produced and imported

direct from Papua (see Chapter XII. "Trade"), and a proclamation of 25th September, 1935 exempted from primage duty goods produced or manufactured in the Territory.

2. Imports and Exports.—Tables of imports and exports during the years 1938–39 to 1940–41, 1946–47 and 1947–48 are given below. The values of exports are expressed in Australian currency but it is not possible to determine accurately the currency of the £ in the table of imports.

PAPUA : IMPORTS AND EXPORTS.

Total ..	490,158	510,672	492,775	347,014	823,891

Pre-war, the trade of the Territory reached its maximum in 1939–40, exceeding by £180,414 the previous highest figure which was established in 1925–26 when imports were valued at £470,774 and exports at £685,896. Prices for both copra and rubber were high about 1925–26 and the copper-mines were producing freely. Since the war, the increase in value of imports has been due to a greater volume of goods and an increase in the prices of practically all commodities. The increase in exports has been due mainly to copra, the exports of which exceeded those for the previous year by approximately 3,280 tons in quantity and £180,000 in value, and to surplus war stores exported by purchasers.

3. Direction of Trade.—Particulars of the countries of origin of the imports into Papua and of destination of the goods shipped therefrom are shown below for the years 1938–39, 1940–41 and 1947–48.

PAPUA : DIRECTION OF TRADE.

The table above and that on page 385 give separate particulars of the respective territories. Following the institution of the new provisional administration particulars of finance relate to both territories. In order to provide a comparison with 1947-48, combined particulars are also shown below for the years 1939-40, 1940-41, 1945-46 and 1946-47. The figures include the transactions of the following accounts :—Trust Territory of New Guinea—Consolidated Revenue Account : Papua—Public Revenue Account,

Native Tax Account, Native Education Fund and Native Benefits Fund. Figures for 1945-46 relate to Civil Administration only. The last three funds are not included in the table above.

TRUST TERRITORY OF NEW GUINEA.

§ 1. General Description.

The land area of the Territory of New Guinea is about 93,000 square miles and the area including the sea within the lines drawn through its extreme outer points is more than 1,000,000 square miles. As the coast of the Territory has not been completely surveyed, the areas of the various islands are known only approximately.

The approximate areas of the principal islands together with the small islands adjacent thereto are as follows :—

AREA OF TERRITORY OF NEW GUINEA.

(Sq. Miles.)

Particulars.	Approximate Area.
North-East New Guinea (also called "The Mainland") ..	69,700
Bismarck Archipelago—	
New Britain	14,600
New Ireland	3,340
Lavongai	460
Admiralty Islands	800
Solomon Islands—	
Bougainville	3,880
Buka	220
Total	93,000

Information regarding physiography and climate will be found in Official Year Book No. 22, p. 613, and in the *Official Handbook of the Territory*.

§ 2. Government.

1. **The Military Occupation (1914-18 War).**—On 17th September, 1914, the Acting Governor of German New Guinea signed terms of capitulation with the officer commanding a Naval and Military Expedition sent from Australia, and thereafter the Territory was under military administration until the establishment of Civil Government on 9th May, 1921.

2. **1939-45 War.**—For the events following the outbreak of the Pacific War and the formation of the Papua-New Guinea Provisional Administration in 1945, *see* p. 364 *ante*.

3. **Mandate (1920).**—In 1919 it was decided by the Principal Allied and Associated Powers that the Territory of New Guinea, which Germany gave up as one of the terms of peace, should be entrusted under Mandate from the League of Nations to the Government of the Commonwealth. The issuing of the Mandate was, however, delayed, and it was not until 17th December, 1920 that its terms were settled, and the Mandate itself did not reach Australia until April, 1921.

The terms of the Mandate are given in Official Year Book No. 33 (*see* p. 264).

4. **Trusteeship (1946).**—The Commonwealth Government undertook to place the Territory of New Guinea under the Trusteeship System established under the Charter of the United Nations. The Trusteeship Agreement for the Territory, under which the Government of Australia is the sole administering authority, was approved by the General Assembly of the United Nations Organization on 13th December, 1946. The terms of the Agreement are as follows :—

Preamble : The Territory of New Guinea has been administered in accordance with Article 22 of the Covenant of the League of Nations and in pursuance of a Mandate conferred upon His Britannic Majesty and exercised on his behalf by the Government of the Commonwealth of Australia.

The Charter of the United Nations, signed at San Francisco on 26th June, 1945, provides by Article 75 for the establishment of an international trusteeship system for the administration and supervision of such territories as may be placed thereunder by subsequent individual agreements.

The Government of Australia now undertakes to place the Territory of New Guinea under the trusteeship system, on the terms set forth in the present Trusteeship Agreement.

Therefore, the General Assembly of the United Nations, acting in pursuance of Article 85 of the Charter, approves the following terms of trusteeship for the Territory of New Guinea in substitution for the terms of the Mandate under which the Territory has been administered :—

Article 1. The Territory to which this trusteeship agreement applies (hereinafter called the Territory) consists of that portion of the island of New Guinea and the groups of islands administered therewith under the Mandate dated 17th December, 1920, conferred upon His Britannic Majesty and exercised by the Government of Australia.

Article 2. The Government of Australia (hereinafter called the Administering Authority) is hereby designated as the sole authority which will exercise the administration of the Territory.

Article 3. The Administering Authority undertakes to administer the Territory in accordance with the provisions of the Charter and in such a manner as to achieve in the Territory the basic objectives of the international trusteeship system, which are set forth in Article 76 of the Charter.

Article 4. The Administering Authority will be responsible for the peace, order, good government and defence of the Territory and for this purpose will have the same powers of legislation, administration and jurisdiction in and over the Territory as if it were an integral part of Australia, and will be entitled to apply to the Territory, subject to such modifications as its deems desirable, such laws of the Commonwealth of Australia as it deems appropriate to the needs and conditions of the Territory.

Article 5. It is agreed that the Administering Authority, in the exercise of its powers under Article 4, will be at liberty to bring the Territory into a customs, fiscal or administrative union or federation with other dependent territories under its jurisdiction or control, and to establish common services between the Territory and any or all of these territories, if (in its opinion) it would be in the interests of the Territory and not inconsistent with the basic objectives of the trusteeship system to do so.

Article 6. The Administering Authority further undertakes to apply in the Territory the provisions of such international agreements and such recommendations of the specialized agencies referred to in Article 57 of the Charter as are, in the opinion of the Administering Authority, suited to the needs and conditions of the Territory and conducive to the achievement of the basic objectives of the trusteeship system.

Article 7. The Administering Authority may take all measures in the Territory which it considers desirable to provide for the defence of the Territory and for the maintenance of international peace and security.

Article 8. The Administering Authority undertakes that in the discharge of its obligations under Article 3 of this agreement—

1. It will co-operate with the Trusteeship Council in the discharge of all the Council's functions under Articles 87 and 88 of the Charter.

2. It will, in accordance with its established policy—

- (a) take into consideration the customs and usages of the inhabitants of New Guinea and respect the rights and safeguard the interests both present and future of the indigenous inhabitants of the Territory and, in particular, ensure that no rights over native land in favour of any person not an indigenous inhabitant of New Guinea may be created or transferred except with the consent of the competent public authority;

- (b) promote, as may be appropriate to the circumstances of the Territory, the educational and cultural advancement of the inhabitants;

- (c) assure to the inhabitants of the Territory, as may be appropriate to the particular circumstances of the Territory and its peoples, a progressively increasing share in the administrative and other services of the Territory;

- (d) guarantee to the inhabitants of the Territory, subject only to the requirements of public order, freedom of speech, of the press, of assembly, of petition, freedom of conscience and worship and freedom of religious teaching.

5. *Administration.*—For particulars of the administration of the Territory of New Guinea prior to the setting-up of the Papua and New Guinea Administration see Official Year Book No. 36 and earlier issues.

For administrative purposes the Territory is divided into the following districts :—New Britain, comprising New Britain and adjacent islands; Morobe, Madang, Central Highlands, and Sepik on the mainland; New Ireland, comprising New Ireland, Lavongai and adjacent islands; Manus, comprising the Admiralty Group; and Kieta, the former German portion of the Solomon Islands. Each district is under a District Officer, assisted by a small staff.

§ 3. Population.

1. *Non-indigenous Population.*—(i) *General.* The number of the non-indigenous population enumerated at the Census of 30th June, 1947, was 6,200, of whom 4,369 were males and 1,831 were females. There were 5,627 full-bloods, of whom 3,412 were Europeans and 2,215 non-Europeans. Half-castes with one of the parents a European numbered 573.

At the 30th June, 1948 the non-indigenous population was estimated at 7,026.

The following table shows the non-indigenous population enumerated at the last three censuses and as estimated at 30th June, 1948:—

TERRITORY OF NEW GUINEA : NON-INDIGENOUS POPULATION.

Race.				4th April, 1921.	30th June, 1933.	30th June, 1947.	30th June, 1948.
Full-blood—							
European	1,288	3,191	3,412	(b)
Non-European—							
Chinese	1,424	1,449	1,769	
Other	392	381	446	
Total	1,816	1,830	2,215	(b)
Half-caste (a)	69	195	573	
Grand Total	3,173	5,216	6,200	7,026

(a) Persons who have European blood to the extent of one-half.

(b) Not available.

(ii) *European Population.* The number of the European population for various years since 1885 is shown in the following table. At 30th June, 1947, the European population was 3,412, of whom 2,604 were males and 808 females.

TERRITORY OF NEW GUINEA : EUROPEAN POPULATION.

Year.	Number.			Year.	Number.		
1885	64	1939	4,608
1933	3,191	1940	4,399
1937	4,286	1941	4,101
1938	4,445	1947	3,412

(iii) *Asiatic Population.* Malays seem to have been the first Asiatics brought by the Germans to German New Guinea; 37 of them were recorded on the mainland in 1885. About 1889 the New Guinea Company began to bring Chinese, Malays and Javanese in growing numbers from Singapore and Java to work on the plantations; in the year 1892 there were about 1,800 Asiatics on the mainland. By 1898 the number had decreased to 300 or 400, but it had risen to 1,830 at the time of the 1933 Census and at 30th June, 1941, numbered 2,228, of whom 2,199 were Chinese and 29 Japanese. The Japanese at the 1933 Census numbered 73. The Chinese provide the skilled artisans of the Territory, and many of them are small traders. At the census of 30th June, 1947, non-Europeans numbered 2,215, of whom Chinese (1,769) and Filipinos (276) constituted the major proportion. At the same date half-castes with one of the parents a European numbered 573.

2. *Native Population.*—As a large portion of the Territory is not under Government influence it is not possible to obtain reliable figures in regard to the number of the natives.

The following table shows those enumerated as at 30th June, 1941 :

TERRITORY OF NEW GUINEA : NATIVE POPULATION AT 30th JUNE, 1941.
(Including Indentured Labourers.)

District.	Children.			Adults.			Total.		
	Males.	Females	Persons.	Males.	Females	Persons.	Males.	Females	Persons.
Kieta ..	11,307	9,912	21,219	15,618	15,218	30,836	26,925	25,130	52,055
Madang ..	37,406	30,897	68,303	58,786	54,901	113,687	96,192	85,798	181,990
Manus ..	3,259	2,749	6,008	4,235	3,891	8,126	7,494	6,640	14,134
Morobe ..	29,334	26,348	55,682	42,541	39,076	81,617	71,875	65,424	137,299
New Britain ..	21,737	19,349	41,086	34,503	25,938	60,501	56,300	45,287	101,587
New Ireland ..	7,619	6,422	14,041	15,791	11,723	27,514	23,410	18,145	41,555
Sepik ..	32,223	27,772	59,995	44,049	45,060	89,109	76,272	72,832	149,104
Total ..	142,885	123,449	266,334	215,583	195,807	411,390	358,468	319,256	677,724

(a) Includes 6,560 Mission scholars, constabulary, etc., not distributed.

The number of natives indentured as labourers on 30th June, 1949, was 10,677. In addition, there were 19,575 non-indentured employees.

§ 4. The Natives.

1. **General.**—The natives are divided into two main groups—Melanesian and Papuan—the former, with a few exceptions, constituting the population of the Bismarek Archipelago, the Solomon Islands, and the coastal districts of the New Guinea mainland, the latter inhabiting the interior of the mainland. Odd tribes of Negritos exist in the mountains of New Guinea. There is a strain of Papuan, and, possibly, of Polynesian blood in the Admiralty Islanders, while the Western Islanders and the inhabitants of the small islands east and south-east of New Ireland are Micronesians. (*See Official Year Book No. 16, p. 670, and Official Handbook of the Territory, Pt. V.*)

2. **Land Tenure.**—Native customs in regard to the ownership and use of land may be briefly outlined as follows. The ownership and use of the land are generally individual, although, in some rare cases, particularly in North Bougainville, the communal system exists. In districts where a great many coco-nut palms are growing on native lands it is often found that the land is the property of a chief or of one of the old men of the tribe, and that the coco-nut palms growing thereon are divided into small groves, and are the property of several members of the tribe. Customs with regard to the use of unoccupied forest lands vary. Right of inheritance to land is almost invariably through the maternal branch. (*See Official Year Book No. 17, p. 634, and Official Handbook of the Territory.*)

3. **Research Work.**—During the German occupation of the Territory a certain amount of research work was carried out, partly by scientific expeditions, and partly by missionaries and by a local resident. For many years an anthropologist was engaged consolidating the work already done, and extending it throughout the Territory. The results of his work appear in special reports.

4. **Education.**—Provision for the education of natives is made in the Ordinance of 1922-1935 under which the Administrator is authorized to establish schools, grant money therefor, prescribe instruction, and arrange for the training of teachers and other matters. Natives are liable to pay education tax, but none has been collected since 1922-23. The European teachers have been recruited from Education Departments in Australia. During the year ended 30th June, 1948, 26 schools were maintained by the Administration for native children, two for part-native and Malay children, and five each for European and Chinese children. In addition, the Missions conducted different

grades of schools having a total enrolment of 60,000 native students. To assist the Missions in their educational work, the Administration provides professional advice and certain items of equipment and text-books. In addition to this assistance, the sum of £21,750 was distributed amongst the Missions as grants-in-aid during the year ended 30th June, 1948. As well as those above, there are five schools for Europeans at Rabaul, Wau, Bulolo, Lae and Madang.

5. Health of Natives.—In a report dealing with the health of the natives in New Britain submitted before the 1914-18 War, it was stated that "the natives in the districts examined are not degenerate; but they are sick". The same qualification undoubtedly applies to the native population throughout the Territory.

The diseases taking the greatest toll of native life directly or through lowering vitality are—Malaria, respiratory diseases, dysentery, frambæsia, yaws, tropical ulcer, hookworm, filariasis and beri-beri.

The Health Department of the Administration consists of (i) a staff of medical officers, medical assistants and orderlies; (ii) native hospitals at Government stations and sub-stations (its staff also supervises hospitals on plantations); (iii) a laboratory; (iv) a training system for natives as medical orderlies; (v) a scheme of distribution of medical necessities; and (vi) leprosaria. It also undertakes the general oversight of sanitary conditions.

6. Missions.—Several mission societies have operated in the Territory. The Society of the Sacred Heart of Jesus worked in the Bismarck Archipelago, the Society of the Holy Ghost, the Franciscan Order and the Society of the Divine Word along the coast of North-East New Guinea from Sek to the Dutch border, and the Marists in Buka and Bougainville. These are Roman Catholic Missions. The Protestant Missions are the Australian Methodist Mission in New Britain and New Ireland, the New Zealand Methodist Mission in Bougainville, the Liebenzell Mission in the Admiralty Group, the Lutheran Mission (supported and staffed by the Lutheran Churches in Australia and America) which worked along the coast of North-East New Guinea from Sek to the Papuan border, the Melanesian Mission (Anglican) in New Britain, the Seventh Day Adventist Mission in Bougainville, New Britain and the mainland of New Guinea, and the East and West Indies Bible Mission in the Central Highlands. All these societies include teaching with their missionary work.

§ 5. Land Tenure.

1. Acquisition of Land.—A short account of the modes of acquiring land appears in Official Year Book No. 19, p. 590, but considerations of space preclude its repetition.

2. Land Policy of the Present Administration.—The Land Ordinance 1922-1941 provides for sale as well as leasing of land belonging to the Administration. The divergence from the policy usually adopted by the British in the Pacific (including Papua), which provides for leasehold only, was made with a view to disposal by sale of the freehold properties taken over from Germans, which until 1927 were controlled by the Expropriation Board. The general land policy is based on the leasehold principle. All grants or leases contain a reservation to the Administration of all minerals, including mineral oil. Leases are for a term of 99 years except where a shorter period is provided. Lands, except in towns, are classified by a Land Board into land suitable for agriculture (Class A) and land not so suitable (Class B), and the unimproved value of the land is assessed. In the case of agricultural leases for more than 30 years the rent is 5 per cent. of the unimproved value, with power to remit during the first ten years, and subject to reappraisal every 20 years. Pastoral leases of lands of Class B may be granted for terms not exceeding 30 years, at a rental of $2\frac{1}{2}$ per cent. of the unimproved value, subject to reappraisal every 10 years. Agricultural leases are subject to improvement conditions and pastoral leases to stocking conditions. Leases of town allotments may be granted for terms not exceeding 99 years, at a rent to be fixed at such percentage of the unimproved value as is prescribed.

The following table shows the leases in force on 30th June, 1948 :—

TERRITORY OF NEW GUINEA : LEASES IN FORCE, 30th JUNE, 1948.

Tenure.	No. of Leases.	Area.
		Acres.
Agricultural leases	444	141,445
Pastoral leases	3	9,496
Residence and business leases	320	334
Special leases	56	707
Mission leases	443	1,552
Leases granted to Chinese in towns	213	58
Long period leases from German regime	115	5,189
Total	1,594	158,781

3. **Alienation and Occupation of Land.**—The area of the Territory is estimated at 59,520,000 acres, of which, at 30th June, 1948, 1.52 per cent. was alienated. The following table shows the distribution :—

TERRITORY OF NEW GUINEA : LAND TENURE, 30TH JUNE, 1948.

Particulars.	Acres.
Alienated—	
Held by Private Non-indigenous Inhabitants—	
Freehold	519,400
Leasehold	158,780
Held by the Administration	202,042
Native Reserves(a)	26,611
Total	906,833
Held by Natives	58,613,167
Total Area of Territory	59,520,000

(a) Vested in the Director of District Services and Native Affairs as Trustee for Natives.

4. **Registration of Titles.**—Under German law there was a system of registration of titles in a "Ground Book," but registration did not confer an indefeasible title. The German system has been replaced by one modelled on the Torrens plan, embodied in an Ordinance entitled the Lands Registration Ordinance 1924-1939.

§ 6. Production.

1. **General.**—The natives have been described as a people of peasant proprietors, practising a crude form of agriculture. Their gardens and groves furnish but a small amount of produce for oversea trade, and the exports of the Territory grew only as European plantations were made, and natives were employed to work them.

Scientific methods of cultivation have been adopted, and production has been greatly increased thereby.

2. **Agriculture.**—(i) *General.* There is provision in the Native Administrative Ordinance 1921-1938 of New Guinea for compelling native inhabitants to plant food crops for their own benefit, under certain circumstances. This type of compulsion has been mainly eliminated since 1942. The Ordinance was used in New Guinea, pre-war, when the villages were obviously short of food crops. Coco-nut plantings were mainly involved, as this constituted both a food and an economic crop.

Since the 1939-45 War, the activities of the Department of Agriculture, Stock and Fisheries have been concerned with the maintaining and improving of those establishments which were not destroyed during the war, viz. :—the Highlands Agricultural Experiment Station at Aiyura on the headwaters of the Ramu River where, at 5,500 feet to 6,000 feet altitude, observations are being made on the culture of tea, quinine, arabica coffee, soya bean, pyrethrum, native and introduced food, fodder, and cover crops and on the care of live-stock; and the Lowlands Agricultural Experiment Station at Keravat, near Rabaul, which suffered great damage under enemy occupation but where valuable material is being rehabilitated and propagated for future development, including special hybrids and selections of cocoa, coco-nut, robusta coffee, oil palm, manila hemp, native food crops, rice and other grains, and a large assortment of specimen plants of economic species.

The policy in the expanding programme of new work has been to develop close contact with the native peoples in order to help them in post-war rehabilitation and to determine the wisest lines of future development in each area. The Department also assists non-native settlers in an advisory capacity.

The principal agricultural products of the Territory are copra, cacao and coffee. With regard to copra plantations no accurate acreage figures are available owing to widespread war damage.

About 25 per cent. of the coco-nut bearing areas were destroyed during the war and the remainder is gradually being restored to production. The present production rate of copra is about 25,000 tons per annum, compared with the peak pre-war figure of about 76,400 tons in 1936-37. Very little replanting of coco-nuts has yet been undertaken, and no new areas have been planted. Cacao plantings suffered war-time losses to the extent of about 60 per cent. The present production rate is approximately 150 tons per annum, compared with the pre-war potential of about 1,000 tons, although this figure was never actually reached. Considerable activity is at present taking place in regard to cacao planting, the tendency being for planters to plant this crop wherever suitable land and labour are available.

With regard to robusta coffee, some 80 per cent. of pre-war plantings have been lost largely through the impact of war. Planters are not being encouraged to develop this crop. Very little loss was suffered by the limited pre-war plantings of arabica coffee but these are not of any great importance. Development of this crop is limited largely by the relative inaccessibility of suitable areas to cheap transport.

Rice, normally imported from Saigon and the East, is now obtained from Australia, but supplies are much lighter than formerly, and more highly priced. It is an objective of the Administration to develop adequate local production of this important staple.

(ii) *Plantations.* During 1934-35 the Administration disposed of the several plantations maintained by it with the exception of the demonstration plantation at Keravat. The principal crops grown on plantations are shown in the table hereunder for the year ended 30th June, 1940. The figures are not complete, but they give an indication of the progress of agriculture in the Territory to that date. Details are not available for later years.

TERRITORY OF NEW GUINEA : PLANTATIONS, 1939-40.

(Excluding Native Reserves.)

Crop.	Area Planted.(a)	Area Bearing.	Yield.
	Acres.	Acres.	Tons.
Coco-nuts	261,676	210,954	(b)71,583
Cocoa	5,827	2,301	570
Coffee	2,792	1,935	56
Rubber	2,481	1,591	95
Kapok	556	321	15
Native Food (c)	3,289	1,453	2,099
Other	912	106	..
Total	277,533	218,661	..

(a) Includes inter-planted crops.

(b) Copra; desiccated coco-nut, 596 tons, also produced.

(c) Native food of all kinds is mostly grown between young coco-nut palms not yet in bearing.

The area of plantations for various years from 1885 to 1940 is shown hereunder:—

TERRITORY OF NEW GUINEA: PLANTATIONS.

(Excluding Native Reserves.)

(Acres.)

Year ended June—	Total Area.	Area Planted.	Area under Coco-nuts (including Area not in Bearing).
1885	148	(a)	(a)
1895	2,152	(a)	(a)
1911	58,837	(a)	51,510
1914	84,488	(a)	76,847
1924	411,275	(a)	172,373
1932	460,942	216,730	211,882
1937	487,375	244,066	234,189
1938	496,118	262,547	239,976
1939	504,000	264,877	253,235
1940	525,965	277,533	261,676

(a) Not available.

3. **Live Stock.**—Little natural pasture is at present accessible in the Territory of New Guinea, though investigations have proved that good cattle country exists in the vicinity of the lower Sepik River, the nearest point of access being Marienberg, 38 miles from the river mouth. The swampy country through which the Sepik passes is not itself suitable for cattle. Apart from pasture lands which have been discovered in the Sepik area, in the Markham Valley, there is excellent cattle country from Lae to Wau, and further inland to Ramu and Purari. In the gold-fields area, also, large valleys of open country exist, probably suitable for grazing and stock-raising. An experiment is at present being conducted by the E. J. Hallstrom Trust in the breeding of Romney Marsh sheep at Nondugl in the Central Highlands District of the Territory of New Guinea.

Soils are variable and often the terrain is broken; however, the loose, coral-derived soils and those from pumice and volcanic sands are gently undulating. The foothill soil is heavier, being generally a mixture of volcanic and sedimentary types. The hinterland soils are often heavy and lateritic. Generally, there is more good land on the island groups than on the mainland, except in certain valleys such as the Markham and Sepik.

District Agricultural Stations are being established in various parts of the Territory. In the selection of sites for these, special consideration has been given to areas which suffered most under enemy occupation. Each of these Stations is in the charge of a District Agricultural Officer whose functions are largely those of extension. As a first step towards improving live stock breeds and animal husbandry methods, a piggery has been established at each Station and stocked with imported Berkshires.

Pig numbers in many parts of the country were almost entirely annihilated during the Japanese occupation. As the pig is one of the chief sources of meat to most natives, a serious unbalancing of the native diet has been brought about in such areas. Pigs are also of considerable importance to the native people in social prestige, wealth and as a medium of exchange. With a view to increasing the number and the quality of pigs at present available, small studs of pure breeds are being formed at Lae, Madang, Wewak, Aitape, Rabaul and Sohana. From these studs, pigs of a superior type will be made available to natives, especially good type boars. It is hoped in this way gradually to improve the standard of native pigs.

A Quarantine Ordinance is in operation in the Territory and this is largely under the control of the Department of Public Health, in co-operation with the Department of Agriculture, Stock and Fisheries.

All stock introduced is carefully inspected in Australia prior to shipment, and on arrival is again inspected and treated for internal and external parasites. The stock is not allowed to land if parasites not already existent in the Territory are present on inspection.

4. **Timber.**—An investigation of the timber resources was made by the Commonwealth Inspector-General of Forests, and a report in connexion therewith was published in 1926. According to this report, while offering no prospects of immediate gain to large sawmilling interests, the Territory possesses forest potentialities of a high order. Surveys of the timber resources of the Morobe District indicate that there are

approximately 500 million super. feet of timber in the pine forests of the Bulolo Valley. This is supporting sawmills cutting for local use. It is proposed to harvest this forest over a period of years and progressively re-afforest the area. Sawmills controlled by the Administration are established at Lae and Keravat, and are supplying local requirements. The log export trade has not yet recovered, but in 1948 shipments of some 400,000 super. feet of timber in the log were made.

The Forestry Ordinance 1936-1937 provides for the issue of permits and licences to cut timber, but at present the policy is to call tenders for timber areas as they can be made available. Timber growing on native lands cannot be acquired by private purchasers directly from the natives, but must be obtained through the Administration. A royalty is payable on all forest produce taken under a permit or licence. Some 26 permits, which were in force when the war intervened, have been extended to cover the five-year period of suspension, and cover approximately 200,000 acres.

5. **Fisheries.**—The wealth of the waters of the Territory has been little exploited. Fish are caught at many places along the coast to supply the small local demand of the natives and of the few resident Europeans. Pearl-shell is exported in fair quantities, while *bêche-de-mer*, trochus-shell and tortoise-shell also figure amongst the exports. The value of marine products exported in 1947-48 was £21,092 compared with £9,255 in 1940-41. A survey of the Territorial waters of the Territory is at present in progress with a view to ascertaining and developing the fisheries resources and the shell industries. The Commonwealth Scientific and Industrial Research Organization is co-operating in this survey.

6. **Mining.**—Except for gold there has been little mining in New Guinea. Gold has been discovered on the Waria, the Ramu, the Francisco, and the Markham Rivers, and in tributaries of the Sepik River. Rich gold was discovered in the Morobe District in 1926: the field is situated about 90 miles (40 by air) inland from Lae, the nearest coastal port. Communication is established with the coast by a regular aeroplane service and by road transport. Osmiridium is reported to have been found on the upper tributaries of the Ramu, and platinum on the Kabenau River. Copper has been discovered in the form of chalcopyrite and malachite in the Baining District. Iron occurs as magnesite and hæmatite in the Baining District, apparently in large quantities. Sulphur occurs in several localities in the volcanic regions of the Territory. Brown coal has been found on the mainland in the vicinity of Astrolabe Bay, and in the southern portion of New Ireland.

Mining is regulated by the Mining Ordinance 1928-1940. Copies of the Ordinance and Regulations made thereunder may be obtained from the Secretary, Department of External Territories, Canberra.

The following table shows the production of gold during the years 1937-38 to 1940-41 and 1947-48:—

TERRITORY OF NEW GUINEA : GOLD PRODUCTION.

Year.	Quantity.	Value.(a)
	Fine oz.	£
1937-38	223,929	1,935,954
1938-39	237,795	2,153,018
1939-40	278,922	2,917,526
1940-41	263,097	2,808,835
1947-48	126,092	851,570

(a) Valued at average price realized for fine gold in Australia.

Since the high market price of gold has been maintained, the search for profitable areas in various parts of the Territory has not diminished and systematic testing by drilling and other means has been undertaken on alluvial areas previously considered unworthy of attention. Although there were no new discoveries of alluvial or reef gold during 1948, work proceeded steadily on the known gold-bearing areas.

A search for petroleum has been actively conducted on the mainland. The Petroleum Ordinance 1936 has been superseded by the Petroleum (Prospecting and Mining) Ordinance 1938-1947, which has facilitated the carrying out of geological surveys and prospecting activities generally. On 30th June, 1948, two permits to search for petroleum were in force.

§ 7. Trade.

1. **Customs Tariff.**—With the exception of high revenue rates on ale, spirits, beverages and tobacco and a duty of 3d. per gallon on petrol, kerosene and lubricating oil, the tariff of the Territory of New Guinea is generally on a 10. per cent. ad valorem basis. Only 72 items are mentioned in the import schedule, of which approximately 60 are on the free list consisting of articles for use by the Administrator, the Trade Commissioners and the Missions, and medical supplies, live stock, meat, fish, fresh fruit, vegetables and certain essential manufactures for use in the Territory. The rate of duty for the remaining items as well as for all other goods not mentioned in the schedule is 10 per cent. ad valorem. No preferential tariff rates are provided in the schedule.

Export duties are levied on copra, trepang, shell, feathers and sulphur. When the price, or the assessed value of copra is less than £5 15s. per ton no tariff is imposed, but when the price exceeds this figure but is not more than £11 per ton 2s. 6d. per ton is charged; thereafter the charge increases on a sliding scale to 11s. 6d. per ton as the price rises to £18, with an additional 2s. per ton for every further increase of £1 in the price of copra. Imports in 1947-48 amounted to £3,105,098 on which £335,276 was received in import duties, while £60,491 was paid in export duties and royalties.

Provision is made in the Australian Customs Tariff (Papua and New Guinea Preference) 1930 for the free entry into Australia of certain goods produced and imported direct from the Territory of New Guinea (see Chapter XII. "Trade"), and a proclamation of 25th September, 1935, exempted from primage duty goods produced or manufactured in the Territory.

2. **Imports and Exports.**—Values of the principal items of imports and exports for the years 1937-38 to 1940-41 and 1947-48 are shown below. The values of exports are expressed in Australian currency, but it is not possible to determine accurately the currency of the £ in the table of imports.

Total	1,268,097	962,129	3,105,098	3,681,120	3,253,984	1,927,075

The bulk of the imports into the Territory of foodstuffs, beer, coal, paints, boats, launches and soap comes from Australia, which also supplies large quantities of machinery and metal manufactures, drugs, explosives, tobacco, cigarettes, apparel, boots, leather manufactures, timber, stationery and polishes.

§ 8. Shipping and Communication.

1. **General.**—Prior to the Japanese invasion a subsidized mail service between New Guinea and Australia was maintained by Burns, Philp and Co. Ltd., which also operated a two-monthly non-subsidized service between Australia, New Guinea, Hong Kong and Saigon. The Dutch Royal Packet Navigation Company's vessel called at Rabaul every five weeks *en route* from Singapore to Australia. Shipping within the Territory is regulated by the Shipping Ordinances 1936 and the Coastal Shipping, Ports and Harbours Regulations.

2. **Oversea Tonnage in 1947-48.**—The number and net tonnage of oversea vessels which entered and cleared the Territory during 1947-48 are shown hereunder.

TERRITORY OF NEW GUINEA : SHIPPING, 1947-48.

Nationality.	Vessels Entered.		Vessels Cleared.		Total.	
	Number.	Net Tonnage.	Number.	Net Tonnage.	Number.	Net Tonnage.
American	2	3,888	2	3,888	4	7,776
British	50	128,371	42	126,032	92	254,403
Total	52	132,259	44	129,920	96	262,179

3. **Shipping, Ports and Inland Waterways.**—Shipping services on a regular basis ply between Australia and the Territory, providing passenger and cargo accommodation. A number of cargo vessels has been chartered at various times to supplement the regular service. Vessels of the Eastern and Australian Shipping Line on the Australia-Hong Kong service make calls at Rabaul with imports from Hong Kong. The Australian Government is responsible for the coastal and inter-island shipping service and it provides the vessels for the purpose.

Main ports of call for oversea vessels are established at Lae and Madang (mainland), Rabaul (New Britain), Kavieng (New Ireland), Lorengau (Manus) and Kieta (Bougainville). Ports proclaimed under the Coastal Shipping Ports and Harbour Regulations for the service of local vessels are, in addition to the main ports above-mentioned, Salamaua, Finschhafen, Wewak, Aitape and Wanimo (mainland), Gasmata and Talasea (New Britain), Namatanai (New Ireland) and Buka Passage (Bougainville).

There are no prepared inland waterways. The natural river system is not generally suitable for vessels except those of small tonnage. There is a fair measure of traffic on the Sepik River.

4. **Land Communication.**—Means of communication on land are scanty. There are no railways. Roads lead from Rabaul to places within 30 or 40 miles, and there is a road 200 miles long in New Ireland and also a road from Lae to Wau in the Morobe District. Elsewhere there are few roads outside plantations and the District Officers' stations.

5. **Air Transport and Civil Airfields.**—The discovery of gold in New Guinea resulted in great aviation activity in the vicinity of the gold-fields. On account of the mountainous country and dense undergrowth between the coast and the gold-fields the task of transporting food and stores to the fields and of bringing the gold to the seaboard by land was an irksome and costly process. The fields are situated about 90 miles (40 by air) inland from Lae, and aircraft cover the distance in less than an hour.

Qantas Empire Airways Ltd. operates a regular service from Australia to Lae and Rabaul. Commercial aircraft operators located at Lae maintain passenger and freight-carrying services to Wau, Bulolo, Mount Hagen, Kainantu, Goroka, Finschhafen, Madang, Wewak, Aitape, Maprik and Angoram. Charters are undertaken to other parts of the Territory as occasion arises.

Further reference to New Guinea air activities is contained in Chapter V. "Transport and Communication" (see p. 204).

§ 9. Revenue and Expenditure.

Details of the revenue collected from various sources and the expenditure during each of the years 1937-38 to 1940-41 and 1947-48 are given hereunder :—

(a) Includes £40,011, expenditure due to the volcanic eruption.

(b) Included elsewhere.

For information for 1945-46 and 1946-47 see Papua, § 7, p. 371.

TRUST TERRITORY OF NAURU.

1. General.—Nauru is an oval-shaped atoll about 12 miles in circumference, having an area of about 5,263 acres, of which approximately two-thirds is phosphate-bearing. It is situated in longitude 167° E., and is 26 miles south of the Equator. Portion of the island between the sandy beach and the coral cliffs is fertile, and it is there that the Nauruans reside. With the exception of a small fringe around an inland lagoon, the plateau which contains the phosphate deposits possesses few food plants and is uninhabited, but portion of the area has been planted with fruit trees. The system

of land tenure is governed by an old custom, and, with the exception of small allotments held by the Government, the British Phosphate Commissioners and the Missions, the whole of the island is owned by individual natives. The average shade temperature ranges between 72° and 95° F., and the average humidity between 70 and 80 per cent. The average rainfall is 85 inches, but droughts occasionally occur, and in 1916 and 1917 only 40 inches were received for the two years. Similarly in 1938 only 20.94 inches were recorded.

2. **History.**—The island, discovered by Captain Fearn in 1798, was annexed by Germany in 1888, and prior to 1914 was part of the protectorate of German New Guinea.

In November, 1914, Nauru was occupied by a detachment from the Australian Naval and Military Expedition at Rabaul, and it was included in the cession of colonies made by Germany in 1919 to the Allied and Associated Powers, whose representatives agreed that a mandate for its administration should be conferred upon His Britannic Majesty. The mandate was confirmed by the Council of the League of Nations on 17th December, 1920. On 2nd July, 1919, the British, Australian and New Zealand Governments agreed that the administration (which, since 1915, had been in charge of an official appointed by the British Colonial Office) should be vested in an Administrator who took up duty in June, 1921. The agreement between the three Governments was approved by the Commonwealth Parliament in the Nauru Island Agreement Act 1919, and is shown in the Schedule to that Act. A supplementary agreement concerning Nauru was drafted in May, 1923, and ratified by the Commonwealth Parliament by the Nauru Island Agreement Act 1932.

On 25th August, 1942, nine months after the outbreak of the war in the Pacific, communications with Nauru ceased, and the island was occupied by Japanese forces. It was re-occupied by a joint Australian Naval and Military Force on 14th September, 1945, and civil administration was re-established on 1st November, 1945.

3. **Trusteeship Agreement.**—On 1st November, 1947 the General Assembly of the United Nations approved a Trusteeship Agreement for the Territory of Nauru submitted by the Governments of Australia, New Zealand and the United Kingdom in substitution for the terms of the mandate under which the Territory had been administered. This Agreement designates the Governments of Australia, New Zealand and the United Kingdom as the Joint Administering Authority, with the Government of Australia continuing, on behalf of the Administering Authority, to exercise full powers of legislation, administration and jurisdiction in and over the Territory. The terms of the Agreement are as follows :—

Preamble : In pursuance of a Mandate conferred upon His Britannic Majesty, the Territory of Nauru has been administered in accordance with Article 22 of the Covenant of the League of Nations by the Government of Australia on the joint behalf of the Governments of Australia, New Zealand and the United Kingdom of Great Britain and Northern Ireland.

The Charter of the United Nations, signed at San Francisco on 26th June, 1945, provides by Article 75 for the establishment of an international trusteeship system for the administration and supervision of such territories as may be placed thereunder by subsequent individual agreements.

His Majesty desires to place the Territory of Nauru under the trusteeship system and the Governments of Australia, New Zealand and the United Kingdom undertake to administer it on the terms set forth in the present Trusteeship Agreement.

Therefore, the General Assembly of the United Nations, acting in pursuance of Article 85 of the Charter, approves the following terms of the trusteeship for the Territory of Nauru in substitution for the terms of the Mandate under which the Territory has been administered :—

Article 1. The Territory to which the Trusteeship Agreement applies (hereinafter called the Territory) consists of the island of Nauru (Pleasant Island) situated approximately 167° longitude East and approximately 0° 25' latitude South, being the Territory administered under the Mandate above referred to.

Article 2. The Governments of Australia, New Zealand and the United Kingdom (hereinafter called the Administering Authority) are hereby designated as the joint authority which will exercise the administration of the Territory.

Article 3. The Administering Authority undertakes to administer the Territory in accordance with the provisions of the Charter and in such a manner as to achieve in the Territory the basic objectives of the international trusteeship system, which are set forth in Article 76 of the Charter.

Article 4. The Administering Authority will be responsible for the peace, order, good government and defence of the Territory, and for this purpose, in pursuance of an agreement made by the Governments of Australia, New Zealand and the United Kingdom, the Government of Australia will on behalf of the Administering Authority and except and until otherwise agreed by the Governments of Australia, New Zealand and the United Kingdom continue to exercise full powers of legislation, administration and jurisdiction in and over the Territory.

Article 5. The Administering Authority undertakes that in the discharge of its obligations under Article 3 of this agreement—

1. It will co-operate with the Trusteeship Council in the discharge of all the Council's functions under Articles 87 and 88 of the Charter;

2. It will, in accordance with its established policy—

(a) take into consideration the customs and usages of the inhabitants of Nauru and respect the rights and safeguard the interests both present and future of the indigenous inhabitants of the Territory; and in particular ensure that no rights over native land in favour of any person not an indigenous inhabitant of Nauru may be created or transferred except with the consent of the competent public authority;

(b) promote, as may be appropriate to the circumstances of the Territory, the economic, social, educational and cultural advancement of the inhabitants;

(c) assure to the inhabitants of the Territory, as may be appropriate to the particular circumstances of the Territory and its peoples, a progressively increasing share in the administrative and other services of the Territory and take all appropriate measures with a view to the political advancement of the inhabitants in accordance with Article 76 (b) of the Charter;

(d) guarantee to the inhabitants of the Territory, subject only to the requirements of the public order, freedom of speech, of the press, of assembly and of petition, freedom of conscience and worship and freedom of religious teaching.

Article 6. The Administering Authority further undertakes to apply in the Territory the provisions of such international agreements and such recommendations of the specialized agencies referred to in Article 57 of the Charter as are, in the opinion of the Administering Authority, suited to the needs and conditions of the Territory and conducive to the achievement of the basic objectives of the trusteeship system.

Article 7. In order to discharge its duties under Article 84 of the Charter and Article 4 of the present agreement, the Administering Authority may take all measures in the Territory which it considers desirable to provide for the defence of the Territory and for the maintenance of international peace and security.

4. Administration.—The administration of the island is vested in the Administrator, who is obliged to conform to instructions issued by the Government which appointed him, and all ordinances made by him are subject to confirmation or disallowance by the Governor-General of Australia acting on the advice of the Federal Executive Council. All administration expenses are met from local revenue and

phosphate royalties. Native industries such as canoe-building, fishing, mat-making, etc., are encouraged by the provision of prizes at annual competitions. An agency of the Commonwealth Savings Bank has been established. There is a co-operative store managed to a large extent by the natives. The store books, however, are audited by Government officers. Natives are not allowed to carry or be in possession of firearms, and the use by them of intoxicating liquors and deleterious drugs is prohibited.

5. **Population.**—The population figures on 1st April, 1939, 31st December, 1940, 1941 and 1946 and 30th June, 1947 and 1948, are given hereunder. Details are not available for the years 1942 to 1945, the period of Japanese occupation :—

NAURU : POPULATION.

Race.	1st April, 1939.	31st Dec., 1940.	31st Dec., 1941.	31st Dec., 1946.	30th June, 1947.	30th June, 1948.
Europeans	171	192	68	159	192	247
Chinese	1,512	1,350	584	787	1,163	1,370
Nauruans (a)	1,765	1,761	1,827	1,369	1,379	1,448
Other	44	49	193	33	31	97
Total	3,492	3,352	2,672	2,348	2,765	3,162

(a) The natives of Nauru are Micronesians.

During the year ended 30th June, 1948, there were 105 births, compared with 58 during the year ended 30th June, 1947. In 1947-48 there were 30 marriages (two between Europeans) and 35 deaths.

6. **Health.**—Cases of the usual diseases known in the Pacific occur. Venereal disease is rare, but elephantiasis is occasionally met with. An area has been set apart for the segregation of lepers, and the latest methods of treatment are applied. The total number of persons receiving treatment at 30th June, 1948, was 85 of whom 10 were in segregation at the Leper Hospital. Two hospitals are maintained on the island, one by the Administration for Nauruans, and one by the British Phosphate Commission for its employees. In common with other natives, the Nauruans are very susceptible to tuberculosis and influenza, and in 1921 an influenza epidemic caused the deaths of 230 islanders. Dysentery, both amœbic and bacillary, is endemic. A regular anti-mosquito campaign is conducted. Steps have been taken by the authorities to improve the water supply and to provide efficient sanitation generally. Every Nauruan is required to undergo a medical examination once a month. Baby clinics have been established to give help and advice to Nauruan mothers in regard to infant nurture.

7. **Education.**—Formerly the education of Nauruan and other native children was undertaken by the Missions subsidized by the Administration, but on 1st October, 1923, the Administration assumed responsibility for education. There are 5 primary schools for native, and one for European, children. A total of 389 native, 33 European and 2 Chinese children were enrolled at 30th June, 1948. The European school is in charge of a teacher on loan from the Victorian Education Department, who also supervises education matters generally.

The curriculum is similar to that of corresponding schools in Australia, and the teaching is, as far as possible, wholly in English. Education is compulsory between the ages of six and sixteen for Nauruan and other native children.

8. **Judiciary.**—The judicial power is vested in the Administrator in a Central Court and a District Court. The right of appeal is provided.

9. **Religion.**—The London Missionary Society (Protestant) and the Sacred Heart of Jesus Mission (Roman Catholic) operate in Nauru.

10. **Phosphate Deposits.**—(i) *General.* From 1906 to 1919 the deposits were worked by the Pacific Phosphate Company, which also worked the deposits on Ocean Island

(about 165 miles east of Nauru and part of the Gilbert and Ellice Islands Colony administered by the Colonial Office). The quantity remaining on Nauru has been estimated at about 70,000,000 tons, and the exports average 85 per cent. to 88 per cent. of tricalcium phosphate.

The interests of the Pacific Phosphate Company in the two islands (though not in other islands in the Pacific in which it had workings) were bought by the British, Australian and New Zealand Governments in 1919 for £3,500,000, the purchase money being contributed in the proportions of 42, 42, and 16 per cent. respectively. The Agreement of 2nd July, 1919, provides for the working of the deposits by the British Phosphate Commission of three members, one appointed by each Government; and the three countries are entitled to receive the output in the same proportions of 42, 42, and 16 per cent.

(ii) *Royalty on Phosphate.* Under a revised agreement between the British Phosphate Commissioners and the Nauruan landowners, an increased royalty of 1s. 1d. per ton of phosphate exported has been payable from 1st July, 1947, as follows:—

- (a) 6d. per ton to be paid to the Nauruan landowner concerned;
- (b) 3d. per ton to the Administrator for the benefit of the Nauruan people;
- (c) 2d. per ton to the Administrator to be held in trust for the Nauruan landowner concerned and invested at compound interest for a period of 20 years.

The capital will then remain invested and the interest thereon will be paid to the landowner.

- (d) 2d. per ton to the Administrator to be held in trust for the Nauruan community and invested until the year 2000 at compound interest.

From 1st July, 1947 the lump sums payable to landowners from whom phosphate-bearing lands are leased were also increased to £45 per acre, with a minimum payment of £7 10s. for areas less than an acre.

(iii) *Nauru and Ocean Island Phosphate Industry.* The following table gives particulars regarding exports of phosphate during the years 1938-39 and 1940-41 to 1947-48:—

NAURU AND OCEAN ISLAND : EXPORTS OF PHOSPHATE.

Year.			Total.	To Australia.	To New Zealand.
			Tons.	Per cent.	Per cent.
1938-39	1,228,590	67.06	23.63
1940-41	626,149	50.14	38.76
1941-42	144,454	53.79	46.21
1942-46 (a)
1946-47	213,875	87.07	12.93
1947-48	468,839	72.77	27.23

(a) Period of, and immediately following, Japanese occupation.

(iv) *Accounts of Commission.* A statement of Nauru and Ocean Island activities for the years 1938-39 and 1940-41 to 1947-48 is given hereunder:—

NAURU AND OCEAN ISLAND : SALES OF PHOSPHATE.

(£.)

Heading.	1938-39.	1940-41.	1941-42.	1942 to 1946.(a)	1946-47.	1947-48.
Receipts from sales, etc.	909,027	749,354	387,464	..	551,537	1,040,086
F.o.b. cost, including interest on capital, sinking fund, etc.	906,133	745,233	327,607	..	508,224	1,037,914

(a) Period of, and immediately following, Japanese occupation.

During the period of the Japanese occupation from August, 1942 to September, 1945, while waiting to resume activities at Nauru and Ocean Island, the Commission was engaged in meeting the phosphate requirements of Australia and New Zealand from

other available sources. Reconstruction of equipment destroyed during the Japanese occupation has progressed steadily at both islands and should be completed by the target date of June, 1950.

The amount due by the British Phosphate Commission to the partner Governments for purchase-money and other capital sums was £3,666,457 on 30th June, 1921, and at 30th June, 1942, this had been reduced to £3,024,373. The partner Governments agreed to a suspension of interest and sinking fund payments from 1st July, 1942, while operations at Nauru and Ocean Island were curtailed. Modified payments were resumed in 1946-47, pending a review of the position in 1950, when it is anticipated that reconstruction will be completed. The redemption fund now totals £507,127.

(v) *Employees.* Apart from a limited number of Europeans and a few Pacific Islanders, the employees are Chinese engaged under a two years' contract. Increasing numbers of Nauruans are being employed, mainly in trade capacities.

(vi) *Christmas Island Phosphates.* It may not be inappropriate to refer here to the phosphate deposits on Christmas Island in which the Australian Government is interested. The concession to work phosphate at Christmas Island, situated in the Indian Ocean near Java, has been held since 1897 by the Christmas Island Phosphate Company Limited, a private company incorporated in England.

The Australian and New Zealand Governments, jointly, have acquired the Company's interests and assets at Christmas Island as at 31st December, 1948.

The undertaking will be controlled by an authority to be appointed by the Australian and New Zealand Governments, and the phosphate will be distributed by the British Phosphate Commissioners, in conjunction with supplies obtained from Nauru and Ocean Island, to meet the agricultural requirements of Australia and New Zealand.

11. *Trade.*—The Customs Tariff of Nauru provides for the free admission of all goods other than cigars, cigarettes, tobacco, spirits, wines, beer, cider, and perry, and cylinder blocks for motor cycle engines. Articles imported by the Administration for its own use and spirits for scientific purposes are exempt.

The Tariff rates apply to all countries alike. Information regarding imports and exports for the years 1939 to 1947-48 is shown in the following table.

NAURU : IMPORTS AND EXPORTS.

Heading.		1939.	1940.	1941.	1.1.42 to 30.6.47 (a)	1947-48.
Imports ..	£	170,624	192,749	106,978	543,916	621,764
Exports—						
Phosphate ..	tons	932,100	808,400	99,150	96,473	263,507
	£	605,974	541,168	69,375	192,946	527,014

(a) Includes period of Japanese occupation.

Of the total imports Australia supplied £466,636 or 75 per cent. during 1947-48; the balance came mainly from the United Kingdom, New Zealand, the United States, China and Canada in that order.

In 1947-48 179,257 tons of phosphate were exported to Australia, and 84,250 tons to New Zealand.

12. *Revenue and Expenditure.*—The revenue and expenditure of the Administration during the years 1939 to 1947-48 were as follows :—

NAURU : REVENUE AND EXPENDITURE.

(£.)

Heading.		1939.	1940.	1941.	1.1.42 to 30.6.47 (a)	1947-48.
Revenue		33,084	27,104	12,023	28,038	23,745
Expenditure		20,391	26,223	23,951	107,543	96,347

(a) Includes period of Japanese occupation.

Of the revenue for the year ended 30th June, 1948, royalty on phosphate amounted to £7,977, post office and radio receipts, £4,792, import duties, £1,706 and licences and internal revenue, £2,082. At 30th June, 1948, the accumulated funds of the Administration amounted to £4,175.

CHAPTER XI.—LABOUR, WAGES AND PRICES.

A.—RETAIL PRICES AND PRICE INDEXES.

§ 1. Collection of Information as to Retail Prices.

The retail prices of the extensive range of commodities and services in common demand (commonly referred to as the "regimen") used in compiling the All Items ("C" Series) Retail Price Index have been ascertained at frequent and regular intervals since 1923 for each of the six capital cities and for 27 of the more important towns of Australia. Comparable information is available for the month of November in each year 1914 to 1922 for each of the six capital cities. The complete list of items covered by the retail price regimen is published in the annual *Labour Report*, and a summary of the main groups and sections of the regimen is given in § 6 hereof.

The retail prices of food and groceries in approximately 200 towns throughout Australia were collected as at November of each year from 1913 to 1942, when collection was discontinued.

Retail prices of food and groceries and average rentals of houses for earlier years extending back to 1901 were collected by this Bureau, and in some cases have been recorded by the Statisticians of various States as far back as 1864.

The methods by which prices used in the "C" Series Index are ascertained and the measures adopted to ensure their accuracy and comparability are briefly as follows:—

- (i) Representative and reputable retailers are selected for each city and town covered by the Index and each is required to furnish a return of prices monthly in respect of food and groceries and quarterly in respect of other items. Prices for each item are obtained where practicable from about ten retailers in each of the capital cities, and from about five retailers in each of the provincial towns.
- (ii) These returns are collected under authority of the Census and Statistics Act 1905-1949, which requires that returns be supplied accurately and promptly and ensures that particulars supplied by individual retailers will not be divulged to competitors or to any other person or Government authority. Penalties are provided against failure to supply returns, against supplying false information and against failure to answer truthfully any question asked by an authorized officer in respect of the contents of the return.
- (iii) The actual collection of returns is carried out by qualified Field Officers of the Commonwealth Bureau of Census and Statistics working under the supervision of the Statisticians of the respective States. These Field Officers have very wide powers of investigation, including entry of premises and inspection of goods, records, etc.

(iv) The Field Officers not only receive and check returns but visit the retail shops concerned, whenever necessary, to verify returns. In respect of articles of clothing and the like, where variation of quality may be considerable, Field Officers are equipped with samples of the goods used for price comparisons. In such cases the Field Officers visit every retail informant at each quarterly collection and personally inspect the relevant goods and prices thereof.

(v) Before each quarterly collection Supervising Field Officers review the standards of the whole of the items for which prices are collected after making extensive inquiries among manufacturers, wholesalers and retailers. These Supervising Field Officers periodically accompany Field Officers at their price collections and check their work. This not only ensures accuracy and assiduity but also that all Field Officers work on uniform lines and that, as far as care and effort can make it possible, prices for identical goods and quality will be recorded at all times and for all places.

(vi) The list of items in the regimen and the standards thereof are revised from time to time to keep them in harmony with changing conditions. Where such changes become necessary suitable adjustment is made in computing the retail price index to ensure that it reflects changes in price with due precision and that it is not vitiated by the influence of other changes. (*See also* § 8 hereof.)

(vii) Returns of rents for unfurnished houses of four and five rooms are made at the middle of each quarter by a representative number (ranging up to 30) of house agents in each city and town covered by the Index, for brick and wooden houses respectively, classified according to number of rooms. These returns show the weekly rental of a substantial number of individual houses, each of which is selected by the Field Officer as suitable for inclusion in a sample designed to measure the quarterly ratio of change in weekly rentals. The aim is to measure variations which may be equivalent to change in price for a constant standard. The ratio of change is used to vary basic average rentals derived from the Census of 1933 and other records. Although expressed in money terms, the average rentals as published are essentially indexes. As such they do not necessarily indicate the average amount of rental actually paid for all rented houses, and still less do they indicate the rental at which vacant or new houses can be rented.

§ 2. Retail Price Indexes.

1. **General.**—The basic principle of a retail price index is relatively simple. It is to select commodities representative of the field to be covered and to combine their prices at regular intervals in accordance with their relative importance in that field. The aim is to measure the degree of change in prices for the selected field taken as a whole.

In practice the application of this principle over a term of years presents great difficulty by reason of the numerous changes which occur in the type, grade and relative quantities of many of the items commonly used.

A full explanation of the methods adopted and an analysis of problems involved is contained in the Appendix to *Labour Report* No. 9.

For convenience the group of selected items is called a "regimen", and the quantities consumed per annum of each item used in the index are called "mass units" or "weights". These terms are used herein. In compiling the index the price of each item is multiplied by its quantity "weight", and then by its appropriate population or household "weight". The sum of these products for all items at any given date represents an "aggregate expenditure". The "aggregate expenditures" for successive periods are converted into an index by denoting the aggregate of a selected or "base" period as 1,000, and calculating all index-numbers to such base by the proportions which their aggregates bear to that of the base period. (*See also* § 6 (2) hereof.)

2. **Essential Features.**—Apart from clear thinking, common sense and sound arithmetic, the prime essentials in compiling a retail price index are—

- (a) that prices be accurately ascertained at regular intervals for goods of constant grade and quality;
- (b) that the regimen be as representative as possible of the field to be covered;
- (c) that the weights be in approximate proportion to quantities actually used in the selected field.

3. **The Regimen.**—The regimen must be a selected regimen because it is impossible in practice to ascertain at regular intervals prices of every item of goods and services entering into household expenditure. Even in normal times there is considerable difficulty in ensuring that the selected items are always a true sample. Some items which it would be desirable to include must be excluded because comparative prices cannot be accurately ascertained for them at different times and different places. It is deemed better to limit the regimen of the index to items for which price variations can be ascertained with reasonable accuracy than to distend the regimen by including items for which price comparisons are necessarily inaccurate. Similarly, many items of small aggregate or individual importance are excluded. The regimen of the index therefore is not (as is sometimes erroneously supposed) a basic wage regimen nor yet is it a full list of component items in a standard of living. It does not imply that any particular goods or any selected grades or quantities of these goods should enter into determination of a basic or living wage. In fact the regimen used for the "C" Series Index is simply a selected list of items combined in certain proportions for the purpose of measuring price variations. The items are representative of the fields covered, and the proportions approximate to those in average consumption so far as can be ascertained.

The regimen and "weights" used in the "C" Series Index are published in full in the annual *Labour Report*. The regimen at the moment comprises 160 commodities and services, consisting of 20 items of Groceries; 6 of Dairy Produce; 15 of Meat; 1 of Rent; 77 of Clothing and Footwear; and 41 of Miscellaneous Household Expenditure comprising Household Drapery (9), Household Utensils (20), Fuel and Light (4), Union and Lodge Dues, Medicine, Newspapers, Recreation, Smoking, Fares and School Requisites (8).

4. **Purpose of Retail Price Indexes.**—Retail price indexes are designed to measure the extent of changes in price levels only. While they may be used as indicating proportionate variations in cost of a *constant* standard of living, they do not measure the absolute cost of any standard of living, nor the cost of changes in the standard of living. In other words, they measure, as nearly as may be, the proportionate change in aggregate cost of specified quantities and qualities of the selected regimen of items included in the index. The regimen is representative of a high proportion of the expenditure of wage-earner households.

5. **Effects of War Conditions on Indexes.**—Under war-time conditions scarcity of certain types of goods, erratic supply and changes of grade due to standardization created unusual difficulty in obtaining the data necessary for measuring variations in prices. In some instances, this has rendered it necessary to substitute new grades,

qualities or types of articles for those formerly used as indicators of changes in price. This has been the case more particularly in the clothing, household drapery and household utensils sections of the regimen. Substitutions of similar kind were necessary at times under normal conditions in order to meet changes of fashion and usage. Such substitutions are not injurious to the index provided the transitional difficulties can be solved as they arise. No change in principle is involved. The index continues to measure as accurately as may be, price variations, and price variations only. Just as in the pre-war period, those differences in prices which are solely due to substitution of a new item for one which has ceased to be available or in common use are neutralized by taking the price of the old item as typical of price variation in its class up to the time of substitution, and the prices of the new item as typical of such changes in price thereafter.

In normal times, popular usage of items in general consumption changes slowly, and the weight of items and groups in the regimen is changed only at long intervals. In war-time, scarcity of supplies of some goods, rationing and kindred factors actually produce substantial changes in usage both long term and short term. The weights applicable to the items in the regimen, however, have not been changed and continue as in pre-war years. (*See* § 8 (3) hereof.)

During the war the "C" Series Index, as published, measured the aggregate variation in prices of the regimen of items adopted in peace times in peace-time proportion. This ensured comparability of the index on that specific basis. Its practical significance under war conditions was limited because a single index cannot take into account all changes that occur.

If it had been practicable, it would have been desirable to compile an additional index to measure variations over the war period, having regard to the fact that the relative consumptions of some items of the regimen have been altered by war conditions, and that the prices of some items not included in the regimen have moved differently from the variations recorded by the "C" Series Index. This would have provided an alternative method of comparison presenting another aspect of price movement in war-time.

§ 3. Various Series of Retail Price Index-Numbers.

Two main series of retail price index-numbers are compiled and shown in some detail in the following pages, viz. :—

- (i) the "B" Series Index relating only to food, groceries and housing, continuously available since 1907;
- (ii) the "C" Series Index relating to food, groceries, housing, clothing, household drapery and utensils, fuel and light, and other miscellaneous items of household expenditure, continuously available from 1914.

The "B" Series Index comprises only the food, groceries and housing sections of the "C" Series Index.

The "C" Series Index in total provides a reliable measure of aggregate variations in retail prices (as well as of group indexes for component sections) of a high percentage of goods and services used in wage-earner households. This index is compiled for—

- (a) the capital city of each of the six States,
- (b) four other principal towns in each of the six States,
- (c) weighted average of five towns (including capital city) in each of the six States,
- (d) weighted average for the six capital cities combined,
- (e) weighted average for the thirty towns (including capital cities),
- (f) separate indexes for Warwick, Port Augusta, Whyalla and Canberra.

The "C" Series Index forms the basis of the "Court" Series Index used by the Commonwealth Court of Conciliation and Arbitration for the "cost of living" adjustments of wages prescribed by awards made by the Court. (*See* § 9 of this Chapter.)

§ 4. Retail Price Levels ("C" Series Index) 1914-1948.

The aggregate indexes for November, 1914, 1921 and the years 1929, 1939 and 1943 to 1948 for the Thirty Towns are published in summary form on page 407 hereof, while the following table furnishes the relevant index-numbers for the Six Capital Cities as a whole for certain significant dates since November, 1914—the earliest date for which this index is available.

ALL ITEMS ("C" SERIES) RETAIL PRICE INDEX-NUMBERS.

WEIGHTED AVERAGE OF SIX CAPITAL CITIES.

(Base: 1923-27 = 1,000.)

1914, November	687	(Beginning of War I.)
1918, November	905	(End of War I.)
1920, November	1,166	(Post-War peak)
1922, November	975	(Post-War trough)
1929, Year	1,033	(Pre-Depression peak)
1933, Year	804	(Depression trough)
1939, September Quarter	916	(Pre-War II.)
1943, March Quarter	1,123	(Pre-Price Stabilization)
1943, June Quarter	1,143	(War II. peak)
1945, September Quarter	1,126	(End of War II.)
1948, December Quarter	1,341	

The index reveals a rise of approximately 32 per cent. during the first world war, followed by a further rise of 29 per cent. in the two post-war years (November, 1918, to November, 1920). From November, 1920 to November, 1922, there was a fall of 16 per cent. and the index remained relatively stable until the onset of the depression in 1929. During the four years of the depression 1929 to 1933 the index fell by 22 per cent., rising thereafter steadily until 1939 when it was nearly 14 per cent. above the level of 1933, and approximately at the level it had occupied at the date of the Armistice of 1918. Between the outbreak of war (September, 1939) and March, 1943 (pre-price stabilization) the index rose by approximately 23 per cent. to a level slightly below that reached at the height of the post-war boom in 1920. Compared with the March Quarter, 1943, the index-number at the close of the war was practically unchanged. At December Quarter, 1948, the level was over 15 per cent. above that of the 1920 peak period.

Immediately after the outbreak of the war price control was established by the Government under Regulations dated 28th September, 1939, and a national policy of price stabilization was applied as from 12th April, 1943, backed by more stringent price control and price subsidies. The retail price level, as measured by the index, remained relatively steady throughout 1944 and 1945 at the level of March, 1943. This stabilized level was approximately 23 per cent. above that of 1939 and 63 per cent. above the level prevailing at the beginning of the first world war in 1914.

An account of price control measures and of price stabilization in Australia is published on page 414.

The movement in the various groups of the index and in the index as a whole for each year for which it has been compiled is shown in the following table for the six capital cities as a whole :—

ALL ITEMS (" C " SERIES) RETAIL PRICE INDEX AND ITS " GROUP " INDEX-NUMBERS(a) FOR THE SIX CAPITAL CITIES COMBINED, 1914 TO 1948.

(Base of Each Group : Weighted Average of Six Capital Cities, 1923-27 = 1,000)

§ 5. Increases in Retail Prices since Outbreak of War in 1939.

1. **Australia.**—The following statement shows for the Six State Capitals and Canberra separately and for the Six State Capitals as a whole, the percentage increases which have taken place in retail prices of items included in the "C" Series Index from September Quarter, 1939 to December Quarter, 1948, inclusive. The proportionate increase in the total index for each capital city is shown in the line marked "Total". The column headed "C" Series Index dissects the total percentage rise to show what part of it was due to the rise in prices in each of the four main groups of items. Thus, of the 45.7 per cent. increase for Sydney 15.3 was due to food and groceries, 0.2 to house rent, 23.4 to clothing and 6.8 to miscellaneous items. The column headed "Group Index" shows the percentage increase in prices of items in each group considered as a group. Thus for Sydney, prices in the food and groceries group increased by 42.6 per cent., house rents by 0.8 per cent., prices of clothing by 117.7 per cent. and prices of miscellaneous items by 36.2 per cent. These when weighted and combined in the proportions of the "C" Series Index showed a rise of 45.7 per cent. For the Six Capital Cities as a whole the increase over the period shown was 46.4 per cent.

ALL ITEMS ("C" SERIES) RETAIL PRICE INDEX.

(a) Weighted average Six State Capitals.

The foregoing comparisons refer to two points of time (i.e., the months immediately preceding the war and the closing months of 1948, at each of which special temporary factors may have influenced relative price levels. For instance, prices of certain foods (e.g., meat) fluctuate with seasonal conditions. The percentage increases shown do not, therefore, necessarily indicate the degree of increase due solely to causes peculiar to the war and post-war period.

2. **International Comparisons.**—The following table shows the increase during this period in Australia and certain other countries. The increases during the first world war have also been included.

Index (Base : December Quarter, 1942 = 100).

(d) New series (Base : 17th June, 1947 = 100).

(b) Old Index as varied by new War-time

(c) Quarterly indexes appear in preceding issues.

At various stages during the first world war most of these countries introduced some measures of price control. But in the second world war they introduced price control measures at an early stage and these became more stringent as the war progressed, culminating in a policy of price stabilization.

Immediately after the outbreak of war in September, 1939, the Commonwealth Government took steps to control prices, and, by proclamations issued from day to day, pegged prices of various commodities at those ruling on 31st August, 1939. The National Security (Prices) Regulations, proclaimed on 28th September, 1939, under the authority of the National Security Act, established the basic principles of war-time price control, provided for the appointment of a Commonwealth Prices Commissioner and conferred upon him extensive powers to control the price of goods declared for that purpose by the Minister for Trade and Customs. Further reference to this control appears on page 414.

WHOLESALE AND RETAIL PRICES; NOMINAL, AND EFFECTIVE OR REAL WAGE INDEX-NUMBERS--AUSTRALIA, 1911 TO 1943.

EXPLANATION.—The index-numbers in the graph above are for the Six Capital Cities as a whole, with the exception of those for Wholesale Prices up to the fourth quarter of 1927, which are for Melbourne. They are all calculated to the common base 1911 = 1,000, the scale for which appears on the left of the graph. The wholesale prices graph shows the trend of prices according to the "old" Melbourne Index up to the fourth quarter of 1927, but thereafter, this index having been "spliced" with the Basic Materials and Foodstuffs Index, the curve line moves in accordance with the variations of the latter. The price quotations for this index are, in the main, obtained from Melbourne sources, but their movements may be taken as representative of fluctuations in most Australian markets. Points in this graph are plotted quarterly from 1912 onward. The "A" Series Retail Price Index-numbers (food, groceries, rent of 4 and 5-roomed houses, clothing and miscellaneous household expenditure) are shown *quarterly* from 1925. For the period 1911-1914 the "C" Series index-numbers are taken back from the true base (November, 1914 = 1,000) by means of the "A" Series Index (Food and Rent of All Houses). Nominal Wages are shown *quarterly* from 1914, and Real Wages *quarterly* from 1925. Real wages are computed on the basis of the "C" Series Retail Price Index.

INDUSTRIAL DISPUTES, AUSTRALIA, 1929 TO 1948—WORKING DAYS LOST.

EXPLANATION.—The scale refers to working days lost in thousands. Thus, taking the year 1929 and comparing the sections with the scale, it will be seen that about 2,528,000 working days were lost in Mining, 1,000,000 in Manufacturing and Building, 30,000 in Transport, and about 3,000 in Other Industries. Total, 4,461,000 days.

§ 6. Construction of All Items ("C" Series) Retail Price Index.

I. The Regimen.—The regimen from which the "C" Series Index is compiled consists of a list of commodities and services which commonly enter into the consumption of the average household, and in respect of which comparative prices can be ascertained with due precision from time to time and from place to place. (See § 2 (3 and 4) hereof). The regimen is divided into the following Groups and Sections :—

Group.	Section.
I. Food and Groceries ..	{ A.—Groceries. B.—Dairy Produce. C.—Meat.
II. Housing	{ D.—House Rent. E.—Clothing—Man. F.—Clothing—Woman.
III. Clothing	{ G.—Clothing—Boy (10½ years). H.—Clothing—Girl (7 years). J.—Clothing—Boy (3½ years).
IV. Miscellaneous ..	{ K.—Household Drapery. L.—Household Utensils. M.—Fuel and Light. N.—Other Miscellaneous.

The "C" Series Index includes the whole of the foregoing Groups, but for many purposes indexes are required for individual Groups or Sections. For this reason the following indexes are regularly compiled at the intervals shown, and published in various publications issued by the Bureau :—

Group.(a)	Content.	Frequency.
I.	Food and Groceries	Monthly
II.	Housing (4 and 5 roomed houses) (b) ..	Quarterly
I. and II.	Food, Groceries and Housing (4 and 5 rooms) ("B" Series)	Quarterly
III.	Clothing	Quarterly
IV.	Miscellaneous Household Requirements ..	Quarterly
I., II., III. and IV.	Food, Groceries, Housing (4 and 5 rooms), Clothing and Miscellaneous ("C" Series) ..	Quarterly

(a) "Group" or "Sectional" index-numbers in the various tables throughout this publication cannot be compared with each other in order to show the relative cost of Food and Groceries, Housing, Clothing or Miscellaneous requirements, since each "Group" or "Section" (or combination thereof) has its own Base = 1,000, viz., the weighted average cost for the Six Capital Cities as a whole during the five-yearly period 1923-27 for that "Group" or "Section". (b) Rent.—The rent index-numbers shown in the tables in this publication measure the proportionate rise and fall in the average weekly rentals paid for houses of four and five rooms taking corresponding houses throughout. They are "price" indexes in the strict sense, i.e., they are designed to measure only the "price" element in rent fluctuations. Similarly, "average rents" where shown are indexes of "price" changes in rentals expressed in terms of pence. They are not the average of rents actually paid by all tenants of 4 and 5-roomed houses. It would be inappropriate to include the average of rents actually paid in an index designed to measure price changes only. The average of rents actually paid is ascertained periodically by Census methods—see also pages 32 and 33 of Labour Report, No. 37.

For convenience of reference several of the indexes mentioned above have been given the "series" designation shown against them. These indexes are dealt with in turn in the following pages.

2. The Mass Units (or "Weights").—The "mass units" (or "weights") are multipliers representing the approximate average annual consumption *per head or per household* under normal conditions. The index-numbers are computed on a "total annual aggregate expenditure" basis, i.e., the total annual expenditure from time to time by a *standard population* in respect of the selected regimen of commodities and services commonly entering into household consumption, and of a constant *standard quality*. As a first step, therefore, it is necessary to multiply the price of each item by its "weight" per head or per household as the case may be. Thus, the "weight" of bread is 100 2-lb. loaves per head; of sugar 100 lb. per head; of towels 3 per household; and of housing 52 rent-weeks per household. The result of this initial calculation is designated the "P.M.U" aggregate (i.e., Prices x Mass Units).

The sum of these "P.M.U" results for each Section or Group is then multiplied by its appropriate population or household "weight" to produce their respective annual aggregate expenditures. Thus, Sections A to C (Food and Groceries) would be multiplied by the total population; Section D (Housing) by the total number of households; Sections E to J (Clothing) by the proportion of the total population applicable to each; and Sections K to N (Miscellaneous) by the total number of households.

The combination of the aggregates from the last paragraph gives the "total annual aggregate expenditure" for the whole regimen, from which the "C" Series index-number is derived by applying to 1,000 the ratio which the aggregate for any period bears to the aggregate for the base period of the Index. In the process of tabulation all prices are converted to pence for these final aggregates.

For tabulating purposes some of these "mass units" are varied when necessary to make up a deficiency or cancel out an excess in the aggregate resulting from a *change in the standard* of any item upon which prices are collected, to ensure that such changes shall not be wrongly recorded by the index as *variations* in prices. The published "mass units", however, still continue to show the correct *relative* consumption "weights" actually applicable to the commodities and services in the regimen for the *constant standards* used in the index. See also § 2 (3) and 6 (3) of this Chapter.

In the case of Food and Groceries (Group I.) the "weights" adopted are approximately the annual average consumption per head for household purposes of the various articles during the years 1927 to 1929. The "weights" allotted to items in Clothing (Group III.) and Household Drapery (Section K of Group IV.) are based largely on the results of the inquiries of the Royal Commission on the Basic Wage, which reported in 1920 and 1921. After exhaustive inquiries the Commission published a "regimen" for an average working family of five persons, and set out the constituent items in its "Indicator List". This list, so far as it related to the articles in question was followed substantially in the original compilation of the "C" Series Index, and has been adjusted by subsequent investigations of the Bureau to accord with changes in popular usage. The "weights" allotted to the items were not adjusted to take account of war-time shortages or rationing, and the index therefore measured war-time price changes in relation to a normal (or pre-war) apportionment of household expenditure. (See § 2 (5) and § 8 (3) hereof.)

3. Relative "Aggregate Expenditure" of Items and Groups.—In the *base period* of the index (the years 1923 to 1927) the relative importance of each of the four main groups expressed as a percentage of the weighted average "aggregate expenditure" in the Six Capital Cities (from which all relative index-numbers are derived) was—Food and Groceries, 38.66 per cent.; House Rent, 21.26 per cent.; Clothing, 23.04 per cent., and Miscellaneous, 17.04 per cent., as shown in the third column of the following table. Although the "weights" of each item in the regimen are kept virtually constant, the relative "aggregate expenditure" of the various items and groups will, of course, vary from time to time as relative prices change and, in

addition, the distribution of relative expenditure as between the groups and sections is varied from time to time for "relative weighting" purposes on the basis of the changing relativities of population and households as disclosed by successive Censuses. This, however, does not affect the level of the Index at the point of change, but alters the degree of variation registered by the various groups or sections of the Index.

The percentage distribution for Melbourne in the *base period* was practically identical with that of the Six Capital Cities as a whole, and has continued to be representative of the relative movement of prices in the capital cities up to the present time. For this and other reasons, therefore, the percentage distribution of the Melbourne "aggregate expenditure" for successive December quarters has been published in previous issues of this publication, and the figures for December Quarter, 1948 are shown in the fourth column of the table for comparison with those of the *base period* of 1923-27:—

Group.	Section.	Percentage of Aggregate Expenditure.			
		1923-27 (Base). Six Capital Cities.		Dec. Qtr., 1948. Melbourne.	
I. Food and Groceries	{ A Groceries	17.44	38.66	12.88	36.29
	{ B Dairy Produce ..	10.28		10.57	
	{ C Meat	10.94		12.84	
II. Housing	D House Rent— (4 and 5 roomed houses)	21.26	21.26	16.75	16.75
III. Clothing	{ E Man	8.69	23.04	10.64	29.43
	{ F Woman	9.12		14.25	
	{ G Boy, 10½ years ..	2.89		2.07	
	{ H Girl, 7 years ..	1.36		1.67	
	{ J Boy, 3½ years ..	0.98		0.80	
IV. Miscellaneous	{ K Household Drapery	1.09	17.04	1.97	17.53
	{ L Household Utensils	0.49		0.67	
	{ M Fuel and Light ..	4.92		4.57	
	{ N Other Miscellaneous	10.54		10.32	
		100.00		100.00	

It should be noted, however, that percentage price variations are measured from the "aggregate expenditures" of the *base period* of the index, and the percentages shown in the foregoing table for the *base period* 1923-27, therefore, are the proportionate "weights" applicable to the various groups and sections in measuring such variations in the index as a whole calculated to *this base period*, and *not* the percentage "weights" of any other period, for example, those shown for December quarter, 1948—which would only become of significance in the measurement of variations if the latter quarter were adopted as a *new base* for the index.

4. *Base Periods of the Indexes.*—The base period originally adopted by the Bureau for its retail price indexes was the year 1911. When the collection of the prices of clothing and miscellaneous items was undertaken for the purposes of the "C" Series Index, the month of November, 1914, was adopted as the base period for this series. The

desirability of computing retail price indexes to a post-war base was considered by a Conference of Statisticians in 1929, and it was resolved that from 1st January, 1930, the five years 1923-27 should be adopted as the base period, and since this date the retail price indexes have been published on this base. The aggregate to which all index-numbers are related is the weighted aggregate cost of the regimen in the six capital cities during the period taken as base, expressed as an index-number of 1,000.

§ 7. Tabular Statements of Retail Price Index-Numbers.

1. **General.**—The results of inquiries into price movements are available in the following publications :—

(i) *Monthly.*—A mimeographed statement is published each month giving index-numbers for Food and Groceries. The *Monthly Review of Business Statistics* contains annual, quarterly and monthly index-numbers to the latest available date.

(ii) *Quarterly.*—A mimeographed statement is issued about three weeks after the end of each quarter giving the "C" Series index-numbers for that quarter and immediately preceding quarters in respect of each of the 30 cities and towns originally adopted and for certain other towns, e.g., Canberra, for which the "C" Series index-numbers are now compiled. The *Quarterly Summary of Australian Statistics* contains annual, quarterly and monthly index-numbers to the latest available date. This publication also contains the average prices of the items comprising the Food and Groceries regimen, for each month of the last available quarter, in the 30 towns covered by the investigation. Comparative average rents of four and five-roomed houses in these towns are also shown therein.

(iii) *Annual.*—The *Labour Report* contains index-numbers over the past 28 years, quarterly results for the last eight years and monthly figures for the last year. The average prices for the last year of the items of food and groceries, and average house rents for the last six are also published in this report. This publication contains information similar to, but in less detail than, that published in the *Labour Report*.

2. **All Items ("C" Series) Retail Price Index.**—On page 300 is published a table of weighted averages for the six capital cities combined of "C" Series index-numbers, together with index-numbers for each of the four main groups of items in the "C" Series Index for each year 1914 to 1948 and quarterly for the years 1939 and 1944 to 1948.

In the pages immediately following are published :—

- (i) the "C" Series index-number for the last quarter of each year 1939 and 1943 to 1948 (page 405) and for the month of November of each of the years 1914 to 1920 (page 406), for each capital city and for the six capital cities combined, and showing also separate indexes for each of the four main groups of items; and
- (ii) the "C" Series index-numbers for November, 1914, 1921 and the years 1929, 1939 and 1943 to 1948 (page 407) for each of the 30 towns with the weighted averages for each State, the six capital cities and 30 towns, together with index-numbers for the same periods for four additional towns for which this index is tabulated.

 (e) Zeehan. (f) Beaconsfield. (g) Not included in weighted averages above.

3. "B" Series Retail Price Index: Food, Groceries and Rent.—This index measures the prices of food and groceries and the rent of 4 and 5-roomed houses. It was first compiled for the year 1925, and retrospectively for several earlier years. It was designed to replace the "A" Series Index (food, groceries and rent of all houses), which was the original index compiled in 1912. The first of the two tables following is split up into the various sections of the regimen, and covers only the six capital cities,

while the second represents the whole regimen and covers the 30 Towns included in the tabulation of the "B" Series Index, with the weighted averages for the 5 towns in each State, the Six Capital Cities and the 30 Towns.

RETAIL PRICE INDEX-NUMBERS(a) : CAPITAL CITIES—"B" SERIES.

(Base of each Section : Weighted Average of Six Capital Cities, 1923-27 = 1,000.)

§ 8. Changes in the Regimen.

1. General.—Since the original compilation of retail price indexes by the Bureau in 1912, the regimens of the several groups and sections have undergone some modifications. These are fully described in the annual *Labour Report* No. 37 for 1948, pp. 32-35. These changes are made from time to time with a view to improving the index-numbers as measures of price variations. They comprise chiefly the elimination or replacement of articles no longer in demand, or which experience had shown to be unsuitable media for the measurement of price variations; the alteration of units of quantity in certain cases to conform with those most in general use; the adjustment of the mass unit allotted to certain articles to bring them into accord with present-day consumption habits; the

re-adjustment of the population and household weights applicable to the several groups and sections of the regimen in accordance with general Census results; and improved methods of collecting and weighting average house rentals.

2. **Method of Effecting Changes.**—Changes of the nature mentioned are commonly made in price indexes without seriously impairing their continuity. In accordance with established principles of procedure in changing the regimen (see *Labour Report* No. 9, Appendix I., Part II., paragraphs 14 and 18), the general level of the index is taken as determined by the old regimen for the quarter in which the change is made, and the new regimen is used to measure variations in the price-level after that date. The linking up of the index-numbers on the old and the new basis is effected by the usual method of equating the respective weighted aggregate costs of the old and the new regimens in the six capital cities.

There are two methods of effecting this, as follows :—Up to June Quarter, 1942, all such changes were made by equating the new aggregate of the section embodying the changes to the former aggregate. This course was adopted when items were added to or omitted from the regimen, and when a change was made in the standard of any item. From September Quarter, 1942, however, all changes of standard were effected mainly by an appropriate adjustment of the “mass unit” or “weight” so as to preserve the percentage weight which the item carried in the aggregate from time to time and, wherever possible, the “weight” of any item dropped from the regimen was transferred to an article of a similar nature which would serve as a more appropriate medium for the measurement of the variations in the price of the article dropped than the remaining items of the section. The “mass units” of the remaining items under the former procedure were in effect proportionately increased to carry the aggregate of the item dropped, or reduced to admit a new item added. *See also* par. 2 on page 402.

While the foregoing involves no break of continuity in the index-numbers for the six capital cities as a whole, upon the basis of which all such changes are effected, slight alterations of the relative positions of individual towns are inevitable on account of the alteration of former standards. The effect, however, is more noticeable in the group index-numbers than in those covering a combination of groups, wherein the losses and gains tend to balance out.

3. **The Regimen under War Conditions.**—Although the effects of the war produced some variations from normal consumption in 1940 and 1941 it was not until 1942 (*See also* 2 (5) of this Chapter) that fundamental changes began to occur. As there explained, the years 1942, 1943 and 1944 produced temporary changes of a far-reaching character which, if permanent and stable, must have necessitated fundamental re-adjustments in the regimen and mass units of the index. But the resultant changes in the index would have been so extensive as virtually to create a new index which would not have been continuously comparable with the “C” Series Index either as compiled pre-war or as it may be compiled in post-war years. Consideration of the matter led to the conclusions—

- (i) that it was desirable to continue the “C” Series Index substantially on its pre-war regimen in order to ensure continuity of comparison of price movements on a clearly defined basis;
- (ii) that it was impossible to reconstruct the “C” Series Index to take account of recurrent temporary departures from normal consumption.

§ 9. Retail Price Indexes and Wage Variations.

Two distinct procedures are adopted by the Commonwealth Court of Conciliation and Arbitration in fixing and varying basic or living wages as follows :—

- (i) The Court periodically *fixes* the amount of wage in the light of evidence submitted by parties appearing before it. Such evidence usually covers a wide range of facts as to economic conditions.
- (ii) Having determined the amount of basic wage the Court further determines whether or not it shall be subject to automatic adjustment for changes in price level and, if so, by what method such *variation* shall be made. This again is decided in the light of evidence and of representations by the parties concerned.

The "C" Series Index is used by the Court to derive the "Court" series of retail price index-numbers upon which the basic or "needs" portion of the wages prescribed in awards is varied automatically for changes in price levels quarterly, half-yearly or yearly. These are commonly referred to as "cost of living adjustments" although in fact they relate only to that part of the *change in cost of living* which is due to variations in prices. The Court itself determines from time to time at public sittings the amount of the basic wage, having regard to evidence submitted in relation to other aspects of "cost of living" and other relevant considerations. In fixing the amount of the basic wage the Court does not have regard to either the regimen used in compiling the retail price index or the cost of such regimen. The regimen of the index would not be suited to such a purpose.

The considerations upon which the basic wage is fixed are set out in successive judgments of the Court and briefly summarized in Chapter III. (§ 3) of the *Labour Report*. On this matter, reference should be made to the Basic Wage Judgments of the Court, particularly those of 1934, 1937 and 1941, and to the general statement of principles set out in the judgment on the "Munition Workers' Case" of 1943. Certain State industrial tribunals use the index-numbers directly for automatic or quasi-automatic adjustments of the rates of wages determined by them as tribunals, while some State tribunals have regard to the index-numbers and other factors in considering what "cost of living" variations they should make in rates of wages.

The use of indexes by industrial authorities for purposes of adjusting rates of wages for changes in price level is a practice of long standing, dating in the case of the Commonwealth Court of Conciliation and Arbitration, for example, back to the year 1913. The tribunals form their own judgment as to relevance of the indexes to their purposes, and periodically hear the representatives of employers and employees on the issues involved, including questions as to whether the index is satisfactory for the purposes to which it is applied by the tribunal. In such proceedings the Statistician or his officers are called at times as witnesses on questions of fact and technical matters relating to the indexes.

The automatic adjustments in wages prescribed in awards of the Court on the basis of retail price index-numbers are sometimes referred to as "cost of living" adjustments and the index is popularly referred to as a "cost of living index". This at times creates misconceptions as to the nature of the retail price index since the term "cost of living" connotes not only change in cost of living due to changes in prices, but also changes in cost of living due to changes in standard of living. Beyond that, use of the term "cost of living" index sometimes creates the erroneous impression that the retail price index purports to embrace all that should be included in a desirable standard of living. As pointed out in the opening sections of this chapter, the "C" Series Index is a retail price index of specific meaning.

Reference should be made to *Labour Report* No. 37 for the actual Automatic Adjustment Scale used for the adjustment of the "needs" portion of the Commonwealth basic wage.

B.—WHOLESALE PRICES AND PRICE INDEXES.

§ 1. Melbourne Wholesale Price Index.

1. General.—The data on which this section is based relate almost entirely to wholesale prices in Melbourne.

The index of Melbourne wholesale prices was first computed in 1912, and has been continued on the same lines since that year. The items included comprise chiefly basic materials which in the form of raw material, food or as a source of power enter into production for home consumption. The purpose of the index, therefore, is to measure the changes in the prices of these particular materials rather than the changes in prices generally. As Australia does not, to any extent, manufacture from imported raw materials commodities for export, the local consumption appears to give the most appropriate weighting.

2. Index-Numbers.—Index-numbers for each group of commodities as well as for all groups combined are shown in the following table:—

MELBOURNE WHOLESALE PRICE INDEX-NUMBERS.

(Base of each Group : Year 1911 = 1,000.)

NOTE.—The figures given in this table are comparable in the vertical columns but are not directly comparable horizontally.

§ 2. Basic Materials and Foodstuffs.

1. General.—As mentioned above, the Melbourne Wholesale Price Index was first computed in 1912. Neither the component items nor the weighting have been varied. Consequently the index is a measure of changes in wholesale price levels based on usages which have altered substantially since the period on which the weighting was determined. As such it is useful as an indication of long-term trends over the past 88 years which it covers, on the assumption that the relative importance of component items remained constant. But it no longer serves as a measure of price variations from month to month or from year to year of commodities weighted in accordance with present day consumption. Reference to the description of the index published in the annual *Labour Report* will indicate that animal fodder preponderate in the "Agricultural Produce" group, while "Building Materials" include little besides imported timber. In other groups, some principal items have increased in consumption while others have decreased. It was resolved, therefore, at the Conference of Statisticians at Brisbane in 1930 that the time had come to revise and extend the items included in order to bring the index into line with changed conditions. An investigation to that end was commenced, and in the course of the past few years, many new price-series have been collected on a monthly basis back to January, 1928. Some of these have been incorporated in a new index of the prices of basic materials and foodstuffs, index-numbers of which are currently published in the *Monthly Review of Business Statistics* and other publications of the Bureau. The

price quotations have in the main been obtained directly from manufacturers and merchants and, with a few important exceptions, from Melbourne sources. Apart from home-produced building materials, coal and one or two minor commodities, however, the price movements may be taken as representative of fluctuations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on average annual consumption during the years 1928-29 to 1934-35 inclusive. The original index is being continued for the present on the old lines, as set out in § 1 on page 411.

2. *Index-Numbers.*—Index-numbers for each group of commodities and for all groups combined for this new index of wholesale prices of basic materials and foodstuffs are given in the following table.

WHOLESALE PRICE INDEX-NUMBERS : BASIC MATERIALS AND FOODSTUFFS.

(Base of each Group : Average 3 years ended June, 1939 = 1,000.)

Period.	Basic Materials.							Food-stuffs and Tobacco.	Basic Materials and Foodstuffs.		
	Metals and Coal.	Oils, Fats and Waxes.	Textiles.	Chemicals.	Rubber and Hides.	Building Materials.	Total.		Goods principally Imported. (a)	Goods principally Home Produced.	Total-All Groups.

(a) Represents only such imported commodities as are included in the wholesale price index. This index does not measure changes in price of imports generally.

NOTE.—The figures given in this table are comparable in the vertical columns but are not directly comparable horizontally.

C.—CONTROL OF PRICES DURING AND SINCE THE 1939-45 WAR.

1. **General.**—An account of the measures taken by the Commonwealth Government to control prices from September, 1939 (immediately after the outbreak of war), until 29th May, 1948 (the date of the Prices Referendum), is given in Official Year Book No. 37, pp. 458-464.

2. **Transfer of Price Control to the States.**—Consequent upon the rejection of the proposal embodied in the Prices Referendum held on 29th May, 1948, that permanent power to control rents and prices (including charges) be conferred on the Commonwealth Government, responsibility for price fixation was assumed by the State Governments and steps were taken to pass State Prices Acts. These acts were proclaimed to operate simultaneously on 20th September, 1948. Except in the case of Queensland, each Act was to remain in force for a specific period, but the period varied from State to State.

An amendment of the National Security (Prices) Regulations on 15th September, 1948, provided that the Minister may, by declaration published in the *Gazette*, declare that from and including a date specified prices for the sale of goods and rates for the supply of services in a State or Territory of the Commonwealth specified in the declaration would cease to be controlled under the Regulations. In pursuance of this power, the Minister for Trade and Customs issued declarations on 17th September, 1948, providing for the relinquishment of price control by the Commonwealth in the States as from 20th September, 1948.

On 20th September, 1948, each State Government issued declarations covering uniform lists of goods and services, which were brought under price control. Existing Commonwealth Prices Regulation Orders continued to apply to these goods and services until specially varied in accordance with the terms of the State legislation. At the same time, the Commonwealth Government issued an identical list of declared items to operate in the Australian Capital Territory and other Territories of the Commonwealth.

In the operation of State price control, the State Prices Commissioners closely collaborate. Conferences of Commissioners are held at intervals of approximately two months. The Commissioners are vested with certain powers of price control under the Prices Acts, and it is the usual procedure after the administrative conference for State Prices Ministers to meet to discuss matters of policy and any specific questions referred to them for determination. Thus a large degree of uniformity is attained in controlling and decontrolling items and in the fixation of margins and prices of major items.

3. **Expenditure on Price Stabilization Subsidies.**—The following is a comparison of the expenditure on Price Stabilization Subsidies for the years 1943-44 to 1948-49 inclusive. In addition to this expenditure, the Government paid subsidies to the dairy industry and on superphosphates and these payments also had a stabilizing influence on prices.

D.—WAGES.

§ 1. Operations under Wages Board and Industrial Arbitration Acts.

1. *General*.—Particulars regarding operations under the Commonwealth and State Acts for the regulation of wages, hours and conditions of labour were first compiled for the year 1913, and reviews to the end of each annual period appear in the *Labour Reports* up to and including No. 36, in the *Quarterly Summaries of Australian Statistics* up to and including No. 196 and in previous issues of the Official Year Book (see No. 36, p. 465). Owing to the lack of comparability between States, which rendered the figures of doubtful value, and to difficulties encountered in the collection of these statistics they have been discontinued.

2. *Control of Wages During and Since the War*.—Reference may be made to *Labour Report* No. 35, page 55, for a summary of the steps taken during and since the war under the authority of the National Security (Economic Organization) Regulations to "peg" all rates of remuneration throughout all industry (both public and private) at those being paid on 10th February, 1942 and of the steps taken gradually to "unpeg" such wages by various amendments of the regulations mentioned.

§ 2. Rates of Wage and Hours of Labour.

1. *General*.—The collection of information respecting the current rates of wage payable in different callings and in occupations in various industries was first undertaken by this Bureau in the early part of 1913. The particulars are obtained primarily from awards, determinations and agreements under Commonwealth and State Industrial Acts, and therefore are the minimum rates prescribed. They refer generally to the capital city in each State, but in industries which are not carried on in the capital cities, e.g., mining, agriculture, etc., the rates in the more important centres are taken. In cases where no award, determination, or agreement is in force, particulars are taken of the ruling union or predominant rate. During recent years the number of predominant rates of wage included in the tabulations has been reduced considerably, as most of the industries and occupations are now covered by awards, determinations, or industrial agreements. The figures of nominal wages and hours are in course of revision to meet changes in industrial structure. The amounts should not be regarded as actual current averages, but as an index of changes expressed in money and hour terms.

The index-numbers for male adult workers are computed with the weighted average wage in 1911 as base (= 1,000). In the case of females, however, it has not been possible to secure information for the years prior to 1914, and the index-numbers are therefore computed with the weighted average rate of wage payable to adult female workers in Australia at 30th April, 1914 as base (= 1,000).

An extensive tabular presentation of the minimum rates of wage for adult male and female workers in the main occupations in the capital city of each State is given each year in the Appendix to the *Labour Report*.

2. *Weekly Rates of Wage, 1939, 1944 to 1948*.—(i) *General*. The average rate of wage for each industrial group is computed by taking the arithmetic average of the rates of wage payable for all classified occupations within that group. These averages are weighted in accordance with census results to give the average of all occupations for the States and for Australia.

(ii) *Adult Males—States.* The following table gives the weighted average nominal weekly rates of wage payable to adult male workers at the dates specified :—

(a) The figures of nominal wages and hours of labour are in constant prices to meet changes in industrial structure. The amounts shown should not be regarded as actual current averages but as an index of changes expressed in money and hour terms.

(b) As at 31st December, 1948.

Except in South Australia in 1933, wages declined in all States during the four years 1930 to 1933, the average rates at 31st December of the latter year being approximately 17 per cent. less than those ruling at the end of 1930. Increases were granted in each of the States during the next six years, the weighted average nominal rate for Australia at 31st December, 1938 being 16 per cent. higher than at the end of 1933. During the early war years nominal weekly wages advanced annually in each State, the greatest increase occurring in 1942 (11 per cent. for Australia), followed by an increase of 3 per cent. in the following year, after which they remained comparatively stable until the fourth quarter of 1946 when they advanced 5.4 per cent. due mainly to the increase in the "needs" wage granted by the Commonwealth Court of Conciliation and Arbitration in its judgment of 13th December, 1946. With the relaxation of the Wage Pegging Regulations and the end of Price Stabilization wages rose rapidly during 1947 and 1948.

Male wages at 31st December, 1948, were 64.2 per cent. higher than in December, 1939, and 28.3 per cent. higher than in September, 1946.

At the close of 1948 rates were highest in New South Wales, followed in the order named by Western Australia, Victoria, South Australia, Tasmania and Queensland. The highest weighted average rate for Australia was recorded at 31st December, 1948, namely, 156s. 4d. per week.

(iii) *Adult Males—Industrial Groups.* The following table shows for Australia the average weekly rates of wage and index-numbers in each industrial group, and for all groups at the dates specified.

WAGE RATES OF ADULT MALES.

WEIGHTED AVERAGE NOMINAL WEEKLY RATES FOR A FULL WEEK'S WORK AND INDEX-NUMBERS OF WAGE RATES IN EACH INDUSTRIAL GROUP(a).

NOTE.—Index-numbers for each industrial group and for all industrial groups are based on the average wage for all groups in 1911 (51s. 3d.) = 1,000. The index-numbers in this table are comparable throughout :—

(a) See note (a) on page 416. (b) Includes the value of victualling and accommodation where supplied. (c) Includes the value of board and lodging where supplied.

The foregoing table shows that the highest average weekly wage at 31st December, 1948 was recorded in Group XI. (Shipping, etc.), 182s. per week, followed by Groups V. (Books, Printing, etc.), 177s. 2d., VII. (Building), 171s. 9d., VIII. (Mining, etc.), 163s. 5d., XII. (Agricultural, etc.), 158s. 1d., IX. (Railways, etc.), 156s. 1d., and II. (Engineering, etc.), 155s. 10d. The lowest average rate was recorded in Group XIII. (Domestic, etc.), 141s. 5d. Compared with those prevailing at 31st December, 1947, rates of wage increased in all industrial groups during 1948.

(iv) *Adult Females—States.* The following table shows the weighted average nominal weekly rates of wage payable to adult female workers for a full week's work in each State and Australia at the dates specified.

(a) See note (a) to table on page 416.

(b) As at 31st December, 1948.

It should be noted that the base of these index-numbers is 1914 and not 1911 as in the foregoing tables for adult males. This is because there is no tabulation for adult female rates prior to 1914.

Female rates followed the same downward course as male rates from 1930 to 1933. The weekly average nominal wage for Australia fell from 54s. 1d. at 31st December, 1929, to 43s. 5d. at the same date in 1933, a decline of 10s. 8d., or 20 per cent. As with the rates for males, increases were recorded in all States during the next thirteen years, especially after September, 1946 when female rates were increased under the National Security (Female Minimum Wage) Regulations. The weighted average rate for Australia at 31st December, 1946, had advanced by 37s. 4d. per week over that ruling on 31st December, 1933. Female rates have risen rapidly since December, 1946, owing to increases in the male "needs" basic wage, in the percentage of that wage which the female rates represent and in marginal rates. The weighted average rate for Australia at 31st December, 1948 (100s. 4d.), was the highest recorded to that date and was 90.5 per cent. above the average at 31st December, 1939.

(v) *Adult Females—Industrial Groups.* The following table shows the weighted average weekly rates of wage payable in Australia to adult female workers in the industrial groups in which they are mainly employed, and in all groups combined.

(a) See note (a) to table on page 416.

(b) Includes the value of board and lodging, where supplied.

During 1948 the rate of wage for female employees in each industrial group increased as follows :—III. (Food, etc.), 12s. 7d. per week ; XIII. (Domestic, etc.), 12s. 8d. per week ; I, II, V. and VI. (All other manufacturing), 13s. 1d. per week ; IV. (Clothing, etc.), 14s. per week and XIV. (Miscellaneous), 19s. 4d. per week. The weighted average for all groups increased by 14s. 8d. per week.

3. *Relative Hours of Labour and Hourly Rates of Wage, 1939 to 1948.*—(i) *General.* The rates of wage referred to in preceding paragraphs are the minima payable for a full week's work. The number of hours constituting a full week's work differs, however, in many instances between various trades and occupations in each State, and between the same trades and occupations in the several States. To secure what may be for some purposes a better comparison, the results in the preceding paragraphs are reduced to a common basis, namely, the rate of wage per hour. Particulars as at the end of the years 1944 to 1948 compared with 1939 are given in the following table, for males and females separately in each State. These particulars relate to (a) the weighted average

nominal weekly wage; (b) the weighted average number of working hours constituting a full week's work; and (c) the weighted average hourly wage. The weighted average weekly wage relates to all industrial groups combined and includes the value of board and lodging where supplied in land occupations, and the value of victualling and accommodation where supplied in marine occupations, whereas the number of working hours and the hourly wage relate to all industrial groups other than Groups XI. (Shipping), and XII. (Agricultural, Pastoral, etc.). Some of the occupations included in these groups are of a casual or seasonal nature, and the hours of labour are not generally regulated either by awards or determinations of industrial tribunals or otherwise, hence the necessary definite particulars for the computation of the average number of working hours are not available.

The general effect of reducing the rates of wages to a common basis (i.e., per hour) is to eliminate any difference between the several States which may be due to unequal working time.

(ii) *Adult Males and Females.* Particulars of the weekly and hourly wages and hours of labour for adult males and females at the close of the years 1944 to 1948 compared with 1939 are given in the table hereunder:—

		Hourly Wage	2/6	2/7	2/5½	2/4½	2/4	2/5	2/6

(a) See note (a) to table on page 416. (b) Weighted average weekly rate in all industrial groups combined. (c) Weighted average working hours per week, and computed hourly rates of wage for all industrial groups excepting Groups XI. (Shipping, etc.), and XII. (Agricultural, Pastoral, etc.). Working hours in these groups are generally regulated by industrial tribunals for some of the occupations classified in industrial groups XI and XII.

(iii) *Index-numbers.* The downward tendency in hours of labour for Australia commenced in the December quarter of 1924, when the weighted averages were 46.66 for males and 46.02 for females, and, excepting for slight increases in 1929 and 1930, the reduction has continued. During the second half of 1947 hours for males and females in New South Wales were reduced owing to the introduction of the forty-hour week in occupations under the jurisdiction of State arbitration. A substantial reduction also occurred in South Australia, while slight reductions took place in Victoria and Tasmania. In Australia generally, the forty-hour week operated from 1st January, 1948 and was responsible for substantial reductions in hours in that year. The weighted averages for Australia at 31st December, 1948 were 39.96 hours for males and 40.00 hours for females. The effect of changes in hours of labour on the hourly rate of wage as compared with the general increase in the weekly wage is readily seen from the comparative index-numbers for all classes combined given in the following table. It should be noted that these comparative index-numbers for males and females are on the 1914 base as against the 1911 base of the earlier tables for adult males. This is because there is no tabulation for adult female rates prior to 1914 :—

(a) Weighted average working hours per week for all industrial groups excepting Groups XI. (Shipping), and XII. (Agricultural, Pastoral, etc.). Working hours have not been generally regulated by industrial tribunals for some of the occupations classified in Industrial Groups XI. and XII. See note (a) to table on page 416.

5. **Nominal and Effective Wages.**—(i) *General.* Wages are said to be *nominal* when they represent the actual amounts of money received in return for labour, and are described as *effective* or *real* when expressed in terms of their equivalent purchasing power, that is, their purchasing power over some definite composite unit or regimen the cost of which can be ascertained at different times. The relation between *nominal* and *effective* or *real* wages was discussed at some length in *Labour Report* No. 6, and was also referred to in *Labour Report* No. 11.

Since it is possible to measure purchasing power over more than one composite unit or regimen it is equally possible to convert any given nominal wage series into more than one series of effective or real wages. Prior to 1936 it was the practice of this Bureau to compute effective wage index-numbers by dividing the nominal wage index-numbers by the corresponding retail price index-numbers for food, groceries and rent of all houses ("A" series). While wage rates were generally varied on the basis of the "A" series index-numbers there was a good deal to be said for this procedure. When the Commonwealth Court abandoned the "A" series, the merits of the "C" series for "deflating" nominal wage rates were strengthened. The "C" series covers food, groceries, rent of four and five-roomed houses, clothing and miscellaneous household requirements. As the computation of the "A" series was discontinued after the June Quarter of 1938, tables measuring real wages in terms of their purchasing power over the "A" series regimen have been discontinued, and in the following tables real wages are measured in terms of their purchasing power over the "C" series only.

(ii) *Nominal Weekly Wage Index-numbers, Adult Males, 1901 to 1948—States.* The following table shows for the period 1901 to 1948 the weighted average nominal weekly rates of wage payable for adult males in each State, the weighted average rate for Australia in 1911 being taken as the base (= 1,000). These results are based generally upon rates of wage prevailing in the capital city of each State, but in certain industries, such as mining, rates are necessarily taken for places other than the capital cities. The index-numbers for 1901 and 1911 are based on rates current at the end of December, annual averages

not being available. For 1914 and subsequent years, however, the index-numbers are based on the average rates current at the end of the four quarters of each year:—

NOMINAL WAGE INDEX-NUMBERS: ADULT MALES.

(Base: Weighted Average Wage for Australia, 1911 = 1,000.)

State.	1901.	1911.	1914.	1921.	1929.	1933.	1939.	1944.	1945.	1946.	1947.	1948.

Tasmania ..	719	799	1,027	1,745	1,840	1,519	1,738	2,268	2,273	2,336	2,512	2,861
Australia ..	848	1,000	1,081	1,826	1,972	1,584	1,846	2,326	2,339	2,400	2,598	2,914

(iii) *Effective or Real Wage Index-numbers, Adult Males, 1911 to 1948—States.* In obtaining the effective wage index-numbers in the following table, the nominal wage index-numbers shown above have been divided by the corresponding retail price index-numbers for the capital city and multiplied by 1,000. Since the "C" series index-numbers were not compiled for periods prior to November, 1914, it has been assumed that fluctuations between 1911 (the base of the table) and 1914 in the "C" series would have been similar to the fluctuations observed in the "A" series. A table showing effective or real wage index-numbers from 1901 to 1937 measured in terms of purchasing power over the "A" series regimen appeared in previous issues of the Official Year Book, see No. 37, page 473.

EFFECTIVE OR REAL WAGE INDEX-NUMBERS: ADULT MALES (FULL WORK).

Measured in terms of purchasing power over the "C" series regimen.

(Base: Weighted Average Real Wage in Australia in 1911 = 1,000.)

State.	1911.	1914.	1921.	1929.	1933.	1939.	1944.	1945.	1946.	1947.	1948.
New South Wales	925	1,073	1,130	1,186	1,207	1,247	1,249	1,258	1,316	1,359
Victoria	954	1,084	1,164	1,147	1,180	1,234	1,243	1,260	1,312	1,355
Queensland	1,022	1,227	1,290	1,382	1,306	1,288	1,307	1,314	1,367	1,379
South Australia	914	1,034	1,099	1,086	1,147	1,214	1,218	1,229	1,291	1,341
Western Australia	1,043	1,096	1,152	1,177	1,308	1,292	1,300	1,296	1,348	1,377
Tasmania	902	984	1,108	1,110	1,153	1,237	1,237	1,237	1,285	1,334
Australia ..	1,000	948	1,087	1,151	1,187	1,211	1,246	1,252	1,263	1,318	1,357

In the table above, the effective wage index-numbers are computed to the one base, that of Australia for 1911. As the index-numbers are comparable in all respects, comparisons may be made as to the increase or decrease in the effective wage index-number for any State over any period of years.

(iv) *Effective or Real Wage Index-numbers, 1901 to 1948—Australia.* In the following table similar index-numbers are given for Australia as a whole under both the "A" and "C" series. These are obtained by dividing the nominal wage index-numbers for Australia for the year concerned by the corresponding retail price index-numbers for the six capital cities and multiplying by 1,000.

NOMINAL AND EFFECTIVE OR REAL WAGE INDEX-NUMBERS (FULL WORK).

(a) Not available.

NOTE.—For years prior to 1914 the nominal wage index-numbers relate to the end of the year only, but from 1914 onwards these figures, in addition to those for retail prices, are averages for the whole year.

§ 3. Basic Wages in Australia.

1. *General.*—Basic wages in Australia are fixed by various industrial tribunals operating under Commonwealth and State Arbitration Acts, and are varied from time to time according to changes in cost of living, constitution of the family unit, etc. In the industrial legislation of New South Wales, Queensland, South Australia and Western Australia, provision is made for the tribunals appointed under the Acts to determine the basic rates of wage to be paid to adult unskilled workers. In Tasmania provision for the declaration of a basic rate of wage is not included in the industrial Acts in force. The Wages Board system operates in this State, and each Wages Board determines the rate of wage to be paid to the unskilled worker when the determination for an industry or calling is under review. In Victoria, however, the same Wages Board system exists, but by amendments of the Factories Act, operative from 17th October, 1934, Wages Boards are obliged to adopt Commonwealth Award rates and conditions “which such Boards are under the Factories and Shops Acts empowered to include in their determinations.” As the power of the Commonwealth Arbitration Court is limited by the Constitution to the settlement, by conciliation and arbitration, of industrial disputes extending beyond the limits of any one State, no similar provision respecting the determination of a basic wage is to be found in the Commonwealth Conciliation and Arbitration Act. In practice, the Court does declare a Commonwealth basic wage, and uses the wage so declared as a basis for all awards made by it in the exercise of its jurisdiction, except in the case of awards made for Whyalla and Iron Knob where the basis of awards has, since

1947, been the South Australian living wage plus 5s. That is, upon a new basic wage being declared, the awards made in the settlement of all interstate industrial disputes are re-opened and amended accordingly. In addition to the "basic" wage, these tribunals also determine what is known as the "secondary" wage—"the extra payment to be made for trained skill or other exceptional qualities necessary for an employee exercising the functions required."* The term "minimum" wage, on the other hand, is used to express the lowest rate payable in a particular industry, and is either equal to, or greater than, the "basic" wage.

2. The Commonwealth Basic Wage.—(i) *General.* The doctrine of a basic wage was propounded as far back as 1890 by Sir Samuel Griffith, Premier of Queensland, and the same principle was enunciated in the New South Wales Arbitration Court in somewhat similar terms by Mr. Justice Heydon in 1905. In spite, however, of these pronouncements and the fact that wage-fixing tribunals had been in operation as early as 1896 (in the State of Victoria), it was not until 1907 that the first basic wage, as such, was declared by a Court in Australia. This was made by Mr. Justice Higgins, President of the Commonwealth Court of Conciliation and Arbitration, and it was defined as the lowest wage which can be paid to an unskilled labourer on the basis of "the normal needs of an average employee regarded as a human being living in a civilized community."† This declaration was made by way of an order in terms of Section 2 (d) of the Excise Tariff 1906 in the matter of an application by H. V. McKay, of the Sunshine Harvester Works, Victoria, from which was derived the title of the "Harvester Wage" by which it is popularly known. The rate of wage declared in this case was 7s. per day or £2 2s. per week for Melbourne, the amount considered reasonable for "a family of about five."‡ The constituent parts of this amount were £1 5s. 5d. for food, 7s. for rent, and 9s. 7d. for all other expenditure.

The "Harvester" basic rate was adopted by the Commonwealth Arbitration Court for incorporation in its awards, and practically the same rates continued until 1913, when the Court took cognizance of the retail price index-numbers, covering food and groceries and rent of all houses ("A" series), for the 30 more important towns of Australia, which had been published by the Commonwealth Statistician for the first time in the preceding year. These index-numbers had been taken back to 1901, with the year 1911 as base, and disclosed not only considerable percentage increases since 1907, but also large disparities in the relative purchasing power of money in the various towns. The basic rates for towns were thereafter fixed largely on their respective index-numbers, taking the index-number 875 for Melbourne for the year 1907 as being equivalent to the "Harvester" rate of 42s. per week, or the base of the index (1,000) as being equivalent to 48s. per week. Exceptions were made in the case of many country towns, where certain "loadings" were applied to counterbalance their lower index-numbers due to cheaper rentals.§

In 1922 an amount known as the "Powers' 3s."|| was added as a general "loading" to the weekly wage for the purpose of securing to the worker during a period of rising prices the full equivalent of the "Harvester" standard. In the same year the system was instituted of making regular quarterly adjustments of the basic wage to accord with variations in purchasing power as disclosed by the "A" Series retail price index-numbers, and of basing the adjustments on the index-number for the quarter in place of that for the previous calendar year or the year ended the preceding quarter.

The Commonwealth Conciliation and Arbitration Act provides that the "basic" wage, or any alteration thereof including the principles on which it is computed, together with any variation or interpretation of any award involving any such alteration, shall be considered by a Court constituted by not less than three Judges, and must be approved by a majority of the members of that Court. By a judgment of the High Court on 21st April, 1933, the "basic" wage is taken to mean, for the foregoing purpose, not only the "Harvester" wage but any "loadings" forming part of the primary wage of an unskilled labourer. A "loading" is defined as an addition to the "basic" wage as compensation

* Mr. Justice Higgins—*A New Province of Law and Order*.

† *Ibid.*

‡ See page 428 for Court's interpretation in 1940 Basic Wage Inquiry of the "family unit".

§ As these indexes covered only about 60 per cent. of household expenditure, a low index due to low rentals would wrongly presume low costs in the remaining uninvestigated 40 per cent. of household expenditure and *vice versa*.

|| Awarded by Mr. Justice Powers in the Gas Workers' Case.

for some peculiar condition of labour or environment, and not by way of "margin for skill". The wage payable for skilled labour is assessed on the basis of the "basic" wage, including "loadings".

The adequacy or otherwise of the "Harvester" standard has been the subject of much discussion, the author of the judgment himself urging on several occasions the need for its review. The abnormal conditions during and for some time after the 1914-18 War hindered such a review which was regarded as less urgent by reason of the fact that wages throughout Australia were being automatically adjusted to changes in retail prices. A Royal Commission (referred to later) was appointed in 1919 to assess a basic wage, but its recommendations were not carried out.

No change was made in the method of fixation and adjustment of the basic wage until the onset of the depression which began to be felt severely during 1930. Applications were then made to the Court by employers for some greater measure of reduction of wages than that afforded by the automatic adjustments to falling retail prices. An account of the proceedings which resulted in the Court reducing all wages under its jurisdiction by 10 per cent. from 1st February, 1931, is given in *Labour Report* No. 23, page 74. Reference is also made to the Court's refusal in June, 1932, and May, 1933, to remove this special reduction.

(ii) *Basic Wage Inquiry*, 1934. The "Harvester" standard, adjusted to retail price variations, continued as the theoretical basis of the wage of the Commonwealth Court until 30th April, 1934, when it was superseded by a judgment delivered on 17th April, 1934, full particulars of which appear in *Official Year Book* No. 29, 1936, page 545. The basic wage declared on this occasion (subsequently referred to as the "Needs" Basic Wage 1934) was as follows for the six capital cities:—

		<i>s.</i>	<i>d.</i>			<i>s.</i>	<i>d.</i>
Sydney	..	67	0	Adelaide	..	64	0
Melbourne	..	64	0	Perth	..	66	0
Brisbane	..	61	0	Hobart	..	67	0

Six Capital Cities, 65s. 0d.

The following is a comparison for the capital cities of the basic rates granted by the judgment and those ruling under previous practices of the Court:—

(a) Calculated to nearest rd., and including the equivalent of the "Powers' 3s." to the nearest 6d., and including "Powers' 3s." (in full).

(b) Calculated

The 10 per cent. special reduction in wages referred to above ceased to operate upon the introduction of the new rates, and the basis of the periodical adjustments to retail price variations was transferred from the "A" and the "D" Series to the "C" Series of index-numbers which covers Food and Groceries, Rent of 4-roomed and 5-roomed Houses, Clothing, Fuel, Light, Household Utensils, Household Drapery, Fares, and other Miscellaneous household requirements. The base of the index (1,000) was taken by the Court as equal to 81s. per week. This gave the rates in Column 2 for the capital cities on the basis of their respective index-numbers. In effect, the new rate for the six capital cities was the same as that previously paid under the "A" Series, without the "Powers' 3s." and without the 10 per cent. reduction. Certain towns gained and others lost in comparison with rates under the "A" Series, owing to the different relationship of towns under the "A" and the "C" Series.

In view, however, of the fact that the vast majority of workers were being paid the rates shown in Column 3 under the "D" Series Retail Price Index (which rates allowed for the 10 per cent. "cut" in wages), the differences compared with the full basic wage standard established by the Court from 1st May, 1934 by means of this Series were as shown in Column 5. The full rates under this Series may be obtained by adding one-ninth to those rates in Column 3.

(iii) *Basic Wage Inquiry, 1937.* In May, 1937, the Commonwealth Court heard an application by the combined unions for an increase in the basic wage. The unions asked that the equivalent of the base (1,000) of the "C" Series Index be increased from 81s. to 93s. which on current index-numbers would have represented an average increase of about 10s. per week. The hearing extended from 10th May to 4th June, 1937, and the Court delivered judgment on 23rd June. The chief features of the judgment were :—

(a) Various amounts were added to the basic wage not as an integral, and therefore adjustable, part of that wage, but as "loadings" on the rates payable under the "shilling table" as determined by the 1934 judgment. The latter was referred to in the judgment as the "needs" portion of the total resultant basic wages. The "loadings" and resultant "total basic wages" for the six capital cities were as follows :—

City.				"Needs" Basic Wage.	"Loading."	Total Basic Wage.
				s. d.	s. d.	s. d.
Sydney	72 0	6 0	78 0
Melbourne	69 0	6 0	75 0
Brisbane	68 0	6 0	74 0
Adelaide	68 0(a)	4 0	72 0
Perth	70 0(a)	4 0	74 0
Hobart	70 0(b)	4 0	74 0
Six Capitals	70 0	5 0	75 0

(a) An additional 1s. was actually being paid under the "2s. minimum adjustment" provision.
 (b) One shilling less was being paid under the "2s. minimum adjustment" provision.

(b) Female and junior rates were left for adjustment by individual Judges when dealing with specific awards.

The main parts of the judgment are reprinted in Official Year Book No. 30, and in *Labour Report* No. 28, p. 77.

(iv) *"Lag" in Adjustments.* The Commonwealth Court on 19th December, 1939 heard an application by the unions that the date of adjustment of the basic wage in accordance with the variations in the "Court" Series of index-numbers be brought nearer to the period upon which the variation was based. In a judgment delivered on

the same day the Court directed that such adjustments be made one month earlier. The effect, therefore, was to make future adjustments operative from the beginning of the first pay-period to commence in a February, a May, an August or a November.

(v) *Basic Wage Inquiry, 1940.* On 5th August, 1940 the Full Court commenced the hearing of an application by the combined unions for an increase in the existing basic wage by raising the value of 1,000 (the base of the "C" Series Index upon which the "Court" Series are based) from 8rs. to 100s. per week, and the abolition of the present "Prosperity" loadings, which would be regarded as incorporated in the new rate mentioned. Judgment was delivered on 7th February, 1941, the Court unanimously refusing to grant any increase, and deciding that the application should not be dismissed but stood over for further consideration after 30th June, 1941. The application was refused mainly owing to the uncertainty of the economic outlook under existing war conditions (*see* (vi) following).

In regard to the popular idea that the basic wage of the Commonwealth Court of Conciliation and Arbitration was identified with a specific family unit, the Chief Judge made the following statements to clarify the position: "The Court has always conceded the 'needs' of an average family should be kept in mind in fixing a basic wage. But it has never as the result of its own inquiry specifically declared what is an average family or what is the cost of a regimen of food, clothing, shelter and miscellaneous items necessary to maintain it in frugal comfort, or that a basic wage should give effect to any such finding. In the end economic possibilities have always been the determining factor What should be sought is the independent ascertainment and prescription of the highest basic wage that can be sustained by the total of industry in all its primary, secondary and ancillary forms. That, no doubt, is the object, but the adoption of something like the real average family as the unit to be provided for is not without its use in the attainment of that object. There is no clear means of measuring the general wage-paying capacity of the total industry of a country. All that can be done is to approximate and one of the methods of approximation is to find out the actual wage upon which well-situated labourers are at the time maintaining the average family unit. We may be pardoned for saying that Mr. Justice Higgins very wisely used this criterion in the 'Harvester' case. Moreover, if the average-sized families of such well-situated labourers have become accustomed to enjoy, and do actually enjoy, a certain standard of living in our community, it may reasonably be assumed that such a standard for all labourers is probably not beyond the capacity of industry in general to provide. Therefore in determining the amount of a living or basic wage there is sound economic warranty for the ascertainment of the real average family unit and of the cost of providing something like the standard which such families of well-employed labourers have already reached. But obviously, if the real average family unit is departed from, or a standard is sought for the likely maintenance of which experience gives no reason to hope, then an unrealizable wage-level may be ordained It may be that in the light of past experience the Court should conduct a specific inquiry as to the cost of living of an average family, but under war conditions, such an inquiry would be futile. More than ever before wage fixation is controlled by the economic outlook".

The Chief Judge further stated: "I was impressed by the new evidence and argument as to the inadequacy of the earnings of the lower-paid wage earners with families. On our accepted standards of living, looking at it from the needs point of view only, I regard the present basic wage as adequate for a family unit of three persons, but think it offers only a meagre existence for a family unit of four. When the unit gets beyond four hardship is often experienced." He suggested that the more logical system would be to grade the basic wage according to family responsibilities and that, notwithstanding the increase in aggregate wages, the benefits resulting from a re-apportionment of national income to increase the wages of those with more than one dependent child would more than offset the inflationary tendency of provision for a comprehensive scheme of child endowment, and that if a scheme of this nature were established, as recently announced

by the Commonwealth Government*, future fixations of the basic wage would be greatly simplified. The other two Judges (O'Mara, J., and Piper, J.), in separate judgments, agreed with that of the Chief Judge, particularly in regard to the need for a child endowment scheme as a solution of the main problem.

(vi) "*Interim*" Basic Wage, 1946. As the result of (a) an application made on 30th October, 1946 (during the course of the Standard Hours Case) by the Attorney-General for the Commonwealth for the restoration to the Full Court List of certain adjourned 1940 basic wage applications (see (v) *supra*), (b) a number of fresh cases which had come to the Court since 1941, and (c) an application by the Australasian Council of Trade Unions on behalf of the unions for an "*interim*" basic wage declaration, the Court, on 25th November, 1946, commenced the hearing of this case. The case ended on 10th December, 1946 and judgment was delivered on 13th December, 1946 whereby an increase of 7s. per week was granted in the "*needs*" portion of the basic wage then current and based on the weighted average "*Court*" index-number for the Six Capital Cities (as a whole) for the September quarter, 1946. This had the effect of raising the base (1923-27) index-number of the "*Court*" Series Index from 81.0 to 87.0, the corresponding "*needs*" basic wage from 81s. to 87s. per week, and the current rate for the Six Capital Cities as a whole from 93s. to 100s. per week. All "*loadings*" on the basic wage were retained at their existing amounts until otherwise ordered by the Court.

The immediate monetary effect was to increase by 7s. per week the basic wage in each of the capital cities (with the exception of Hobart, where the increase was 6s.), and in most of the other towns or combinations of towns—the position of the index-number for a town in the new Automatic Adjustment Scale (on the new base rate of 87s.) determining whether the increase was 7s. or 6s. The date of operation for the majority of workers affected was the beginning of the first pay-period commencing in the month of December, 1946, in certain industries as from 1st December, 1946 and for certain other groups of workers from dates fixed by Judges dealing with individual applications for the increase.

Further details of this judgment may be obtained from *Labour Report* No. 37, page 78.

(vii) *Current Commonwealth Basic Wage Rates*. The basic wage rates of the Commonwealth Court for adult males, including the "*loadings*" granted in 1937, operative at 1st November, 1949, are as follows:—

	s.	d.		s.	d.
New South Wales—			South Australia—		
Sydney	132	0	Adelaide	126	0
Newcastle (a) ..	132	0	Five Towns (c) ..	126	0

(a) Based on Sydney.	(b) Based on Melbourne.	(c) Weighted average.			

* Legislation covering a scheme to become operative on 1st July, 1941, was actually passed by the Commonwealth Parliament on 3rd April, 1941—see page 436 for details.

The rate for provincial towns, other than those mentioned above, is 3s. less than that of their respective capital cities. The rate for adult females varies, approximately, from 54 to 75 per cent. of the adult male rate.

The following table shows the movements of this wage in all capital cities and the six capital cities as a whole during the years 1939 to 1949.

(a) Rates include "prosperity loadings" granted from 1st July, 1937 and increase in "needs" basic wage granted from 1st December, 1946. (b) Generally from the beginning of the first pay period commencing in the month indicated.

3. **Australian Territories.**—A full account of the basis upon which the basic wages are determined in (a) Australian Capital Territory and (b) Northern Territory (both north and south of the 20th parallel of South Latitude) will be found on pages 87 to 92 of *Labour Report No. 37*, for 1948.

The following table gives a summary of variations in the basic wage in the Australian Capital Territory from 1st May, 1922, the first determination of the Industrial Board, to 1949.

BASIC WAGE VARIATIONS IN THE AUSTRALIAN CAPITAL TERRITORY.

Date of Operation.	Basic Wage per Week (Males.)	Date of Operation.	Basic Wage per Week (Males.)
	£ s. d.		£ s. d.
1st May, 1922	4 5 0	10th October, 1941 ..	4 15 6
10th October, 1926 ..	5 0 0	1st December, 1946 ..	5 13 6
25th July, 1931	4 3 4	1st May, 1947	5 14 6
21st October, 1932 ..	4 5 0	1st November, 1948 ..	6 8 6
1st July, 1936	4 5 6	1st November, 1949 ..	6 19 6

In the Northern Territory there are two basic wages operating, one in respect of areas north of the 20th parallel of South Latitude, generally referred to as the "Darwin" rate and the other in respect of areas south of that parallel and extending down to the 26th parallel (the "Port Augusta" rate). The main variations in these rates are set out in the following table.

BASIC WAGE VARIATIONS IN THE NORTHERN TERRITORY.

" Darwin " Rate.		" Port Augusta " Rate.

4. *Basic Wage Rates for Females.*—Reference should be made to *Labour Report* No. 37 for 1948 (page 82) for a statement of the general principles followed by the Commonwealth Court of Conciliation and Arbitration in fixing basic wage rates for females in relation to those of males, and of the principles followed by the Women's Employment Board which operated over the period March, 1942 to October, 1944 in respect only of females in war industries employed on work usually performed by males, or on work which, immediately prior to the outbreak of war, was not performed in Australia by any person.

5. *State Basic Wages.*—(i) *New South Wales.* The first determination under the New South Wales Industrial Arbitration Act of a standard "living" wage for adult male employees was made on 16th February, 1914, by the Court of Industrial Arbitration.

The Board of Trade was established in 1918 with power to determine the living wage for adult male and female employees in the State. The Board made numerous declarations from 1918 to 1925, but ceased to function after the Industrial Arbitration (Amendment) Act 1926 established the Industrial Commission of New South Wales, which exercised the powers of the Board of Trade from 15th April, 1926.

The adult male rate was determined on the family unit of a man, wife and two children from 1914 to 1925; a man and wife only in 1927, with family allowances for dependent children; and a man, wife and one child in 1929, with family allowances for other dependent children. With the adoption in 1937 of the Commonwealth basic wage referred to below, however, the identification of a specified family unit with the basic wage disappeared.

Employees in rural industries are not covered by the rates in the table referred to below; a wage for rural workers of £3 6s. per week was in force for twelve months from October, 1921, and a rate of £4 4s. operated from June, 1927, to December, 1929, when the power of industrial tribunals to fix a living wage for rural workers was withdrawn.

A table showing the variations in the living wages determined by the industrial tribunals of New South Wales up to 27th April, 1937 was published in previous issues of the Official Year Book (*see* No. 37, page 481). Since 27th April, 1937, changes have been made automatically in accordance with the procedure outlined in the next paragraph, and the latest current rate payable will be found in the table in sub-par. vi., page 435.

Following on the judgment of the Commonwealth Arbitration Court referred to on page 427, the Government of New South Wales decided to make the State Basic Wage accord with the Commonwealth rates ruling in the State, and secured an amendment of the Industrial Arbitration Act to give effect thereto. The Act (No. 9 of 1937) was passed on 7th October, 1937, and was to operate from the commencement of the first pay period in October, practically from 1st October, 1937. The general principles laid down by the Commonwealth Court were followed as closely as practicable, and provision was made for the automatic adjustment of wages in conformity with variations in retail prices as shown by the Commonwealth Court's "All Items" Retail Price Index-numbers, shortly known as the "Court" Series of Index-numbers. The Commonwealth Court's principle of treating the "prosperity loadings" as a separate and non-adjustable part of the total basic wage was adopted. The basic rate for adult females was fixed at 54 per cent. of the adult male rate to the nearest sixpence. The provisions of the main Acts for the periodic declaration of the living wage by the Industrial Commission were repealed, but the amending Act placed on the Commission the responsibility of altering all awards and agreements in conformity with the intentions of the new Act; to define boundaries within which the various rates are to operate; and to specify the appropriate "Court" Series retail price index-numbers to which they are to be related.

Compared with State adult basic wages of £3 11s. 6d. per week for males, and £1 18s. 6d. for females operative at the time, the alteration represented for males increases of 6s. 6d. in Sydney; 3s. 6d. in Country districts (with certain exceptions); and 4s. 6d. for railway and other Crown employees as defined by the Act. For females the increases were 54 per cent. of the foregoing, and amounted to 3s. 6d., 2s., and 2s. 6d., respectively.

The latest rates applicable in the metropolitan area from 1st November, 1949 are £6 12s. for males and £3 11s. 6d. for females.

The principle of supplementing wages by a payment in respect of dependent children under fourteen years of age was operative in New South Wales from July, 1927 until superseded by the Commonwealth Government Scheme operative from 1st July, 1941, and a brief account of the main features of the system appears in Official Year Book No. 37, pp. 485-6.

(ii) *Victoria and Tasmania.* A State basic rate of wage is not declared in Victoria and Tasmania. In these States the Wages Board system of wage fixation is in operation, and each Board determines the minimum rate of wage to be paid in the industry or calling under review. In the majority of cases the practice of the Commonwealth Arbitration Court of adjusting wages in accordance with variations in retail prices has been followed in the past by these bodies. In the case of Victoria, by amendments of the Factories and Shops Acts No. 4275 of 1934 and No. 4461 of 1936, it is now obligatory on all Wages Boards to adopt such provisions of Commonwealth Awards which such Boards are empowered under the Factory and Shops Acts to include in their determinations. The Secretary of Labour is also empowered under this Act to make adjustments of wages according to variations in retail price index-numbers without calling the Board together. The latest Commonwealth adult male rate for Melbourne is £6 10s. per week (operative from 1st November, 1949), and for Hobart £6 8s. per week (operative from 1st November, 1949). Female rates vary approximately from 54 to 75 per cent. of those rates.

(iii) *Queensland.* The first formal declaration by the Industrial Arbitration Court in this State of a basic wage was gazetted on 24th February, 1921. Prior to this declaration the rate of £3 17s. per week for adult males had been generally recognized by the Court in its awards as the basic or living wage. The basic wage is nominally intended to provide for the needs of a man, his wife and three children. The variations in the adult basic wages determined by the Industrial Arbitration Court up to 1st April, 1937, were published in previous issues of the Official Year Book (*see* No. 37, page 482). Variations since that date are shown below:—

BASIC WAGE VARIATIONS IN QUEENSLAND. (*State Jurisdiction.*)

Date of Operation.	Adult Basic Wage.			
	Male.		Female.	
	£	s. d.	£	s. d.
1st April, 1938	4	1 0	2	3 0
7th August, 1939	4	4 0	2	5 0
31st March, 1941	4	9 0	2	8 0
4th May, 1942 (a)	4	11 0	2	9 6
23rd December, 1946 (b)	5	5 0	3	0 6

(a) Quarterly adjustments provided by judgment of 21st April, 1942—*see* below for latest rates.

(b) Consequent on "Interim" basic wage of Commonwealth Court of December, 1946.

The rates shown above are applicable throughout the Southern Division (Eastern District), which includes the metropolitan area: allowances are added for the following divisions—Northern (Eastern District), 10s.; Northern (Western District), 17s. 4d.; Mackay, 5s. 6d.; and Southern (Western District), 7s. 4d. Half of these allowances are granted to females.

On 15th April, 1942, the Court declared the rates operative from 31st March, 1941 as adequately meeting the requirements of Section 9 of the Industrial Conciliation and Arbitration Act 1932, having regard to the level of the "C" Series (All Items) retail Price Index for Brisbane for the December quarter, 1941. In order to ensure, however, that it would continue to do so under present exceptional conditions, the Court decided to make a quarterly declaration of the basic wage on the basis of the variations in the "cost of living" as disclosed by the "C" Series Index for Brisbane, commencing with the figures for the March quarter, 1942. This declaration was duly made by the Court on 21st April, 1942, at the rates of £4 11s. for adult males, and £2 9s. 6d. for adult females. The latest rates are £6 9s. for adult males, and £3 19s. 6d. for adult females, and have been operative since 1st November, 1949.

(iv) *South Australia.* The Industrial Code 1920-1948 provides that the Board of Industry shall after public inquiry declare the living wages to be paid to adult male and female employees. Prior to the passing of this Act the living wage was declared by the Industrial Court, the first award, 7s. per day, being made by Mr. Justice Gordon in the Brushmakers' Case in December, 1908.

The first declaration by the Board of Industry was made on 15th July, 1921, when the living wage for adult male employees in the metropolitan area was determined at £3 19s. 6d. per week.

The family unit is not specifically defined in the Code, but the South Australian Industrial Court in 1920 decided that the average employee in respect of whom the living wage is to be declared is a man with a wife and three children.

Following on the declaration of an "interim" increase in its "needs" basic wage by the Commonwealth Court of Conciliation and Arbitration on 13th December, 1946 (*see* p. 429) the South Australian Parliament, by virtue of the Economic Stability Act No. 52 of 1946, and other enabling powers, provided for the Governor, by proclamation, to declare the "daily living wage" for adult males in the metropolitan area to be one-sixth of the Commonwealth weekly basic wage for this area (102s. per week, inclusive of the "prosperity loading" of 4s.) and to be operative from 7th January, 1947. The Act mentioned also provided for similar proclamations in respect of any adjustment of such wage, but the powers of the Board of Industry to declare a "living wage" were retained, and any such wage so declared will supersede that declared by proclamation.

The variations in the living wages determined by the Board of Industry up to 25th November, 1937, were published in previous issues of the Official Year Book (*see* No. 37 page 483). Variations since that date are shown below:—

LIVING WAGE VARIATIONS IN SOUTH AUSTRALIA. (*State Jurisdiction.*)

Male.			Female.		
Date of Operation.		Living Wage per Week.	Date of Operation.		Living Wage per Week.
		£ s. d.			£ s. d.

19th May, 1949	..	6 5 0	19th May, 1949	..	3 8 6

(a) Commonwealth rate for metropolitan area adopted.

(v) *Western Australia.* The Industrial Arbitration Act 1912-1948 provides that the Court of Arbitration shall determine and declare a basic wage to operate from 1st July of each year and, wherever and whenever necessary, differential basic rates in special or defined areas of the State. In an amending Act of 1930 provision is made for quarterly adjustments when the Government Statistician reports a variation in the cost of living of 1s. or more per week compared with the previous quarter.

The first declaration of the basic wage by the Court of Arbitration, since the authority to fix one was vested in the Court in 1925, was made on 11th June, 1926. The family unit is not specifically defined in the Act, but it has been the practice of the Court to take as a basis for its calculations a man, his wife and two dependent children. The variations in the annual declarations of the Court of Arbitration up to 1937 were published in previous issues of the Official Year Book (*see* No. 37, page 484). Variations since 1937 are shown in the following table:—

BASIC WAGE VARIATIONS IN WESTERN AUSTRALIA. (*State Jurisdiction.*)

South Australia	6 5 0	3 8 6	19.5.49	" " "
Western Australia(e)	6 15 11	3 13 5	24.10.49	Man, wife and two children
Tasmania (c)	(6 8 0)	(3 9 0)	1.11.49	(c)

(a) Sydney, Newcastle, Port Kembla—Wollongong, Broken Hill—males £7 1s., females £3 16s. Elsewhere, males £6 9s., females £3 9s. 6d. (b) Commonwealth Basic Wage operative—no defined family unit. (c) None declared, but rates (Capital City) shown are those of Commonwealth Court which are followed to a large extent. (d) Southern Division (Eastern District—including Brisbane). Allowances are added for the following Divisions—Northern (Eastern District), 10s.; Northern (Western District), 17s. 4d.; Mackay, 5s. 6d.; and Southern (Western District), 7s. 4d. Half of these allowances are granted to females. (e) Metropolitan Area. Basic wage for Gold-fields areas and portions of State excluding the South-West Land Division—males £7 2s. 11d.; females £3 17s. 2d. South-West Land Division (excluding Metropolitan Area)—males £6 15s. 4d.; females £3 13s. 1d.

6. **Royal Commission on the Basic Wage, 1920.**—Only one comprehensive attempt has been made by the Commonwealth authorities to ascertain specifically what the actual requirements were in the various States according to reasonable standards of comfort, including all matters comprised in the ordinary expenditure of a household in respect of a family consisting of a man, wife and three children under fourteen years of age.

The attempt referred to was made by a Royal Commission which in its report, issued in 1920, recommended the following amounts for the various capital cities :—

						£	s.	d.
Sydney	5	17	1
Melbourne	5	16	6
Brisbane	5	6	2
Adelaide	5	16	1
Perth	5	13	11
Hobart	5	16	11
Six Capitals (Weighted Average)	5	15	8

The recommendations of this Commission were not carried out owing largely to the marked advance of the amounts suggested over ruling rates* and the grave doubts expressed as to the ability of industry to pay such rates.

§ 4. Child Endowment in Australia.

1. **General.**—The principle of supplementing wages by a payment in respect of dependent children under sixteen years of age became prominent in Australia following the recommendations of the Royal Commission on the Basic Wage of 1920, and was implemented in Australia as described in the following paragraphs. The system has been in force in various forms in England and on the Continent as far back as 1795, the first instance occurring in England in that year.

2. **National Scheme.**—The Commonwealth Government, in June, 1927, called a conference in Melbourne of the Premiers of the several States to consider the question from a national standpoint. The Prime Minister submitted various estimates of the cost of endowing dependent children under fourteen years of age in Australia at 5s. per week. After discussion, it was decided to refer the matter to a Royal Commission, to be appointed by the Commonwealth Government.

The Commission submitted its report on 15th December, 1928. It was not unanimous in its findings, and the opinions and recommendations of the members were embodied in two separate reports, which dealt exhaustively with the constitutional aspects, existing systems, industrial legislation, the basic wage, standard of living, regulation of wages, working conditions and cognate matters.

At the conference of Commonwealth and State Ministers held in Canberra in May, 1929, the Prime Minister stated that the Commonwealth Government was not prepared to adopt the scheme financed entirely from the proceeds of taxation, as had been recommended in the minority report. The Commonwealth Government agreed with the majority of the Commission that child endowment could not be separated from the control of the basic wage—a power which the Commonwealth did not possess and which the States were not prepared to relinquish. The Government, therefore, did not propose to establish any system of child endowment. It was generally agreed that any scheme which would increase the charges upon industry would be unwise at that particular time. The matter of child endowment was accordingly left to be dealt with as the State Governments should think proper.

* The "Harvester" equivalent for Melbourne at the time (September quarter, 1920) was £4 13s. per week, but only £3 18s. to £4 2s. was being paid on the basis of an annual index-number.

The findings and recommendations in the *majority* and *minority* reports are given in *Labour Report*, No. 19.

In 1941, the Commonwealth Government introduced a scheme of child endowment throughout Australia. The necessary legislation* was introduced into Parliament on 27th March, and finally passed on 3rd April, 1941. The main features of the scheme, which came into operation on 1st July, 1941, are as follows:—

(a) Payment at the rate of 10s. per week (5s. per week from 1st July, 1941 to 25th June, 1945, and 7s. 6d. from 26th June, 1945 to 8th November, 1948) for each child under the age of sixteen in excess of one child in each family, provided the persons claiming the endowment, and the child in respect of whom the endowment is claimed, have resided in Australia for a period of twelve months preceding the date of claim.

(b) The endowment is payable to the mother of the child, or to such persons as are prescribed.

(c) Endowment is also payable to approved institutions, not wholly or mainly dependent upon the Commonwealth or a State for their revenue, in respect of all children under 16 years of age maintained therein.

(d) The scheme, which formerly was financed partly from Consolidated Revenue, partly from the abolition of the exemptions from taxation in respect of children after the first, and the major part from a tax of 2½ per cent. of all pay-rolls in excess of £20 per week, is now a charge on the National Welfare Fund.

(e) The general administration of the Act is under the control of the Director-General of Social Services, and the detailed administration is carried out by Directors in each State.

A summary of the operations under the Child Endowment Act from 1st July, 1944 to 30th June, 1949, is given on pp. 330–1 of Chapter IX. "Welfare Services".

3. **Earlier Schemes.**—Consequent upon the operation of the Commonwealth Child Endowment Scheme, appropriate steps were taken for the termination of the schemes operating in the Commonwealth Public Service and in New South Wales. The Commonwealth Public Service Scheme was the first system instituted in Australia and came into operation on 1st November, 1920. In New South Wales an abortive attempt to institute the system was made in 1919 and a scheme was adopted under the Family Endowment Act 1927 which operated from 23rd July, 1927. For further details of these schemes reference may be made to the Official Year Book No. 37, pages 485 and 486.

E.—EMPLOYMENT.

§ 1. Employment.

1. **Total Occupied Persons.**—(i) *General.* The following estimates of the total numbers of occupied males and females are based principally on data from the 1933 Census (June), the National Register (July, 1939), The Civilian Register (June, 1943), the Occupation Survey (June, 1945) and the 1947 Census (June). These sources of information have been supplemented by Pay-roll Tax returns, which commenced in July, 1941.

(ii) *Australia.* The estimates in the table below are divided into three categories (a) Defence Forces; (b) all persons fully occupied as employers, or as self-employed in businesses or on farms; and (c) wage or salary earners fully employed, or occupied as casual, part-time, intermittent or seasonal workers. Wage earners unemployed, in the sense that they are incapacitated or have no work to go to, are excluded, as also are persons engaged on Government relief works.

* Act No. 8, 1941 (Child Endowment Act) as amended by No. 5, 1942, and Nos. 10 and 41, 1945; Act No. 2, 1941 (Pay-roll Tax Assessment Act); and Act No. 3, 1941 (Pay-roll Tax Act).

All unpaid helpers in non-rural industry have been included with wage and salary earners. Male unpaid helpers in rural industry have been included with employers and self-employed persons, as it is considered that the majority of these are sons or other close relatives of farmers working in an unofficial partnership, or as learners with the farm owner. Unpaid female helpers on farms are very numerous, but their exact number is not known. Generally, they combine part-time dairy or other farm work with part-time duties in the home. Together with women occupied in unpaid home duties they have been excluded from the category of occupied persons.

Statistics of net enlistments in the Defence Forces shown in the table below represent total enlistments for full-time duty less deaths and discharges. Prior to December, 1941, men in certain age-groups were called-up for short training courses but these men are excluded from the figures. In July, 1941, the number of such men was approximately 50,000.

1947—June(c) ..	55.5	296.0	343.7	640.3	158.9	2,310.8	2,469.7	3,110.0	3,165.5

(a) Includes those serving outside Australia. (b) Occupation Survey, 1st June, 1945.
(c) Subject to revision. (d) Excludes approximately 20,000 men called up for short training courses.
(e) Includes females, in thousands, in private domestic service as follows:—106.7 in June, 1933; 124.5 in July, 1939; 100.0 in July, 1941; 41.5 in June, 1943; 47.6 in June, 1945; and 41.8 in June, 1947.

From June, 1933 to July, 1939, the number of occupied persons of both sexes had increased by 488,000, due to the increases of 223,700 in the number of available bread-winners and to the decrease of 265,200 in the number unemployed from 563,200 to 298,000.

During the war years from July, 1939 to June, 1943, the number of males occupied as civilians decreased by 288,000, while females occupied as civilians increased by nearly 113,000, representing a net decrease of 175,000 persons. This decrease, together with decrease of unemployment (272,000), normal increase of breadwinners (91,000) and an abnormal war-time increase of 178,000 bread-winners (persons who would not otherwise have been working), balanced the net intake into the Defence Forces at June, 1943 (716,000). The preliminary estimate of 661,400 female wage and salary earners employed in non-rural industries as at June, 1947 includes 41,800 private domestics (the preliminary Census figure). The remaining 619,600 females in the estimate include females working part-time. The tentative 1947 Census figure for the same industries (i.e. excluding rural and private domestic) was 576,400. Persons working regularly but for considerably less than normal working hours were instructed on the Census Schedule to exclude themselves from the work force, unless their earnings from such work formed their principal means of livelihood.

(iii) *States.* The following table shows total occupied males and females in each State in July, 1939, and June, 1947, divided into Defence Forces, Employers and Self-employed, and Wage and Salary Earners.

(c) Includes Aus-

Between July, 1939 and December, 1948, the occupied population of Australia (including Defence Forces but excluding unemployed, pensioners, retired persons of independent means and dependants) increased by approximately 15.1 per cent. The proportionate increase in each State was as follows: New South Wales, 10.4; Victoria, 15.2; Queensland, 14.4; South Australia, 13.7; Western Australia, 8.6; Tasmania, 15.3.

2. **Wage and Salary Earners in Employment.**—(i) *Australia and States.* Estimates are made monthly of wage and salary earners in employment (excluding employees in rural industry and female domestics in private homes), based on Pay-roll Tax returns and statistics of Commonwealth Government employment. Pay-roll Tax returns cover only a small proportion of wage earners on rural holdings, and practically no private domestic servants. It is not possible to obtain actual numbers of farm employees and private domestic servants except when a Census or quasi-Census such as Occupation Survey (1st June, 1945) is taken, but estimates have been made from time to time using available data. The next table shows for each State and for Australia as a whole the trend in that section of wage and salary earning employment which it is possible to estimate monthly. Figures are shown as at June, 1933 (Census) and July, 1939 (based on National Register). From July, 1941 (commencement of Pay-roll Tax returns) the estimates are available for each month, and the table shows the level at June of the years 1943 and 1945 to 1949.

(a) Includes employees of Australian Government Authorities (Commonwealth, State and Local) and of Allied Governments. (b) 1st June, 1945 (Occupation Survey). (c) Subject to revision.

(d) Australian-wide black coal strike commenced 27th June, 1949.

(iii) *Factories.* Actual mid-monthly factory employment derived from the results of annual factory censuses is published in the *Production Bulletin* issued by this Bureau. Estimated employment in each State in later months, subject to revision, may be

obtained from the *Monthly Review of Business Statistics* and the *Monthly Bulletin of Employment Statistics*. Additional tables regarding employment in factories may be found in Chapter XXIV. "Manufacturing Industry".

An index of factory employment in Australia, published in the *Monthly Review of Business Statistics*, shows that in 1948-49 factory employment was 60 per cent. higher than the average employment for the three years ended June, 1939.

3. **Index of Employment in Retail Stores.**—Indexes for Australia and each State are published in the *Monthly Review of Business Statistics* and are based on Pay-roll Tax returns, which commenced in July, 1941.

The index shows that in Australia in June, 1949, employment in retail stores was 24.4 per cent. higher than in July, 1941.

4. **Seasonal Employment in Australia.**—An investigation concerning the extent of seasonal employment in Australia was made during 1928 and the results were published in the *Official Year Book*, No. 22, and in *Labour Report*, No. 19.

§ 2. Unemployment.

1. **Total Persons Unemployed.**—The total number of persons unemployed has been recorded only at the dates of the various censuses. The Census records include all persons who state that they are unemployed, and distinguish between unemployment on account of sickness, accident, scarcity of work, industrial dispute, and all other causes combined. The following table sets out the number of unemployed at the Censuses of 1911, 1921, 1933 and 1947, the National Register, 1939, and the Occupation Survey, 1945. The percentage which the unemployed bore at each time to all wage and salary earners of the same sex, comprising those estimated to be in employment and those unemployed is also shown.

UNEMPLOYMENT (ALL CAUSES): AUSTRALIA.

Year and Month.	Wage and Salary Earners Unemployed.			Percentage of Wage and Salary Earners Unemployed.		
	Males.	Females.	Total.	Males.	Females.	Total.
	'000.	'000.	'000.	%	%	%
1911—April (Census)	48.0	8.3	56.3	4.3	2.7	4.0
1921—April ..	139.4	21.5	160.9	10.7	5.7	9.6
1933—June (a) ..	460.2	103.1	563.3	27.9	19.1	25.8
1939—July (b) ..	264.0	34.0	298.0	15.0	5.7	12.6
1945—June (c) ..	39.9	16.2	56.1	2.7	2.3	2.6
1947—June (d) ..	66.6	10.9	83.5	3.7	2.5	3.4

(a) The figures shown for 1933 are in excess of those actually recorded at the Census through an allowance having been made for a number of youths and girls who would normally have been wage and salary earners, but who, on account of the economic depression, having never been employed, were not classed as wage and salary earners. (b) Derived from National Register, 1939. (c) Derived from Occupation Survey, 1945. (d) Persons in the work force who were not at work at the time of the Census.

The estimates and percentages of unemployment given above for periods subsequent to the Census of 1933 should be interpreted in conjunction with the notes below.

The estimates for 1939 were based on the National Register, which covered males aged 18-64 years, and data available from other sources. Owing to the use on the Occupation Survey (1945) card of the definition "a person normally working for wages but without a job on 1st June", it appears that the 1945 figures exclude some persons who were temporarily absent from their jobs at the date of the survey.

The proportion of wage earners unemployed in July, 1939, immediately prior to the 1939-45 War, was estimated at approximately 12½ per cent. In July, 1941, it was about 4 per cent. and by June, 1943, under conditions of intensive mobilization of manpower for war purposes involuntary unemployment was practically nil.

Of the numbers at the 1947 Census shown above 25.6 per cent. were not at work owing to sickness or accident and 26.6 per cent. stated that they were resting. Of the latter approximately half said they expected to resumé their former jobs.

2. **Unemployment of Members of Trade Unions.**—(i) *General.* The particulars given in the following tables are based upon information furnished by the secretaries of trade unions. The membership of the unions furnishing regular reports exceeds 770,000, consisting predominantly of males and representing about 54 per cent. of the total trade union membership, and between 25 and 30 per cent. of all wage and salary earners. Unemployment returns are not collected from unions whose members are in permanent employment, such as railway and tramway employees, and public servants, or from unions whose members are casually employed (wharf labourers, etc.). Very few of the unions pay unemployment benefit, but the majority of the larger organizations have permanent secretaries and organizers who are closely in touch with the members and with the state of trade within their particular industries. In many cases unemployment registers are kept, and provision is made in the rules for payment of reduced subscriptions by members out of work. Seasonal fluctuations in unemployment have been provided for by collecting returns quarterly since 1st January, 1913. The quarterly figures relate to persons who were out of work for three days or more during a specified week in each quarter: they include persons out of work through sickness but exclude persons out of work through strikes and lock-outs, except those outside the industry who are indirectly affected. The yearly figures quoted represent the average of the four quarters.

The value of the percentages of unemployment derived from trade union returns is in the indication they give of the trend of unemployment among trade unionists as reported by secretaries of trade unions.

(ii) *Summary for Australia, 1939 to 1948.* The following table gives a summary for Australia for the years 1939 and 1944 to 1948 and quarterly for the years 1939 and 1946 to 1948. Particulars of unemployment percentages at intervals since 1911 will be found on page 460 :—

	September "	380	769,959	6,813	0.9
	December "	380	777,332	6,287	0.8

NOTE.—Similar figures for each of the four quarters of the years since 1912 will be found in the *Labour Reports*. The quarterly figures show the number of persons who were out of work for three days or more during a specified week in each quarter, and the annual figures, the average of the four quarters, the returns do not include persons out of work through strikes or lock-outs, except those outside the industry concerned who are indirectly affected.

The highest percentage of unemployed yet recorded (30.0) was reached in the quarter ended June, 1932.

(iii) *Australia, Industrial Groups, 1947 and 1948.* Below are shown the percentages unemployed in industrial groups. Industries or occupations in which employment is stable, such as railways, and those which are subject to exceptional fluctuations, such as wharf labour, agricultural, pastoral, etc., are not included. Other occupations—domestic, hotel employees, etc.—are included in the "Other and Miscellaneous" group, as their returns are not sufficiently representative:—

(iv) *States, 1947 and 1948.* In making interstate comparisons of unemployment percentages, allowances must be made for the circumstance that the industries included in the returns from trade unions are not quite identical in the various States, and that for some States the returns are a more representative sample than for others. The State percentages shown below, therefore, should not be read as indicating the relative degree of unemployment amongst unionists in the individual States but as an indication of the trend of unemployment as reported by the trade unions.

UNEMPLOYMENT OF MEMBERS OF TRADE UNIONS.

State.	Unions Reporting.				Unemployed.

3. **Special Legislation for the Relief of Unemployment.**—The position in regard to unemployment in Australia became so serious during 1930 that the usual methods of providing funds for relief works and sustenance were found to be inadequate. The cessation of loans, and the general depression in industry and business, due mainly to the decline in the prices of primary products, brought about an economic crisis in all States. The number of persons thrown out of work increased rapidly with little prospect of conditions improving during the immediate future. The Commonwealth and State Governments realized that special action was necessary to provide additional funds to relieve the distress caused by continued unemployment, as the money ordinarily available was not sufficient to meet the abnormal conditions.

Special grants to the States were made by the Commonwealth Government, while special legislation relating to the relief of unemployment was enacted in practically all the States. In New South Wales, Victoria and Queensland, the Acts provided for special taxation for the purpose of creating funds for relief works and sustenance for the unemployed. The funds necessary for the relief of unemployment in South Australia, Western Australia and Tasmania were provided from revenue.

Further references to the special legislation relating to unemployment, rates of tax and sustenance payments will be found in *Labour Reports*, Nos. 22 to 31.

§ 3. Commonwealth Employment Service.

The Commonwealth Employment Service was established under Section 47 of the Re-establishment and Employment Act of 1945, and under the Social Services Legislation Declaratory Act 1947.

The principal function of this Service, as set out in Section 48 of the first-mentioned Act, is to provide services and facilities in relation to employment for the benefit of persons seeking to become employed, to change employment, or to engage labour, and

to provide facilities to assist in bringing about and maintaining a high and stable level of employment throughout the Commonwealth. The Act also gives the Service a number of specific functions in relation to the re-establishment of ex-servicemen and war workers.

The Service also assists in the administration of the Unemployment and Sickness Benefits, provided under the Social Services Consolidation Act 1947, as well as the Re-Employment Allowance, provided under the Re-Establishment and Employment Act for certain classes of discharged members of the Forces. All persons who wish to claim unemployment benefits or re-employment allowances must register with their residential Employment Office which is responsible for checking the claim and arranging for payment of benefit, if appropriate, and if no suitable employment can be offered to the applicant.

The Service functions within the Employment Division of the Department of Labour and National Service, and is under the control of a Director of Employment. It functions on a decentralized basis. The Central Office is in Sydney, and there are State Head Offices in each of the capital cities, with 154 District Employment Offices in suburban and the larger provincial centres, and with some 500 agents in the smaller country centres who are responsible to the various District Employment Offices. The District Offices are distributed as follows :—New South Wales, 61 ; Victoria, 38 ; Queensland, 23 ; South Australia, 13 ; Western Australia, 14 ; Tasmania, 5.

The Service completed its third year of operation in May, 1949, and monthly average statistics of the principal items of business transacted during the year ended April, 1949, were as follows :—applicants for employment—new registrations 33,417, referred to employers 30,760, placed in employment 21,248 ; vacancies—new notifications 38,524, unfilled at end of month 105,574 ; persons receiving advice or information 33,936 ; and discharges (ex-Service) dealt with 1,272.

§ 4. Industrial Disputes.

1. **General.**—Information with regard to the collection of particulars and the methods of tabulation of industrial disputes involving stoppage of work are given in previous issues of the Official Year Book, and also in the annual *Labour Reports* of this Bureau.

In annual tabulations particulars are included of all disputes which either commenced or were current during the year under review. As regards "number of disputes", "establishments involved", and "workpeople involved", therefore, duplication will take place in respect of those disputes which started in and were unsettled at the end of a preceding year ; the number involved will, however, be indicated in a footnote, to permit of due allowance being made in any calculations made from the tables. There were no disputes recorded in 1948 which started in and were unsettled at the end of 1947.

2. **Industrial Disputes Involving Stoppage of Work, Classified in Industrial Groups, 1948.**—The following table gives particulars of industrial disputes which either commenced or were current during 1948, classified according to industrial groups. Figures for 1947 may be found in *Labour Report*, 1947, No. 36, page 124.

(a) Persons thrown out of work at the establishments where the stoppages occurred but not themselves parties to the dispute.

3. Industrial Disputes, Australia, 1939, 1944 to 1948.—The following table gives particulars of the number of industrial disputes, the number of workpeople involved, and the losses in working days and wages caused by disputes which either commenced or were current during each of the years 1939 and 1944 to 1948, classified according to industrial groups.

Satisfactory comparisons of the frequency of industrial disputes in classified industries can be made only after omitting those which are recorded for coal-mining (Group VIII. (a)). For 1913 the proportion of disputes in the mining industry represented practically 50 per cent. of the total number recorded. In subsequent years the proportion remained high, ranging from 45 per cent. in 1917 and 1918 to 83 and 85 in 1947 and 1948 respectively. In the five years 1944 to 1948 working days lost through dislocations involving workpeople engaged in coal-mining amounted to 2,183,578, representing 27 per cent. of the total loss of working days during the period :—

The main causes of industrial disputes are "Wage" questions, "Working Conditions," and "Employment of Particular Classes or Persons." In each of the years 1913 to 1925 with the exception of 1922, the number of dislocations concerning "Wages" exceeded those caused by any other question. From 1913 to 1948 the proportions varied between 19 per cent. in 1942 and 45 per cent. in 1916. Since 1925 the number of disputes concerning "Wages" has averaged about 20 per cent. of the total number for each year. The majority of the dislocations of work classified under the heading, "Employment of Particular Classes or Persons," are stoppages for the purpose of protesting against the dismissal of certain employees, who, in the opinion of their fellow-workers, have been unfairly treated or victimized. This class of dispute occurs very frequently in the coal-mining industry, and was the principal cause of industrial disturbance in most of the years from 1925 to 1942, averaging about 30 per cent. of the total number for each year during that period. Since 1942 the number of dislocations classified under the heading "Working Conditions" and "Other Causes" has increased proportionately, the percentages of the total in 1948 being 34 and 29 respectively. The number of disputes over "Trade Union" questions has averaged below 10 per cent. of the total number of disputes during the years under review. Stoppages of work concerning "Hours of Labour" increased during 1926 and 1927, but have been relatively unimportant during recent years.

The numbers of disputes concerning "Wages" were 208 in 1947 and 184 in 1948 representing 21 per cent. and 16 per cent. respectively of the total. Stoppages concerning "Employment of Particular Classes or Persons" numbered 104 in 1947 and 153 in 1948, 11 per cent. and 13 per cent. respectively of the totals, and those concerning "Working

Conditions" 254 in 1947 and 388 in 1948 or 26 per cent. and 34 per cent. respectively. Disputes classified under these three headings numbered 566 or 58 per cent. of the total dislocations during the year 1947 and 725 or 64 per cent. in 1948.

7. Results of Industrial Disputes.—The results of industrial disputes during 1939 and each of the years 1944 to 1948 are shown in the following table :—

INDUSTRIAL DISPUTES CLASSIFIED ACCORDING TO RESULTS : AUSTRALIA.

Year.	Number.				Workpeople Involved.				Working Days Lost			
	In Favour of Workpeople.	In Favour of Employer.	Compromise.	Indefinite.	In Favour of Workpeople.	In Favour of Employer.	Compromise.	Indefinite.	In Favour of Workpeople.	In Favour of Employer.	Compromise.	Indefinite.
1939..	75	302	19	20	22,517	117,445	6,233	6,635	104,192	256,602	43,569	54,791
1944..	260	603	3	72	73,643	171,347	1,234	28,950	315,216	413,606	11,043	151,471
1945..	205	652	5	70	58,905	206,856	554	48,756	380,515	1,094,228	7,723	387,119

By other methods	56,509	71,127	241,965	381,180	847,696	298,086	212,333
Total	623,528	459,154	891,336	2,069,585	1,736,859	1,338,728	1,634,801

(a) See note to previous table.

Prior to 1947 the majority of disputes were settled by direct negotiation between employers and employees, the proportion so settled since 1913 ranging between 39 per cent. in 1942 and 78 per cent. in 1937. In 1947 and 1948, however, the majority of disputes were settled by "Other methods". The percentage settled by direct negotiations was 27 in 1947 and 24 in 1948. The proportion of dislocations settled by compulsory conferences or the intervention and assistance of officials under State or Commonwealth Arbitration Acts has varied considerably during the period under review, ranging between 3 per cent. in 1915 and 22 per cent. in 1913. The proportion was 14 per cent. in 1947 and 12 per cent. in 1948. In connexion with the comparatively large number of disputes which are classified as having been settled "By other methods", many stoppages of work occur each year, principally at collieries, but the cause of such stoppages is not officially known to the employers or their representatives. Such stoppages usually last for one day, and work is resumed without negotiations for a settlement of the trouble. In 1947 the percentage of disputes settled by "Other methods" rose to 50 while the percentage in 1948 was 56, the highest recorded for that class of settlement.

F.—ASSOCIATIONS.

§ 1. Labour Organizations.

1. *Registration.*—(i) *Under Trade Union Acts.* The benefits obtained by registering trade unions under the Trade Union Acts in force in the various States are not considered of much value, consequently the statistics of registered trade unions of employees do not accurately represent the position of unionism. Further, the returns for past years are so defective as to be practically valueless, inasmuch as no reliable indication is afforded of the numerical and financial position of the unions. Some of the registered unions fail to supply returns; this non-supply may lead to cancellation of the registration. Others have obtained the cancellation of their certificates of registration, the apparent reason being that they proposed to register under the Commonwealth Conciliation and Arbitration Act or a State Arbitration Act. In Queensland, some of the largest labour unions withdrew from registration during 1911, mainly on account of the necessity for closer restriction of their objects as set forth in their rules, consequent on legal decisions affecting trade unions. In Victoria and in South Australia very few of the existing unions are registered under the Trade Union Acts. It will be seen, therefore, that the available information under this heading is too meagre for statistical purposes.

(ii) *Under Industrial Arbitration Acts.* Information with regard to registrations of employers' associations and trade unions under the various State Industrial Arbitration Acts will be found in previous issues of the Official Year Book. The latest information available as to registrations is as follows:—New South Wales, 214 industrial unions of employers and 157 industrial unions of employees, the membership not being available in either case; Queensland, 20 industrial unions of employers with approximately 22,221 members, and 75 industrial unions of employees with approximately 227,802 members; South Australia, 37 organizations of employers with approximately 53,000 members; Western Australia, 34 organizations of employers with 1,130 members and 126 organizations of employees with approximately 72,000 members. There is no provision in the South Australian Industrial Acts for the registration of organizations of employers, and in Victoria and Tasmania, where Wages Board systems of wage fixation are in operation, organizations of employers and employees are not required to register. Registration under Commonwealth legislation began in 1906. In that and the four years following, there was but one union of employers; another was registered in 1911. The unions of employees registered in 1906 were 20, with 41,413 members. Early in 1949 the number of employers' organizations registered under the provisions of the Commonwealth Conciliation and Arbitration Act was 48. The number of unions registered early in 1949 was 163, with a membership of approximately 1,286,942 representing 90 per cent. of the total membership of all trade unions in Australia.

2. *Particulars regarding Trade Unions.*—(i) *Types.* The trade unions in Australia are very diverse in character, and range from the small independent association to the large interstate organization, which, in its turn, may be merely a branch of a British or International union. Broadly speaking, there are four distinct classes of labour organizations:—(i) the local independent; (ii) the State; (iii) the interstate; and (iv) the Australian or International; but a number of variations occur from each of these classes. The leading characteristics of each of these types are briefly outlined in *Labour Report No. 2* (pp. 7–9) issued by this Bureau.

(ii) *Number and Membership.* As already stated, the figures for trade unions registered under the Acts do not represent the position of unionism in Australia. In 1912 the Labour and Industrial Branch of the Commonwealth Bureau of Census and

Statistics was established and with the cordial co-operation of the officials of the labour organizations comprehensive figures relating to the development of organized labour are now available. The following table shows the position at the end of 1947 and 1948 :—

TRADE UNIONS : BRANCHES AND MEMBERSHIP, 1947 AND 1948.

State or Territory.	Number of Separate Unions.		Number of Branches.		Number of Members.	
	1947.	1948.	1947.	1948.	1947.	1948.
New South Wales ..	183	180	594	621	556,097	582,162
Victoria ..	137	136	386	397	337,502	363,661
Queensland ..	110	111	310	302	218,062	234,480
South Australia ..	111	115	174	178	109,288	115,764
Western Australia ..	130	129	209	206	80,672	85,875
Tasmania ..	70	77	72	80	33,175	35,742
Northern Territory ..	7	7	2,422	2,244
Australian Capital Territory ..	16	17	1	..	3,239	3,213
Total ..	764	772	1,746	1,784	1,339,457	1,423,150
Australia ..	(a) 357	(a) 318	(b) 2,153	(b) 2,238	1,339,457	1,423,150

(a) Allowing for interstate duplication. The figures represent the number of distinct organizations and interstate groups of organizations in Australia—not the total number of organizations which are practically independent and self-governing.

(b) See remarks below.

In the preceding table the number of separate unions in each State refers to the number of unions which are represented in each State, excluding branches therein, and each union is counted once only. Except in the last line, the number of branches indicates the number of branches of State head offices, which may, of course, themselves be branches of an interstate or larger organization. In taking the total number of separate unions in Australia (*see* last line but one), it is obvious that, in the case of interstate and similar unions, there will be duplication, since each such union is counted once in each State in which it has any branches. In the figures given in the last line, allowance has been made for this duplication. State branches of interstate or federated unions, as well as sub-branches within a State, are included under the heading "Branches" in the fourth and fifth columns—last line. The scheme of organization of these interstate or federated unions varies greatly in character, and the number of separate Commonwealth unions does not, therefore, fairly represent the number of practically independent organizations in Australia. In some of these unions the State organizations are bound together under a system of unification and centralized control while in others the State units are practically independent and self-governing, the federal bond being loose and existing only for one or two specified purposes. At the end of 1948 there were, therefore, 318 distinct organizations and interstate groups of organizations in Australia, having 2,238 State branches and sub-branches, and a total of 1,423,150 members.

(iii) *Classification in Industrial Groups.* The following table shows the number of unions and members thereof in Australia at the end of each of the years 1944 to 1948 compared with 1939. The number of unions specified refers to the number of different unions represented in each State and, while interstate or federated unions are counted once in each State in which they are represented, sub-branches within a State are not counted. The number of unions decreased annually from 1939 to 1946 but rose in 1947 and 1948 while membership has increased generally during the same period. Compared with 1939, membership in 1948 had increased by 55 per cent.

The only industrial group in which membership in 1948 was less than in 1939 was "Mining, Quarrying, etc."; all other groups registered increases. In 1948 increases were recorded in all groups except "Other Manufacturing", "Domestic, Hotels, etc." and "Other Miscellaneous" where decreases occurred.

(a) Allowing for interstate duplication.

(iv) *Trade Unions : Numbers of Male and Female Members and Percentage to Total Wage and Salary Earners, Australia.* Prior to 1939 the numbers of male and female wage and salary earners (including unemployed) aged 20 years and over were estimated by increasing the numbers of such persons enumerated at the 1933 Census in ratio to the annual increases in males and females aged 20 to 64 years. Similarly, for wage and salary earners (including unemployed) under 20 years the numbers of such persons at the 1933 Census were increased in ratio to the annual increases in males and females 15 to 19 years. Further, allowance was made for (a) increase in the proportion of females

who became wage and salary earners and (b) youths and girls who were without occupation but were not recorded in the wage-earning group at the 1933 Census. While the foregoing method of estimation would produce fairly accurate results during normal times, the drastically altered conditions of employment over the period of the recent war necessitated the adoption of more direct methods. For 1939 and subsequent years, therefore, the estimates are based on data obtained largely from the National Register of July, 1939, the Pay-roll Tax returns commencing from July, 1941, the Civilian Register of June, 1943, the Occupation Survey of June, 1945 and records of Defence Forces. Figures for 1947 and subsequent years are based primarily on the results of the 1947 Census. Since 1939 the estimated numbers of wage and salary earners include (a) wage earners enlisted in the Defence Forces and (b) persons who were "not gainfully occupied" before the outbreak of war but who subsequently entered wage-earning employment, and (c) persons who in normal times would be occupied in their own businesses but undertook wage and salary earning employment during the war and post-war period.

The following table shows separately for males and females (a) the number of members of trade unions; (b) the estimated number of wage and salary earners of each sex 20 years of age and over in all professions, trades and occupations: and (c) the percentage of the former (a) on the latter (b) at the end of each year, 1944 to 1948 as compared with 1939. The estimated number of wage and salary earners includes all persons 20 years of age and over in receipt of wages or salary, as well as those unemployed, and therefore embraces a large number of adults who are not eligible for membership of any trade union, such as certain persons employed in professional occupations, as well as others who, while eligible for membership so far as the nature of their trade or occupation is concerned, do not reside in a locality which is covered by any union devoted to their particular trade or occupation. Moreover, the age at which persons are eligible for membership varies in different unions. The census results are classified in five-yearly age groups, and age 20 years is taken as approximating to the age of admission to membership. A line has also been added showing the estimated numbers of "junior" workers under 20 years of age.

TRADE UNIONS : NUMBER OF MALE AND FEMALE MEMBERS AND PERCENTAGE ON TOTAL WAGE AND SALARY EARNERS(a), AUSTRALIA.

Particulars.	1939.	1944.	1945.	1946.	1947.	1948.

Percentage of Members on Estimated Number of Adult Wage and Salary Earners ..	32.8	50.6	51.9	51.7	51.6	50.6
Junior Wage and Salary Earners (under 20)	187,200	222,000	219,000	211,300	175,100	181,400

(a) Includes wage earners enlisted in the defence forces or unemployed.

TRADE UNIONS: NUMBER OF MALE AND FEMALE MEMBERS AND PERCENTAGE ON TOTAL WAGE AND SALARY EARNERS(a), AUSTRALIA.—
continued.

Particulars.	1939.	1944.	1945.	1946.	1947.	1948.
TOTAL.						
Estimated No. of Adult Wage and Salary Earners (20 years of age and over) ..	1,925,100	2,248,400	2,213,000	2,121,100	2,129,300	2,191,400
No. of Members of Unions ..	915,470	1,218,778	1,200,395	1,262,658	1,339,457	1,423,150
Percentage of Members on Estimated Number of Adult Wage and Salary Earners ..	47.6	54.2	54.2	59.5	62.9	64.9
Junior Wage and Salary Earners (under 20)	462,800	494,600	485,000	469,200	414,400	427,600

(a) Includes wage earners enlisted in the defence forces or unemployed.

(v) *Interstate or Federated Trade Unions.* The following table gives particulars of the number and membership of interstate or federated unions in 1948:—

INTERSTATE OR FEDERATED TRADE UNIONS: AUSTRALIA, 1948.

Particulars.	Unions Operating in—					Total.
	2 States.	3 States.	4 States.	5 States.	6 States. (a)	
Number of Unions ..	19	12	11	26	50	118
„ „ Members ..	46,265	36,117	121,989	286,067	759,222	1,249,660

(a) Certain unions in this group have, in addition to branches in each of the six States, branches in the Northern Territory and the Australian Capital Territory.

The number of organizations operating in two or more States increased from 72 in 1912 to 118 in 1948, and the percentage of the membership of such organizations on the total membership of all organizations rose from 65 to 83 during the same period.

3. **Central Labour Organizations.**—In each of the capital cities and in a number of industrial centres elsewhere, delegate organizations, consisting of representatives from a group of trade unions, have been established. Their revenue is raised by means of a per capita tax on the members of each affiliated union. In most of the towns where such central organizations exist, the majority of the local unions are affiliated with the central organization, which is usually known as the Labour or the Trades Hall Council, or the Labour Federation. In Western Australia a unified system of organization extends over the industrial centres throughout the State. In this State there is a provincial branch of the Australian Labour Party, having a central council and executive, and metropolitan and branch district councils, to which the local bodies are affiliated. The central council, on which all district councils are represented, meets periodically. In the other five States, however, the organization is not so close, and, while provision usually exists in the rules of the central council at the capital city of each State for the organization of district councils or for the representation of the central council on the local councils in the smaller industrial centres of the State, the councils in each State are, as a matter of fact, independent bodies.

A new Central Labour Organization, called the Australasian Council of Trade Unions, came into being during 1927. The Council was created to function on behalf of the Trade Unions of Australia, and was founded at an All-Australian Trade Union Congress held in Melbourne in May, 1927. The Australasian Council is based on the Metropolitan Trades and Labour Councils in each State, such bodies having the right to appoint two representatives to act on the Executive of the Council. The Metropolitan Trades and Labour Councils are the branches of the Australasian Council. In addition to the representatives from the Metropolitan Councils, the Executive consists of four officers—the President, two Vice-Presidents, and a Secretary, who are elected by and from the All-Australian Trade Union Congress.

The objective of the Council is the socialization of industry, i.e., production, distribution and exchange. The methods to be adopted are—(a) The closer organization of the workers by the transformation of the Australasian Trade Union Movement from the craft to an industrial basis by the establishment of one Union in each industry; (b) the consolidation of the Australasian Labour Movement with the object of unified control, administration and action; (c) the centralized control of industrial disputes; and (d) educational propaganda among unions. The Australasian Council of Trade Unions is the first interstate body in Australia with authority to deal with industrial matters of an interstate character affecting the Trade Union movement generally. It is also the body responsible for submitting to the Commonwealth Government the names of persons suitable for selection as the Australian workers' delegate to the Annual International Labour Conference.

The table below shows the number of metropolitan and district or local labour councils, together with the number of unions and branches of unions affiliated therewith, in each State at the end of the year 1948:—

CENTRAL LABOUR ORGANIZATIONS : NUMBER AND UNIONS AFFILIATED, 1948.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Total.
Number of Councils	8	9	12	7	9	5	1	49
Number of Unions and Branch Unions affiliated ..	268	274	151	141	314	90	19	1,257

The figures given in the preceding table concerning the number of unions do not necessarily represent separate unions, since the branches of a large union may be affiliated with the local trades councils in the several towns in which they are represented.

Between the trade union and the central organization of unions may be classed certain State or district councils organized on trade lines, and composed of delegates from separate unions whose members' interests are closely connected because of their occupations. Delegate councils of bakers, bread carters and mill employees, or of unions connected directly or indirectly with the iron, steel, or brass trades, or with the building trades, may be so classed.

§ 2. Employers' Associations.

The collection of detailed particulars in respect of Employers' Associations has now been discontinued, but particulars for the years 1922 to 1939 appear in issues of the Official Year Book prior to No. 34 and in the *Labour Reports*.

G.—COMPARATIVE INDEX-NUMBERS.

In order to show the relative movements of certain price and related data, the following table of annual and quarterly index-numbers for the six capital cities combined has been compiled with a common base 1911 = 1,000.

COMPARATIVE INDEX-NUMBERS FOR THE SIX CAPITAL CITIES COMBINED.

(Base of each Group: Weighted Average of Six Capitals 1911 = 1,000 (a).)

Period.	Retail Price Index-numbers.							Real Wages. (c)	Percentage of Unemployment among Trade Unionists.

(a) The index-numbers given in the separate columns of the table cannot be compared with each other in order to show, for example, the relative cost of housing and food and groceries, since the cost in 1911 in each group or combination of groups is made equal to 1,000. (b) See footnote (b) on page 401. (c) Index of nominal weekly wage rates for adult males divided by "C" Series Retail Prices Index-number. (d) Taken back from true base (November, 1914 = 1,000) by means of the "A" Series Index (Food and Rent of all Houses).

CHAPTER XII.

TRADE.

§ 1. Introductory.

Constitutional Powers of the Commonwealth in regard to Commerce.—The powers vested in the Commonwealth Parliament by the Commonwealth Constitution with respect to oversea trade and commerce will be found in Sub-section 51 (i) and Sections 86 to 95 thereof (see pp. 15 and 21-22 *ante*).

§ 2. Commonwealth Legislation affecting Oversea Trade.

1. **General.**—In previous issues of the Official Year Book brief particulars of the various Commonwealth Acts and amendments thereof affecting oversea trade are given in chronological order. The Customs Acts represent the administrative or machinery Acts under which the Department of Trade and Customs operates, while the Customs Tariff provides the statutory authority for imposing the actual rates of duties operative from time to time.

The Acts at present in force are: The Customs Act 1901-1947; Customs Tariff, 1933-1948; Customs Tariff (Canadian Preference) 1934-1948; Customs Tariff (Industries Preservation) Act 1921-1936; Customs Tariff (Newfoundland Preference) 1939; Customs Tariff (New Zealand Preference) 1933-1948; Customs Tariff (Papua and New Guinea Preference) 1936; Customs Tariff (Southern Rhodesian Preference) 1941-1948; Customs Tariff (Primage Duties) 1934; Trading with Enemy Act 1939-1947.

2. **Customs Tariffs.**—The Customs Tariff 1921-1930 provided a British Preferential Tariff, an Intermediate Tariff and a General Tariff. The Intermediate Tariff was omitted from the Customs Tariff 1933 but was restored by the Customs Tariff 1936.

"British Preferential Tariff" rates of duty apply to goods the produce or manufacture of the United Kingdom provided such goods comply with the laws and statutory regulations for the time being in force affecting the grant of British preference, and that the goods have been shipped in the United Kingdom to Australia and have not been transhipped, or, if transhipped, it is proved to the satisfaction of the Collector of Customs that the intended destination of the goods, when originally shipped from the United Kingdom, was Australia. The benefits of the British Preferential Tariff may be extended wholly or in part to any British non-self-governing colony, British protectorate or to certain territories governed under British mandate. The benefits of the British Preferential Tariff have been extended by separate Trade Agreements to certain goods the produce of the Dominions of Canada and New Zealand and to certain goods the produce of British non-self-governing colonies.

In submitting tariff schedules to Parliament on 20th March, 1936, the Minister for Trade and Customs said: "Another new feature of the schedules is the Intermediate Tariff. It has been re-introduced to provide a convenient avenue for expressing the level of duties which the Government propose should form the basis for trade treaties. The rates proposed under the protective items of the Intermediate Tariff express, in every case, a protective level for Australian industry as well as preserving the margins required under the Ottawa Agreement." The Customs Tariff 1933-1948 provides that the Governor-General may from time to time by proclamation declare that the Intermediate Tariff shall apply from a date and time specified to goods specified in the proclamation which are the produce or manufacture of the British or foreign country specified in the proclamation. The Intermediate Tariff was brought into operation on 1st January, 1937, by Customs Proclamations Nos. 338, 342, 343 and 360, which granted intermediate rates of duty to specified goods the produce of "Proclaimed Countries." The countries proclaimed include the United Kingdom, the Dominions and Colonies in respect of goods which do not comply with the conditions prescribed for the application of a lower tariff

and most foreign countries under the terms entitling them to most-favoured-nation treatment. The United States of America was an important exception until 17th February, 1943, when Customs Proclamation No. 571 included it in the list of "Proclaimed Countries".

The "General Tariff" applies to all importations excepting :—

- (a) Goods the produce or manufacture of the United Kingdom, shipped in the United Kingdom ;
- (b) Goods the produce or manufacture of the following countries when admissible under the British Preferential Tariff or at a special rate of duty : Canada, New Zealand, Norfolk Island, Papua and New Guinea, Southern Rhodesia, and British non self-governing Colonies, British Protectorates and certain Territories governed under British mandate.
- (c) Goods admitted under the provisions of the Intermediate Tariff.

The Customs Tariff 1933-1948 provides for duties on certain goods to be deferred. Where a deferred duty on any goods is provided in the Schedule, the Minister shall refer to the Tariff Board for inquiry and report on the question whether the deferred duty should or should not operate on and after the date to which it has been deferred. The Board shall report whether the goods in respect of which the deferred duty is provided are being made or produced in Australia or will be so made or produced on, or immediately after, the date to which the duty has been deferred—(a) in reasonable quantities ; (b) of satisfactory quality ; and (c) at a reasonable price having regard, among other things, to the probable economic effect of the imposition of the deferred duty upon other industries concerned, and upon the community in general. Upon receipt of a report from the Tariff Board, the Minister may defer the duty further by notice published in the *Commonwealth Government Gazette*.

3. Preferential Tariff.—(i) *British Preference.* The Commonwealth Tariff 1908 provided Preferential Tariff rates in favour of specified goods produced or manufactured in the United Kingdom. Subsequent legislation has extended the list of articles to which these rates apply. For the purpose of preferential treatment the following goods are deemed by Section 151A of the Customs Act 1901-1947 to be the produce or manufacture of the United Kingdom provided the final process of their production or manufacture was performed in that country.

- (a) Goods which are wholly produced or wholly manufactured in the United Kingdom from materials in one or more of the following classes—
 - (i) Materials wholly produced or wholly manufactured in the United Kingdom or in Australia ;
 - (ii) Imported unmanufactured raw materials ;
 - (iii) Imported manufactured raw materials as determined by the Minister.
- (b) Goods of the factory or works cost of which not less than seventy-five per cent. is represented—
 - (i) by labour or material of the United Kingdom ; or
 - (ii) by labour or material of the United Kingdom and labour or material of Australia.
- (c) Goods of a class or kind not commercially produced or manufactured in Australia and of the factory or works cost of which not less than twenty-five per cent. or fifty per cent. if the Minister so determines is represented—
 - (i) by labour or material of the United Kingdom ; or
 - (ii) by labour or material of the United Kingdom and labour or material of Australia.

The benefits of the British Preferential Tariff have also been extended by separate Trade Agreements to certain goods the produce of the Dominions of Canada and New Zealand and by separate Tariff legislation to the Territories of Papua and New Guinea and the above-mentioned conditions apply *mutatis mutandis* to each.

At the Imperial Economic Conference held at Ottawa, Canada, during July and August, 1932, a trade agreement providing for special preferential trade conditions was made between the Governments of the United Kingdom and the Commonwealth of

Australia. A summary of the provisions of this agreement appeared in Official Year Book No. 26, pp. 868-873 and further references were made in subsequent issues of the Year Book.

The five years' currency of the agreement terminated on 19th August, 1937, but, in view of the negotiations then in progress between the Governments of the United Kingdom and the United States of America for a trade agreement, a review of the terms of the Ottawa Agreement became a matter of urgency. The United Kingdom Government at the time sought the concurrence of the Dominions in the modification of certain preferences granted under the Ottawa Agreement in order to facilitate the satisfactory conclusion of an agreement with the United States of America. As a consequence, a conference of United Kingdom and Australian Ministers was held in London early in 1938 and a joint statement setting out the result of the conference was issued by the two Governments in the form of a Memorandum of Conclusions which was published by the United Kingdom Government on 20th July, 1938. Details of the Memorandum have been published in previous issues of the Official Year Book. The full text appears on pages 479-482 of Official Year Book No. 32.

The future of the agreement and of Empire preferences generally has been discussed in connexion with the proposals for the establishment of an International Trade Organization which are referred to in paragraph 6.

(ii) *Intermediate Tariff.* The Intermediate Tariff came into operation on 1st January, 1937, in respect of a selected list of items. This list has been substantially extended from time to time but many rates have not yet been proclaimed to come into operation. Those items which have been proclaimed apply to goods from countries with which specific most-favoured-nation arrangements exist, including goods from all members of the British Commonwealth of Nations not receiving preferential Tariff treatment. They apply also to goods from certain other Foreign countries in respect of which Australia has no formal obligation to accord Intermediate Tariff treatment.

(iii) *Exchange Adjustment.* The Customs Tariff (Exchange Adjustment) Act 1933-1939 provides for adjustments in Duties of Customs consequent upon depreciation in the value of Australian currency relative to sterling. This Act came into operation on 5th October, 1933 and ceased to operate on 15th November, 1947, as a result of the Customs Tariff (Exchange Adjustment) Act Repeal Act 1948.

A summary of the provisions of the Customs Tariff (Exchange Adjustment) Act 1933-1939 is contained in previous issues of the Official Year Book.

(iv) *Papua and New Guinea Preference.* The Customs Tariff (Papua and New Guinea Preference) Act 1936 which repealed the Act of 1934 provides for Customs Preference on goods the produce of Papua and on goods the produce of the Territory of New Guinea. Imports into Australia direct from the Territory of Papua or the Territory of New Guinea, of such of the goods specified in the schedule to the Act as were produced in the Territory from which they were imported, shall, notwithstanding anything contained in the Customs Tariff 1933-1939, be free of duty. The goods specified in the schedule to the Customs Tariff (Papua and New Guinea Preference) 1936 are coffee, dried lychee fruit, various native fresh fruits, edible fungi, green and dry ginger, coco-nuts, Rangoon beans, kapok and sesame seeds, areca nuts, cocoa beans, massoi oil, nuts (edible), sago, tapioca, spices, vanilla beans, gums, pyrites, denatured spirit and tea.

4. *Primage Duty.*—From 10th July, 1930 a primage duty of 2½ per cent. ad valorem was imposed on all goods whether dutiable or not dutiable, in addition to the duties collected in accordance with the Customs Tariff 1921-1930, excepting bullion, specie, radium and certain special governmental and other imports. The rate of primage duty was subsequently increased to 4 per cent. as from 6th November, 1930.

A proclamation of 14th May, 1931 exempted certain aids to primary production, and on 11th July, 1931 a further amendment, in addition to extending the list of these goods and also exempting some minor imports from primage duty, provided for a rate of 4 per cent. ad valorem on a few other items, mainly aids to production, and increased the ad valorem rate of primage duty to 10 per cent. on all other articles imported. Amendments promulgated since 11th July, 1931 have greatly increased the list of goods exempt from primage duty.

The Customs Tariff (Primage Duties) Act 1934 imposed primage duty at rates of 4, 5, and 10 per cent. and provided for preferential treatment of certain goods admitted under the British Preferential Tariff. A proclamation of 12th December, 1934 exempted from primage duty goods the produce or manufacture of Fiji, and a proclamation of 25th September, 1935 exempted from primage duty goods the produce or manufacture of the Territories of New Guinea and Papua. Under the Customs Tariff (New Zealand Preference) Act goods the produce or manufacture of New Zealand are exempt from primage duty. Similarly under the Norfolk Island Act 1913 goods the produce or manufacture of Norfolk Island are exempt from primage duty.

Customs proclamations, which came into force on 1st January, 1937 and later dates, provide in respect of specified tariff items exemptions from, and reduced rates of 4 and 5 per cent., primage duty on imports the produce or manufacture of "Proclaimed Countries". All countries whose goods are admissible to Australia under the intermediate customs tariff rank as proclaimed countries and include the United Kingdom, the Dominions and Colonies, the United States of America (from 18th February, 1943), and most foreign countries.

Further proclamations have provided for exemption of additional tariff items from primage duty. Of proclamations of recent date, those operative from 19th November, 1947, were the principal.

5. *Trade Agreements.* (See also para. 6 following)—(i) *United Kingdom.* A reciprocal trade agreement between the United Kingdom and Australia came into force on 14th October, 1932, and is referred to briefly in paragraph 3 above. Broadly speaking, Australia secured preferences in the United Kingdom market for a wide range of Australian export commodities and in return Australia incurred obligations to the United Kingdom in respect of Tariff rates and the grant of preferences to United Kingdom goods.

(ii) *Dominion of Canada.* A reciprocal trade agreement between Canada and Australia which came into force on 1st October, 1925, was superseded by a new agreement operating from 3rd August, 1931. The basis of the new agreement was, generally, the mutual accord of British Preferential Tariff treatment. The only exceptions to this general rule were listed in the schedules to the agreement.

Australian commodities to which the British Preferential Tariff does not apply on their importation into Canada are: Butter, brandy, champagne, cheese, currants, eggs, eucalyptus oil, fresh apricots, pears, quinces, nectarines, grapes, oranges and passion fruit, dried prunes, apricots, nectarines, pears and peaches, fruit pulp, fruits in cans, gelatine, hops, rice (uncleaned), meat (fresh and canned), peanuts, raisins, sugar, tallow, veneers and wine.

Canadian commodities to which the British Preferential Tariff does not apply on their importation into Australia are: Carbide of calcium, cash registers, corsets, fish, gloves, goloshes and rubber sand boots, etc., piece goods, iron and steel tubes or pipes, printing machinery, barbed wire, paper (printing, typewriting and writing), timber, typewriters, vacuum cleaners and vehicles—motor chassis (unassembled and assembled)—and vehicle parts but not including bodies, gears, rubber tyres and tubes, storage batteries, shock absorbers, bumper bars, sparking plugs and springs.

Certain administrative provisions, including a special concession to Canada in respect of the inland freight charges to be included in the dutiable value of Canadian goods on importation into Australia, were incorporated in the agreement.

The Customs Tariff (Canadian Preference) Acts 1931 and 1934–1948 give effect to the agreement so far as Australia is concerned.

(iii) *Dominion of New Zealand.* A reciprocal trade agreement between New Zealand and Australia came into force on 1st December, 1933, superseding an earlier agreement of 1922. The basis of the new agreement was, generally, the mutual accord of British Preferential Tariff treatment. The only exceptions to this general rule were listed in the schedules to the agreement.

The Customs Tariff (New Zealand Preference) Act 1933 giving effect to the agreement repealed earlier acts and provides that duties on all goods specified in the schedule to the Act shall be at the rates indicated therein, and that all goods other than those

provided for in the schedule shall be subject to the rates in force under the British Preferential Tariff. An amendment to this Act in 1934 provides that, where the rate of duty upon any class of goods under the New Zealand British Preferential Tariff is less than that operating in Australia under the British Preferential rate, upon request by the New Zealand Government such goods may, after proclamation, be admitted at the lower rate. The rates of duty on goods re-exported from New Zealand (not being goods the produce or manufacture of New Zealand) and which are imported into Australia, and which if they had been imported into Australia direct from the country of origin would have been subject to the rates of duty under the British Preferential Tariff, shall be the rates of duty in force under that tariff.

The Act provides also that films produced in New Zealand by or for the Government of New Zealand for publicity purposes shall be admitted free of duty, also that cocoa beans the produce of Western Samoa shall not be subject to any higher duties than those paid on cocoa beans the produce of any British non-self-governing Colony or Protectorate or any Territory under British mandate. The provisions of the Act do not, however, apply to goods the produce of Cook Islands.

Goods the produce or manufacture of the Dominion of New Zealand are exempt from primage duty.

The conditions of preference in the Act provide that goods shall be deemed to be the produce or manufacture of New Zealand if they conform to the laws and regulations in force in Australia which apply to such goods when imported under the British Preferential Tariff (*vide* section 151A of Customs Act 1901-1947) except that goods not wholly produced or manufactured in New Zealand need not contain more than 50 per cent. of New Zealand labour and/or material in their factory or works cost, instead of 75 per cent. under the conditions of the United Kingdom preference.

(iv) *Newfoundland.* An agreement between Newfoundland and Australia which came into operation on 12th December, 1939, provided for imports of news printing paper the produce or manufacture of Newfoundland to be accorded the benefits of the British Preferential Tariff, and in return the Government of Newfoundland accorded exclusive Tariff preference to Australian butter and canned fruits imported into that country.

The agreement was approved by the Trade Agreement (Newfoundland) Act 1939, and effect was given to its provisions so far as Australia is concerned by the Customs Tariff (Newfoundland) Preference Act 1939.

Following the incorporation of Newfoundland as the tenth province of Canada as from 1st April, 1949, the Agreement with Newfoundland has lapsed and trade between Australia and Newfoundland is now subject to the Canada-Australia trade agreement.

(v) *Southern Rhodesia.* An agreement between Southern Rhodesia and Australia came into operation on 9th April, 1941.

Under the agreement the principal undertakings by the Commonwealth Government were—(a) to accord a preferential rate of ninepence per lb. lower than the British Preferential Tariff on unmanufactured tobacco from Southern Rhodesia; and (b) to admit raw asbestos and chrome at rates of duty not higher than those applicable to these products from other countries, and to admit them free of primage duty.

The Southern Rhodesian Government on its part agreed—(a) to admit free of duty a schedule of Australian goods comprising 33 items; (b) to accord specified preferential rebates ranging from 10 per cent. to 50 per cent. from the duties applicable to United Kingdom goods on a schedule of Australian goods comprising 19 items; (c) to accord British Preferential Tariff rates to a schedule of Australian goods comprising 14 items and (d) to accord similar tariff treatment to Australian wheat and wheat flour, in the event of permits being issued for importation from any other country at rates of duty lower than those accorded to Australia under the agreement.

The Trade Agreement (Southern Rhodesia) Act 1941 approved the agreement, which was given effect to so far as Australia is concerned by the Customs Tariff (Southern Rhodesia Preference) Act 1941.

(vi) *Union of South Africa.* A trade agreement between Australia and the Union of South Africa came into force as from 1st July, 1935.

This agreement provides that the products of the Union of South Africa or of the mandated territory of South-West Africa entering Australia and the products of Australia entering the Union of South Africa or the mandated territory of South-West Africa shall be subject to customs duties not higher than those imposed by the importing country on like products from the most favoured foreign nation. A reciprocal tariff arrangement under which products of Mozambique are admitted duty free to the Union of South Africa is exempt from the agreement.

The Trade Agreement (South Africa) Act 1936 approves the terms of this agreement.

(vii) *Foreign Countries.* Trade agreements between the Commonwealth Government and the Governments of Belgium, Czechoslovakia and France were in operation prior to the outbreak of war in September, 1939, but were inoperative during the war, owing to the provisions of the Trading with the Enemy Act 1939-1940. These agreements are again in full force.

The trade agreement concluded in 1938 between Australia and Switzerland continued in limited operation during the war period.

Between December, 1939 and April, 1944 the Commonwealth Government also entered into trade agreements with Brazil and Greece.

Summaries of the texts of these agreements appeared in previous issues of the Official Year Book.

6. The Charter for an International Trade Organization and the General Agreement on Tariffs and Trade.—These documents are basically the result of a series of international trade discussions which commenced in 1946 and culminated in a World Conference on Trade and Employment at Havana in 1948.

The origin of these discussions is found in the principles enunciated in Article VII. of the Mutual Aid Agreement between the Government of the United Kingdom and the United States of America, which reads as follows:—

“ In the final determination of the benefits to be provided to the United States of America by the Government of the United Kingdom in return for aid furnished under the Act of Congress of the 11th March, 1941, the terms and conditions thereof shall be such as not to burden commerce between the two countries, but to promote mutually advantageous economic relations between them and the betterment of world wide economic relations. To that end they shall include provision for agreed action by the United States of America and the United Kingdom, open to participation by all other countries of like mind, directed to the expansion, by appropriate international and domestic measures, of production, employment, and the exchange and consumption of goods, which are the material foundations of the liberty and welfare of all peoples; to the elimination of all forms of discriminatory treatment in international commerce, and to the reduction of tariffs and other trade barriers; and, in general, to the attainment of all the economic objectives set forth in the joint declaration made on the 12th August, 1941, by the President of the United States of America and the Prime Minister of the United Kingdom.”

“ At an early convenient date, conversations shall be begun between the two Governments with a view to determining, in the light of governing economic conditions, the best means of attaining the above-stated objectives by their own agreed action and of seeking the agreed action of other like-minded Governments.”

This Article is linked with the terms of the Atlantic Charter and has particular reference to Clauses 4 and 5, which state the common principles in the national policies of the United Kingdom and the United States of America in relation to trade and international economic relations. The paragraphs referred to read as follows:—

“(4) They will endeavour, with due respect to their existing obligations, to further the enjoyment by all States, great or small, victor or vanquished, of access on equal terms to trade and raw materials of the world which are needed for their economic prosperity.

(5) They desire to bring about a full collaboration between all nations in the economic field, with the object of securing for all improved labour standards, economic advancement and social security.”

The Commonwealth Government subscribed to these principles in an Exchange of Notes made on 3rd September, 1942 between the Australian Minister at Washington and the United States Secretary of State, which formed also the basis of the Australian Reciprocal Aid Agreement with the United States of America.

The first step towards the implementation of these principles in the field of international trade was taken in December, 1945, when the Government of the United States of America issued an invitation to a number of the leading trading nations of the world (including Australia) to participate in two sets of preliminary negotiations. One was designed to discuss a draft Charter prepared by the Government of the United States of America and entitled "Proposals for Expansion of World Trade and Employment." The other proposed negotiations were for the purpose of giving practical effect to the policy of expanding international trade by bringing about a series of mutually advantageous trade agreements.

The conference did not eventuate at the time fixed, but after the establishment of the United Nations Organization the first subject of negotiation (viz. the Charter) was brought under the auspices of the United Nations by the acceptance of a resolution proposed by the United States of America at the First Meeting of the Economic and Social Council in February, 1946. The Council established a Preparatory Committee to elaborate an annotated draft agenda for consideration by a World Conference on Trade and Employment. The Committee comprised the United Kingdom, the United States of America, France, Belgium, Netherlands, Luxembourg, Norway, Czechoslovakia, Lebanon, Canada, India, South Africa, New Zealand, Australia, China, Cuba, Brazil and Chile. The U.S.S.R. had been invited but did not participate.

The first meeting of the Preparatory Committee was convened for October, 1946 in London and, in July, 1946, the United States Government issued an amendment of its previous proposals in the form of a "Suggested Draft Charter for an International Trade Organization of the United Nations."

Broadly speaking, the proposals embodied in the draft aimed at implementing the principles enunciated in Article VII. of the various Mutual Aid Agreements and in the Atlantic Charter and contemplated—

- (1) The establishment of an International Trade Organization;
- (2) the modification of restrictive trade barriers; and
- (3) the development of agreed rules of conduct in regard to matters affecting international trade.

The object was to raise living standards in all the countries of the world by the promotion of a high level of employment and the expansion of world trade.

At its first meeting in London in October, 1946, the Preparatory Committee discussed generally the Articles of the Draft Charter. Various amendments were proposed and, as a result, it was necessary for the Preparatory Committee to appoint a Drafting Committee, which met in New York in January and February, 1947, and incorporated in the Draft Charter the alterations suggested at the London discussions.

The text of the Drafting Committee's revised Charter became the basis for discussion by the Preparatory Committee in its Second and Final Preparatory Session held in Geneva during May–October, 1947. The Charter as further revised during that session was laid before the World Conference on Trade and Employment, which commenced in Havana in November, 1947.

The Draft Charter considered at Havana covers a very extensive range of subjects connected with the rules and conduct of international trade. It is divided into nine chapters covering the purposes and objectives of the proposed International Trade Organization, employment and economic activity, economic development, commercial policy, restrictive business practices, intergovernmental commodity arrangements, treatment of non-members and the administrative arrangements for the organization itself.

Other features of the draft Charter from the view-point of Australia are (1) that provision is made for the preservation of the existing British Preferential Tariff System and (2) present Australian stabilization schemes for the marketing of primary produce are permitted to continue. In addition, the proposed International Trade Organization

will provide a forum for the consideration of common problems in a conciliatory spirit ; the principles of multilateral trade are in contrast to the *trading blocs* of the " thirties " and in conjunction with tariff reductions the balance of trade with the dollar area will tend to be restored by weakening restrictions on imports into the United States of America.

The Final Act of the United Nations Conference on Trade and Employment was signed in Havana by the representatives of fifty-three nations on 24th March, 1948. It was agreed that the Charter would be submitted to the Governments of the countries represented at the Conference, and the Charter provides that it must be approved by a majority of these before it comes into operation.

The Charter was considered by the Australian Parliament towards the end of 1948 and approval has been given for Australia to lodge an instrument of acceptance when a corresponding instrument has been lodged by the United Kingdom and the United States of America. These latter countries have such a predominating influence in world trade that it was considered necessary to attach such a condition to Australia's acceptance.

The measure for the United States of America to accept the Charter was introduced into the United States of America Congress in April, 1949 but it has not as yet been approved.

Towards the end of 1946 the Governments of a number of countries comprising the Preparatory Committee felt that the other discussions proposed by the United States of America in December, 1945 (*viz.* those directed at the policy of expanding international trade by bringing about a series of mutually advantageous trade agreements) were an interdependent part of the Charter negotiations. In consequence they were also brought under the auspices of the United Nations on the recommendation of the First Session of the Preparatory Committee.

As a result thereof on 10th April, 1947 (about a month prior to the resumption of the Charter discussions) the member nations of the Preparatory Committee engaged in negotiations with the object of arriving at a satisfactory basis on which the reduction of tariff barriers could be effected.

The Tariff negotiations were kept quite distinct from the Charter discussions as the aim was to bring the results into effect without necessarily awaiting the establishment of the International Trade Organization.

The results of the negotiations were incorporated in a draft General Agreement on Tariffs and Trade which was tabled in the House of Representatives on the 18th November, 1947, together with the tariff schedules implementing the tariff reductions which Australia had undertaken to afford.

A Protocol of Provisional Application provided that, upon signature by Australia, Belgium, Canada, France, Luxembourg, the Netherlands, the United Kingdom and the United States of America not later than 15th November, 1947, those countries should undertake to apply provisionally on and after 1st January, 1948—

- (1) Parts I. and III. of the Agreement,
- (2) Part II. of the Agreement to the fullest extent not inconsistent with existing legislation in their respective countries.

These conditions were satisfied and the Agreement is provisionally in force. Tariff reductions undertaken by Australia operated from the 19th November, 1947. Subsequently fifteen other countries signed the Protocol of Provisional Application and the General Agreement is now being provisionally operated by Australia, Belgium, Brazil, Burma, Canada, Ceylon, Chile, China, Cuba, Czechoslovakia, France, India, Lebanon, Luxembourg, Netherlands, New Zealand, Norway, Pakistan, Southern Rhodesia, Syria, South Africa, United Kingdom and the United States of America.

The agreement does not come definitively into force until 30 days after instruments of acceptance have been lodged by countries accounting for 85 per cent. of the total external trade of the countries signatory to the Final Act. The percentage is to be calculated in accordance with a table set out in Annex II to the Agreement. No country has yet definitively accepted the agreement, but as in the case of the Charter, Parliament has approved Australia lodging an instrument of acceptance when the United Kingdom and United States of America have done likewise.

Many of the articles of the General Agreement are identical with articles in the Charter and were only incorporated in the Agreement to prevent tariff concessions being circumvented by other measures pending the coming into force of the Charter. When the Charter comes into force Part II. of the General Agreement which contains such articles will be suspended.

If finally ratified, the Agreement will run until 1st January, 1951, but will continue thereafter unless it is specifically terminated.

The Agreement, which is in three parts, contains, briefly—

Part I. Schedules of negotiated tariff reductions and an undertaking to extend most-favoured-nation treatment to other participating countries except where existing preferences are deemed valid.

Part II. Undertakings regarding commercial policy to prevent tariff concessions being offset by other protective measures.

Rights are preserved, however, to—

- (1) Impose new duties for protective purposes except in respect of commodities where rates of duty have been bound under the general agreement;
- (2) impose import restrictions to protect the balance of payments;
- (3) take emergency action where any industry is endangered by any negotiated tariff or preference reduction.

Part III. Mainly machinery provisions.

Under the tariff negotiations associated with the Agreement concessions were offered to Australia on almost all the principal products of which Australia is an actual or potential exporter to the individual countries concerned. Generally the offers were made directly to Australia, but in some cases benefits will arise indirectly from concessions granted to third countries which are more important suppliers of the particular product. These latter benefits occur through the operation of the most-favoured-nation principle.

In April, 1949 a further series of tariff negotiations commenced at Annecy in France between the 23 Contracting Parties which are at present operating the General Agreement on Tariffs and Trade and eleven additional countries which have expressed a desire to accede to the General Agreement. These countries are:—Colombia, Denmark, Dominican Republic, Finland, Greece, Haiti, Italy, Liberia, Nicaragua, Sweden and Uruguay.

In addition, Ceylon, which, for domestic reasons, had been unable to operate concessions it negotiated at Geneva in 1947, took the opportunity of re-negotiating with certain countries including Australia.

Besides the tariff negotiations, the Contracting Parties also conducted a session to deal with matters arising out of the administration of the General Agreement on Tariffs and Trade.

7. Customs (Import Licensing) Regulations.—The Customs (Import Licensing) Regulations were promulgated and became effective on 1st December, 1939. These regulations were complementary to the National Security (Monetary Control) Regulations and the Customs (Overseas Exchange) Regulations, which were already in operation, in that the chief immediate aim of the licensing measure was to conserve resources of non-sterling exchange and, in particular, to prevent the absorption of those resources in the purchase of unessential imports to the detriment of more vital national needs. Other objectives were to enable priority in shipping space to be given to essential imports should a shortage develop and to gather information on the relative importance of particular imports to enable future restrictions (if required) to be soundly based.

However, during 1941 the deterioration of Australian sterling balances in London and changes in the general war situation made it necessary in December, 1941 to bring imports from sterling countries within the scope of the regulation. The extension of the restrictions to sterling goods was a necessary corollary to the measures adopted in Australia and throughout the British Commonwealth to divert manpower, machinery and raw materials to war production. Conservation of shipping space was also an important consideration.

With the cessation of hostilities and the improvement in London balances and in accordance with the Government policy of relaxing all forms of war-time restrictions wherever possible, a large range of goods of sterling origin was removed from control in January, 1946. In January, 1947, with the exception of a small number of goods, import licensing control was removed from all goods of United Kingdom origin. Since the cessation of hostilities, also, restrictions have been continuously modified in respect of goods from those non-sterling countries (called easy currency countries) with which the sterling area has no balance of payments difficulties, and they have now been relaxed to the extent that virtually all goods from those countries are permissible imports.

The sterling area still has balance of payments problems with a small number of non-sterling countries (the hard currency countries). Australian policy in respect of importations from these countries (the chief of which are those which comprise the dollar area) is to restrict importations to those goods which are of an essential nature and are unobtainable from sterling or easy currency sources.

8. Export Control.—(i) *General.* Powers for the normal measures of control or supervision over exports are conferred by section 112 (1) of the Customs Act and they provide for the prohibition of the exportation of arms, explosives and military and naval stores, and of any goods—

- (a) the exportation of which would be harmful to the Commonwealth ;
- (b) the prohibition of the exportation of which is necessary for the preservation of the flora or fauna of Australia ;
- (c), in order to preserve the standard and quality of Australian goods for export ;
- (d) the prohibition of the exportation of which is necessary for the protection of the revenue or the prevention of fraud or deception.

Action has been taken under these powers to prohibit the exportation of a large range of goods and these prohibitions apply at all times. They may be general, or restricted and absolute, or conditional.

In addition to these normal measures, restrictions were imposed on the exportation of goods during the war years and many have been continued in the post-war period. These restrictions provide for both monetary and commodity controls and are explained hereunder.

(ii) *Monetary Control.* As an integral part of the framework of exchange control, a control over goods exported from Australia was introduced in 1939 by the promulgation of the Customs (Overseas Exchange) Regulations which were subsequently superseded by Part IIA. of the National Security (Exchange Control) Regulations in December, 1943. The objectives were to ensure that—

- (a) The overseas funds accruing from the exportation of goods were made available to the Australian banking system ; and
- (b) payment for goods exported was made in the currency and the manner prescribed by the Commonwealth Bank of Australia.

On the conclusion of the war it was decided to continue exchange control measures and provision was made in the Banking Act 1945 to enable the introduction of the necessary regulations. On 19th December, 1946 the Banking (Foreign Exchange) Regulations were promulgated and Part III. of these regulations now authorizes the control previously exercised under Part IIA. of the National Security (Exchange Control) Regulations.

Under Regulation 16 of the Banking (Foreign Exchange) Regulations the exportation of any goods is prohibited unless a licence to export has been granted under the regulations or the goods are excepted from the application of the regulations. Provision is made for the granting of export licences subject to such terms and conditions as may be imposed. On the receipt in Australia by the Commonwealth Bank, or by a Bank acting as its agent, of advice that foreign currency has been paid to the Commonwealth Bank or to an agent of the Bank in payment for goods exported in accordance with a licence granted under the regulations, the Bank or agent of the Bank pays the licensee, or such other person as may be entitled to receive it, an amount in Australian currency equivalent to the foreign currency received.

In addition to commercial transactions, exports by private individuals are rigidly controlled and in the case of persons leaving Australia for overseas a restriction applies to the value of specified articles of jewellery and other effects of high intrinsic value which they are permitted to take with them. Their baggage is subject to the regulations and, if containing goods of the nature mentioned, may require an export licence. Any goods contained in passengers' baggage which are restricted exports under the Customs Act require to be covered by an export permit.

(iii) *Commodity Control.* For various reasons, the principal of which were—

- (a) To conserve supplies of essential commodities for Australia's requirements ;
- (b) to implement price determinations ;
- (c) to control exports of goods which are the subject of Empire Marketing Agreements ; and
- (d) to strengthen the control of the exportation of capital in the form of goods, instituted by Part III. of the Banking (Foreign Exchange) Regulations,

a large range of commodities was prohibited from exportation (unless the consent of the Minister for Trade and Customs was first obtained) by proclamation promulgated under section 112 (1A.) of the Customs Act.

These prohibitions were imposed as a war-time measure but post-war conditions have necessitated continued export control of a number of goods. However, the matter is kept under continual review to ensure that restrictions are removed as soon as conditions permit.

9. *Industries Preservation.*—The Customs Tariff (Industries Preservation) Act 1921-1936 provides that, after inquiry and report by the Tariff Board, special duties shall be collected in the following cases when the importation of the goods referred to might be detrimental to an Australian industry :—In the case of goods sold for export to Australia at a price less than the fair market value for home consumption or at a price which is less than a reasonable price, a special dumping duty shall be collected equal to the difference between the price at which the goods were sold and the fair market value or the difference between the price at which the goods were sold and a reasonable price. Similar provision is made for goods consigned to Australia for sale. With regard to goods exported to Australia at rates of freight less than the normal rate of freight the dumping freight duty shall be—on goods carried free—the amount payable as freight at the normal rate ; and in the case of any other goods—an amount equal to the difference between the freight paid and the freight which would have been payable at the normal rate. Special duties are also imposed in the case of goods imported from countries whose currency is depreciated. Provision is also made for the protection of the trade of the United Kingdom in the Australian market from depreciated foreign currency.

The Act provides that the Minister for Trade and Customs, after inquiry and report by the Tariff Board, may publish a notice in the *Commonwealth of Australia Gazette* specifying the goods upon which the special rates of duty under this Act shall thereupon be charged and collected.

10. *Imperial Preference in the United Kingdom.*—(i) *Preferential Tariff of the United Kingdom.* Before 1919 the United Kingdom did not accord tariff preferences to Empire countries on the limited number of revenue duties then chargeable. In that year preferential rates of duty were established on some eighteen items. Of these, the preferential rate on twelve items was to be equivalent to five-sixths of the full rate, on four to two-thirds of the full rate and on another (wine) to 50-70 per cent. of the full rate. The items so affected of interest to Australia at that time were currants, dried and preserved fruit, sugar, molasses and wine.

Preferential treatment was conditional on the goods being consigned from and grown, produced or manufactured in the British Empire. In the case of manufactured articles preference only applied where a prescribed proportion of their value was the result of labour within the British Empire. Subsequent preference arrangements have been subject to substantially similar conditions.

From 1919 to 1932 various further measures increased the preferential tariff treatment to Empire products. The Safeguarding of Industries Act 1921 provided for the imposition of duties on imports of key industry goods from foreign countries with free entry or preferential rates on similar goods from Empire countries; whilst the Dyestuff Import Regulation of the previous year allowed the unrestricted import of dyestuffs of Empire origin although imports of foreign dyestuffs were subjected to licensing restrictions. In 1925 important preferences were accorded or increased on sugar (for ten years) tobacco, dried fruit, wine and several other items. In the following three years further preferences were established under the Safeguarding of Industries Act whilst in 1927 screening quotas for British films and in 1928 further sugar concessions were introduced.

By 1931, therefore, there was considerable preferential treatment of Empire goods entering the United Kingdom, especially of such goods as sugar, dried fruits, wine, jams, and jellies of particular interest to Australia. Nevertheless these items covered only a relatively small part of the trade of the United Kingdom which still adhered in general to free trade principles.

In 1931 to counteract the flood of dumping which followed the collapse of world trade the United Kingdom introduced emergency temporary tariff legislation with a substantial preference element, and in 1932 by enacting the Import Duties Act abandoned free trade as a policy.

So far as preference is concerned, the Import Duties Act may conveniently be considered with the Ottawa Agreements which the United Kingdom made with Australia and six other Empire countries in August and incorporated in the Ottawa Agreements Act in November, 1932.

The Import Duties Act provided for the imposition of a general ad valorem duty of 10 per cent. on all imports with certain exceptions (i.e. those shown on the Free List and those already dutiable under previous legislation). Additional duties could be imposed and items on the Free List subjected to duty. In subsequent years the range of items subject to duty under this Act was greatly extended.

The freedom of Empire goods from these duties was guaranteed under the Ottawa Agreements, which also provided for the imposition of new duties on imports from foreign, but not Empire, countries of a number of products of special interest to the Empire countries concerned. Further, they provided that these duties and selected duties under the Import Duties Act would not be varied by the United Kingdom without the consent of the other party to the respective agreement.

(ii) *The Australia-United Kingdom Trade Agreement.* The preferential advantages accorded to Australia by the United Kingdom under this unit of the Ottawa Agreements may be summarized as follows:—

- (a) Continued free entry was guaranteed for three years for Australian eggs, poultry, butter, cheese and other milk products. (This freedom of entry still continues). Similar foreign goods were subjected to duty thus giving Australia a preference of 1s. to 1s. 9d. per great hundred on eggs; 10 per cent. ad val. on poultry; 15s. per cwt. on butter; 15 per cent. ad val. on cheese; 5s. per cwt. on sweetened whole condensed milk; and 6s. per cwt. on unsweetened whole condensed milk and milk powder and other unsweetened preserved milk.
- (b) Preferences were created on the following products by imposing a duty on like foreign articles whilst guaranteeing free entry to Australian produce: wheat (2s. per quarter); apples and pears (4s. 6d. per cwt.); canned apples (3s. 6d. per cwt.); other canned fruits (15 per cent. ad val.); certain dried fruits, raisins, etc. (10s. 6d. per cwt.); honey (7s. per cwt.); oranges (3s. 6d. per cwt. in season); raw grape fruit (5s. per cwt. in season); and grapes (1½d. per lb. in season).
- (c) The preferential margins on the commodities mentioned in (a) and (b) above were not to be reduced without the consent of the Australian Government and this provision also applied to the 10 per cent. preference on leather, tallow, canned meats, barley, wheat flour, macaroni, dried peas, casein, eucalyptus oil, meat extracts and essences, copra, sugar of milk, sausage casings, wattle bark, asbestos and certain dried fruits.

- (d) The Agreement also provided for a preference of 2d. per lb. on unwrought copper, but this was never implemented as Empire producers could not demonstrate their ability to continue offering their copper on first sale to the United Kingdom at prices not exceeding the world price, which was a condition of the preference. A similar condition applied to wheat, zinc and lead. In the case of zinc and lead the duty was changed from an ad valorem rate of 10 per cent. to a specific rate at an early stage in the life of the Agreement.
- (e) Australia, although not securing in the agreement with the United Kingdom a commitment on the amount and duration of the preference margin applying to a number of commodities of some importance to Australia (e.g. rice), had its interest safeguarded by the fact that such items were usually covered by the United Kingdom's agreement with another Empire country. Such benefits were generalized to Australia.
- (f) The United Kingdom agreed to regulate meat imports and stated its policy as being to give the Dominions an expanding share of United Kingdom meat imports.
- (g) Preferential tariff advantages were also obtained in the British non-self-governing colonies and protectorates.

The preferences operating before Ottawa and not increased by the Ottawa Agreement were continued. Thus the preferential margins on heavy wines, sugar, the sugar content of goods containing added sweetening matter, currants, etc., remained in effect.

(iii) *Developments since the Ottawa Agreement.* The Australia-United Kingdom Agreement operated with virtually no alteration until the beginning of 1939. Since then three major factors have been responsible for altering its terms or significance:—

- (a) *The United Kingdom-United States Trade Agreement, 1938.* This Agreement became effective from 1st January, 1939, and, to enable the United Kingdom to secure concessions from the United States of America, Australia agreed to the following reductions in the preferences which her products were enjoying in the United Kingdom:—

Wheat (preference eliminated); apples and pears (1s. 6d. per cwt. in Northern Hemisphere season); honey (2s. per cwt.); canned apples (1s. 3d. per cwt.); canned grapefruit (preference eliminated). The ad valorem duty of 15 per cent. was replaced by specific duties of 5s. 6d. per cwt. on canned fruit salad, 5s. per cwt. on canned pineapples and 4s. per cwt. on canned loganberries.

- (b) *Long-term Contracts with United Kingdom.* During and after the war Australia made contracts under which the United Kingdom became obligated to purchase the whole or a substantial part of the exportable surplus of several important Australian products normally entitled to preferential treatment. Meat, sugar, dried fruits, apples and pears, butter, cheese and eggs are notable examples. The tariff preference is not significant whilst these contracts are operative.
- (c) *The General Agreement on Tariffs and Trade.* As part of the settlement for concessions secured by Australia from other countries under this Agreement, signed at Geneva in 1947, Australia consented to the following reductions in the preference margins guaranteed to her under the Ottawa Agreement:—

Apples (margin eliminated during Northern Hemisphere season); raisins (2s. per cwt.); canned peaches, pears and apricots (3 per cent. ad val.); non-tropical canned fruit salad (margin eliminated); dried apricots (2s. 6d. per cwt.); dried prunes, apples, peaches and nectarines (margin eliminated); honey (nil to 1s. 6d. per cwt. according to value for duty.) The preference margin was also modified on a number of items in which Australia was interested but on which her consent to reduction was not required under the Ottawa Agreement. Examples are fruit pulp, pig iron, rice, hard soap, glue, gelatine and size. The preference on light wine was increased from 4s. per gallon to 10s. per gallon.

11. Tariff Board.—The Tariff Board Act 1921-1947 provides for the appointment of a Tariff Board consisting of four members, one of whom shall be an administrative officer of the Department of Trade and Customs. This member may be appointed Chairman of the Board. Members of the Board are appointed for a term of not less than one year nor more than three years, and two members may be appointed as a Committee for making special inquiries. The purpose of the Tariff Board is to assist the Minister in the administration of matters relating to trade and customs. The more important matters which the Minister shall refer to the Board for inquiry and report include disputes arising out of the interpretation of any Customs or Excise Tariff; the necessity for new, increased or reduced duties; the necessity for granting bonuses; any proposal for the application of the British Preferential Tariff to any part of the British Dominion or any foreign country; and any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff by charging unnecessarily high prices for his goods or acting in restraint of trade. The Minister may refer to the Board for inquiry and report the following matters:—the classification of goods under items of the Tariff that provide for admission under By-laws; the determination of the value of goods for duty; the general effect of the working of the Customs Tariff and the Excise Tariff; the fiscal and industrial effects of the Customs laws of the Commonwealth; the incidence between the rates of duty on raw materials and on finished or partly finished products; and any other matter affecting the encouragement of primary and secondary industries in relation to the Tariff.

Inquiries conducted by the Board relating to any revision of the Tariff, any proposal for a bounty, or any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff shall be held in public, and evidence in such inquiries shall be taken in public on oath, unless any witness objects to giving any evidence in public which the Board is satisfied is of a confidential nature, when the Board may take such evidence in private. Evidence taken by the Board in connexion with any inquiry under the Customs Tariff (Industries Preservation) Act 1921-1936 shall be taken in public on oath.

The annual report of the Tariff Board for 1947-48 stated that during the year public inquiries were held on the following subjects:—

Spectacle frames and mountings, motor vehicle bodies and pressed panels, truck cabs, surgical instruments, metal-working chucks, acetylene black, hand and breast drills and carpenters' braces, moulders' chaplets and pipe nails, aviation spark plugs, axes, adzes, hatchets and sledge hammers, kit-bag frames, felt for the manufacture of tennis balls, long handled pruning shears, bicarbonate of soda, gloves, vacuum cleaners, switchgear, wire netting, tractors and plastics and materials therefor.

During the year 1947-48 twenty-four reports were furnished to the Minister for Trade and Customs. Nineteen reports were the result of public inquiry, three related to the question of the operation of deferred rates of duty and one on questions of Tariff classification.

Fifteen references from the Minister for Trade and Customs were on hand on 1st July, 1948.

12. Trade Descriptions.—The Commerce (Trade Descriptions) Act 1905 as amended by the Acts of 1926, 1930 and 1933 gives power to compel the placing of a proper description on certain prescribed goods, or on packages containing the same, being imports or exports of the Commonwealth. The goods to which a trade description must be applied are:—(a) Articles used for food or drink by man, or used in the manufacture or preparation of articles used for food or drink by man; (b) medicines or medicinal preparations for internal or external use; (c) manures; (d) apparel (including boots and shoes) and the materials from which apparel is manufactured; (e) jewellery; (f) seeds and plants; and (g) brushware.

13. Acts Passed in 1947 and 1948.—The following Commonwealth Acts relating to Australian production and trade were assented to during the years 1947 and 1948 :—

ACTS PASSED IN 1947.

- Customs Tariff Validation Act No. 7 of 1947. An Act to provide for the validation of Collections of Duties of Customs under Customs Tariff Proposals.
- Customs Tariff (Southern Rhodesian Preference) Validation Act No. 8 of 1947. An Act to provide for the Validation of Collections of Duties of Customs under Customs Tariff (Southern Rhodesian Preference) Proposals.
- Excise Tariff Validation Act No. 9 of 1947. An Act to provide for the Validation of Collections of Duties of Excise under Excise Tariff Proposals.
- Gift Duty Assessment Act No. 14 of 1947. An Act to amend the Gift Duty Assessment Act 1941-1942.
- Gift Duty Act No. 15 of 1947. An Act to amend the Gift Duty Act 1941.
- Beer Excise Act No. 20 of 1947. An Act to amend the Beer Excise Act 1901-1928.
- Wine Export Bounty Act No. 42 of 1947. An Act to provide for the payment of Bounty on the export of certain fortified wine and for other purposes.
- Apple and Pear Export Charges Act No. 45 of 1947. An Act to amend section four of the Apple and Pear Export Charges Act 1938.
- Dairy Produce Export Control Act No. 53 of 1947. An Act to amend the Dairy Produce Export Control Act 1924-1942.
- Customs Act No. 54 of 1947. An Act to amend the Customs Act 1901-1936.
- New Zealand Re-exports Act No. 55 of 1947. An Act to amend the New Zealand Re-exports Act 1924.
- Trading with the Enemy Act No. 75 of 1947. An Act to amend the Trading with the Enemy Act 1939-1940 and for other purposes.
- Egg Export Control Act No. 76 of 1947. An Act relating to the export of eggs.
- Egg Export Charges Act No. 77 of 1947. An Act to impose charges upon the export of eggs.
- Beer Excise (No. 2) Act No. 85 of 1947. An Act to amend the Beer Excise Act 1901-1928 as amended by the Beer Excise Act 1947.
- Excise Act No. 88 of 1947. An Act to amend the Excise Act 1901-1942.

ACTS PASSED IN 1948.

- Customs Tariff Act No. 1 of 1948. An Act relating to Duties of Customs.
- Customs Tariff (Southern Rhodesian Preference) Act No. 2 of 1948. An Act to amend the Customs Tariff (Southern Rhodesian Preference) 1941.
- Excise Tariff Act No. 3 of 1948. An Act relating to Duties of Excise.
- Excise Tariff (No. 2) Act No. 4 of 1948. An Act relating to Duties of Excise.
- Customs Tariff (No. 2) Act No. 5 of 1948. An Act relating to Duties of Customs.
- Customs Tariff (New Zealand Preference) Act No. 6 of 1948. An Act to amend the Customs Tariff (New Zealand Preference) 1933-1934.
- Customs Tariff (Canadian Preference) Act No. 7 of 1948. An Act to amend the Customs Tariff (Canadian Preference) 1934-1939.
- Customs Tariff (Exchange Adjustment) Act Repeal Act No. 8 of 1948. An Act to repeal certain Acts relating to Adjustments in Duties of Customs.
- Customs Tariff (No. 3) Act No. 9 of 1948. An Act relating to Duties of Customs.
- Customs Tariff (New Zealand Preference) (No. 2) Act No. 10 of 1948. An Act to amend the Customs Tariff (New Zealand Preference) 1933-1934 as amended by the Customs Tariff (New Zealand Preference) 1948.
- Customs Tariff (Canadian Preference) (No. 2) Act No. 11 of 1948. An Act to amend the Customs Tariff (Canadian Preference) 1934-1939 as amended by the Customs Tariff (Canadian Preference) 1948.
- Customs Tariff (No. 4) Act. An Act relating to Duties of Customs.
- Customs Tariff (Canadian Preference) (No. 3) Act No. 13 of 1948. An Act to amend the Customs Tariff (Canadian Preference) 1934-1939 as amended by the Customs Tariff (Canadian Preference) 1948 and by the Customs Tariff (Canadian Preference) (No. 2) 1948.

Excise Tariff (No. 3) Act (No. 14) of 1948. An Act relating to Duties of Excise. Customs Tariff Validation Act No. 24 of 1948. An Act to provide for the Validation of Collections of Duties of Customs under Customs Tariff Proposals.

Excise Tariff Validation Act No. 25 of 1948. An Act to provide for the Validation of Collections of Duties of Excise under Excise Tariff Proposals.

Primary Produce Export Charges Repeal Act No. 28 of 1948. An Act to repeal the Primary Produce Export Organization Act 1935 and the Primary Produce Export Charges Act 1935-1938 and for other purposes.

Wheat Export Charge Act No. 49 of 1948. An Act to impose a charge on wheat and wheat products exported from the Commonwealth.

Egg Export Control Act No. 63 of 1948. An Act to amend the Egg Export Control Act 1947.

Customs Tariff (No. 5) Act No. 92 of 1948. An Act relating to Duties of Customs.

Excise Tariff (No. 4) Act No. 93 of 1948. An Act relating to Duties of Excise.

§ 3. Lend-Lease and Mutual Aid between Australia and the United States.

Particulars of Lend-Lease and Mutual Aid between Australia and the United States of America are given in detail in Official Year Book, No. 36, pp. 331-6 and the Terms of Settlement are referred to in Official Year Book No. 37, pp. 393-4.

§ 4. Mutual Aid between Canada and Australia.

Particulars of the arrangements whereby assistance was given by Canada to Australia during the war years, under the terms of the Canadian Mutual Aid Act, are given in detail in Official Year Book No. 36, pp. 336-8 while the termination of Canadian Mutual Aid is dealt with in Official Year Book No. 37, pp. 394-5.

§ 5. Trade Commissioner Service.

Empire and foreign countries have deemed it necessary in their trade interests to establish generous overseas representation and have for many years maintained extensive overseas trade services.

Prior to 1920, Australian representation abroad was limited to the High Commissioner's Office, in London, with a subsidiary agent in Paris, and the Office of the Commissioner-General for Australia in New York. Apart from the facilities afforded by those offices, the only form of overseas trade representation available to Australia was that of the British Overseas Trade Service, a service whose activities are naturally more particularly devoted to the development of United Kingdom rather than Dominion trade.

The growing importance of Australia's trade with Canada led to the appointment in 1929 of an Australian Trade Commissioner in that country. The part played by that official in the subsequent negotiation of the Trade Agreement with Canada, in the cultivation of close and cordial relations with the Canadian authorities, and in general in focussing interest on Australia and Australian products, amply demonstrated the value of such appointments both to the Commonwealth Government and the Australian trading community.

The general advantages to be derived from the appointment of Trade Commissioners may be briefly stated as follows :—(a) fostering of goodwill, (b) correction and avoidance of misunderstandings, and (c) dissemination of knowledge concerning the respective countries. Particular facilities which they are able to afford to the trading community are (a) information as to present and prospective demand for goods, (b) information as to foreign and local competition, (c) advice as to best selling methods, (d) reports as to the standing of foreign buyers, (e) specification of articles in demand, (f) dealing with trade inquiries, (g) advice and assistance to commercial visitors regarding trade matters,

(h) settlement of difficulties between exporters in Australia and buyers abroad, and
 (i) furnishing of information as to foreign import requirements, customs duties, trade regulations, etc.

In addition to the foregoing particular trading functions, it is the duty of a Trade Commissioner to watch and advise the Government regarding any developments in his Territory affecting not only trade and commerce, but any other matters of concern to his home Government.

Trade Commissioners are drawn either from the commercial world or from the ranks of the Public Service as circumstances dictate. With each Trade Commissioner, however, it is customary to provide an Assistant Trade Commissioner, who is selected to undergo training in the service and qualify at a later stage for appointment as a Trade Commissioner. The staffing arrangements are in this way designed to enable the Government to avail itself of the best procurable executives of either the Public Service or the commercial world and at the same time to build up a first class personnel to carry out a vigorous policy of expansion in connexion with Australia's overseas trade.

The overseas trade representation is shown in Chapter XXVIII.—“Miscellaneous”.

§ 6. Method of Recording Imports and Exports.

1. **Value of Imports.**—The recorded value of goods imported from countries beyond Australia as shown in the following tables represents the amount on which duty is payable or would be payable if the duty were charged *ad valorem*. By Act No. 54 of 1947, which operated from 15th November, 1947, the Customs Act was amended to provide that the value for duty of goods imported into Australia should be the f.o.b. value in Australian currency instead of the British currency f.o.b. value plus 10 per cent.

Section 154 (1) of the Customs Act 1901-1947 provides that “when any duty is imposed according to value, the value for duty shall be the sum of the following:—

- (a) (i) the actual money price paid or to be paid for the goods by the Australian importer plus any special deduction, or
- (ii) the current domestic value of the goods, whichever is the higher ;
- (b) all charges payable or ordinarily payable for placing the goods free on board at the port of export ;

“Current domestic value” is defined as “the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of those goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country”. All import values shown throughout this and other chapters of this issue of the Official Year Book are therefore uniform f.o.b. values in Australian currency.

2. **Value of Exports.**—Prior to 1st July, 1929 the recorded value of all goods exported was taken as representing the value in the principal markets of Australia in the ordinary commercial acceptance of the term. Owing to the inflated values arbitrarily allotted in recent years to commodities which are subject to governmental control or subsidy, some change in the practice of valuation of exports of such commodities became desirable. Accordingly a new basis was adopted, as from 1st July, 1929, for the statistical valuation of exports of sugar, butter and goods on which bounty or rebate was paid, which would show for (a) *Sugar*—the value f.o.b. at which sold to overseas buyers, or a f.o.b. value equal to the London market price if shipped on consignment ; (b) *Goods on which bounty or rebate was paid on export*—the value in the principal markets of Australia in the ordinary commercial acceptance of the term, less the value of any bounty or rebate. Until 31st March, 1934, the basis adopted for the value of exports of *butter* was the current market value, less the amount paid as export bonus. From 31st March, 1934 to 30th June, 1937, the basis was (a) sold in Australia for export—the f.o.b. equivalent of the price at which the butter was sold, and (b) shipped on consignment—the f.o.b. equivalent of the ruling price overseas.

From 1st July, 1930 to 30th June, 1937, the basis adopted for the value of *wool* exported was (a) sold in Australia for export—the actual price paid plus the cost of services incurred in placing the wool on board ship, and (b) shipped on consignment—the f.o.b. equivalent of ruling Australian prices.

From 1st July, 1932 to 30th June, 1937, the basis adopted for the value of *wheat* exported was (a) sold in Australia for export—the f.o.b. equivalent of the price at which the wheat was sold, and (b) shipped on consignment—the f.o.b. equivalent of the current selling price overseas.

From 1st July, 1934 to 30th June, 1937, the basis adopted for the value of *flour* exported was (a) sold in Australia for export—the f.o.b. equivalent of the price at which the flour was sold, and (b) shipped on consignment—the f.o.b. equivalent of ruling Australian prices.

Since 1st July, 1937, the following revised definitions of f.o.b. values have been adopted for exports generally:—

- (1) Goods sold to overseas buyers before export—the f.o.b. equivalent of the price at which the goods were sold (e.g. as regards wool, the actual price paid by the overseas buyer plus the cost of all services incurred by him in placing the wool on board ship).
- (2) Goods shipped on consignment—the Australian f.o.b. equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods were despatched for sale (as regards wool, the f.o.b. equivalent of current price ruling in Australia will normally provide a sufficient approximation to the f.o.b. equivalent of the price ultimately received).

All values to be shown in terms of Australian currency, and to include cost of containers.

3. **Customs Area.**—The Customs Area, to which all overseas trade statistics issued by this Bureau apply, is the whole area of the Commonwealth of Australia, comprising the States of New South Wales (including Australian Capital Territory), Victoria, Queensland, South Australia, Western Australia and Tasmania, and the Northern Territory. Non-contiguous territories and mandated areas are treated as outside countries, and trade transactions between Australia and these non-contiguous territories are part of the overseas trade of Australia. Such transactions are shown separately, i.e., the trade of Australia with each particular country is separately recorded and tabulated.

4. **Statistical Classification of Imports and Exports.**—Statistics of overseas imports and exports from which the summary tables in this issue of the Official Year Book have been extracted were compiled according to a classification which came into operation on 1st July, 1945. The new classification provides for over 2,600 separate import items and 1,100 export items.

5. **The Trade Year.**—From 1st July, 1914 the statistics relating to Oversea Trade have been shown according to the financial year (July to June). Prior to that date the figures related to the calendar year. A table is included in § 18 showing the total value of imports and exports in the calendar years 1939 and 1947 to 1949 inclusive.

6. **Records of Past Years.**—In the years preceding Federation each State independently recorded its trade, and in so doing did not distinguish other Australian States from foreign countries. As the aggregation of the records of the several States is necessarily the only available means of ascertaining the trade of Australia for comparison with later years, it is unfortunate that past records of values and the direction of imports and exports were not on uniform lines. The figures in the following tables for years prior to Federation have been carefully compiled and may be taken as representative of the overseas trade of Australia as a whole. On the introduction of the Customs Act 1901 the methods of recording values were made uniform throughout the States. Prior to 1905 the value of ships imported or exported was not included in the returns of trade.

7. **Ships' Stores.**—Prior to 1906 goods shipped in Australian ports on board overseas vessels as ships' stores were included in the general exports. From 1906, ships' stores have been specially recorded as such, and omitted from the return of exports. A table showing the value of these stores shipped each year since 1938-39 is included in § 12, page 502.

§ 7. Oversea Trade.

1. Total Oversea Trade.—(i) *Including Gold.* The following table shows the total trade (including gold) of Australia with overseas countries from the earliest date for which records are available. To save space, the period 1826 to 1940-41 has been divided into five-yearly periods, and the figures shown represent the annual averages for the periods specified. Figures for individual years were published in earlier issues of the Official Year Book but it should be borne in mind, however, that the figures therein for imports are in British currency. (*See note to following table.*)

In this chapter the values in all tables of Imports and Exports are shown in Australian currency f.o.b.

TOTAL OVERSEA TRADE : AUSTRALIA.
(INCLUDING GOLD.)

							131.6

(a) The figures shown for the years 1826 to 1940-41 represent the annual averages for the periods covered. The trade of the individual years will be found in Official Year Book No. 35 and earlier issues but it should be noted that imports are shown in British currency. From 1914-15 onwards the particulars relate to financial years. (b) Prior to 1906, ships' stores were included in the general exports. For value of such goods shipped on overseas vessels each year since 1938-39 see later table, § 12.

In issues of the Official Year Book prior to No. 23 fluctuations in the value of the overseas trade of Australia for earlier years have been treated in some detail. The enhanced prices ruling for commodities and the peculiar conditions affecting Australian trade were responsible for the high value of imports in the years following the 1914-18 War and these factors should be taken into consideration in making comparisons with earlier years.

In 1924-25 the total value of oversea trade exceeded £300 million for the first time. Of the total value of trade, amounting to £318,454,000, imports represented £157,143,000 and exports £161,311,000. Imports in 1924-25, however, included an exceptionally large quantity of bullion and specie valued at £10,543,000. In the three years ended 1928-29 imports fell but exports were well maintained, but in 1929-30 both imports and exports declined substantially. The full effects of the economic depression are reflected in the greatly diminished trade figures for 1930-31 and some years thereafter. The lowest level was recorded in 1931-32 when the total trade amounted to £137,538,000. Following a gradual improvement in 1933-34 and 1934-35, recovery was more rapid in the three years ended 1937-38, owing generally to higher prices for exports of primary products and the rising flow of imports. In 1937-38, however, export prices fell sharply and declined still further in 1938-39. In 1939-40 the value of trade rose substantially as a result of increases in the value of both imports and exports, but declined again in 1940-41, mainly due to import restrictions and scarcity of shipping.

The outbreak of war in the Pacific in 1941 resulted in an enormous increase in the value of imports during the years 1941-42 to 1945-46. Fluctuating yearly increases in the value of exports were recorded during the same period. During 1946-47 the value of total trade reached the total of £518,514,000, due largely to substantial increases in import and export prices.

Import and export values continued to soar during the following two years. The total value of trade in 1947-48 amounted to £749,700,000 (imports, £339,746,000 and exports, £409,954,000) and in 1948-49 the record total of £961,524,000 was reached, when imports and exports attained the record totals of £415,194,000 and £546,330,000 respectively.

(ii) *Excluding Gold.* The fluctuations in merchandise trade (including silver as merchandise) are shown more clearly in the following table, from which *all* gold movements have been excluded :—

OVERSEA TRADE : AUSTRALIA.
(EXCLUDING GOLD BULLION AND SPECIE.)

Year.	Imports excluding Gold.	Exports excluding Gold.	Total Trade excluding Gold.	Value per Head of Population.			Percentage of Exports on Imports.
				Imports.	Exports.	Total Trade.

2. *Balance of Trade.*—The table on page 479 shows the percentage of exports on imports (including gold) for five-yearly periods from 1826 to 1940-41 and for each year from 1941-42 to 1948-49, while the table above shows the percentage of exports on imports (excluding gold) for each year 1944-45 to 1948-49 compared with 1938-39. Reference to the first-mentioned table shows that subsequent to the five-yearly period 1886-90 the balance of trade, for all periods to 1936-37 to 1940-41, had been on the side

of exports. The position was reversed, however, during the war years 1941-42 to 1944-45 when each year recorded a substantial excess of imports. The post-war years to 1948-49 have again shown record balances in favour of exports.

In the following table the balance of commodity trade, including the value of gold currently produced in Australia, has been separated from the monetary movement of gold :—

COMMODITY BALANCE OF TRADE AND MONETARY MOVEMENT OF GOLD.
(£'000,000.)

Year.	A.	B.	C.	D.	E.	F.	G.
	Total Imports other than Gold (Specie, Bullion and in Matte.)	Total Exports, other than Gold (Specie, Bullion and in Matte.)	Gold produced in Australia. (a) First six months only.

NOTE.—From 1939-40 onward, under contracts with the British Government, Australia received payment for some exportable commodities (e.g., wool, etc.) irrespective of when the goods were shipped. Payments for exportable goods were somewhat larger than the recorded value of exports, and payments relating to the balance of trade were more favorable than is indicated by the figures above which relate only to goods actually shipped.

3. Balance of Payments.—The balance of visible trade, including the net movement of precious metals, does not present a complete picture of Australia's international transactions during each year. Allowance must also be made for unrecorded imports

and exports, for services rendered and received, and for international capital and interest transactions. The values of some of these items are known, and some of those remaining can be estimated with a sufficient measure of accuracy, but for many items it is difficult to make even a rough guess. A continuous investigation is being made into the values of these "invisible" items in the balance of payments.

§ 8. Direction of Oversea Trade.

1. Imports according to Country of Origin.—The following table shows the value of the imports into Australia, during the years 1944-45 to 1948-49 compared with the year 1938-39, of commodities stated to be the produce or manufacture of the undermentioned countries.

AUSTRALIAN IMPORTS: COUNTRIES OF ORIGIN. (EXCLUDING GOLD BULLION, SPECIE AND IN MATTE.) (£'000.)

2. **Percentage of Imports from Various Countries.**—In view of the fluctuations in the total values of imports, it is somewhat difficult to ascertain from the preceding table the relative importance of the various countries in the import trade of Australia. A better idea of the proportions of imports supplied by the various countries may be obtained from the following table of percentages.

AUSTRALIAN IMPORTS : PERCENTAGES FROM COUNTRIES OF ORIGIN.

(EXCLUDING GOLD BULLION, SPECIE AND IN MATTE.)

(Per Cent.)

4. **Percentage of Exports to Various Countries.**—The relative importance of various countries as markets for Australian produce is shown by the following table of percentages. Exports to the United Kingdom totalled 42.39 per cent. of the total in 1948-49 and all British countries 62.11 per cent., compared with 54.45 per cent. and 69.51 per cent. respectively during 1938-39.

Foreign countries absorbed 37.89 per cent. of the total exports during 1948-49 compared with 30.49 per cent. during the year 1938-39.

(a) Excludes outside packages.

NOTE.—Minus sign (—) indicates excess of imports.

The balance of trade with single countries is of little significance, since in the first place there is still a fair proportion of Australian produce distributed through the United Kingdom either immediately, by transshipment or re-sale, or ultimately, by incorporation in manufactures. Further, in very many cases international balances are equated directly by services or indirectly by exchange of goods between several countries.

§ 9. Classified Summary of Australian Oversea Trade with the United Kingdom.

1. Imports.—The following table shows, according to statistical classes, the value of imports into Australia of United Kingdom origin during the years 1944-45 to 1948-49 compared with the year 1938-39.

IMPORTS INTO AUSTRALIA OF UNITED KINGDOM ORIGIN : CLASSES.

Total, Specie and Bullion ..	3,537,036	2,916,891	1,761,502	1,142,427	1,660,874	1,138,410
Grand Total ..	116,754,029	215,007,629	178,857,096	209,484,823	339,746,128	415,194,200

8. Imports and Net Customs Revenue.—The percentage of net Customs revenue collected on the total value of all merchandise imported in each year was as follows:—1938-39, 21.9 per cent.; 1944-45, 8.0 per cent.; 1945-46, 12.7 per cent.; 1946-47, 17.1 per cent.; 1947-48, 14.9 per cent.; and 1948-49, 14.0 per cent. Primage duty was in force during these years and adding this to net Customs revenue, the percentages were as follows:—1938-39, 25.0 per cent.; 1944-45, 8.9 per cent.; 1945-46, 14.3 per cent.; 1946-47, 19.8 per cent.; 1947-48, 17.0 per cent.; and 1948-49, 15.3 per cent. The percentages of net Customs revenue, omitting primage, on the total value of dutiable goods only were—1938-39, 37.1 per cent.; 1944-45, 41.1 per cent.; 1945-46, 38.4 per cent.; 1946-47, 32.3 per cent.; 1947-48, 26.0 per cent.; and 1948-49, 24.7 per cent. The calculations are based on Australian currency values and on the assumption that the value of clearances approximated to the value of imports during the same period.

9. Protective and Revenue Customs Duties.—The value of goods cleared for Australian consumption classified under protective and revenue duties and the gross duty collected are shown in respect of the United Kingdom and other countries for each of the years 1937-38 to 1939-40 in Official Year Book No. 37, page 418. Information for a later year is not yet available

§ 12. Ships' Stores.

Prior to 1906, goods shipped in Australian ports on board oversea vessels as ships' stores were included in the general exports. From 1906, ships' stores have been specially recorded as such, and have been omitted from the export figures. The value of these

3316.—16

stores shipped each year during the period 1940-41 to 1948-49, compared with 1938-39, with fuel oils separate, is shown in the following table :—

VALUE OF STORES SHIPPED ON OVERSEA VESSELS : AUSTRALIA.
(£.)

Period.	Fuel Oils.	All Stores (including Fuel Oils).	Period.	Fuel Oils.	All Stores (including Fuel Oils).
1938-39 ..	606,515	2,105,619	1944-45 ..	8,229,307	11,373,252
1940-41 ..	1,674,133	3,528,555	1945-46 ..	2,849,156	6,331,657
1941-42 ..	3,395,337	5,791,983	1946-47 ..	1,684,502	4,500,509
1942-43 ..	3,833,414	6,016,334	1947-48 ..	2,551,736	5,500,945
1943-44 ..	6,078,800	8,478,714	1948-49 ..	3,830,986	7,814,722

In addition to fuel oils, the principal items of ships' stores supplied to oversea vessels in 1948-49 were—Bunker coal, £836,117; meats, £878,934; tobacco and cigarettes, £56,735; vegetables £115,809; ale, beer and porter, £74,281; butter, £123,088; fish, £139,783; and oils other than fuel, £163,794.

§ 13. Movement of Specie and Bullion.

1. Imports and Exports.—The following tables show the values of gold and silver specie and bullion, and of bronze specie imported into and exported from Australia during the years 1938-39 and 1944-45 to 1948-49.

§ 14. Exports according to Industries.

1. **Classification.**—The following table provides an analysis of the exports of Australian produce, according to the main classes of industry in which the goods were produced, for the years 1947-48 and 1948-49 in comparison with those for the years 1913 and 1938-39. The index-number based on the year 1913 shows the variations in the total recorded value only of exports in each industrial group, and has not been adjusted either for price-changes or in accordance with the variation of the Australian £ in relation to sterling.

A graph is published on page 500 of this chapter which shows the value of exports of Australian produce according to industrial groups from 1920-21 onward.

EXPORTS OF AUSTRALIAN PRODUCE ACCORDING TO INDUSTRIAL ORIGIN : VALUE.

Industrial Group.	1913.(a)		1938-39.		1947-48.		1948-49.

(a) Base year.

(b) Australian production of gold substituted for exports of gold each year.

2. **Relative Importance of Industrial Groups.**—In the previous table the value of commodities in each industrial group of exports of Australian produce is that recorded at date of shipment from Australia, with the exception that the value of the production of gold in Australia in each year has been substituted in the Mines and Quarries group for actual shipments of gold in each year. This has been done to eliminate the exports of gold for monetary purposes. In order of importance the pastoral group occupied the highest place, representing in 1913, 51.1 per cent. of the total exports, as compared with 43.7 per cent. in 1938–39, 44.6 per cent. in 1947–48, and 50.0 per cent. in 1948–49.

Exports of agricultural produce rank next in importance. From 13.0 per cent. of the total exports in 1913, agricultural produce increased to 19.5 per cent. in 1938–39. After declining to 16.2 per cent. in 1946–47, it rose again in 1947–48 to 30.0 per cent., but declined in 1948–49 to 27.6 per cent.

According to value, exports of dairy and farmyard produce increased from 4.7 per cent. in 1913 to 11.6 per cent. in 1938–39, but declined to 8.3 per cent. in 1947–48 and to 8.0 per cent. in 1948–49. Though the products of mines and quarries declined seriously subsequently to the year 1913, a recovery was made in later years, the figures for 1938–39 representing 17.7 per cent., but in 1947–48 and 1948–49 the percentages were only 7.2 and 6.9 respectively. The manufacturing groups of exports, which represented 2.8 per cent. in 1913, had increased to 6.4 per cent. in 1938–39 and to 15.7 per cent. in 1945–46. In 1947–48 it was 9.4 per cent. and in 1948–49 7.3 per cent.

3. **Australian Production and Exports according to Industry.**—The following table shows the total values of Australian production and Australian exports during the period of ten years 1938–39 to 1947–48, classified according to industries; the proportion of each industrial group to total production and to total exports; and in the last column the percentage exported of the production of each industrial group:—

VALUE OF AUSTRALIAN PRODUCTION AND EXPORTS, ACCORDING TO
INDUSTRY : 1938–39 TO 1947–48.

Industrial Group.	Value of Production during Ten Years.	Percentage on Total Production.	Value of Exports during Ten Years.	Percentage on Total Exports.	Percentage Exported of the Production in each Industrial Group.
	£'000.	%	£'000.	%	%
Agriculture	1,209,249	17.04	377,741	18.99	31.24
Pastoral	1,325,168	18.67	912,789	45.90	68.88
Dairy and Farmyard ..	755,550	10.65	184,834	9.29	24.46
Mining	381,868	5.38	213,960	10.76	56.03
Forestry and Fisheries ..	214,791	3.03	10,968	0.55	5.11
Total, Primary Produce..	3,886,626	54.77	1,700,292	85.49	43.75
Manufacturing	3,210,324	45.23	288,566	14.51	(a) 8.99
Total	7,096,950	100.00	1,988,858	100.00	28.02

(a) See letterpress in the concluding paragraph of this section.

The figures relating to value of production and value of exports are subject to the qualifications mentioned previously. A period of ten years is embraced, and the values of production and of exports therein give a very fair index of the relative importance of the several industrial groups.

The total exports of gold bullion and specie are not included in the value of exports of the mining industry, the actual production of gold during the period being taken.

On account of the inherent difficulties of classifying production and exports by industries, the figures shown for the manufacturing industry should not be interpreted too literally. In the first place, the value of manufacturing "production" stated is not the total value of output, but only the "value added" by manufacturing processes, while the value of manufactured exports represents the total value of the goods, including raw materials, etc. Secondly, some of the exported goods classified as primary produce have been increased in value by manufacturing processes, but have not been changed in form sufficiently to warrant their inclusion as manufactured products, e.g., flour, butter and sugar.

§ 15. Australian Index of Export Prices.

1. *The Old Annual Series.*—With the exception of a few years after 1929–30 an annual index of export prices has been published by this Bureau since its inception. An index was at first obtained by valuing the exports (other than gold) of each successive year at the prices of 1901, and dividing the values so obtained into the export values actually recorded. These computations were carried back to 1901. In 1918 the procedure was changed and brought into harmony with the methods adopted by the Bureau for constructing other price indexes. The average quantities of the principal exports (other than gold) for the nineteen and a half years from 1st January, 1897 to 30th June, 1916 were taken, and valued at the prices of each successive year. Comparisons of the resulting totals for different years were assumed to give the required comparisons of export price-levels for those years. The two methods would, however, give the same results only if the proportion of different exports for each year in question was the same as the average for the nineteen and a half years. The proportion was, in fact, varying appreciably from year to year with the seasons. The old index, therefore, was based on a different system of weighting in each year, so that the results were not comparable for different years. The new method gave comparable and satisfactory results so long as the proportion of different exports was not widely different from the average of 1897 to 1916. After the 1914–18 War, however, the relative importance of different exports changed considerably. By about 1930 it began to appear that the change was great enough to throw some doubt on the accuracy of the index. It was published with increasing reluctance until 1929–30, after which it was withdrawn from publication.

Following that year endeavours were made to design and compile new series of index-numbers which would reflect more accurately the short- and intermediate-period fluctuations in export prices.

2. *The New Monthly Series.*—An attempt was made to overcome some of the difficulties occasioned by variations in the proportions of the different exports by compiling two separate series of monthly index-numbers. The first series was compiled in very much the same way as the old annual index-numbers, although certain important changes have been made in the data utilized. These are described below. For the present it may be noted that the purpose of this index is to provide comparisons, over a limited number of years, of the level of prices of those commodities normally exported from Australia, making no allowance for any benefit or disadvantage accruing from variations during the period in the relative proportions of the different kinds of exports. It is thus an index purely of price changes. The second series was designed for shorter-period comparisons—from one or more months of the current year to the corresponding months of the previous year. The latter is compiled in such a way as to take closer account

of the actual quantities of each article exported at current prices : and hence to indicate with rather greater accuracy the extent to which price-movements have affected the actual value of our current exports. It will be clear, therefore, that the two series are designed to measure different things, any differences between the results being explicable on wider grounds than mere differences in formulae.

Reference has already been made to the fact that the data on which the new series are based differ from those utilized in the old series of annual index-numbers. These changes apply to both of the new series.

The most important change was the use of actual (or calculated) export parities, based on actual price quotations, in place of the "unit-values" declared at the Customs. Declared unit values are not satisfactory even in an annual index-number, partly because the returns are not always sufficiently accurate, and partly because there is a constant variation in the proportions of different grades and qualities included in the actual exports of any given period. An obvious example of the latter type of inaccuracy is furnished by the case of wool, the poorer grades of which are shipped during certain months of the off-season. In a monthly series of index-numbers, declared unit-values are even less satisfactory, as the difficulties are greatly magnified over short periods, during which the inaccuracies have little chance of averaging out.

Moreover, the export parities have in all cases been based on prices f.o.b. Australian ports. Where freight and selling charges form an appreciable percentage of the selling price, the use of unadjusted oversea quotations results in some distortion of the amplitude of the percentage fluctuations in prices.

The old index took no account of gold exports. The omission is natural and reasonable for countries which produce little or no gold. For gold-producing countries, although some exports of gold would be irrelevant (e.g., the Australian shipments of gold reserves during the depression), the exports of newly-produced gold should be taken into account. In the new series, therefore, gold is included, but the weight given to it is not the quantity exported but the quantity produced.

Each series of index-numbers takes account of 20 items, which constitute about 80 per cent. of the total value of exports of merchandise and silver, and gold production.

3. Monthly Index (Fixed Weights).—The original "quantity multipliers" used for the first series of index-numbers were, in round figures, the average annual exports (or production, in the case of gold) during the five years 1928–29 to 1932–33. This period was chosen some time ago as being fairly representative of the mutual relationship of the different export commodities over the period from 1928 to 1933 and, so far as it was possible to judge at the time, over the ensuing few years. As from July, 1936, the "multipliers" were revised to bring them into accord with observed changes in the composition of Australian exports, and are now based on the average annual exports (production in the case of gold) during the three years 1933–34 to 1935–36. The break of continuity has been bridged by the usual method of splicing.

The twenty items, together with the units of quantity and the "quantity multipliers", are given in the following table. It should be noted that (i) the "multiplier" allotted to wheat has been increased to take into account the "wheat equivalent" of flour exported; (ii) that allotted to greasy wool has been increased to take into account the "greasy equivalent" of scoured wool, tops and wool on skins; and (iii) those allotted to metals have been increased to take into account the metallic contents of ores and concentrates exported. This is the only satisfactory method of dealing with these commodities, for which it is not possible to secure satisfactory export price quotations in their own right.

(a) Includes "wheat equivalent" of flour.

The percentage distributions of the "Aggregative Values" shown in Columns 4 to 7 of the foregoing table are of importance, firstly, as showing their variations from time to time as the result of differential price movements as between the various commodities, and secondly, as regards the effect on the indexes as a whole of the percentage price variations in each commodity. The percentage distribution of the base period of the index (1936-37 to 1938-39) only concerns this second aspect, that is, those of Columns 4 and 5, since they indicate the percentage proportions contributed by each commodity to the total percentage movement of the indexes as a whole. Thus, if the price of wool increased by 5 per cent., its contribution would be $5 \times .4905$, or 2.45 per cent. to the index as a whole (excluding gold), and $5 \times .4563$, or 2.28 per cent. to the total index (including gold)—and similarly for any other commodity or group of commodities. The percentage distributions of Columns 6 and 7, on the other hand, would only become of significance from this aspect if the year 1948-49 were chosen at any time as a new base period for the index.

The following table shows export price index-numbers for Australia for individual commodities, groups of commodities, and all groups combined for the financial years 1936-37 to 1938-39 and 1942-43 to 1948-49 and monthly for the years 1947-48 and 1948-49. For convenience of reference, the percentage distributions of the "Aggregative Values" of the base period referred to above are repeated at the head of this table.

All export parities are calculated from price quotations from the most reliable and representative sources available. In most cases the prices used are those at which current sales are being effected. For some metals, however, the prices are the average value of current realizations in various markets and hence show some irregularity.

In respect of wheat, during 1948 it became impossible to determine "prices at which current sales are being effected" because a very large proportion of exportable wheat was being sold forward on long-term contracts and at widely differing prices. In August,

1949 export sales of wheat became subject to the International Wheat Agreement, under which maximum and minimum export prices are fixed for a specified quota of wheat. Wheat in excess of the quota is sold on the open market at contract prices. A new series of wheat prices was introduced into the index in June, 1948 to meet the effect of the practice of selling on contract. This is based on average actual realizations for current shipments and, for comparability, the price index of wheat and the aggregate index were revised on this basis as from July, 1945. Prices realized for wheat shipped between November, 1948 and June, 1949 have now been adjusted in accordance with the terms of the relevant contract with the United Kingdom Government and the index accordingly revised. Immediately prior to devaluation of the £ on 19th September, 1949, the Australian equivalent of the maximum prices for International Wheat Agreement wheat was 11s. 2d. per bushel. This maximum then rose to 16s. 1d., but this change and the corresponding change in the price of other wheat has as yet had little effect on realizations for current shipments.

In respect of wool, "price at which current sales are being effected" can be determined during the selling season, but complexity of the market due to great diversity of types renders it difficult to obtain precision and recent prices are subject to possible revision, but this will not affect either trend or level of the index appreciably.

EXPORT PRICE INDEXES: AUSTRALIA.

SIMPLE AGGREGATIVE INDEX: FIXED WEIGHTS.

(a) Non-Ferrous—silver, copper, tin, spelter, lead. (b) Beef, lamb, mutton, pork. (c) Sultanas, tlexias, currants. (d) Cattle hides, calf skins. (e) Percentage distribution of base aggregate for "All Groups (including Gold)"—applicable from 1936-37. (f) Percentage distribution of base aggregate for "All Groups (excluding Gold)"—applicable from 1936-37.

4. **Monthly Index (Changing Weights).**—The second series of the new index-numbers is designed merely for comparisons with the corresponding month, or period of months, of the previous year. The same price quotations are used, but the "multipliers" are much more closely in accord with the actual experience of the periods in question.

For any given month, the procedure is to multiply the price of each commodity in that month, and its price in the corresponding month of the previous year, by the quantity exported during the given month. A comparison of the resulting aggregates gives one possible measure of the change in prices over the period; i.e., the change assuming that the proportions of the different kinds of exports whose prices are to be measured were the same as their proportions in the given month. Another possible measure is given by assuming that the proportions of the different kinds of exports in the given month had been the same as their proportions in the corresponding month of the previous year. Accordingly the first step in the procedure is repeated, substituting the quantities exported during the corresponding month of the previous year.

The index-numbers so obtained have been proved over a period of years to lie very close together. As it is convenient for practical reasons to have one single figure rather than two close alternatives the two index-numbers are multiplied together and the square root of the product extracted. This is taken to be the index-number for the month, the prices of the corresponding month of the previous year being taken as base.

The index-numbers for two or more months of one year, as compared with the corresponding period of the previous year, are computed in very much the same way. The process merely involves the cumulative addition of the aggregates computed for the individual months, and extraction of the index-numbers as explained above.

Index numbers computed on this basis are shown in the following table for the years 1947-48 and 1948-49:—

MONTHLY EXPORT PRICE INDEX (CHANGING WEIGHTS): AUSTRALIA.
(Base: Weighted Average Price Level in corresponding months of preceding year = 1,000.)

Month.	1947-48.		1948-49.	
	Month stated compared with same month of preceding year	Period of trade year ending in month stated compared with same period of preceding year.	Month stated compared with same month of preceding year.	Period of trade year ending in month stated compared with same period of preceding year

May	1,487	1,480	963	1,178
June	1,532	1,493	912	1,149

Monthly export price index-numbers are issued in regular press notices, in the *Monthly Review of Business Statistics* and in the *Quarterly Summary of Australian Statistics*.

§ 16. External Trade of Australia and other Countries.

1. **Essentials of Comparisons.**—Direct comparisons of the external trade of any two countries are possible only when the general conditions prevailing therein, and the system of record, are more or less identical. For example, in regard to the mere matter of record, it may be observed that in one country the value of imports may be the value at the port of shipment, while in another the cost of freight, insurance and charges may be added thereto. Again, the values of imports and exports in the one may be declared by merchants, whereas in the other they may be the official prices fixed from time to time by a commission constituted for the purpose. In later years, moreover, a very substantial

difference in the value of imports would rise from the different methods of converting the moneys of foreign countries, i.e., from the application of current rates of exchange or of the mint par. Lastly, the figures relating to the external trade of any country are also affected in varying degree by the extent to which they include transit or re-export trade. This class of trade represents a much greater proportion of the trade of Switzerland and Belgium than that of other countries. France and the United Kingdom also re-export largely, whereas in Canada, Australia and New Zealand the same class of trade represents a comparatively small proportion of the total trade.

2. "Special Trade" of Various Countries.—Special trade may be defined according to the interpretation of the British Board of Trade, as (a) imports entered for consumption in the country (as distinguished from imports for transhipment or re-export), and (b) exports of domestic products.

In the following table the figures, which represent Australian currency values, relate as nearly as possible to imports entered for consumption in the various countries specified, and to exports of their domestic products. It is to be noted, however, that these figures do not invariably denote the same thing throughout, since, in the United Kingdom and other manufacturing countries, raw or partly manufactured materials are imported as for home consumption, and, after undergoing some process of manufacture or further modification, are re-exported as domestic production. Nevertheless, a comparison of this character reveals approximately the extent of the external trade which otherwise would not be manifest. The latest figures relating to foreign countries have been extracted from the publications of the United Nations and converted to Australian currency.

§ 17. Trade of the United Kingdom with Australia compared with that of Competing Countries.

Proportion of Trade from United Kingdom and Competing Countries.—Since 1903 permanent resident Commissioners appointed by the British Board of Trade have been located in Australia for the purpose of advising manufacturers and merchants in the United Kingdom with regard to Australian trade affairs. From 8th August, 1907, the Commonwealth Customs Tariffs have provided preferential rates of Customs Duties on certain goods the produce or manufacture of the United Kingdom with the object of assisting the British manufacturer to retain or improve his position in this market in relation to other countries. The main provisions in these Acts relating to preference are dealt with on previous pages in this Chapter.

In an investigation into the relative position occupied by the United Kingdom in the import trade of Australia, the comparison must, of course, be restricted to those classes of goods which are produced or manufactured in the United Kingdom. The imports into Australia include many commodities, such as tea, rice, raw coffee, unmanufactured tobacco, petroleum products, copra, timber, etc., which the United Kingdom could not supply. These items, in addition to others not available from that country, have, therefore, been omitted from the computation following.

The imports into Australia have been classified under nine headings, and the trade of the United Kingdom therein is compared with that of France, Germany, Japan, and the United States of America. These countries have been selected as the principal competitors in normal times with the United Kingdom for the trade of Australia under the specified headings. Totals for the years 1913, 1938-39, 1947-48 and 1948-49 are shown in the following table.

AUSTRALIAN IMPORTS OF PRODUCTS OF VARIOUS COUNTRIES : VALUE.

The total value of the commodities included in the competitive classes increased from £50,135,071 during 1913 to £77,654,086 in 1938-39 and to £237,055,233 in 1947-48. In 1948-49 it had increased to £294,569,582. The principal classes of competitive imports are (a) metals, metal manufactures and machinery (value £128,035,543 in 1948-49) and (b) apparel, textiles and manufactured fibres (value £109,197,688 in 1948-49). The value of goods included in these two groups represented 80.5 per cent. of the total value of competitive commodities during 1948-49.

In 1938-39 the United Kingdom supplied 52.69 per cent. of the total value of competitive goods. In 1913 the corresponding figure was 58.38 per cent. and in 1948-49 64.68 per cent.

The share of Japan in the competitive trade increased in proportion to other countries from 1.24 per cent. in 1913 to 5.02 per cent. in 1938-39. Owing to the effects of war it was reduced to 0.06 per cent. in 1946-47 and in 1948-49 it was 0.32 per cent.

The position of the United States of America in the competitive trade improved from 10.86 per cent. in 1913 to 13.42 per cent. in 1938-39 and to 20.28 per cent. in 1947-48, falling to 9.15 per cent. in 1948-49.

The position of France declined from 3.61 per cent. in 1913 to 1.21 per cent. in 1938-39 and to 1.22 in 1948-49.

The proportion of the competitive imports supplied by Germany was 10.68 per cent. in 1913, and 4.66 per cent. in 1938-39. In consequence of the war, the proportion of imports from Germany during 1948-49 was 0.52 per cent.

§ 18. Oversea Trade in Calendar Years.

For the purpose of comparison with countries which record overseas trade in calendar years the following table has been compiled to show Australian imports and exports for each quarter of the calendar years 1939 and 1947 to 1949 :—

OVERSEA TRADE IN CALENDAR YEARS : AUSTRALIA.

(£'000.)

Year.	Merchandise.		Bullion and Specie.		Total.	
	Imports.	Exports.	Imports.	Exports.	Imports.	Exports.
QUARTER ENDED MARCH.

§ 19. Excise.

Although excise goods have no immediate bearing on overseas trade the rates of excise duty are in some cases related to the import duty on similar goods. Moreover, as the Excise Acts are administered by the Department of Trade and Customs it is convenient to publish here the quantities of Australian produce on which excise duty has been paid. Particulars of Customs and Excise Revenue are shown in Chapter XVII. "Public Finance". The following table shows the quantities of spirits, beer, tobacco, etc., on which excise duty was paid in Australia during the years 1944-45 to 1948-49 as compared with the year 1938-39.

QUANTITIES OF SPIRITS, BEER, TOBACCO, ETC., ON WHICH EXCISE DUTY WAS PAID: AUSTRALIA.

§ 20. Interstate Trade.

Prior to the federation of the Australian Colonies (now States), each Colony published statistics of its trade with the other Colonies. A similar record was continued by the Commonwealth Government under the provisions of the Constitution (Section 93). On the expiry of the "book-keeping" period, these records were discontinued as from 13th September, 1910, and the latest published statements were for the year 1909. Later, the Governments of Western Australia and Tasmania revived the records, and statistics of the subject are available again for those States.

At the Conference of Statisticians held in January, 1928 it was resolved that efforts should be made in other States to record the interstate movement of certain principal commodities.

The Government Statist for South Australia publishes some figures for that State made up from the records of Western Australia and Tasmania, and from various other sources. Since February, 1940, statistics in some detail have been collected by the Government Statistician of Queensland. The statistics of interstate trade for New South Wales and Victoria are very meagre. The Melbourne Harbour Trust publishes, in its annual report, the quantities of various commodities of interstate trade loaded and discharged in the Port of Melbourne. The trade with individual States is not disclosed.

CHAPTER XIII.

POPULATION.

NOTE.—The figures shown throughout this Chapter for the Census of 30th June, 1947 are the final results, and population estimates shown for the intercensal period 1933–47 are revised figures which have been adjusted in accordance with these results.

§ 1. Population Statistics.

Australian population statistics comprise two types—firstly, those derived from Census counts, and, secondly, those derived between Census dates by the application of vital and migration statistics to the numbers recorded at the last Census. These intercensal estimates are subsequently revised in the light of the next Census results.

The results obtained at the Census attain a very high degree of accuracy and may generally be accepted without reservation.

Since the establishment of the Commonwealth Bureau of Census and Statistics attention has been given to the improvement of intercensal estimates. The principal source of error lay in the migration records and efforts were directed towards their improvement. The 1911 Census disclosed an error in the precensal estimates of an amount equal to a percentage on the recorded overseas departures from Australia of 14.5 per cent. for males and 10 per cent. for females. These percentages were used as adjusting factors for recorded overseas departures during the intercensal period 1911–21. These adjusting factors were reduced after the 1921 Census to 1 per cent. for males and 4.5 per cent. for females and were finally discontinued after the 1933 Census. From the results of the 1947 Census it would again appear that the accuracy of the records of overseas migration is such that in future little adjustment to the recorded figures for Australia as a whole will be necessary. It should be noted, however, that as from July, 1922, the figures for overseas migration relate to passenger traffic and do not include crews of overseas vessels.

It is improbable that the same degree of accuracy as has been attained in the record of overseas migration can be reached in the case of interstate movements. Records are made of interstate passengers by sea, by rail, and by air, but it is impracticable to record the movements by road.

§ 2. The Census.

1. *Census-taking.*—Although “musters” of the population were carried out at least annually from 1788 to 1825, the first regular Census in Australia was not taken until 1828 when a count of the population of the Colony of New South Wales was made. Subsequent Censuses were taken sporadically in the various colonies until 1881 when a Census was taken on the same date throughout Australia.

In 1891 and 1901 Census-taking was still in the hands of the Government Statisticians of the States, but, in 1911, under the provisions of the Commonwealth Census and Statistics Act, which provides for the enumeration to be made from one centre instead of by each State as formerly, the Commonwealth Statistician undertook the first Census for the Commonwealth of Australia. The second was taken in 1921.

In accordance with the provisions of the Commonwealth Census and Statistics Act 1905-1920, the third Commonwealth Census would have been taken in 1931, but, owing to the necessity for economy in governmental expenditure, it was decided to defer the Census, and the date was subsequently fixed for 30th June, 1933.

Owing to the 1939-45 War the fourth Census, due to be taken in 1941, was deferred until June, 1947, the Census for the whole of Australia being taken as for the night between 29th and 30th June, 1947.

2. Results of the Censuses.—The results of the Censuses taken over the period 1828 to 1947 are shown in the following table:—

POPULATION : AUSTRALIAN CENSUSES, 1828 TO 1947.

3. Increase since 1881 Census.—(i) *Australia.* The increase of population during the fourteen years between the 1933 Census and the 1947 Census (final count) was 949,519 of which 430,259 were males and 519,260 were females, as compared with an increase of 1,194,105, comprising 604,241 males and 589,864 females, for the preceding intercensal period of 12½ years. The population enumerated at each Census from 1881 to 1947 was as follows :—

POPULATION OF AUSTRALIA AT EACH CENSUS, 1881 TO 1947.

(a) Number of males per 100 females.

(b) Revised figure.

(c) Final count.

(ii) *States and Territories.* The postponement till 1933 and 1947 of the Censuses which ordinarily would have been taken in 1931 and 1941 respectively destroyed the continuity of the decennial intercensal period which had obtained in Australia since 1881. Consequently, with the exception of the figures expressed as percentage increases per annum, which have been included to give a true comparison of the rate of growth during each intercensal period for Australia as a whole, the increases shown in the following table for the periods 1921–33 (12½ years) and 1933–47 (14 years) are not directly comparable with each other nor with the results shown for the earlier periods.

The increases in the population of the several States and Territories during the last six intercensal periods have been as follows :—

POPULATION : INTERCENSAL INCREASES.

(a) Includes Australian Capital Territory.
Wales prior to 1911.

(b) Revised figure.

(c) Part of New South

(d) Based on final count for 1947 Census.

NOTE.—Minus sign (—) denotes decrease.

The numerical increase during the period 1933-47 (14 years) was less by 244,586 than that for the period 1921-33 (12½ years) and the percentage increase declined from 21.97 for 1921-33 to 14.32 for 1933-47. During the earlier period the increase corresponds to 1.63 per cent. per annum, and in the latter to 0.96 per cent. per annum.

§ 3. Distribution and Fluctuation of Population.

1. **Present Numbers.**—The population of Australia on 31st December, 1948, was estimated at 7,794,880 persons of whom 3,910,051, or 50.16 per cent., were males and 3,884,829, or 49.84 per cent., were females. The increase during 1948 was 156,252, equal to 2.05 per cent., males having increased by 81,180, or 2.12 per cent., and females by 75,072, or 1.97 per cent. This increase was due mainly to the excess of births over deaths, namely 101,137, but a net gain by migration of 55,115 persons. was also recorded.

2. **Growth and Distribution.**—The table which follows shows the growth in the population of the various States and Territories at various intervals from 1788 to 1948. Details as to sex for the years 1788 and 1790 are not available.

ESTIMATED POPULATION: 1788 TO 1948.

(a) Previously included with New South Wales. (b) Previously included with South Australia in which Northern Territory was incorporated prior to 1911. (c) Adjusted in accordance with the final results of the Census of 30th June, 1947. (d) Includes all defence personnel enlisted in Australia irrespective of movements subsequent to enlistment.

Estimates of population for intercensal years are obtained by applying the vital and migration statistics for those years to the numbers recorded at the Census. Figures for interstate migration are liable to error owing to the impracticability of tracing movements of motor traffic. The estimates of populations of the Australian Capital Territory and the Northern Territory are particularly affected by this difficulty. In view of the uncertainty of war-time records of interstate migration, the populations of the States subsequent to 30th June, 1943, and until the 1947 Census, were estimated on the basis of natural increase, deaths of defence personnel and oversea migration.

The extent of the unrecorded movement of population during the preceding intercensal period is determined when a Census is taken and it is the custom to adjust these intercensal estimates on the basis of the Census results. Estimates of population previously published for the intercensal period 1933-47 have now been revised in accordance with the final results of the 1947 Census.

The results of the 1947 Census of the Australian Territories will be found in § 11 of this chapter.

A comparison of annual rates of growth of population of Australia and other countries will be found in § 4 par. 4 of this chapter.

The growth of the population of Australia and of each State and Territory thereof is illustrated by the graph accompanying this chapter on page 533.

3. **Mean Population.**—(i) *Method of Calculation.* From 1901 onwards the mean population for any year has been calculated by the formula :—

$$\text{Mean Population} = \frac{a + 4b + 2c + 4d + e}{12}$$

where *a*, *b*, *c*, *d* and *e*, respectively, are the populations at the end of the quarter immediately preceding the year and at the end of each of the four succeeding quarters, e.g., in the case of a calendar year, 31st December of the preceding year and 31st March, 30th June, 30th September and 31st December of the year under consideration. This formula gives a close approximation to the mean of a theoretical population progressing smoothly through the five values *a*, *b*, *c*, *d*, *e*. Prior to 1901 the mean population was calculated only for calendar years and was obtained by taking the arithmetic mean of the populations at the end of the previous year and the year in question.

(ii) *Calendar Years.* The following table shows the mean population, adjusted where applicable in accordance with the final results of the 1947 Census, for each State and Territory for the calendar years 1933 to 1948 :—

MEAN POPULATION : CALENDAR YEARS, 1933 TO 1948.

(a) Includes all defence personnel enlisted in Australia irrespective of movements subsequent to enlistment.

(iii) *Financial Years.* The mean population for financial years is widely used in connexion with rates for those statistics which are tabulated on a financial year basis. The following table shows the mean population, adjusted where applicable in accordance with the final results of the 1947 Census, for each State and Territory for the years ended 30th June, 1934 to 1948:—

MEAN POPULATION : FINANCIAL YEARS, 1933-34 TO 1947-48.

(a) Includes all defence personnel enlisted in Australia irrespective of movements subsequent to enlistment.

4. Proportion of Area and Population, Density and Masculinity.—A previous table showed the estimated number of persons in each of the States and Territories on 31st December, 1948. In the following table the percentages of the total area and of the total population represented by each State or Territory are given, together with the density and the masculinity of population:—

DENSITY AND MASCULINITY OF POPULATION, 1948.

(EXCLUDING FULL-BLOOD ABORIGINALS.)

State or Territory.	Percentage of Total Area.	Percentage of Estimated Population, 31st December, 1948.			Density. (a)	Masculinity. (b)
		Males.	Females.	Persons.		
	%	%	%	%		
New South Wales ..	10.40	39.18	39.39	39.29	9.90	100.11
Victoria ..	2.96	26.61	27.43	27.02	23.97	97.65
Queensland ..	22.54	14.83	14.22	14.53	1.69	104.98

Australia ..	100.00	100.00	100.00	100.00	2.62	100.65

(a) Number of persons per square mile.

(b) Number of males per 100 females.

Additional information regarding density and masculinity of population appears in later sections of this chapter.

5. **Urban and Rural Distribution.**—At the 1947 Census, information was obtained regarding the distribution of the population amongst metropolitan, provincial and rural areas. Metropolitan Divisions relate to the capital cities of the States and adjoining urban municipal areas within boundaries used for Census purposes at the dates of the respective Censuses. At the 1947 Census the Metropolitan Division of Victoria included areas (with a population of 30,490 persons) not included in that division at the 1933 Census when the population was 991,934. No changes occurred in boundaries of Metropolitan Divisions in other States.

Urban Provincial Divisions comprise the capital cities of the Territories and, in States other than Tasmania, cities and towns outside the Metropolitan Divisions which are separately incorporated. In Tasmania, where most of the towns included are not separately incorporated, boundaries were determined for Census purposes. In New South Wales a number of towns which in 1933 were separately incorporated have since been included in shires.

Rural Divisions comprise the remaining portion of each Territory and State and are affected by the intercensal changes in the areas of the Metropolitan and Urban Provincial Divisions. Figures for Rural Divisions represent therefore only a broad general classification based on administrative rather than geographical considerations. For instance, in New South Wales most of the increase in population shown for "Rural Division" was due to abolition of municipalities which in 1933 were classified as Urban Provincial; in Victoria a large part of the decrease in population shown for "Rural Division" was due to transfer in 1947 to the Metropolitan Division of adjoining urban parts of shire area.

Persons on board ships in Australian ports or travelling on long-distance trains or planes throughout Census night were classed as migratory.

The results obtained at the Census for each State and Territory are shown in the following table:—

URBAN AND RURAL POPULATION: 1947 CENSUS.

(EXCLUDING FULL-BLOOD ABORIGINALS.)

NOTE.—Minus sign (—) denotes decrease.

At 30th June, 1947, the Metropolitan Divisions contained 50.72 per cent. of the total population of Australia as compared with 46.87 per cent. at the 1933 Census. Victoria had the largest percentage of population residing in the metropolitan area (59.69) but was closely followed in this respect by South Australia (59.20). During the intercensal period, however, the highest rates of increase in metropolitan population were experienced in Queensland and Western Australia.

A feature of the metropolitan population is its high femininity. In 1933, 52.5 per cent. of the metropolitan population was composed of females; in 1947 the proportion had fallen slightly to 51.9 per cent., being highest in Tasmania at 52.3 per cent.

6. Metropolitan Population : Australia and Other Countries.—In Australia there is an abnormal concentration of population in the capital cities, which are the only cities of outstanding importance in the various States. A comparison with the capitals of the more important countries is given in the following table. There is some doubt as to the comparability of the figures because of the abnormal conditions during the war and immediately following the war.

METROPOLITAN POPULATION : AUSTRALIA AND OTHER COUNTRIES.

State or Country.	Metropolis.	Year.	Metropolitan Population.
New South Wales	Sydney	1947	(a) 1,484,004
Victoria	Melbourne	1947	(a) 1,226,409

(a) From 24th September, 1947, the municipalities of Illawarra North and Wollongong and the shires of Bulli and Illawarra Central were united to form the City of Greater Wollongong. (b) Comprises municipalities of Geelong, Geelong West, and Newtown and Chilwell. (c) Comprises municipalities of Ballarat and Sebastopol. (d) Comprises municipalities of Bendigo and Eaglehawk. (e) Exclusive of urban population in any contiguous shire. (f) Includes Fremantle and suburbs, 27,934.

8. **Provincial Urban Areas.**—In par. 5, pages 525-7, the percentage of the total population of each State which was located in incorporated urban provincial areas at the 1933 and 1947 Census is shown. In the following table, however, the aggregate population at the 1947 Census of all cities and towns, outside the metropolitan area of each State, with 2,000 or more and 3,000 or more inhabitants is shown, irrespective of whether such centres are incorporated separately or not. In addition, the percentage of the aggregate population of these cities and towns to the total population of the State is shown.

AGGREGATE POPULATION OF CITIES AND TOWNS OF SPECIFIED SIZE : 1947 CENSUS.

(a) Greater London civilian population.
(d) Greater Montreal.

(b) Greater Tokyo.

(c) Includes Howrah.

§ 4. Elements of Increase.

1. **Natural Increase.**—(i) *General.* The two factors which contribute to the growth of a population are the "natural increase," i.e., excess of births over deaths, and the "net migration," i.e., the excess of arrivals over departures. In earlier issues of the Official Year Book particulars of the natural increase from 1861 are given for each sex and State (see No. 22, page 899). In the following table particulars for each sex are given in States for each quinquennium from 1901 to 1945 and for the ten years 1939-48. The natural increase for Australia from 1861 to 1948 inclusive was 5,249,367, consisting of 2,444,298 males and 2,805,069 females, and represented 78.95 per cent. of the total increase in population. During the present century the rate of natural increase grew until it reached the maximum rate of 17.44 per thousand of population in 1914, but it steadily declined after that year to 7.07 in 1934. The figure rose to 7.99 per thousand in 1937 following small gains during each of the previous three years, fell slightly to 7.71 in 1939, but rose sharply during the war and in the post-war period, reaching the level of 14.37 in 1947. In 1948 it dropped to 13.12.

It should be particularly noted that from September, 1939, until June, 1947, "natural increase" was regarded as excess of births over civilian deaths, i.e., no account was taken of deaths of defence personnel.

POPULATION: NATURAL INCREASE (EXCESS OF BIRTHS OVER DEATHS),
1901 TO 1948.

POPULATION OF AUSTRALIA, 1840 TO 1948 (RATIO GRAPH).

(See page 523.)

EXPLANATION.—This is a ratio graph, the vertical scale being logarithmic, and the curves rise and fall according to the rate of increase or decrease. Actual numbers are indicated by the scale at the side of the graph. The curves represent the estimated population of each State at 31st December each year.

(a) Excess of births over deaths per 1,000 mean population. (b) Part of New South Wales prior to 1911. (c) Excess of births over civilian deaths per 1,000 mean population from September, 1939, to June, 1947.

NOTE.—Minus sign (—) denotes excess of deaths over births.

The table above shows the decline which has taken place in the rate of natural increase in all States of Australia since the beginning of the century. The decline is evident notwithstanding the stepping-up of the rate occasioned by increased births since the commencement of the 1939-45 War and the overstatement due to the omission of deaths of defence personnel. During the first five years of the present century the average increment to the population of Australia by this means was 56,886 persons per annum. The increment rose to a maximum of 81,693 persons per annum in 1921-25, but thereafter fell to 52,650 persons per annum in the quinquennium 1931-35, increasing during 1936-40 to 54,489. During 1941-45 the average annual excess of births over civilian deaths was 74,750, which rose in 1947 to a record high level of 108,916, falling slightly to 101,137 in 1948.

(ii) *Comparison with other Countries.* Notwithstanding its low birth-rate, Australia has a higher rate of natural increase than most European countries, owing to the fact that its death-rate is very low. The following table gives a comparison between the rates of natural increase in 1948 for the several States of Australia and for the Dominion of New Zealand, and those of some of the principal countries for which such information is available. Corresponding annual rates for the period 1909-13 have also been appended.

2. *Net Migration.**—The other factor of increase in the population, namely, the excess of arrivals over departures, known as “net migration,” is, from its nature, much more subject to variation than is the factor of “natural increase”.

Particulars of the increase by net migration are given below for quinquennial periods from 1901 to 1945 and annually for the ten years 1939-48. Disturbances in the war-time migration records were caused by interstate troop movements, which prevented accurate

* The subject of migration is dealt with at some length later in this chapter.

count of civilians travelling interstate. Interstate passenger traffic was, for this reason, excluded from migration records from 30th June, 1943 to the date of the Census, 30th June, 1947.

1939, to June, 1947.

(c) Excludes interstate migration from July, 1943, to June, 1947.

NOTE.—Minus sign (—) indicates excess of departures over arrivals.

There was a loss of population by migration in the first five years of the present century; in the next five quinquennial periods there were varying gains which averaged about 115,000 per quinquennium.

In the five years ended 1935 there was a net emigration of 10,886 and in the five years ended 1940 a net immigration of 43,128. During the war period 1941-45 net immigration fell to 7,809 persons. A large net loss by migration of 15,148 persons in 1946 was due mainly to the departure of refugees and evacuees, and also fiancées, wives and children of British and Allied servicemen. With the increasing transport facilities and the resumption of assisted migration, net gains of 10,611 and 55,115 persons were recorded in 1947 and 1948 respectively.

3. **Total Increase.**—The total increase of the population is obtained by the combination of the natural increase with the net migration, and, in the case of the period September, 1939 to June, 1947, with deaths of defence personnel.

The total increment to the population from the beginning of 1861 to the end of 1948 was 6,649,295 while that from 1901-48 was 4,029,541. The annual results for the last ten years are shown below, together with quinquennial figures from 1901 to 1945.

(a) Part of New South Wales prior to 1911. (b) Includes recorded deaths of defence personnel whether inside or outside Australia, from September, 1939, to June, 1947. (c) Excludes interstate migration from July, 1943, to June, 1947.

NOTE.—Minus sign (—) denotes decrease.

Differences between the figures above and totals of figures for natural increase and net migration shown in preceding tables represent, after taking into account deaths of defence personnel, unrecorded movement of population during the intercensal period July, 1933, to June, 1947, as disclosed by the final results of the 1947 Census. Particulars of total increase have been adjusted for this discrepancy but no separate adjustment has been applied to individual elements of increase. Intercensal discrepancies disclosed by previous Censuses were adjusted on recorded oversea departures.

4. **Percentage Rates of Increase.**—(i) *Australia.* The annual percentage rates of increase of population in Australia during each of the years 1940 to 1948 were as follows:—1940, 1.04; 1941, 0.93; 1942, 0.80; 1943, 0.95; 1944, 1.06; 1945, 1.13; 1946, 1.18; 1947, 1.60; 1948, 2.05. These rates are based on population estimates adjusted in accordance with the final results of the 1947 Census.

(ii) *Various Countries.* The table hereunder gives approximate percentage rates of increase of the population of Australia and its component States, in comparison with those for other countries:—

POPULATION: PERCENTAGE RATES OF INCREASE IN VARIOUS COUNTRIES.

(a) Based on populations revised in accordance with the final results of the 1947 Census.
 (b) Includes Australian Capital Territory. (c) Includes Northern Territory. (d) Excludes armed forces overseas at 31st December, 1941. (e) Not available. (f) Excludes war losses.
 (g) Territory defined by 1947 peace treaty.

NOTE.—Minus sign (—) denotes decrease.

(iii) *Variations in the Rates.* The annual rate of increase of the population during the present century has averaged 1.53 per cent., but the results from year to year have deviated widely from this figure. In the following table the period 31st December, 1900, to 31st December, 1948, has been arranged into certain defined groups of years according to the occurrence of influences seriously affecting the growth of population:—

POPULATION: PERIODICAL PERCENTAGE RATES OF INCREASE.

Period from 31st December—	Interval.	Increase during Period.	Average Annual Increase.	Average Annual Percentage Rate of Increase.		
				Natural Increase.	Net Migration.	Total.
	Years.	Million.	Thousand.			
1900 to 1913 ..	13	1.13	87	1.59	0.53	2.04
1913 to 1923 ..	10	0.86	86	1.50	0.15	1.64
1923 to 1929 ..	6	0.68	113	1.28	0.64	1.88
1929 to 1939 (a) ..	10	0.57	57	0.82	0.02	0.85
1939 to 1945 (a) ..	6	0.43	71	0.92	0.05	0.99
1945 to 1948 (a) ..	3	0.36	122	1.38	0.23	1.61

(a) Based on population revised in accordance with the final results of the 1947 Census. The figures include Australian defence forces overseas from September, 1939, to June, 1947.

Up to 1913 the rate of natural increase was rising, and this factor, coupled with the impetus given to immigration from 1911 onwards, was responsible for the comparatively high annual rate of 2.04 per cent. during this period. The 1914-18 War was a dominating influence in the decade 1914-23, and its effects can be seen in the reduction of the rate from 2.04 to 1.64 per cent. In the next span 1924-29 a more settled and prosperous era was experienced; migration was resumed on a large scale and, despite a further decline in the rate of natural increase owing to the persistent fall in the birth-rate, the annual rate of growth rose to 1.88 per cent. After 1929 came the economic depression, and immigration ceased—in fact Australia actually lost people through an excess of departures over arrivals in 1930, 1931, 1932 and 1935. The rate of natural increase also fell, and the rate of growth of the population receded to 0.85 per cent. per annum. With the outbreak of war in 1939, Australia entered a new phase in her demographic history, the full effects of which will not be seen for some time to come. The immediate effect of the war was to increase the number of marriages and to reverse the downward trend in fertility. The number of births increased each war year from 1940 to 1945 and these increases more than offset the rise in deaths due to war casualties and higher civilian death rates. As might be expected, migration over these years was negligible. The post-war period 1946 to 1948 was marked by a continued high natural increase and a resumption of immigration, the latter resulting in a substantial net gain of 55,115 persons in 1948. The annual rate of growth for the period was 1.61 per cent.

If the population increased at the average rate of the present century, namely, 1.53 per cent. per annum, it would double itself in 46 years. It has been estimated, on the assumptions that the 1932-34 birth and death rates remain unchanged and that no increment to the population results from migration, that the average annual rates of natural increase would be for the period 1933-53, 0.64 per cent.; 1933-63, 0.55 per cent. and 1933-73, 0.46 per cent. In this respect the experience in Australia would be very similar to that of many other countries as the result of the low birth-rate.

Rates of increase from 1860 to 1948 may be found for each State and Territory of Australia in *Demography Bulletin*, No. 66, 1948.

§ 5. Density.

1. *General.*—From certain aspects population may be less significant in respect of its absolute amount than in its relation to the area of the country. Australia, with an area of 2,974,581 square miles, and an estimated population on 31st December, 1948, of 7,794,880, excluding about 47,000 full-blood aboriginals, has a density of only 2.62 persons to the square mile, and is, therefore, the most sparsely populated of the civilized countries of the world. For the other continents and sub-continents the densities are approximately as follows:—Europe (excluding U.S.S.R.), 201; Asia (excluding U.S.S.R.), 119; U.S.S.R., 22; Africa, 16; North and Central America, 24; and South America, 15. The population of Australia has thus about one-sixth of the density of South America and of Africa; about one-eighth of that of U.S.S.R.; about one-ninth of that of North and Central America; about one-forty-fifth of that of Asia (excluding U.S.S.R.); and about one-seventy-fifth of that of Europe (excluding U.S.S.R.).

On account of the very large area of Australia and the unsuitability for settlement of much of the country, the density of population must necessarily increase slowly. In Australia as a whole the figure has increased from 1.29 per square mile in 1901 to 2.62 in 1948. Victoria's density, however, has grown from 13.77 to 23.97 and that of New South Wales from 4.43 to 9.90 in the same period.

A map showing the density of population throughout Australia at the 1947 Census appears on pages 535-6 of this chapter. When comparing the density of population of the several States consideration should be given to the average annual rainfall distribution in each State as an indication of the climatic influence upon probable population numbers. The area of New South Wales receiving less than 10 inches of rainfall is 20 per cent.; Victoria, nil; Queensland, 13 per cent.; South Australia, 83 per cent.; Western Australia, 58 per cent.; Tasmania, nil; and Australia, 38 per cent.

Particulars concerning the number and density of the population of the most important countries of the world at 30th June, 1947, are given in the following table. In some instances, more particularly in the cases of Asia and Africa, the numbers must be considered as rough approximations only.

**POPULATION OF THE MAIN COUNTRIES OF THE WORLD :
NUMBER AND DENSITY, 1947.**

(a) Number of persons per square mile. (b) Includes Dodecanese Islands. (c) Not available.
 (d) Includes Dutch New Guinea. (e) Includes European Territory. (f) Population 1946.
 (g) Includes 47,000 full-blood aboriginals.

2. Position of the British Commonwealth.—The approximate relationship of the British Commonwealth to the world as a whole in regard to its area and population is given hereunder :—

AREA AND POPULATION : BRITISH COMMONWEALTH AND WORLD, 1947.(a)

Particulars.	The World.	British Commonwealth.
Area in square miles (excluding Polar Circles) ..	51,379,000	13,253,000
Population ..	2,325,736,000	597,696,000
Population per square mile ..	45.3	45.1

(a) *Demographic Year Book*, United Nations, 1948, and *The Statesman's Year Book*, 1947.

§ 6. General Characteristics.

1. Sex Distribution.—(i) *States.* The number of males to each hundred females has been adopted as a measure of the “masculinity” of the population. On pp. 163–5 in the second issue of the Official Year Book a table was included showing the masculinity of the population of each of the States for each year from 1796 to 1907. In the fifth issue, on p. 123, the figures in this table for the years 1901 to 1907 were modified in accordance with the results of the 1911 Census.

With the exception of some dislocation arising from the two World Wars there has been a continuous diminution of the masculinity of the population. In 1900, the masculinity was 110.55; in 1910, 107.87 and in 1920, 103.47. After 1921, however, the masculinity tended to rise until 1927 (104.54), since when it gradually fell to 100.41 in 1946 but rose slightly to 100.65 over the following two years.

A reduction in the masculinity of a population may be expected where persons in the higher age-groups constitute an increasing proportion of the total population. This is a direct consequence of the greater longevity of females. A falling birth-rate tends to reduce masculinity while a rising birth-rate tends to increase it.

The following table shows the masculinity of the population at quinquennial intervals from 1901 to 1940 and for each year from 1943 onwards:—

POPULATION : MASCULINITY, 1901 TO 1948.

(NUMBER OF MALES PER 100 FEMALES.)

As at 31st December—	N.S.W.	Victoria.	Q'land.	S. Aust.	W.Aust.	Tas.	Nor. Terr.	Aust. Cap. Terr.	Aust.

(a) Part of New South Wales prior to 1911.
of the 1947 Census.

(b) Revised in accordance with the final results

(ii) *Various Countries.* The difference between young and old countries in the masculinity of their population is clearly illustrated by the comparisons furnished in the following table.

POPULATION : MASCULINITY IN VARIOUS COUNTRIES.

Country.	Year.	Number of Males to each 100 Females.	Country.	Year.	Number of Males to each 100 Females.
Canada	1938	106.5	Belgium	1945	96.0
Eire	1946	102.4	Hungary	1941	95.9
Union of South Africa(a)	1946	101.2	Northern Ireland ..	1946	95.5
Australia(b) ..	1948	100.6	U.S.S.R. (Russia) ..	1939	94.8
New Zealand(c) ..	1948	100.4	Italy	1936	94.3
Japan	1940	100.0	England and Wales ..	1948	94.1
United States of America	1946	99.5	Spain	1947	93.2
Netherlands	1947	99.2	Scotland	1946	93.2
Sweden	1946	99.1	France	1939	93.0
Denmark	1939	97.4	Poland	1946	84.4
Norway	1939	96.3	Germany	1946	79.9

(a) White population only.

(b) Excludes full-blood aboriginals.

(c) Excludes Maoris.

2. **Age Distribution.**—The age distribution of the population is obtained only at a Census. The following table shows the variation which took place in the age constitution of the population during the 14 years following the 1933 Census.

Of the 7,579,358 persons enumerated at the 1947 Census, 10.0 per cent. were under 5 years of age; 8.0 per cent. were 5 years of age and under 10 years; 7.1 per cent. from 10 to 14 years; 7.7 per cent. 15 to 19 years; and 34.4 per cent. were under age 21. At the 1933 Census 8.6 per cent. were under 5 years; 9.5 per cent. 5 to 9 years; 9.4 per cent. 10 to 14 years; 9.3 per cent. 15 to 19 years; and 38.6 per cent. under 21 years of age.

Owing mainly to the fall in the birth-rate, the number of young people in Australia between the ages of 5 to 19 years in 1947 shows a serious decline of 142,680 compared with the number in this age-group in 1933. The corresponding increase in this age-group from 1921 to 1933 was 277,154 persons. Although the decrease in the 5 to 19 years age-group in 1947 is offset by an increase of 191,422 persons in the age-group 0 to 4 years, the proportion of persons under 21 years of age in Australia has decreased from 38.6 per cent. in 1933 to 34.4 per cent. in 1947 whilst the proportion of persons aged 21 years and over has increased from 61.4 per cent. to 65.6 per cent. over the same period.

POPULATION: ADJUSTED AGE DISTRIBUTION(a), AUSTRALIA, 1933 AND 1947.

(a) Unspecified ages have been distributed over the population aged 15 years and upwards.

NOTE.—Minus sign (—) denotes decrease.

The next table shows the change which has been taking place in the age constitution of the population of Australia since 1871. Each successive Census except 1921 has revealed a larger percentage of the population 15 years of age and over than was recorded at the previous Census.

POPULATION : AGE DISTRIBUTION, AUSTRALIA, 1871 TO 1947.
(Per cent.)

Census Year.	Males.				Females.				Persons.

1933	27.53	66.09	6.38	100	27.42	65.99	6.59	100	27.48	66.04	6.48	100
1947	25.48	67.08	7.44	100	24.63	66.71	8.66	100	25.05	66.90	8.05	100

3. **Conjugal Condition.**—Of the total population of Australia at the 1947 Census, 47.3 per cent. had never married; 46.4 per cent. were married; 5.6 per cent. widowed; and 0.7 per cent. divorced. Since the 1933 Census the number never married had decreased by 2.4 per cent.; those married increased by 35.2 per cent.; the widowed by 28.4 per cent.; and the divorced by 148 per cent.

From a demographic point of view the most important change in the conjugal condition of the population of Australia since 1933 was the decrease in the number of persons who had never married and the relative increase in the number of married persons. In 1947, 62.0 per cent. of all persons 15 years of age and over, who stated their conjugal condition, were married, compared with 54.2 per cent. in 1933. If the latter percentage had obtained in 1947 there would have been approximately 440,000 fewer married persons at 30th June, 1947.

The number of widowed females recorded in Australia in 1947 was 309,383, or nearly three times as many as the number of widowed males. This disparity is the result of two influences. The first is the greater longevity of females coupled with the usually younger age at marriage; and the second is that a larger proportion of males cancel their widowhood by remarriage.

The number of divorced persons increased by 31,280 between 1933 and 1947 compared with an increase of 12,585 between 1921 and 1933. The numbers of divorced males and females at 30th June, 1933 in this table differ slightly from those shown on page 288 where the conjugal conditions of those for whom particulars were not given at the Census have been distributed proportionately among the various groups.

POPULATION : CONJUGAL CONDITION, AUSTRALIA, 1933 AND 1947.

(a) Includes persons permanently separated (legally or otherwise).

NOTE.—Minus sign (—) denotes decrease.

4. **Dependent Children under 16 years of age.**—At the 1947 Census 927,453 males and 66,418 females stated they had children under 16 years of age dependent on them at 30th June, 1947, the total number of dependent children under age 16 claimed being 1,962,791, of whom 1,853,314 or 94.4 per cent. were dependent on males and 109,477 or 5.6 per cent. were dependent on females. This represented an average of 2.00 for each male with dependent children and 1.65 for each female with dependent children.

Forty-three per cent. of the males with dependent children under 16 years of age had one dependent child; 31 per cent. two children; 15 per cent. three children; 6 per cent. four children; 3 per cent. five children; and 2 per cent. more than five children. Of the females with dependent children under 16 years of age, 60 per cent. had one dependent child; 25 per cent. two children; 9 per cent. three children; 4 per cent. four children; 1 per cent. five children; and 1 per cent. more than five children.

Compared with 1933, the number of children dependent on persons with one, two or three dependent children increased by 234,521, but this increase was largely offset by decreases in the number of children dependent on persons with four or more dependent children. Although persons with dependent children increased by 127,759, the number of children under 16 years dependent on such persons increased by only 42,932.

POPULATION : PERSONS WITH DEPENDENT CHILDREN UNDER SIXTEEN YEARS OF AGE, AUSTRALIA, 1933 AND 1947.

5. **Birthplace.**—At 30th June, 1947, the Australian-born element of the population of Australia represented 90.2 per cent. as compared with 86.4 per cent. at the 1933 Census. The number of Australian-born increased by 1,108,605 or by 19.4 per cent. since 1933.

On the other hand the overseas-born population declined during the same period by 159,086 or by 17.6 per cent. The principal contribution to the decline of the overseas-born population was the decrease of approximately 171,000 in the number of persons born in the British Isles.

There was little change during the intercensal period in the number of persons of Asiatic, African or American birthplace, but persons born in these continents form a very small percentage of the population of Australia.

Of persons born outside Australia, 56 per cent. were males and 44 per cent. females.

POPULATION : BIRTHPLACES, AUSTRALIA, 1933 AND 1947.

6. **Period of Residence in Australia.**—The decline, until recently, in immigration into Australia is reflected in the figures in this table, which classifies the immigrant population of Australia according to period of residence in Australia. They show that, of persons born outside Australia who stated their period of residence, 5.7 per cent. had resided in Australia for a period of less than 5 years, 11.2 per cent. for less than 10 years, and 14.8 per cent. for less than 15 years, compared with 5.7, 25.5 and 39.5 per cent. respectively at the previous Census in 1933.

NOTE.—Minus sign (—) denotes decrease.

7. **Nationality.**—The number of foreign nationals in Australia decreased since the 1933 Census by 36 per cent.—males by 40 per cent. and females by 18 per cent.—as compared with an increase of 15 per cent. in the number of British nationality. There was little change, however, in the proportion of foreign nationals relative to the total population, 99.5 per cent. of the population being British subjects, as compared with 99.1 per cent. at the previous Census. The principal foreign nationals in Australia were Italian, 7,172; Chinese, 4,858; Greek, 4,504; United States of America, 3,351; German, 2,361; Yugoslav, 2,096; and Dutch, 2,001.

The number of persons in Australia who were born in countries outside the British Empire totalled approximately 128,000, and of this number 38,653, or 30 per cent., were of foreign nationality at 30th June, 1947, the remainder being British subjects, mainly by naturalization.

POPULATION: NATIONALITY (i.e., ALLEGIANCE), AUSTRALIA, 1933 AND 1947.

5. Race.—The people of Australia may be classified into two groups with respect to racial characteristics, namely, non-indigenous and indigenous. The former group comprises the European and other races who have migrated to Australia and their descendants born in Australia, while the latter group consists of the full-blood aboriginal natives of Australia whose estimated number at 30th June, 1944, was about 47,000, but who are not included in the general population figures of Australia. The non-indigenous population of Australia is fundamentally British in race and nationality.

At 30th June, 1947, 7,524,129 persons or 99.3 per cent. of the population were of full-blood European race and 0.7 per cent. of non-European and half-caste. Full-blood non-Europeans decreased from 22,780 in 1933 to 21,495 in 1947, but the number of half-castes increased from 27,066 to 33,734 during the same period.

The principal full-blood non-Europeans in Australia were Chinese, 9,144; Polynesian, 5,332; Natives of India, 2,480; and Syrian, 1,675; while half-caste Australian aboriginals, who increased from 20,620 in 1933 to 27,179 in 1947, represented 80.6 per cent. of the total half-caste population.

POPULATION: RACE, AUSTRALIA, 1933 AND 1947.

(b) Includes Maoris, Fijians, Papuans, and Torres Strait Islanders.

NOTE.—Minus sign (—) denotes decrease.

9. Religion.—At the 1921 Census 92,258 persons in Australia, or 1.7 per cent., gave no reply to this question, but in 1933 and again at the 1947 Census, when the public was informed there was no legal obligation to answer this question, 848,948 persons, or 12.8 per cent., and 824,824 or 10.9 per cent., respectively, gave no reply. Of males 11.7 per cent. and of females 10.0 per cent. did not state their religion in 1947.

Of those who stated their religion, the greatest numerical increase during the inter-censal period between 1933 and 1947 was recorded by the Church of England, followed by the Roman Catholic and Catholic (so described), which it is thought may be grouped without serious error, as the latter term usually signifies Roman Catholic. Then followed Methodist, Presbyterian and Church of Christ in that order. Amongst the denominations with the largest number of adherents, the greatest proportional increases since 1933 were recorded by Methodists, 27.4 per cent.; Roman Catholic and Catholic combined, 21.8 per cent.; Church of England, 15.3 per cent.; and Presbyterian, 4.2 per cent.

In 1933 and again in 1947, 99 per cent. of those who stated their religion professed the Christian faith. Since the previous Census, the number who stated they were of non-Christian religion increased by 28 per cent., and those specifically stating they had no religion increased by 71 per cent.

POPULATION : RELIGION, AUSTRALIA, 1933 AND 1947.

(a) So described in individual Census Schedules.

NOTE.—Minus sign (—) denotes decrease.

10. Industry.—In the following table the male and female populations of Australia at the 1947 Census are classified according to the industry in which they are usually engaged. If the 124,439 persons (84,673 males and 39,766 females) for whom no particulars regarding industry were given on the Census schedules are included, the number of persons "in the work force" is 3,196,431, of whom 2,479,269 were males and 717,162 were females. It is believed that subsequent tabulations will furnish evidence to enable most, if not all, of the 124,439 persons in "Industry Not Stated" to be included in the work force. The remainder of the population, totalling 4,382,927 (1,318,101 males and 3,064,826 females), were classified as not being in the work force. The term "in the work force" includes persons of all ages who are employers, self-employed or working on their own account, wage and salary earners, unpaid helpers engaged in industry, and those who usually work for their living but who have lost their jobs.

Persons who do not earn their living by doing work for monetary reward, such as children, housewives, full-time students, retired persons, pensioners, and permanent inmates of institutions are regarded as not being in the work force.

On the average, 65 in every 100 of the male population and 19 in every 100 of the female population were in the work force, or in other words there were, in 1947, 3½ males to every female in the work force.

Of the males in the work force who stated their industry, those engaged in Manufacturing represented the largest proportion, namely 27.0 per cent., followed next in order by those in Primary Production, 19.8 per cent.; Commerce, 11.6 per cent.; Transport and Storage, 9.7 per cent.; Building and Construction 9.7 per cent.; and Public Authority (n.e.i.) and Professional Activities, 8.7 per cent.

As with the males, females in the work force who stated their industry were mostly engaged in Manufacturing, 27.2 per cent.; followed next in order by those in Public Authorities (n.e.i.) and Professional Activities, 20.6 per cent; Amusement, Hotels, Cafes, Personal Service, etc., 19.2 per cent.; and Commerce, 18.8 per cent.

11. **Occupational Status.**—The term "occupational status" has been substituted for "grade of occupation" formerly in use, and it relates to the capacity in which persons are engaged in the various branches of industry.

The number of employers in Australia at 30th June, 1947, was 221,289 compared with 207,680 at the previous Census. Persons who were self-employed or working on their own account increased from 369,375 in 1933 to 387,137 in 1947. Of the males in the work force, 74.4 per cent. were employees receiving wages or salaries at 30th June, 1947, and the corresponding proportion of female employees receiving wages or salaries was 87.3 per cent.

Persons not at work, including those not actively seeking a job at 30th June, 1947, amounted to 82,774, consisting of 66,009 males and 16,765 females.

At the Census of 30th June, 1947, 29,013 persons gave no answer to the question regarding occupational status, but, as with persons for whom no industry was stated, it is believed that subsequent tabulations will disclose that the majority, if not all, of these persons should be classified to the work force.

In 1933, wage-earners who were employed part-time were asked to indicate that fact on the Census Schedule in answer to the question regarding occupational status, and all those who so described themselves are included in the work force for that year. In 1947, however, persons working regularly, but for considerably less than normal working hours, were instructed on the Census Schedule to exclude themselves from the work force, unless their earnings from such work formed their principal means of livelihood.

POPULATION: OCCUPATIONAL STATUS, AUSTRALIA, 1933 AND 1947.

(a) Includes persons who were (1) unable to secure employment; (2) temporarily laid off from their jobs; or (3) not actively seeking work at the time of the Census on account of sickness or accident, industrial dispute, resting between jobs or for any other reason. (b) See last preceding paragraph above.

NOTE.—Minus sign (—) denotes decrease.

12. **Other General Characteristics.**—Questions regarding orphanhood, and the ability to read and write a foreign language (of persons who could not read and write English), were not asked on the schedules of the 1947 Census. Consequently, the latest Census data available concerning these questions are those of the 1933 Census, as published in previous issues of the Year Book (see No. 36, pp. 482 and 487).

Tables showing persons not at work at 30th June, 1947, classified according to cause and duration will be found in the Appendix.

§ 7. Dwellings.

1. Number of Dwellings.—In addition to the questions relating to the personal particulars of the individual members of the household there were a number of important questions on the Census Schedule designed to elicit information concerning the dwellings in which the population was housed at the date of the Census. From the replies to these questions much valuable information was tabulated concerning housing conditions. For the purpose of a Census a "dwelling" is defined as a room or a collection of rooms occupied by a household group living together as a "family unit" whether comprising the whole or only part of a house or other building (including temporary structures). Included in this definition are private houses, flats, tenements, hotels, boarding houses, hospitals, institutions, and other any structure used for the purpose of human habitation.

Since the 1933 Census, the number of dwellings in Australia, including those being built, increased by 371,194, or 22.9 per cent., a much higher rate of increase than that of the population during the same period, namely 14.3 per cent.

The following table represents a summary of the information relating to the number of dwellings in Australia at 30th June, 1947:—

DWELLINGS : AUSTRALIA, 1947 CENSUS.

(EXCLUDING DWELLINGS OCCUPIED SOLELY BY FULL-BLOOD ABORIGINES.)

Division.	Occupied.	Unoccupied.	Being Built.	Total.	Percentage of Total Dwellings.
Urban—					%
Metropolitan	981,420	7,397	17,871	1,006,688	50.59
Provincial	332,543	7,303	6,679	346,585	17.42
Rural	593,932	32,281	10,208	636,421	31.99
Total	1,907,895	47,041	34,758	1,989,694	100.00

Details for each State and Territory are as follows:—

DWELLINGS : STATES, 1947 CENSUS.

State or Territory.	Occupied.	Unoccupied.	Being Built.	Total.
New South Wales	746,343	17,392	12,981	776,716
Victoria	527,406	11,412	11,328	550,146
Queensland	272,045	9,647	4,175	285,867
South Australia	168,538	3,547	2,794	174,879
Western Australia	124,767	2,606	1,535	128,908
Tasmania	62,484	2,351	1,607	66,442
Northern Territory	2,697	34	22	2,753
Australian Capital Territory	3,615	52	316	3,983
Total	1,907,895	47,041	34,758	1,989,694

2. **Class of Dwelling.**—As previously indicated, the dwellings in which the people are housed comprise private houses, tenements, flats, hotels, boarding-houses, charitable institutions, etc. It is desirable when considering the question of housing to exclude those forms of accommodation which do not represent the normal housing conditions associated with family life, and the statistics which follow relate mainly to private dwellings only, i.e., private houses, shares of private houses, tenements and flats.

At the 1947 Census 1,873,623, or 98.2 per cent. of the total occupied dwellings in Australia, were private dwellings, as compared with 1,509,671, or 97.6 per cent., at the 1933 Census. During the intercensal period the number of private dwellings in Australia increased by 363,952, or 24.1 per cent.; those in the metropolitan areas increased by 248,581, or 34.9 per cent.; those in the urban provincial by 76,466, or 30.6 per cent., and those in the rural areas by 38,905, or 7.1 per cent.

(a) Private house shared by two or more family units or household groups in respect of which only one Householder's Schedule was furnished. (b) Portions of shared private houses in respect of which portions separate Householders' Schedules were furnished. (c) Not available. (d) Residences attached to police stations and fire stations were classed as Private Dwellings in 1947.

NOTE.—Minus sign (—) denotes decrease.

For Census purposes a "flat" is defined as part of a house or other building ordinarily intended for occupation by a separate family group, and is a self-contained dwelling unit with both cooking and bathing facilities. A "tenement" is part of a house or other building ordinarily intended for occupation by a separate family group but is not a self-contained unit, and consists in the main of a room or rooms with cooking facilities.

Owing to the shortage of houses in Australia in 1947, information was sought at the Census as to the extent of house-sharing, and particulars as recorded are shown separately for 1947 in the following tables. In a number of cases where private houses were shared by more than one family unit, however, only one Householder's Schedule was returned for the whole of the house, instead of separate schedules for each portion occupied separately. These are shown in the tables as "Private Houses (Shared by Two or More Families)" and represent not "occupied dwellings" as defined for Census purposes, but "houses" occupied by more than one family.

In the case of the remaining private houses shared by more than one family, separate schedules were furnished for each portion occupied separately and these portions are shown in the tables as separate dwellings under the heading "Share of Private House".

3. **Population According to Class of Dwelling, etc.**—In the next table, the total number of persons in Australia are distributed according to the dwellings in which they were recorded on Census night.

Of the total population in 1947, 92.71 per cent. were living in private dwellings—houses, flats and tenements—whilst 552,598 persons, or 7.29 per cent. of the population spent the night in hotels, boarding houses, hospitals, institutions, etc., or on ships, or were camping out.

(b) Private house shared by two or more family units or household groups in respect of which only one Householder's Schedule was furnished. (c) Portions of shared private houses in respect of which portions separate Householder's Schedules were furnished. (d) Shipping, railway and air travellers.

4. *Occupied Private Dwellings.*—(i) *Materials of Outer Walls and of Roof.* In the following tables occupied private dwellings are classified according to the materials of which the outer walls and the roof were built.

Wood has been the most extensively used material in the construction of the walls, followed by brick and fibro cement, the respective percentages for Australia for occupied private dwellings for which the material of the walls was specified being—wood, 47.4 per cent., brick, 34.8 per cent. and fibro cement, 6.3 per cent. The latter has shown a most spectacular increase since 1933 when the number recorded was only 23,696 compared with 117,631 in 1947. Brick dwellings represented 57.6 per cent. of all occupied private dwellings in the Metropolitan Divisions whilst in the Urban Provincial and Rural Divisions wooden dwellings predominated, the respective percentage of such dwellings being 63.0 per cent. and 62.4 per cent.

Particulars regarding the materials of which the roofs of dwellings were constructed were not collected at the 1933 Census, but the results for 1947 show that, of the occupied private dwellings for which the materials of the roofs were specified, iron (68.1 per cent.) was by far the most popular material used for roofing private dwellings in Australia, followed by tiles (22.6 per cent.) and slates (5.8 per cent.).

(ii) *Number of Rooms.* For Census purposes, the kitchen and any permanently enclosed sleep-out or portion of a verandah were included in the number of rooms in the dwelling, but the bathroom, pantry, laundry and storehouse were excluded unless generally used for sleeping. The average number of rooms per private house (one family) in Australia at 30th June, 1947, was 5.11 which was slightly higher than the average of 5.07 rooms for all private houses in 1933. The average number of rooms per private house (one family) in 1947 was highest in the metropolitan areas, namely 5.27 rooms and lowest in the rural areas, 4.89 rooms.

The average number of rooms for tenements and for flats was less than that for private houses, the average for tenements being 2.07 rooms and for flats 4.06 rooms. Tenements and flats were not recorded separately at the Census of 30th June, 1933, but the combined average at that date was 3.35 rooms.

Excluding houses with rooms unspecified, private houses of four, five and six rooms represented 79.3 per cent. of the total number of private houses (one family) in Australia at 30th June, 1947, and practically the whole of the total increase in the number of private houses since 1933 has been confined to houses containing these numbers of rooms.

(c) Portions of shared private houses in respect of which portions separate Householder's Schedules were furnished.

NOTE.—Minus sign (—) denotes decrease.

(iii) *Number of Inmates.* A classification of occupied private dwellings according to the number of inmates is shown in the following table.

The most usual number of inmates residing in private houses occupied by one family for Australia as a whole was four, followed very closely by three and then by two and five inmates in that order. The average number of inmates in such private houses was 3.87 compared with an average of 4.15 inmates for all private houses in 1933.

It was known that "House sharing" existed during the economic depression at the time of the 1933 Census, but information concerning its extent was not sought from householders on that occasion. In the circumstances, it may be more appropriate to compare the average number of inmates in private houses in 1933 with a figure obtained after

combining dwellings consisting of private houses and shares and their inmates in 1947. If shares of private houses are converted to actual houses on the basis of the average number of family groups residing in private houses shared by two or more families, the estimated average number of inmates in all private houses in 1947 would rise to 3.97 persons.

Two inmates predominated in flats, but tenements with one inmate were slightly in excess of those with two inmates. The averages for Australia were flats, 2.84 persons and tenements, 2.18 persons.

(a) Includes all persons sleeping out on verandahs or in sleep-outs. (b) Private house shared by two or more family units or household groups in respect of which only one Householder's Schedule was furnished. (c) Portions of shared private houses in respect of which portions separate Householder's Schedules were furnished.

NOTE.—Minus sign (—) denotes decrease.

(iv) *Nature of Occupancy.* At the 1947 Census, 50.8 per cent. of the private houses occupied by one family in Australia for which particulars were supplied were occupied by owners; 9.0 per cent. by purchasers by instalments; 37.3 per cent. by tenants; and 2.9 per cent. by others. The percentages for all private houses in 1933 were—owners, 42.8 per cent.; purchasers by instalments, 13.5 per cent.; tenants, 39.1 per cent.; and others, 4.6 per cent.

In the metropolitan areas 56.0 per cent. of the occupants of private houses occupied by one family were owners or purchasers by instalments, as compared with 60.2 per cent. in the urban provincial areas, and 64.8 per cent. in the rural. In the latter areas, however, the ownership of the house is associated with the ownership of the land acquired as a means of livelihood.

Tenants occupied 88.9 per cent. of the flats and 96.2 per cent. of the tenements in Australia in 1947. Separate particulars for flats and tenements were not recorded in 1933 but taking flats and tenements together at that date 91.4 per cent. were occupied by tenants.

(a) Private house shared by two or more family units or household groups in respect of which only one Householder's Schedule was furnished. (b) Portions of shared private houses in respect of which portions separate Householder's Schedules were furnished.

NOTE.—Minus sign (—) denotes decrease.

(v) *Rent per Week.* (a) *All Tenanted Private Dwellings.* Information tabulated concerning rents was restricted to the actual rent paid per week by tenants occupying unfurnished private dwellings. For 6.4 per cent. of private houses occupied by one family at 30th June, 1947, the rent was less than 10s. per week; for 29.9 per cent., between 10s. and £1 per week; for 40.3 per cent., between £1 and £1 10s. per week; for 17.9 per cent. between £1 10s. and £2 per week; and for 5.5 per cent. £2 per week and over. Ninety per cent. of the houses with rents of less than 10s. per week were located outside the metropolitan areas.

Throughout Australia the average rent for unfurnished private houses occupied by one family was 22s. 7d. per week. In the metropolitan areas the average was 25s. 8d. per week, in the urban provincial areas 21s. 5d., and in the rural areas 15s. 5d.

The average rent for unfurnished flats in the metropolitan areas was 37s. 9d. per week, or 47 per cent. more than that paid for private houses (one family) in the same areas, notwithstanding that private houses (one family) in the metropolitan areas contain nearly 30 per cent. more rooms than flats. In the urban provincial and rural areas, the rent of flats was approximately 30 per cent. and 51 per cent. respectively higher than for private houses (one family). Nearly 86 per cent. of the tenanted flats were located in the metropolitan areas, 10.8 per cent. in the urban provincial areas, and only 3.2 per cent. in the rural areas. For 5.3 per cent. of all tenanted flats in Australia the rent was less than £1 per week; for 23.5 per cent. between £1 and £1 10s. per week; for 37.0 per cent. between £1 10s. and £2 per week; and for 34.2 per cent. £2 per week and over.

During the latest intercensal period the average rent per week for unfurnished private houses rose by 33 per cent., or from an average of 17s. per week for all private houses in 1933 to an average of 22s. 7d. per week for private houses occupied by one family in 1947. Similar comparisons for flats and tenements are not possible as data were not tabulated separately for these dwellings in 1933. The average rent for all private dwellings including private houses, shares of private houses, flats and tenements rose by 38 per cent. from 1933 to 1947.

(a) Private house shared by two or more family units or household groups in respect of which only one Householder's Schedule was furnished. (b) Portions of shared private houses in respect of which portions separate Householders' Schedules were furnished.

NOTE.—Minus sign (—) denotes decrease.

(b) *Private Houses of Three to Six Rooms.* Special tabulations of rents were undertaken for tenanted private houses of three to six rooms with walls of wood or of brick or stone. The particulars for this group of private dwellings, which represented about 80 per cent. of all tenanted private houses in Australia, provide a very convenient summary of average rents ruling at the time of the Census.

Rents were summarized for 468,536 tenanted private houses (occupied by one family) in this group. Forty-nine per cent. had walls of brick or stone and 51 per cent.

of wood compared with proportions of 46 and 54 per cent. respectively for all rented private houses in a similar tabulation in 1933. During the intercensal period there was little variation in the numbers of rented houses of three, four and six rooms but the number of rented houses of five rooms increased by nearly 13 per cent. Brick dwellings were largely responsible for this increase.

The average rent of 25s. per week for all private houses, three to six rooms, of wood, brick or stone in the metropolitan areas at the 1947 Census was 6s. 7d., or 35.7 per cent., higher than the corresponding average in 1933. In the urban provincial sections the average rent was 21s. 3d. per week, or 36.4 per cent. higher than in 1933, while in the rural areas the average rent of 15s. 7d. was 35.5 per cent. higher than that at the 1933 Census.

An interesting comparison regarding the rent of private houses is that based on the average weekly rent per room. At the 1947 Census the average rent per room for wooden houses of three to six rooms in the metropolitan areas of Australia was 4s. 9d. per week, an increase of 1s. 4d. or 39 per cent. over the average of 3s. 5d. per week at the 1933 Census. Similarly, the average of 5s. 6d. per room for brick or stone houses in the metropolitan areas showed a corresponding increase of 1s. 5d. or 35 per cent.

In the urban provincial sections the average rent of 4s. 3d. per room for wooden houses was 1s. 2d., or 38 per cent., higher than the 1933 Census figure of 3s. 1d. per week, while the rent of 4s. 9d. per week for brick or stone houses was 36 per cent. higher than the previous figure of 3s. 6d. per week. The average rent per room in the rural areas also showed increases—from 2s. 6d. to 3s. 3d. per week (30 per cent.) for wooden houses, and from 2s. 7d. to 3s. 8d. per week (42 per cent.) for those of brick or stone. With the exception of brick houses in the metropolitan and rural areas, the average rent per room for houses of three rooms was generally higher than for houses of four, five or six rooms. The increase since the 1933 Census in the rent per room was somewhat similar for all houses of three to six rooms but was generally lower in the urban provincial and rural areas than in the metropolitan areas.

AVERAGE WEEKLY RENT (a) PER ROOM OF TENANTED PRIVATE HOUSES (ONE FAMILY), THREE TO SIX ROOMS, WITH WALLS OF WOOD, BRICK OR STONE, AUSTRALIA, 1933 AND 1947.

(EXCLUDING DWELLINGS OCCUPIED SOLELY BY FULL-BLOOD ABORIGINALS.)

Average Weekly Rent per Room.										

(a) Rents relate to all tenanted private houses in 1933 and to tenanted private houses (one family) in 1947.

(vi) *Facilities.* At the 1947 Census, householders were asked for the first time to state whether their dwellings were supplied with electricity, gas and running water, and whether they had such facilities as a bathroom, flush toilet, laundry and cooking facilities. In addition they were asked to indicate the means of cooking mostly used.

In cases of sharing the householder was to answer the questions regarding facilities only in relation to his own dwelling. If toilet, washing and cooking facilities were shared the householder of the dwelling containing the facilities was to include those facilities on his schedule and to indicate that they were being shared by another household.

The householder of a dwelling without facilities but sharing those of another household was asked not to include the shared facilities on his schedule.

Details of the results tabulated are shown in the following table :—

**OCCUPIED PRIVATE DWELLINGS CLASSIFIED ACCORDING TO FACILITIES,

§ 8. Oversea Migration.

1. Oversea Migration during Present Century.—Earlier issues of the Official Year Book contain in summary form tables showing the increase of population by net migration from 1861 to the latest date, while the Demography Bulletins issued by this Bureau give this information for the individual years. On pp. 539-40 of this chapter will be found a summary showing, in quinquennial groups from 1901 to 1945 and in single years from 1939 to 1948, the increase of the population of the States due to net migration. The following table shows for Australia the arrivals and departures and the net migration since 1901:—

OVERSEA MIGRATION : AUSTRALIA.

Period.	Arrivals.			Departures.			Net Migration.		
	Males.	Females.	Persons.	Males.	Females.	Persons.	Males.	Females.	Persons.

(a) Includes movements of defence personnel.
from September, 1939, to June, 1947.

(b) Excludes movements of defence personnel

NOTE.—Minus sign (—) indicates excess of departures over arrivals.

Net migration has varied greatly during the foregoing periods, reaching a maximum in the five years 1921-25. The 1914-18 War, during which 331,781 members of the Australian Imperial Forces embarked for service overseas, was responsible for a very large increase in the departures during the years 1914-18. Immigration increased rapidly from 1910 to 1912, the gain during the latter year being the second greatest in any one year in the present century (excluding 1919, when the troops were returning to Australia), the greatest gain being in 1949, when there was an excess of arrivals of 150,001 persons.

Owing to the depressed economic conditions in Australia the gain by migration decreased rapidly during 1928 and 1929 and there were actual losses of population during the next three years. There was little variation in the figures for arrivals and departures from 1933 to 1936, but in 1938 the arrivals exceeded the departures by 9,137 and in 1939 the excess was 13,891, the greatest gain to the population by migration since 1928. The excess of arrivals over departures in 1940 was 13,400, but with the outbreak of war in the Pacific area, the figure fell to 5,184 for 1941, 6,166 for 1942, 1,271 for 1943 and in 1944, 1945 and 1946 there were net losses by migration of 2,183, 2,629 and 15,148 persons respectively. With the resumption of immigration, net gains by migration of 10,611, 55,115 and 150,001 persons were recorded in 1947, 1948 and 1949 respectively.

The influence of the Commonwealth immigration policy is clearly reflected in the figures above. The average annual number of nominated and selected immigrants who arrived in Australia during the periods specified was as follows:—

IMMIGRATION: NUMBER OF NOMINATED AND SELECTED PERSONS.

Period.	Average Annual Number.	Year.	Recorded Number.
1901-05	Not available	1935	100
1906-10	7,945	1936	9
1911-15	30,111	1937	141
1916-20	2,326	1938	852
1921-25	23,090	1939	2,686
1926-30	19,881	1940(a)	140
1931-35	156	1947(a)	6,303
1936-40	766	1948	28,943
		Total to end of 1948	1,103,557

(a) Assisted migration was discontinued during the 1939-45 War and was not resumed until 31st March, 1947.

The number of nominated and selected immigrants reached its peak in 1926, when 31,260 arrivals were recorded. Assisted migration was discontinued for the duration of the war. For information on post-war policy see § 9 (A) following.

2. *Country of Embarkation and Disembarkation.*—The countries from which the migrants arrived or to which they departed are shown for 1947 and 1948 in *Demography Bulletin* Nos. 65 and 66 respectively. Annual averages for the period 1925-29 appear in *Official Year Book* No. 25.

3. *Racial Origin.*—The majority of migrants to and from Australia are of British race, while only a small proportion are of non-European race.

During the period 1926-30 there was such a considerable influx of Italian, Greek and Yugoslav settlers, that, despite considerable concurrent emigration they provided a large permanent addition to the population of Australia. In the following quinquennium 1931-35, there was a considerably reduced increment to the Italian population by migration whilst there was actually an excess of departures of most other races. The five years 1936-40, however, saw a resumption of immigration of Southern Europeans, while refugees were responsible for the heavy increase in net immigration of German nationals. The net movement of non-Europeans is generally small, although with the influx of considerable numbers of evacuees of non-European race a marked excess of arrivals over departures was recorded during the war period. In 1946, the first post-war year, many of these war-time evacuees were repatriated. The numbers of arrivals and departures and the net gain or loss by migration during the five years 1936-40, the year 1947 and six months ended June, 1948, classified according to racial origin, are shown in the following table. The figures should not, however, be regarded as a completely accurate record of "Racial Origin" as they are based on the passenger's own statement as to race, which in many cases may express the country of his nationality or birthplace rather than actual race. For this reason, the system of classifying the race of migrants according to individual countries has been discontinued and from July, 1948, onwards, particulars of race have been compiled only in respect of broad racial groups.

RACIAL ORIGIN OF ARRIVALS AND DEPARTURES: AUSTRALIA.

(a) See par. 3 above. Comparable particulars for the last six months of 1948 are available only as follows:—Europeans—Arrivals, 61,471; departures, 25,697; net migration, 35,774. Non-Europeans—Arrivals, 1,514; departures, 1,008; net migration, 506. (b) Includes Maltese and Cypriote. (c) Includes Austrian.

NOTE.—Minus sign (—) indicates excess of departures over arrivals.

4. **Nationality.**—The particulars of race shown in the preceding paragraph closely reflect the nationalities of migrants and, accordingly, until the discontinuation of detailed tabulations of race in July, 1948, migrants were classified as to nationality only according to the two main groups "British" and "Alien". In July, 1948, a detailed classification of migrants according to individual countries of nationality was commenced.

The following table shows particulars of the nationality of migrants for the periods covered by the preceding table relating to race:—

NATIONALITY OF ARRIVALS AND DEPARTURES: AUSTRALIA.

Nationality.	Arrivals.			Departures.			Net Migration.		
	1936-40.	1947.	1948.	1936-40.	1947.	1948.	1936-40.	1947.	1948.
British ..	261,973	55,975	89,189	254,835	50,037	53,191	16,138	5,938	35,998
Alien ..	59,339	11,793	26,534	32,349	7,120	7,417	26,990	4,673	19,117
Total ..	321,312	67,768	115,723	278,184	57,157	60,608	43,128	10,611	55,115

5. **Classes of Arrivals and Departures.**—Since 1st July, 1924, arrivals and departures have been classified according to the declared intention of the migrant in regard to residence. The figures for the five-year periods 1931-35, 1936-40 and 1941-45, and for each of the years 1946 to 1948 are as follows:—

MIGRANTS CLASSIFIED ACCORDING TO INTENDED RESIDENCE : AUSTRALIA.

Classification.	1931-35.	1936-40.	1941-45.	1946.	1947.	1948.
Permanent new arrivals ..	54,444	88,712	32,624	18,217	31,765	65,739
Australian residents returning from abroad ..	84,554	104,870	11,150	6,330	18,305	23,813
Temporary visitors ..	100,325	127,730	20,151	10,343	17,698	26,171
Total Arrivals ..	239,323	321,312	63,925	34,890	67,768	115,723
Australian residents departing permanently ..	71,670	51,006	22,399	29,806	19,579	17,271
Australian residents departing temporarily ..	79,426	94,650	9,163	6,702	18,764	19,557
Temporary visitors ..	99,108	132,528	24,554	13,530	18,814	23,780
Not Stated ..	5
Total Departures ..	250,209	278,184	56,116	50,038	57,157	60,608

NOTE.—The figures for permanent new arrivals include evacuees arriving in Australia during the war years as follows:—1940: 1,404 males, 3,139 females; 1941: 600 males, 1,670 females; 1942: 4,033 males, 4,105 females; 1943: 1,167 males, 591 females; 1944: 23 males, 28 females; 1945: 216 males, 133 females.

Although permanent new arrivals increased during each of the eight years prior to 1939 the number in the latter year was considerably below the annual average for the quinquennium 1926-1930. The war caused a large drop from 1940, but after the war the number rose progressively, reaching 167,727 in 1949, the highest on record. Permanent departures were far more numerous in the years 1928 to 1931 than in earlier years but they declined during each of the six years ended 1937, the number in the latter year being the lowest recorded until the outbreak of war in 1939. As in the case of arrivals, although not to the same extent, the number of Australian residents departing permanently rose rapidly after the war. Up to and including 1929 there was a considerable gain of permanent residents, but during 1930 and 1931 there was a heavy loss. The loss was very much reduced in 1932, 1933 and 1934, whilst during the five years up to and including 1939 there was a net gain in permanent residents of more than 28,000. Except for the arrival of evacuees, little movement took place during the war period, but in 1946 a net permanent loss of 11,589 persons occurred, due in large measure to the departure for the United States of America of Australian wives and children of American servicemen, and, when conditions permitted after the war, the departure of Australians to Papua and New Guinea and of large numbers of war evacuees who were returned to their home countries. Subsequently large net gains were recorded, amounting to almost 50,000 in 1948 and 150,000 in 1949.

In the table above "permanent" residence means residence of a year or more, travellers being classified under this definition according to information supplied by them at the time of arrival or departure. For various reasons the intentions of travellers are subject to subsequent modification, and the figures quoted in the table must therefore be accepted as a record of intention only.

§ 9. Immigration.

(A) Assisted Migration into Australia.

1. Joint Commonwealth and States' Scheme.—In 1920 an arrangement was arrived at between the Commonwealth and State Governments whereby the Commonwealth Government became responsible for the selection and medical inspection of British migrants from the United Kingdom, and for their transport to Australia. The State Governments advised the Commonwealth from time to time as to the numbers and classes of migrants they were prepared to receive, and became responsible for their subsequent settlement. In addition, personal and group nominations were accepted by the States, the nominators undertaking responsibility for their settlement and after-care.

In 1930, owing to the financial and industrial depression, it was decided to confine the grant of assisted passages to the wives and dependent children of men who arrived in Australia prior to 1st January, 1930.

On 4th March, 1938, the Commonwealth Government decided, in co-operation with the Government of the United Kingdom, to resume assisted migration, and provision was made for the grant of assisted passages from the United Kingdom in favour of—

- (a) persons (relatives and friends) resident in the United Kingdom nominated by individuals or approved organizations;
- (b) migrants specially requisitioned for by any State; and
- (c) persons of British stock resident in the United Kingdom, who would be in possession of—
 - (1) in the case of a married man, not less than £300 capital on arrival in Australia, or alternatively, a pension or other income of not less than £100 per annum;
 - (2) in the case of a single man not less than £50 capital on arrival.

It was also decided that the Commonwealth Government would co-operate with any State to the extent that the migration policy of that State coincided with the policy of the Commonwealth, provided that the Commonwealth would itself deal with nominations which did not fall within the ambit of the policy of any particular State, but which were acceptable under the Commonwealth policy.

2. Number of Persons Assisted.—The number of British assisted migrants for the years 1931 to 1948 inclusive, and the total from the earliest years up to the end of 1948 are given in the following table:—

IMMIGRATION : NUMBER OF PERSONS OF BRITISH ORIGIN ASSISTED.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Ausl.	Tas.	A.C.T.	Australia.
1931	76	45	43	6	99	5	1	275
1932	21	3	23	..	123	5	..	175
1933	11	3	1	1	56	72
1934	11	4	1	..	143	159
1935	1	..	1	..	98	100
1936	4	2	1	..	2	9
1937	60	33	6	3	39	141
1938	410	179	19	43	161	38	2	852
1939	1,309	544	376	126	304	24	3	2,686

1947(a) ..	695	619	593	574	1,282	339	645	4,747
1948	5,146	4,787	1,982	1,707	1,577	789	255	16,243
Total from earliest years to end of 1948.. ..	353,546	261,496	238,988	118,275	89,874	26,150	972	1,089,301

(a) Assisted migration was suspended during the years 1941 to 1946. See following paragraphs.

3. *Suspension of Assisted Passage Scheme during War.*—After the outbreak of hostilities in 1939 it was decided to discontinue the grant of assisted passages for the duration of the war. Resumption of assisted migration was the subject of negotiations between the Commonwealth and United Kingdom Governments towards the end of 1945.

4. *Free and Assisted Passage Agreement, March, 1946.*—(i) *General.* An agreement was signed in March, 1946, between the Commonwealth and British Governments for free and assisted passages for British residents desirous of migrating to Australia. As from the opening date, 31st March, 1947, the Commonwealth Government undertook to accept eligible persons provided they are medically fit and otherwise regarded as suitable for settlement. Information concerning conditions and opportunities for employment is provided by the Australian High Commissioner for the guidance of all prospective settlers. Expenses incurred in the selection of applicants are borne by the Commonwealth Government, which has also undertaken to provide free transportation from the port of disembarkation to the ultimate destination in Australia, and temporary accommodation for a limited period wherever necessary. In this connexion, the Commonwealth has undertaken to make adequate administrative arrangements with the States in regard to the reception, placement and aftercare of all migrants upon arrival, and to secure the co-operation of approved voluntary organizations.

Substantial rights, including health, medical services, sickness and unemployment benefits, maternity allowances and child endowment under the Australian Social Security Services Scheme are extended to settlers as from the date of arrival; but it has not been possible to extend employment preference to British ex-servicemen and women. Prospective settlers will not, however, be granted passages unless there is a reasonable assurance that they will obtain employment on arrival.

Any adult resident of Australia may nominate for free or assisted passages friends or relatives resident in the United Kingdom who are eligible for consideration.

(ii) *Free Passages.* This part of the scheme is financed by the United Kingdom Government as part of its re-settlement programme. Persons eligible for consideration are British ex-servicemen and women, together with their dependants, if they were resident in the British Isles on 1st September, 1938, or were in the United Kingdom Forces overseas on that date and subsequently served in a full-time capacity in the Armed Forces or Merchant Navy of the United Kingdom during any period after 25th May, 1939.

Applications under the scheme can only be considered if they are made and lodged within two years from 31st March, 1947 (the date on which the scheme came into operation) or within two years from the date of release from the Forces, whichever is the later, provided that in all cases the date of release was on or before 31st December, 1948.

(iii) *Assisted Passages.* Assisted passages are granted under the Empire Settlement Acts of the United Kingdom to suitable British subjects normally resident in the United Kingdom and who do not come within the scope of (ii) above. However, the Commonwealth normally is not prepared to accept single persons or married persons without children if they have reached their forty-sixth birthday before the date of sailing. However, if otherwise acceptable under the scheme, the parents or close relatives of intending migrants or of persons established in Australia may be granted passages irrespective of age.

Each settler, male or female, of 19 years of age and over is required to contribute £10 (English currency) towards the cost of a passage, and each juvenile of 14 years, but not more than 18 years, £5 (English currency). Children under 14 years of age travel free. The cost of the latter and the remainder of the cost of the others is borne equally by the two Governments up to a basic passage rate of £75 (English currency), any excess being met by the Commonwealth. A migrant not remaining in Australia for a minimum of two years is liable for repayment of the amount of free grant.

5. **Assisted Passage Scheme, Eire.**—In November, 1948, the Commonwealth Government approved a scheme for the granting of limited financial assistance to natural born citizens of Eire normally residing in the British Isles, or natural born British citizens residing in Eire, who wish to emigrate to Australia and who are selected as suitable for settlement here. This scheme, however, only applies to prospective new settlers and their dependants who are not eligible for free or assisted passages under the schemes agreed to with the United Kingdom Government (*see* para. 4 above).

The maximum amount of assistance granted toward an adult passage is £30 sterling, with varying amounts for children according to age.

It is not essential for an applicant to have been nominated by a friend or relative in Australia before being considered for financial assistance under the scheme. Single men, or women, may be accepted, but owing to the acute difficulty of finding accommodation for family units, families are, at present, only being accepted if they have nominators in Australia able to accommodate them or if they can make arrangements regarding accommodation before arrival.

6. **Maltese Migration.**—On 31st May, 1948, the Commonwealth Government entered into an agreement with the Government of Malta under which assistance to travel to Australia is jointly given by the two Governments to selected settlers from Malta. The maximum contribution by the Commonwealth is £30 sterling in the case of an adult's passage money, and is subject to the Government of Malta contributing not less than a like amount.

Persons already established in Australia may nominate individual Maltese under this scheme and nominations for groups of migrants may be submitted by prospective employers or by organizations. In either case, the nominator undertakes to provide accommodation and, in the case of group nominations, employment.

The Commonwealth retains the right of final selection of all migrants under the scheme including group and personal nominees. The Government of Malta has undertaken to attend to after-care of Maltese migrants arriving under this scheme.

Maltese settlers who arrived under this scheme during 1948 totalled 547.

7. **Empire and Allied Ex-Servicemen's Scheme.**—With the principal object of giving servicemen of Empire and Allied countries who had served in Australia during the recent war an opportunity to return here for permanent settlement, the Australian Government on 26th May, 1947, initiated a scheme of financial assistance toward the cost of the passages to Australia of eligible Empire ex-servicemen not covered by the United Kingdom-Australia Free and Assisted Passage Agreement, and ex-Servicemen of the United States of America and their immediate dependants. The maximum amount of assistance granted toward an adult passage is £30 sterling with varying amounts for children according to age.

The scheme was later extended to provide similar assistance to ex-Servicemen and former members of the Resistance movements of the following countries:—Holland, Norway, Belgium, France and Denmark with their dependants. The nationalities of the 1,439 migrants who arrived in Australia under this scheme during the years 1947 and 1948 were 1,345 United States of America, 73 British, 20 Dutch and 1 French.

8. **Dutch Migration Agreement.**—An agreement was made in December, 1946, between the Commonwealth Government and the Netherlands Emigration Foundation, which is sponsored by the Netherlands Government, for the introduction of migrants from Holland. The agreement provides for the admission of Dutch settlers who are required to possess a very much smaller amount of landing money than is usually required of foreign migrants. The Netherlands authorities are responsible for providing shipping for these migrants. The Netherlands Emigration Foundation has appointed a representative in Australia to attend to the reception, placement in employment and after-care of migrants arriving under this agreement.

Due to the lack of shipping available the number of migrants who settled in Australia under this agreement to the end of 1948 was 40 only.

9. **Migration of Former European Displaced Persons.**—On 21st July, 1947, the Commonwealth Government entered into an agreement with the International Refugee Organization covering the resettlement in Australia of European displaced persons who are under the protection of that body.

Under this agreement, the International Refugee Organization undertook responsibility for provision of transport and the care of the displaced persons until their disembarkation in Australia. The Commonwealth undertook selection in Europe and responsibility for reception in Australia, placement in employment and after-care after arrival. The Commonwealth also undertook to make an *ex gratia* payment to the International Refugee Organization of £10 sterling per person towards the cost of travel of each adult migrant carried under the agreement.

Eligibility for selection is based on similar standards of age, physical fitness and general suitability of settlement as apply under other schemes of encouraged migration operated by the Commonwealth. There is no restriction on the nationality of migrants selected, the only limiting factor in this regard is that applicants must be displaced persons within the definition accepted by the International Refugee Organization.

All applicants under this scheme enter into an undertaking to remain in the employment found for them by the Commonwealth for a period of two years from the date of their arrival and their admission into the Commonwealth is subject to their observing this undertaking. On completion of this period, these migrants may be granted indefinite admission to the Commonwealth. Except for this one provision in respect to employment, migrants arriving under this scheme are in the same position as other foreign migrants admitted to the Commonwealth, and are eligible to receive health and medical service benefits, sickness and unemployment benefit, maternity allowance and child endowment.

In order to ensure suitable arrangements for the reception of these migrants and their absorption into the community, the Commonwealth has set up Reception and Training Centres at Bathurst in New South Wales and Bonegilla in Victoria. At these Centres migrants are medically examined and X-rayed (to reveal any disabilities which may have developed since the medical examination at the time of selection) and interviewed individually to assess their employment potential. During the period of their stay in Reception and Training Centres, which is usually three or four weeks, they are given a course of instruction in utilitarian English and the Australian way of life, and are paid a special social service benefit from which an amount is deducted towards the cost of their upkeep, leaving them 5s. per week for incidental expenditure. To cope with the planned increase in the numbers arriving during 1949, additional Reception and Training Centres were established at Greta, New South Wales, Woodside, South Australia and Graylands and Northam in Western Australia.

At the end of this training period, breadwinners amongst the arrivals are placed in employment where employer-found accommodation near the job is available. In cases where there is no accommodation near the job available for the breadwinner's dependants they, instead of accompanying him to the job, are provided with accommodation at the breadwinner's expense in specially established Immigration Dependents' Holding Centres until such time as he is able to find other accommodation for them. These Holding Centres have been or are being established in all States; generally former Service Camps have been adapted for the purpose.

Priority in employment placements is given to essential industries which are experiencing difficulties in obtaining adequate supplies of Australian labour, and particularly those industries associated with the supply of building materials, such as the timber industry, the clay products industry and the cement industry. In some cases, Workers' Hostels have been established by the Commonwealth Government to accommodate migrant workers in these and similar industries. Priority is also given to road and rail construction and to water and sewerage undertakings associated with housing projects.

Single women and married women without children are, for the most part, employed as nurses, nurses' assistants and as domestics in hospitals and private homes.

The number of migrants who arrived to the end of 1948 under this scheme is as follows:—1947, 840 and 1948, 9,953.

Limitations of shipping restricted the numbers received up to the end of 1948 but, with shipping becoming more freely available to the International Refugee Organization, a large proportion of the 100,000 migrants Australia agreed to take under the scheme by June, 1950 arrived during 1949.

(B) The Regulation of Immigration into Australia.

1. Powers and Legislation of the Commonwealth.—(i) *Constitutional.* Under Section 51, xxvii. and xxviii. of the Commonwealth Constitution, the Parliament of the Commonwealth is empowered to make laws with respect to immigration and emigration and the influx of criminals.

(ii) *Legislation.* A summary of the provisions of the Immigration Act 1901-1925 and the Contract Immigrants Act 1905 (except the provisions of the Amending Immigration Acts of 1920, 1924 and 1925, which will be found in Official Year Book No. 21, p. 927), containing particulars regarding the admission of immigrants, prohibited immigrants, the liabilities of shipmasters and others, and kindred matters will be found in preceding issues of the Official Year Book (*see* No. 12, pp. 1166-8).

The Immigration Act 1930.—Under this Act it is provided that Section 5, subsection (1) of the Immigration Act 1901-1925 applies to any person, who, since the commencement of the Immigration Restriction Act 1901, evaded an officer when entering Australia, or gained admission or re-admission by fraudulent means. Steps can be taken to deal with such persons as prohibited immigrants at any time after they have landed in Australia.

The Immigration Act 1932.—This Act provides (a) that any alien who fails to satisfy an officer that he holds a landing permit, or that his admission has been authorized, may be prohibited from landing; (b) for the increase from three to five years of the period during which a person may be declared a prohibited immigrant; (c) that a person not a British subject and who has been convicted of a crime of violence against the person may be deported pursuant to an order of the Minister without his being subjected to a dictation test; (d) for the deportation of a person who has been convicted of a criminal offence or who has become an inmate of an insane asylum or public charitable institution within five years from the date of arrival instead of three years as hitherto; and (e) that where the wife of a person whom it is proposed to deport so desires, her name and the names of her dependent children may be included in her husband's deportation order. This would of course apply only to wives and children who were themselves immigrants.

The Immigration Act 1933.—This Act provides that Section 8A, as amended by the Immigration Act 1932—*see* (d) above—shall apply to persons who arrived in Australia since the commencement of the Section, i.e., since 2nd December, 1920. It also makes statutory provision for the taking of securities for compliance with the provisions of the Act.

The Immigration Act 1935.—The main purpose of this Act was to add a penalty clause to Section 5 of the principal Act, to overcome a legal difficulty which had arisen in regard to relying on Section 7 for the imposition of penalties on persons convicted under Section 5 on charges of being prohibited immigrants offending against the Act.

The Immigration Act 1940.—This Act provides (a) that the holder of a landing permit shall on demand satisfy an officer that he is able to comply with the conditions specified in the permit; (b) for the issue of, and extensions of, certificates of exemption; (c) that a non-British person who is convicted of a crime of violence against the person or of extorting any money or thing by force or threat, or of any attempt to commit such a crime or who is convicted of any other criminal offence for which he is sentenced to imprisonment for one year or longer may be deported; (d) for the exercise of discretion by the Minister in enforcing an order for the deportation of a person; and (e) for the provision and enforcement of maintenance guarantees in relation to persons seeking to enter Australia.

The Immigration Act 1948.—The main purpose of this Act is to provide for the registration of persons acting as agents in respect of (a) applications for the admission of intending immigrants to Australia; and (b) arranging or securing passages for intending migrants. The Act provides that only registered agents shall be permitted to receive fees for such services and it prescribes the charges which agents may make in return for their services.

The Immigration Act 1949.—This Act provides for the amendment of Section 4 of the Principal Act in relation to the grant of certificates of exemption. The object of the Act is to revalidate certificates which had become invalid following on a High Court decision.

The Aliens Deportation Act 1948.—This Act repeals the Aliens Deportation Act 1946 and empowers the Minister for Immigration to order the deportation of an alien who after investigation by a Commissioner is reported as not being a fit and proper person to be allowed to remain in Australia.

The War-time Refugees Removal Act 1949.—The purpose of the Act is to enable the Minister for Immigration to effect the repatriation to their own countries of persons given refuge in Australia during the war.

2. **Conditions of Immigration into Australia.**—(i) *Immigration of Non-European Persons.* In pursuance of the established policy, the general practice is not to permit Asiatics or other coloured immigrants to enter Australia for the purpose of settling permanently.

Special arrangements were made with India, Japan, China and other Eastern countries under which facilities were afforded for subjects of those countries who were bone fide merchants, students, or tourists to enter and remain in Australia under exemptions whilst they retained their status. Permission is also given for nationals of these countries to enter Australia as assistants or substitutes for local traders domiciled in Australia. Such persons are permitted to remain so long as they retain their status as such.

(ii) *Immigration of White Aliens.* Aliens seeking to enter Australia for permanent residence are required to obtain landing permits or special authority for admission from the Department of Immigration.

The present immigration policy provides for the admission of aliens, apart from German nationals, whose maintenance and accommodation have been guaranteed by persons resident in Australia.

The admission of Germans is at present confined to the following classes :—(a) wives, children, parents and other close relatives of persons resident in Australia; and (b) those who may have suffered persecution during the war on religious or political grounds.

(iii) *General Information.* General information as to conditions of entry into Australia may be obtained from the following officers :—

- (a) In Australia: The Secretary, Department of Immigration, Canberra, A.C.T.;
- (b) In Great Britain: the Official Secretary, High Commissioner's Office, Australia House, Strand, London;
- (c) in other British Dominions: the High Commissioner for Australia;
- (d) in other countries where Australia is represented: the Secretary, Australian Legation.

For details of the Dominions and countries included see the section entitled "Diplomatic and other Representatives Overseas and in Australia" in Chapter XXVIII.

3. **Nationality or Race of Persons Arriving.**—The following table shows the number of persons who arrived in Australia during the year 1947 and the six months ended June, 1948 according to their "nationality or race." For explanation of the data supplied under this definition and of the institution of a new detailed classification of migrants according to individual countries of nationality see pars. 3 and 4, pages 573-4.

NATIONALITY OR RACE OF PERSONS ARRIVING: AUSTRALIA, 1947 AND SIX MONTHS, 1948.

(a) See pars. 3 and 4, pages 573-4.

4. Departures of Persons of Non-European Races.—The number of persons of non-European race who left Australia during 1947 and the six months ended June, 1948 were 2,589 and 1,300 respectively, distributed among the various nationalities as follows (1947 figures shown in parentheses):—Chinese, 842 (1,510); Indians and Cingalese, 225 (778); Other Asiatics, 158 (248); Papuans, nil (9); Polynesian, Melanesian, etc., 46 (5); Other 29 (39).

(C) Passports.

Provision is made in the Immigration Act 1901-1949 for the production of a passport by each person over 16 years of age who desires to enter Australia. Under the Passports Act 1920, it was compulsory also for each person over 16 years of age to be in possession of a passport or other document authorizing his departure. This Act has now been superseded by the Passports Act 1938, which repealed the compulsory provisions and is now simply a machinery measure governing the issue of passports and the grant of other passport facilities. The Act extends to the Territories of Australia, including Papua, Norfolk Island and the Trust Territory of New Guinea.

Although not compulsory under the 1938 Act to be in possession of a passport when leaving Australia, it is very desirable in their own interests that Australians proceeding abroad should provide themselves with a passport as a means of establishing their

identity and nationality. The possession of a passport is necessary for admission into most countries overseas, and the holder of an Australian passport also has no difficulty in landing on return to Australia. The charge for an Australian passport is £1, for an ordinary visa 8s. and for a transit visa, 2s.

As a consequence of the passing of the Nationality and Citizenship Act 1948 (*see below*—§ 10), two types of Australian passports are now issued in Australia to persons travelling in a private capacity, one type being issued to Australian citizens ("C Series") and the other to British subjects who have not acquired Australian citizenship ("B Series"). The latter type are to be issued only until such time as each British Commonwealth country has enacted citizenship legislation and has authorized her own representative in Australia to issue passports to her own citizens. Australian citizens abroad may now secure passports only from Australian representatives.

In addition to "B" and "C" Series passports, Diplomatic and Official passports are now issued to members of the Australian diplomatic service and other Government officials proceeding abroad on official business.

Applicants for passports are required to produce evidence of their identity and nationality (e.g. Birth Certificates).

§ 10. Citizenship and Naturalization.

1. Commonwealth Legislation.—The Nationality and Citizenship Act 1948 commenced on Australia Day (26th January), 1949, and repealed all previous Commonwealth legislation on this subject. The most significant effect of the Act was the creation for the first time of the status of "Australian Citizen". In this respect the Act was complementary to citizenship legislation passed or about to be passed by other countries of the British Commonwealth. All Australian citizens, and the citizens of other countries of the British Commonwealth, are deemed to be British subjects. Australian citizenship was automatically acquired as from 26th January, 1949, by persons who were British subjects at that date and who either (a) were born in Australia or New Guinea; or (b) were naturalized in Australia; or (c) had been residing in Australia during the five years immediately preceding 26th January, 1949; or (d) were born outside Australia of fathers to whom (a) or (b) above applied (provided the persons concerned had entered Australia without being placed under any immigration restriction); or (e) were women who had been married to men who became Australian citizens under the above headings (provided that the women concerned had entered Australia without being placed under immigration restriction).

After the Act's commencement citizenship may be acquired in the following ways:—(a) by birth in Australia; (b) by birth outside Australia, of a father who is an Australian citizen, provided that the birth is registered at an Australian Consulate; (c) by registration. Certificates of Registration as Australian citizens may be granted by the Minister to British Subjects or Irish citizens who make application and satisfy the Minister that they can comply with specified requirements as to residence in Australia, good character and intention to reside permanently in Australia; (d) by naturalization. Certificates of Naturalization as Australian citizens may be granted by the Minister to aliens who make application and can comply with requirements somewhat similar to those previously required under the Nationality Act 1920–1946. New requirements for naturalization are—(i) a Declaration of Intention to apply must be lodged at least two years before the final application; (ii) five years residence in Australia is required; (iii) applicants must have an adequate knowledge of the responsibilities and privileges of citizenship; (iv) Certificates do not take effect until the applicant takes the Oath of Allegiance. The Oath is now taken in open Court, where the Judge or Magistrate addresses the applicant upon the responsibilities and privileges of citizenship before the Oath is administered and the Certificate of Naturalization delivered to the applicant.

Under the Act, the independence of married women in nationality matters is recognized, and British nationality is restored to those women who had lost it through marriage to aliens. In future, marriage will not affect a woman's nationality. Alien women who marry Australian citizens may, however, be naturalized under somewhat easier conditions than those which apply to other aliens.

2. **Certificates Granted.**—(i) *Australia.* The following figures relate to certificates issued under the Nationality Act 1920-1946 during the years 1947 and 1948 :—

NATURALIZATION : CERTIFICATES GRANTED, 1947 AND 1948.

(ii) *States.* The certificates of naturalization granted in 1948 (1947 figures in parentheses) were issued in respect of residents of the various States and Territories as follows:—New South Wales, 627 (865); Victoria, 742 (842); Queensland, 343 (421); South Australia, 188 (225); Western Australia, 195 (348); Tasmania, 12 (11); Northern Territory, 3 (8); Australian Capital Territory, 13 (17); and New Guinea, 6 (4); Total, 2,129 (2,741).

§ 11. Population of Territories.

At the Census of 30th June, 1947, arrangements were made to obtain complete information concerning not only the two internal territories of Australia—Northern Territory and Australian Capital Territory—but also the external Territories under the control of Australia, namely:—Norfolk Island; Papua; Trust Territory of New Guinea; and Trust Territory of Nauru.

Figures respecting population and number of dwellings in each Territory at the Census of 1947 are summarized in the following table:—

POPULATION AND DWELLINGS: TERRITORIES, 30th JUNE, 1947.

(EXCLUDING INDIGENOUS POPULATION.)

Territory.	Population.			Dwellings.			
	Males.	Females.	Persons.	Occu- pied.	Unoccu- pied.	Being Built.	Total.
Northern Territory ..	7,378	3,490	10,868	2,705	34	22	2,761
Australian Capital Territory	9,092	7,813	16,905	3,020	52	316	3,988

Trust Territory of Nauru ..	1,413	63	1,476	54	9	10	73

(a) Includes temporary dwellings constructed of iron, sisalcraft, native materials, canvas, etc., in war-devastated areas.

(b) Not available.

Particulars concerning the indigenous populations of these Territories are included in Chapter X.—“The Territories of Australia”.

§ 12. The Aboriginal Population of Australia.

In Official Year Book No. 17, pp. 951–61, a brief account is given of the Australian aboriginal population, its origin, its numbers as estimated from time to time, and the steps taken for its protection. On pp. 914–16 of Official Year Book No. 22, particulars are shown for each of the States and Territories of Australia at successive periods, while a special article dealing with the estimated number and distribution of the native population at the date of first settlement of the white race in the continent appears on pp. 687–96 of Official Year Book No. 23.

The aborigines are scattered over the whole of the mainland, but the majority are concentrated in Western Australia, Queensland and the Northern Territory. At a Census of aborigines taken on 30th June, 1944, in all States except New South Wales, the following particulars were disclosed :—

ABORIGINAL CENSUS, 30th JUNE, 1944.

State or Territory.	Full-blood.					Half-caste.					Total, Full-blood and Half-caste.
	Noma-dic.	In Em-ploy-ment.	In Super-vised Camps. (a)	Other.	Total.	Noma-dic.	In Em-ploy-ment.	In Super-vised Camps. (a)	Other.	Total.

(a) This figure does not include those living in supervised camps who were in regular employment. (b) At 30th June, 1941. (c) Excludes Torres Strait Islanders (1,064 in regular employment, 2,754 in supervised camps, and 82 other).

CHAPTER XIV.

VITAL STATISTICS.

NOTE.—1. In the Vital Statistics chapter of Official Year Book No. 36, tables covered 1941 and, where possible, 1942 and 1943. In the last issue these tables covered 1946 and, where possible, 1945. In the present issue these tables cover 1948 and, where possible, 1947. In some cases, however, space does not permit of the inclusion of figures for 1947. These figures will be found in *Demography Bulletin* No. 65 unless otherwise specifically indicated.

2. Figures for Australia throughout are exclusive of full-blood aboriginals.

§ 1. Marriages.

1. Number, 1948.—The number of marriages registered in Australia during the year ended 31st December, 1948, was 74,902, giving a rate of 9.71 per 1,000 of the mean population for the year. In 1942 both the number and the rate were the highest on record. A summary of the number of marriages registered in each State and Territory since 1861 is given in the following table:—

MARRIAGES.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.

(a) Number of marriages (not persons married) per 1,000 of mean population. South Australia prior to 1901. (c) Part of New South Wales prior to 1911. accordance with the final results of the Census of 30th June, 1947.

(b) Included with (c) Part of New South Wales prior to 1911. (d) Revised in accordance with the final results of the Census of 30th June, 1947.

As the marriage-rates in some international tabulations are based on the unmarried population aged 15 years and over, the corresponding rates have been calculated for Australia for the last seven census periods. The period in each case comprises the census year with the year immediately preceding and the year immediately following, and the figures are as follows:—1880-82, 48.98; 1890-92, 45.74; 1900-02, 42.14; 1910-12, 50.44; 1920-22, 56.22; 1932-34, 42.88; and 1946-48, 71.33. These rates refer, of course, to persons married, and not, as in the case in the preceding table, to marriages.

3. *Crude Marriage-rates of Various Countries.*—The following table gives the crude marriage-rates for Australia and each State thereof in comparison with the rates for various other countries.

CRUDE MARRIAGE-RATES (a) : VARIOUS COUNTRIES.

Country.	1908-13.	1921-25.	1926-30.	1931-35.	1948.
United States of America	(b)	10.6	9.9	9.2	12.5

(a) Number of marriages per 1,000 of mean population. (b) Not available. (c) 1939.
 (d) White population only. (e) 1943. (f) Excludes Maoris. (g) Excludes full-blood
 aborigines. (h) 1947. (i) 1944. (j) 1938.

4. Age and Conjugal Condition at Marriage.—(i) *General.* Age at marriage in single ages and previous conjugal condition of bridegrooms and brides in 1947 and 1948 will be found in *Demography Bulletins* Nos. 65 and 66. A summary in age-groups is given hereunder for these years. There were 4,722 males aged less than twenty-one years married during 1948 while the corresponding number of females was 20,544. At the other extreme there were 95 bachelors and 33 spinsters in the age-group 65 years and over.

Information regarding the percentage distribution of bridegrooms and brides is shown for 1907-10, in five-year periods thereafter until 1945 and for each of the years 1946, 1947 and 1948.
